Under the new provision all of his losses would be disallowed—and he may not even be aware that he stands to suffer such consequences until it becomes clear that he cannot turn a profit in the fourth year of his operation. This would require false economic pressures, and disrupt the orderly processes of good operations.

It is my contention, Mr. President, that section 270—as it exists in the code today—is as severe as the thoroughbred horse industry and similarly situated industries can bear. Section 213 would be added weight that could destroy them.

I urge the adoption of my amendment.

The PRESIDING OFFICER. The amendment will be received and printed, and will lie on the table.

## EXTENSION OF PUBLIC HEALTH PROTECTION WITH RESPECT TO CIGARETTE SMOKING—AMENDMENTS

AMENDMENTS NOS. 410 THROUGH 412

Mr. MOSS submitted three amendments intended to be proposed by him, to the bill (H.R. 6543) to extend public health protection with respect to cigarette smoking, and for other purposes, which were ordered to lie on the table and to be printed.

## AMENDMENT OF ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965 AND RELATED ACTS—AMENDMENT

AMENDMENT NO. 415

Mr. DOMINICK (for himself and Mr. MONDALE) submitted an amendment, intended to be proposed by them, jointly, to the bill (S. 2218) to amend the Elementary and Secondary Education Act of 1965 and related acts, and for other purposes, which was referred to the Committee on Labor and Public Welfare and ordered to be printed.

## NOTICE OF HEARING ON CERTAIN NOMINATIONS

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Tuesday, December 16, 1969, at 10:30 a.m., in room 2228, New Senate Office Building, on the following nominations:

George H. Barlow, of New Jersey, to be U.S. district judge for the District of New Jersey, vice Arthur S. Lane, resigned.

Leonard I. Garth, of New Jersey, to be U.S. district judge for the District of New Jersey, vice Thomas M. Madden, retired.

Philip C. Wilkins, of California, to be U.S. district judge for the Eastern District of California, vice Sherrill Halbert, retired.

Joe McDonald Ingraham, of Texas, to be U.S. circuit judge, fifth circuit, vice a new position created under Public Law 90-347, approved June 18, 1968.

John L. Gibbons, of New Jersey, to be a U.S. circuit judge, third circuit, vice Gerald McLaughlin, retired.

The subcommittee will consist of the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Nebraska (Mr. HRUSKA), and myself as chairman.

## WATER POLLUTION IN ALASKA

Mr. KENNEDY. Mr. President, tomorrow, Senate and House conferees will meet to continue their discussion of H.R. 4148, the Federal Water Pollution Control Act of 1969.

One of the amendments to be considered at tomorrow's meeting was sponsored by the Senator from Alaska (Mr. STEVENS) and me and has as its purpose the creation of a special emergency program designed to provide safe water and hygienic sewage disposal facilities in Alaskan villages which presently do not have such facilities. It is my firm hope that, recognizing the immediate and vital need for these programs, the conference will retain this amendment.

In a further effort to inform the members of the conference about the threat of water pollution to the health of Alaska's citizens and its effect on the economic viability of the State, I ask unanimous consent to have printed in the RECORD an article on this subject, written by Frederick B. Lotspeich, and published in Science magazine for December 1969.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WATER POLLUTION IN ALASKA: PRESENT AND FUTURE

(By Frederick B. Lotspeich)

Many people think vaguely of Alaska as a vast wasteland, dominated by ice and snow. They visualize its resources as unspoiled, believing that the state's sparse population and the relatively low stage of technical development have insignificant impact on the land. This is true to some extent, though an accurate evaluation requires some qualifying.

Alaska is largely an unspoiled wilderness; evidence of man's polluting influence on this northern environment is minimal. Winters are long, cold, and dark; the summers, however, are warm, with long hours of sunlight each day, permitting rapid growth of vegetation.

Alaska's waters, although largely unpolluted at present, are locally polluted in several areas by pulp mills, fish packing, and municipalities. This pollution is serious and will intensify before abatement measures are put into effect. Economic activity is increasing, especially in oil production and lumbering, which will generate wastes that must be controlled, despite industry's insistence that pollution is a necessary consequence of industrial development. Water pollution prevention must be emphasized as Alaska enters a new chapter in its history.

Any program for water pollution control in Alaska must consider the natural environment and the possible effects of man's social institutions on this environment, particularly the effects from wastes generated by advancing technology. Because of its location and the relative lack of contamination in its water, Alaska offers a unique opportunity to establish a program of pollution control based on the ecosystem approach. The cold environment poses unique problems that cannot be solved with existing knowledge. Several features of Alaskan natural and social environments are discussed in the following pages as a starting point to this state's program for pollution control.

In his introduction to the Department of the Interior's Conservation Yearbook, *The Third Wave*,[1] Laurance Rockefeller refers to the ecosystem approach as the modern method of conservation. This approach stresses an understanding of ecology, with all its ramifications, as necessary to knowledgeable conservation of the resources which man depends upon for survival. Much needs to be learned about this ecological approach. Without an understanding of man's role in ecosystem dynamics, conservation measures, however well intended, frequently fail because of unforeseen effects. Water pollution is an example of degraded environment caused by man's dumping of his wastes into marine and fresh waters and debasing these ecosystems in varying degrees.

In its report to the Federal Council for Science and Technology, describing the results

Footnotes at end of article.

of its study of waste management and control,[2] the Committee on Pollution recommends an ecological approach to pollution control. This report emphasizes the need to attain, through research, a better understanding of ecosystem dynamics as a basis for predicting how a given waste will affect the receiving waters. Irreparable damage can be prevented by applying the knowledge thus gained. Research should be programed to anticipate, investigate, and prevent the problems before they are upon us. Alaska must stress such programing because pollution prevention costs less than abatement after the waters are degraded.

Alaska is inviting industry that demands certain raw materials. Economic expansion here depends on attracting industry, but expansion portends polluted waters unless early action is taken to prevent water quality degradation. The enlightened approach—and many top-level industrial managers are coming to accept this view—holds that control of its wastes is industry's responsibility and a normal cost of production. Such attitudes need fostering: pollution control benefits the entire society because industrial profits accrue when industry, municipalities, conservationists, and pollution control agencies work harmoniously in the public interest.

With these thoughts before us, let us turn to Alaska's water pollution problems, scrutinize the unique features of Alaskan ecosystems, and compart this with the other 49 states. There is much to be learned about Alaska's ecosystems if we are to prevent widespread devastation. The tundra and taiga are examples of large areas that may be threatened by man's unenlightened quest for new materials to feed his technology. Pruitt[3] describes how the taiga responds to man's activities and points out that the delicate balance of these northern ecosystems is easily upset by man-made interference. The search for, and development of, resources in these environments can easily lead to their destruction unless we have the foresight and knowledge to prevent it. Let us now look at Alaska as it is today and how it is developing.

PHYSICAL ENVIRONMENT

To gain some idea of the scope of its management problems, consider that Alaska is the farthest north of the 50 states; most of it lies between 60° and 70°N. Anchorage, the largest city, is about 61°N and is 1300 miles (2100 kilometers) west and 900 miles north of Seattle. Fairbanks, the principal city on the central plateau, lies almost due north of Anchorage and is only 2.5° south of the Arctic Circle.

Figure 1 (omitted) superimposes a map of Alaska over the continental United States. The main land mass of Alaska, comprising 586,300 square miles, covers the major parts of seven north-central states and is about one-fifth the area of continental United States. The southernmost islands of southeast Alaska are on the coast of Georgia and South Carolina, with the Aleutian Islands chain extending all the way to Los Angeles, a distance of about 2500 miles. Because it is essentially a very large peninsula with outlying islands, Alaska's total tidal coastline measures about 47,300 miles.[4]

The peninsular characteristics provide some moderation of weather by large water masses, but the northern latitude overrides these effects, causing colder climates than those of the other northwest states. Alaska's size and mountain ranges cause severe winter temperatures in the central plateau, commonly dropping to −50°C. Southeast Alaska, lying between 55° and 59°N, has a milder climate because of the maritime influence. The Aleutian Peninsula and Islands are about the same latitude as southeast Alaska, with a cool, damp, windy climate.

High latitude has two important effects on climate—day length and sun angle. Fairbanks, at 65°N, enjoys 24 hours of daylight at the summer solstice although the sun is below the horizon for about 4 hours. At the winter solstice, Fairbanks has a 3.75-hour sun day (a sun day is the length of time the sun is visible); however, because of long twilights and dawns, daylight is about 5 hours. At the Arctic Circle, 175 miles north of the city, the sun neither rises at the winter solstice nor sets at the summer solstice. At Barrow, about 450 miles north of Fairbanks, the sun sets on 29 November, and does not rise until 24 January, a period of 56 days. Anchorage, about 300 miles south of Fairbanks, enjoys a sun day of about 5.5 hours at the winter solstice. Portland has a day length of 8.5 hours at the winter solstice. Sun angle (the angle between the sun and the horizon) at Fairbanks never exceeds 47.5°, so that even with long summer days, the rays strike obliquely. In winter, sun angle is only 2.5° at Fairbanks, and warming is correspondingly less. By comparison, the sun angle at Portland is 66.5° at the summer solstice and 22° at the winter solstice.

Alaska is the only state with permafrost, a permanently frozen surface layer of earth. It is directly related to past and present climate and causes aggravating problems of pollution, water supply, and construction. Distribution of permafrost is included in the discussion on Alaska's ecological division.

In Fig. 2, (omitted) Alaska is divided into five principal physiographic zones: the north slope, Brooks Range, central plateau, south-central area, and the coastal mountains. These divisions are also logical ecological zones because climate and resulting vegetation are strongly influenced by the mountain ranges separating the lowlands. Because most of the precipitation comes from the south, the Alaska Range, forming the southern boundary of the central plateau, removes most of the moisture as air masses move northward, causing a semiarid climate in regions north of the range. The far north is similarly affected by the Brooks Range; Barrow is arid and has an average precipitation of about 5 inches (13 centimeters) annually. A fifth narrow zone along the coast, south and west of the central mountains, needs delineating because its climate and vegetation differ from that inland from the mountains.

This coastal zone extends in a broad arc from southeastern Alaska across the Gulf of Alaska to Kodiak Island and has a high to moderate rainfall, well distributed throughout the year, with relatively mild temperatures for this latitude. Annual rainfall ranges from about 150 inches at Ketchikan to about 26 inches at Skagway on the upper end of Lynn Canal. Vegetation in this zone is primarily coniferous forest (Fig. 3), a continuation of the coastal forests of Washington and British Columbia. Sitka spruce is important in all the zones with western hemlock an important species as far west as Kenai and western red cedar as far north as Petersburg. These forests contain the bulk of the timber resource of Alaska. No permafrost occurs in this zone; however, it contains many glaciers because of heavy precipitation and low temperatures above altitude of 3000 to 4000 feet.[5]

Inland from this coastal zone, rainfall decreases rapidly, with Anchorage receiving about 15 inches a year. Temperatures are colder and the vegetation changes from predominantly conifers to birch, aspen, cottonwood, and white spruce. Figure 4 (omitted) shows a scene representative of this zone. The Matanuska and Susitna valleys are in this zone and offer potential agricultural lands because of milder average temperature and longer growing season. However, by comparison with other states, this climate is rigorous. Both intermittent and sporadic permafrost is present in this zone, forming a mosaic of frozen and unfrozen areas.[6]

The central plateau occupies that area of the interior between Alaska Range on the south to Brooks Range on the north. This is the zone of intense winter cold and summer warmth, and is the extension of the taiga forests of northern Canada. Precipitation is low for reasons given earlier; Fairbanks intermittent in this zone and is an important ecological factor that distinguishes this zone from anything similar in other states. There is some potential for agriculture in the Tanana Valley in this zone but short, dry growing seasons limit the kinds of crops that could be grown.

Brooks Range is the extension of the Rocky Mountain system that bends westward in Yukon Territory, to form a barrier between the interior lowlands and the Arctic slope.[6] This rugged range is treeless except for stunted willow and birch on the southern flanks. The Arctic slope is the true tundra which slopes from Brooks Range to the Arctic Ocean. Figure 6 (omitted) shows the flat, patterned ground typical of the tundra. Permafrost is continuous and deep. Climate is severe, although winter temperatures are not as low as in the interior plateau. Summers are cooler, giving a lower annual mean. Barrow has a summer mean temperature of about 4° to 5° C. Precipitation is about 5 inches a year, but because of the short summer and frozen subsoil, the entire region is a morass from June through August when the surface soil thaws and creates a shallow, perched water table. Vegetation consists primarily of prostrate willow, shrubs, and forbs; no upright trees grow in this zone.

SOCIOECONOMIC ENVIRONMENT

Since people and their activities are chiefly responsible for polluting natural environments, let us look at Alaska and speculate on future problems of water pollution control. Alaska's population of 1 July 1967 was estimated at 270,000, an increase of 25,000 over 1966. Traditionally, Alaska's population has been highly transient because its industrial and economic activity has been seasonal; however, this transciency is steadily declining as new industry develops in the state and improved construction methods are used. Alaska can conceivably support a much larger population; for example, Scandinavia supports a population of 15 million on less area at latitudes similar to Alaska's, although its climate more closely approximates that of coastal Alaska with less rain. As economic activity increases, population will increase, and a population of 400,000 to 900,000 by the year 2000 is forecast.[7]

Economically, Alaska has served as a source of raw materials which are removed and processed elsewhere. This condition will continue to some extent because of the high price of local processing: however, as the economy stabilizes, costs should come down, partly as the result of the recent introduction of efficient freight-handling techniques, such as containerization and hydrotrain. Competition will also influence the price structure as larger enterprises move to Alaska. Some economists feel that the state is near the economic "take-off" stage where industrial expansion generates its own prosperity.

Some industries associated with Alaska—such as gold mining and fur trapping—which were once important, are now minor. Others, like fishing, are still important; some like oil, are completely new to Alaska, and may prove to be all-important future industries. Tourism, although not new to Alaska, is expected to become one of the most important industries in the state. Oil production is the immediate stimulus to prosperity in Alaska which now ranks ninth in production, and predictions are for the state to climb to the nation's fourth largest oil producer in a few years.[8] Costs of exploration, production, and transportation are high; however, even in the face of these costs, the future for oil in Alaska is optimistic.

Lumbering should prove to be a stabilizing industry along the coastal forests, with 5.7 million acres of commercial timber,[9] now

Footnotes at end of article.

that a third pulp mill is scheduled to be built. Nearly all the national forest commercial timber is now scheduled for cutting under a sustained yield plan. Interior forest resources although never inventoried in detail, are estimated at 39 million acres of commercial timber and, once markets develop, will add to the total resource activity. Furs, once important, are no longer in demand as in the past; hence, this industry continues to be minor, although it is capable of large expansion if demands for furs increase.[10] Agriculture is unlikely ever to become important because of unfavorable climates and of Alaska's inability to compete with other areas of agricultural production. Gold mining flourished in recent years, but the cost-price structure has caused this industry to wither.[11] Mining for other metals is almost certain to increase in future years because deposits of many minerals are known and the geology is similar to that of adjacent Canada, where mining is a thriving industry.

Tourism and transportation are related, and both continue to expand with expansion of the road network to all major communities. Tourism is projected to increase and become an even more important industry because of the areas many scenic attractions. Freight rates compare favorably with those in other states, now that efficient handling methods, mentioned earlier, are in effect. The state ferry system has stimulated surface travel to Alaska and bids to compete with the Alaska Highway as a means of entry from Canada. The jet age has arrived in Alaska with regular air routes to Japan, Europe (over the pole), and Seattle; Alaska is strategically located for world air travel. The new superjets are optimistically predicted to transport a significant percentage of Alaskan freight now moving on the surface.

Traditionally, Alaska's salmon fishery was its foremost industry. Although this industry reached its peak several years ago, fishing will continue as an important industry in the state. Recent new conservation and fishery techniques, diversification of the industry to king crab, shrimp, and other shellfish, and modern processing methods will stimulate fishing as an industry.[12]

Alaska's water resources, like her petroleum reserves, are tremendous. A recent inventory of U.S. water resources [13] disclosed that runoff from Alaskan streams is about 650 million acre-feet (1 acre-foot is about 1235 cubic meters), approximately one-third that of the entire United States. If runoff from Canada into the Yukon River is included, the figure rises to about 800 million acre-feet. Alaskan marine waters are an additional resource because of the long tidal coastline and the vast continental shelf totaling 830,000 square miles.

Because Alaskan waters, fresh and marine, are pristine except for a limited number of local areas, and because water quality is increasingly recognized as one possible limiting factor to continue prosperity, serious thought is being given to preventing pollution in these waters. How to use the surplus freshwater resources of Alaska is a question often asked. Thirsty states of the "Lower 48" propose huge programs to import water from the north, but those who now control surplus water [14] oppose this. An alternative proposal is to develop water-using industries in Alaska adjacent to the water resource. Such action could use the water and at the same time disperse plant and prosperity by providing jobs and capital in areas where natural resources need developing. Regardless of the direction Alaska water resources use takes, the quality of this water must be such that it is usable without costly pretreatment.

Summarizing this discussion on the total environment brings out two principal points. Alaska's natural environment is harsh, with many serious problems to be overcome in the state's orderly development of resources and economic expansion; development and expansion are inevitable because Alaska has many natural resources in quantity that are or will be needed by our growing technological society. Although capable of supporting many more people as resources are developed, Alaska's rigorous natural environment will strongly influence population density and economic expansion.

LOCI OF POLLUTION TODAY

Although its waters are now dominantly pure, Alaska has several local pollution problems. By today's standards, no city in the state has an adequate municipal waste disposal system, and only a few have treatment of any kind. None of the major military bases has adequate treatment facilities. Dumping of raw wastes into the nearest water body is the rule; this results in some serious local pollution. Fairbanks runs the effluent from its primary treatment plant directly into the Chena River, and Fort Wainwright, immediately upstream does also. Pollution in this stream is evidenced by bacterial counts below Fairbanks that are 300,000 to 500,000 times those in the river above all sources of man's wastes.

Cook Inlet receives raw sewage from Anchorage and the Elmendorf Air Force Base. Fort Richardson's untreated wastes also end up in Cook Inlet by way of the Eagle River. All these wastes are to be treated by a treatment plant by 1972. The plan calls for primary treatment of wastes initially, with secondary treatment added at a later date as population increases. Raw sewage from Juneau is discharged directly into Gastineau Channel, a poorly circulating inlet. To date no health problem has developed, probably because the population is small. The discharge of raw sewage into any available water is common practice in coastal communities.

Kodiak Harbor has become so polluted from seafood cannery wastes that harbor waters can no longer be used in the live holding tanks. Water quality is so poor that crabs so held die and are wasted. This condition has developed to an acute state in the 10 to 12 years that the king crab industry has been in Kodiak.

Few of the many small military installations, Bureau of Indian Affairs schools, or other state or federal agency properties provide adequate waste treatment by today's standards. When small military installations were built throughout Alaska after World War II, waste disposal was a salient point in the overall plan. The tragic aspect of these plans was their complete reliance on criteria from temperate zones, with insufficient data and with little understanding of the environment in which they were to be applied. This lack of suitable design criteria for northern waste disposal has resulted in a large percentage of failure of waste disposal systems at many locations. Contributing to the failures were the lack of trained treatment plant operators and generally poor management and maintenance of installed systems.

Only the sparse population and the relatively low quantities of these raw wastes have kept the pollution problems from becoming acute and thus highly publicized. This is an example where knowledge is insufficient to deal with a problem that may well become paramount as Alaska develops and population pressures on the environment increase. Design criteria are simply not available—and this includes Scandinavia and Soviet Russia as well as Alaska—to build disposal systems that will function with assurance under the severe climatic conditions of northern latitudes. Only by research, to explore new methods of waste treatment and to improve or modify conventional systems, can satisfactory disposal systems be developed.

Industrial wastes are being recognized as potential pollution agents in Alaska. Two pulp mills now discharge their wastes into estuaries that were pristine 10 to 20 years ago. Recent surveys indicate that pollution products are accumulating; the diministed size and number of shellfish in the intertidal zones of these estuaries are attributed to the polluting agent and the lack of sufficient circulation in these marine water bodies. With a third pulp mill to be built somewhere in southeastern Alaska, it is possible that another estuary will suffer a similar fate.

Oil spills on the waters of Cook Inlet are common, as the petroleum industry enters the production stage. This estuary has some unique physical characteristics making it totally unlike any other water body in the United States. The tides in Cook Inlet are second in magnitude only to those in the Bay of Fundy. Currents during a tidal cycle commonly reach velocities of 8 knots; the upper end of the inlet carries a high silt load derived from glacial streams; in winter the ice becomes several feet thick. How Cook Inlet will react to extensive oil pollution is unknown because our documented knowledge is inadequate to predict the behavior of a cold-water, silt-laden estuary.

FUTURE POLLUTION PROBLEMS

If Alaska prospers as its people hope it will, its cities will assuredly grow, magnifying the volume of municipal wastes. This is being recognized by local governments which are planning disposal systems. Present plans call for all Alaska municipalities to have adequate sewage and waste treatment facilities in place by 1972. A recent inventory to establish the costs of pollution control in Alaska sets forth an estimate of $82 million just for the immediate needs with no reference to future projects.

In the past, great reliance was placed on dilution when raw sewage or the effluents from treatment plants were discharged to a stream. An unknown factor in such reliance is the uncertainty of the efficacy of planned conventional treatment systems in an arctic or subarctic environment. This rigorous environment imposes restrictions on conventional systems that can be overcome only with costly modification of the local environment under which the equipment must function. Moreover, water now unused and considered surplus may have an alternative important future use that is totally unpredictable under prevailing economics today. Another unknown associated with northern climates is the capacity of these cold waters to assimilate wastes. Continued reliance on dilution can result in dramatic failures because the accumulated effects are insidious; they build up with time and are triggered when a critical level is reached. Frequently, these failures are irreversible under the imposed conditions.

Industrial wastes are bound to increase with economic expansion. Ultimately effects of pulp mills on estuarine ecosystems are not known. In these waters in Alaska, temperatures seldom rise above 10° to 20°C, which retards biological and chemical reactions compared to the normal rate for warmer waters. Kodiak Harbor is an example of accelerated pollution because of thoughtlessness. Petroleum wastes will cause problems either because of accidents or irresponsible operations. Methods for the disposal of these wastes warrant intensive research to eliminate the problem before it grows bigger. Certain wastes, now exempt under Alaskan law, will surely assume increased importance, once industry expands as it is almost certain to do. How silt affects stream ecology, except in a general way, is also a subject that has hardly been studied. Dissolved oxygen in arctic streams is low because of ice cover during the winter months; [15] the addition of oxygen-demanding wastes may trigger irreversible reactions in the ecosystem which could interrupt the food chain and cause serious damage to desirable species of flora and fauna.

Timber harvesting is ancillary to pulp

Footnotes at end of article.

mills to supply the wood from which to make pulp. This industry frequently comes in for severe criticism from the fishery biologists because of opposing viewpoints on how logging affects the streams of a watershed. Stripping climatic forest from a watershed is indeed traumatic, but is it as disastrous to aquatic life as some biologists infer, if properly done? There must be a compromise position that will satisfy both interests if responsible parties will agree to look at the problem objectively and accept the facts from unbiased research. Much research needs to be done in this area, but enough information is at hand to justify certain controls that prevent stream degradation. The principal obstacle is unwillingness on the part of loggers to accept the premise that it is possible and desirable to log without ruining the watershed.[16]

FUTURE COURSE OF ACTION

Two courses of action must be implemented immediately. First, present knowledge must be used to treat and manage waste to prevent damage to the environment; and, second, necessary research must be instituted to acquire an understanding of ecosystem dynamics in the northland. Such an approach was supported in a colloquium at Washington, D.C., where a "National Policy for the Environment" was discussed.[17] Treating municipal wastes and using only approved logging practices are examples of the first action where much benefit will accrue. However, ultimate solutions must await research or engineering innovations for some problem areas. For example, in the Point Barrow area, the Navy and various other groups under contract for oil exploration have accumulated an estimated one-quarter of a million drums of human wastes because no feasible disposal method is available.[18] What is going to happen as oil development expands with its attendant problems in the tundra ecosystem? How to provide ground transportation in the tundra without destroying these tundra ecosystems, how to dispose of human and petroleum wastes in this environment, and how to prevent polluting the arctic waters when water is everywhere in summer—these are some of the problems that must receive attention if damage is to be avoided.

Research to gain additional knowledge of Alaskan waters off the continental shelf needs to be given momentum. Alaska's continental shelf area is estimated at 830,000 square miles and constitutes 74 percent of the total U.S. shelf.[19] The fisheries over the Alaskan continental shelves are incompletely understood. However, the consensus is that these fisheries have a tremendous potential for supplying seafood to a growing population. Mining the continental shelf for desirable metals will probably become important as research develops information to extract these metals from shelf areas. For these industries to develop without damaging the marine ecosystems, marine scientists must have research completed which will furnish guidelines to orderly development of these resources.

Total solution of these and other pollution problems is not at hand today, but the Washington, D.C., colloquium concurred on one need—to continue educating all persons involved to accept responsibility for preventing pollution and to develop incentives to make this desirable. When it can be shown that, in the long run, degradation of the environment costs more than preventive measures, potential polluters will more readily accept and initiate control measures. Regulations and water quality standards in themselves are insufficient to provide long-range results; there must be an honest desire on the part of the general population to prevent deterioration of man's environment. Once this is accomplished, policing becomes an insignificant facet of pollution control.

SUMMARY

Evidence indicates that Alaska is on the threshold of economic expansion. The magnitude of the expansion is unknown, but any expansion is certain to increase pollution pressures. Because Alaskan waters are, for the most part, still clean, a unique opportunity exists to apply a preventive program based on ecosystem dynamics, instead of the classical practice of cleanup after deterioration has set in. Research on the tundra and taiga ecosystems must be initiated to learn the dynamics of ecological response to man's quest for new resource development. Imaginative engineering innovations must be applied toward solving the immediate problems while awaiting research findings that accrue slowly over time. An accelerated, continuing education of industry and all others who are potential polluters must be initiated. All the research, engineering, standards, and regulations in the world will not prevent the ultimate destruction of our environment unless we all accept our responsibility to prevent this destruction. Pollution prevention will make great strides when we devise means, through economic analysis, to show that esthetics and society's acceptance of the costs of pollution control are imperative to man's survival, health, and happiness. Then we will no longer think in terms of how heavily we can load a stream with wastes, but how clean we can get it and how we can maintain it in this enhanced condition.

## NATIONAL INDUSTRIES FOR THE BLIND SHOWS CONTINUED GROWTH; FEDERAL GOVERNMENT AIDS IN PROVIDING EMPLOYMENT FOR THE BLIND

Mr. RANDOLPH. Mr. President, thousands of blind Americans, people who once were ignored and shunted aside, are now productive citizens because of organizations like National Industries for the Blind.

Thanks to a coordinated effort by the Federal Government, NIB, and 79 workshops in 35 States, more than 5,000 blind men and women are earning wages turning out more than 300 high-quality products.

NIB was esablished in 1938 as an outgrowth of the Wagner-O'Day Act, which I voted for when a member of the U.S. House of Representatives in 1938. Its provisions offered the Federal Government as a market for products manufactured by the blind.

According to the annual report of the NIB, sales during the past year amounted to $49.2 million, of which 45 percent were made to the Federal Government. Employees of the affiliated shops earned an all-time high of $9.2 million for their labors.

One of the most significant developments in the history of NIB occurred last year when the Federal Government agreed to purchase all of its ball-point pens and refills from the organization. This single agreement amounts to 70 million units a year, resulting in sales of $3.3 million for NIB organizations.

National Industries for the Blind functions under the leadership of Jansen Noyes, Jr., chairman; and Thor W. Kolle, Jr., president. Its national operations are directed by Robert C. Goodpasture, executive vice president, whom it was my privilege to join this fall when we were speakers at a dinner in Morgantown, W. Va., recognizing community efforts to improve employment opportunities for the handicapped.

I am gratified that NIB, whose affiliated organizations represent 95 percent of the productive capacity of all workshops for the blind, is prospering under the leadership of such men.

This coordinating organization is providing another vital service to help the blind overcome their handicap and be useful members of their communities.

I have long held a concern for the welfare of the blind and believe that if given opportunities, free of prejudice and misconception, they can stand on their own feet. To further improve the chances for the blind, I have this year introduced a bill to amend and update the Randolph-Sheppard Act, which I helped to write 33 years ago as a member of the House of Representatives. It is under this program that the familiar vending stands with over 3,300 blind operators in public and private buildings are made possible, and I believe the improvements are needed during this Congress.

The National Industries for the Blind and its affiliated workshops are providing an important humanitarian service. I hope that their number will grow and that the sightless people they serve will continue to prosper in the years ahead.

## SENATOR MURPHY STRONGLY URGES ADDITIONAL FUNDS FOR DROPOUT AND BILINGUAL PROGRAMS

Mr. MURPHY. Mr. President, in my statement before the Senate Appropriations Committee, I urged the funding of the dropout prevention program at the $24 million level and full funding of the bilingual program.

I was the author of the dropout prevention program and a cosponsor of the bilingual program. I think they are two of the most promising education programs that we have in the country.

I do hope that Senators will read my testimony and that they will agree with me that the additional funding that I recommended is fully justified.

Mr. President, I ask unanimous consent that my testimony be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY BY SENATOR MURPHY

Mr. Chairman. First, I want to thank the Subcommittee for giving me this opportunity to testify again this year. I want to discuss and strongly urge increased funding for the Dropout Prevention and the Bilingual programs. I believe that these two programs will prove themselves to be among the most significant, far-reaching, and wise investments that this nation has ever made.

Last year, when the House failed to provide a single cent for either program, I testified before this Subcommittee making a personal plea that the "shortsighted" action of the other body be reversed. The Committee, realizing both the magnitude of the problems and the merits of these two programs, responded, and in the HEW Appropriations measure passed by the Senate last year included $20 million for the Dropout Prevention program and $10 million for the Bilingual program. We were able to retain only $7.5 million for the Bilingual program and $5 million for the Dropout Prevention program in conference with the House.

This year, the House has come around somewhat and in the Labor/HEW Appropriations bill passed by the House, $10 million was provided for the Bilingual program and $5 million for the Dropout Prevention program. Given the size and seriousness of the problems to which these two programs are addressed, the sums provided by the House are clearly inadequate.

I am fully aware of the fiscal problems that we are facing, but nevertheless I believe that we must increase the funding of these two programs. I strongly urge $24 million for the Dropout Prevention program, which is the same figure recommended by both President Johnson and President Nixon in this year's budget. For the Bilingual program, I strongly recommend full funding—$40 million—which is in excess of the budget of $10 million, but which is fully justified.

Mr. Chairman, I authored the Dropout Prevention program, which was added to the Elementary and Secondary Education Amendments of 1967. The program is aimed at preventing and reducing dropouts. It was drafted in consultation with some of the nation's leading educators, including Dr. James Conant. Members will recall that Dr. Conant warned the nation in 1961 that "social dynamite" was accumulating in our cities. The accuracy of his warning is now history. Much of this "social dynamite" results from those who drop out of school and who are out of work. At one time the dropout posed no problem since those leaving school were able to find jobs in agriculture and industry demanding frequently little or minimum skill or education requirements. The knowledge explosion and the technological advances in the country have dramatically altered our national picture. That is why it is so alarming that approximately one million students are dropping out of school each year. In our nation's fifteen largest cities, the dropout rate varies from a high of 46.6 per cent to a low of 21.4 per cent. As high as these percentages are, they are for the entire city district. To really comprehend the seriousness of the problem, it is necessary to focus on the poverty-area schools within these cities. In these poverty-area schools, seventy per cent drop out.

Mr. Chairman, it is these statistics and these schools which prompted me to author the Dropout Prevention program. It is these statistics and these schools which prompted me to label the dropout problem as the Achilles' heel of our educational system. It is these statistics and these schools which compel me to urge the Congress to substantially increase the funding of the Dropout Prevention program.

Mr. Chairman, the Dropout Prevention program is based on the premise that answers have not as yet been found which will make dramatic changes in the poverty-area schools. The program provides maximum freedom and flexibility at the local level for experimentation. Under the program local and state educational agencies submit innovative proposals which zero resources on a particular school or on a particular classroom in an effort to have a major impact on the dropout problem. Eligible schools must be located in urban or rural areas having a high percentage of children from low-income families and a high percentage of children who drop out of school. The local educational agency, in addition to securing the approval of the state educational agency, is required to identify the dropout problem, analyze the reasons the students are leaving school, and tailor programs designed to prevent or reduce dropouts. Furthermore, the most significant, the program requires objective evaluation.

Mr. Chairman, the Dropout Prevention program is a no-nonsense approach to education. Dropout prevention projects must spell out clearly their objectives. Having stated their objectives, they will be held accountable for achieving them. Most importantly, and I believe this is a first for the Office of Education, an educational audit will be done on each dropout prevention project. This educational audit will seek to determine, in terms of student learning, what the taxpayer is getting for his tax dollar. This educational audit will be done by an independent organization outside of the project and will attempt to verify the project's performance. This is in addition to intensive in-house evaluations that will be done on the Dropout Prevention program.

In the National Education Journal of December 1966, the following statement appeared with respect to educational change and reform: "One often gets the eerie impression of huge clouds of educational reform drifting back and forth from coast to coast and only occasionally touching down to blanket an actual educational institution."

The Dropout Prevention program is causing educational waves. The Dropout program is "touching" actual educational institutions. The Dropout Prevention program will produce change, will bring about reform that will not only touch the particular educational system involved but also educational programs throughout the country. Although dropout projects are now underway, I would like to discuss two of them so that the Committee might judge their significance and the momentum of their educational waves for improvement in our educational programs.

The project perhaps that has generated the most national interest is the Texarkana one. In this program, the school districts of Texarkana, a Texas and Arkansas border community, have called on private industry in an effort to raise basic levels of potential dropouts. The school system has entered into what is called a performance contract with a private corporation to bring potential dropouts up to grade level in academic performance. As the name of the contract implies, the companies must perform or they do not get paid. In addition to this phase of the project, the Texarkana project is experimenting with a system of rewards and incentives for students. For example, successful students will receive coupons redeemable for merchandise and students who successfully complete two grade levels of achievement will receive transistor radios.

Another exciting project, Project STAY, in St. Louis, Missouri, places great emphasis on the work-study approach. St. Louis found that a desire to work and earn money and a lack of interest in or dissatisfaction with the school and the curriculum were among the major reasons for dropouts. In its attack, the community and the real world have been made part of the curriculum. Industry has warmly responded by providing positions wherein skills may be acquired, where the relevance of the classroom can be both seen and tested by the student and the system.

Some of the approaches are very unconventional, Mr. Chairman. For example, twenty students have been assigned to the McGraw-Hill Publishing Company where they will receive training in various job areas within the plant, including the operation and production of machinery used in the printing business. A teacher will accompany the students. This is rather unique because they will receive both academic instruction and job training here. For these students McGraw-Hill will be their school, home and their work assignment. This meant that the State Department of Education of Missouri had to relax somewhat their course requirements to permit this experiment. This they did.

The school system also has leased a Sinclair Oil service station. At this station, students will receive on-the-job training leading to such jobs as mechanics, service station management, and even to service station ownership. The Sinclair Company has provided a trailer which will be located at the gas station for conducting demonstrations of functions of the service station business.

In addition, the City of St. Louis has purchased an apartment building with local funds and 64 students—32 in the morning and the other half in the afternoon—will learn skills useful in construction work under the supervision of industrial arts teachers. After the apartment is rehabilitated, it will be returned to the City of St. Louis, which will then use the building to help solve some of the housing needs of the city. This may have potential both for skill acquisition and city rehabilitation. The union and real estate interest has responded well to this educational pioneering.

The interest and potential of the program, Mr. Chairman, can be seen by the fact that over a thousand requests from local educational agencies to submit preliminary Dropout Prevention programs has been received by the Office of Education. To fund all of these programs would take over $700 million. Of course, I am not recommending the funding of all of them. The Dropout Prevention program was not intended to take care of all the dropouts. Rather, its intent was to identify and attack some of the worst situations in the country by establishing highly visible demonstration projects that are large enough to have a significant impact, while at the

same time enough in number to be carefully monitored and evaluated so that, insofar as possible, success could be assured. Thereafter, it was hoped that the success of the program would be duplicated in other sections of the country. This educational R & D effort, the Dropout Prevention project, then are live local educational laboratories whose work has both great national interest and implications in solving one of the most persistent problems in American education.

Mr. Chairman, in my testimony before this Committee last year, I cited the growing realization of the relationship of education and income. I cited a study by Dr. Harold Kastner, a consultant for the Florida State Office of Education which divided individuals based on the 1960 census into levels of educational achievement as follows: Less than 8 years, 8 years, 1 to 3 years of high school, and 4 years of college. Dr. Kastner then projected the aggregate income gain if the individual had been able to complete the next income level. If those who had not completed the eighth grade and had been able to do so, and if those who had completed the eighth grade had been able to complete 1 to 3 years of high school, the national income would have increased annually by 6.5 per cent. A 6.5 per cent increase would have added $50 billion to our national wealth. These calculations help convey the monetry costs to society.

In addition to the earning loss to individuals and tax losses to the country, the dropout reappears in our crime statistics, on our juvenile delinquency rolls, in our corrective and penal institutions, and on our welfare rolls.

The investment of $24 million in this program with its great promise and potential is thus a small amount of money compared to the total money costs and waste of human potential. I am convinced that an investment of $24 million might save society billions of dollars in keeping dropouts from being a burden—or as the crime statistics indicate, even a menace—to our society.

Now, Mr. Chairman, I would like to turn to a second program that is so important to California and the Southwestern states, the Bilingual Program.

I cosponsored the Bilingual Education Act which was added to the Elementary and Secondary Education Act of 1967. Congress should be particularly proud of this program, for it is an excellent example of Congressional initiative. The bilingual program, the Committee will recall, was enacted over the opposition of the executive branch in 1967.

There are over five million Mexican-Americans in the United States located primarily in the southwestern states. My state is proud of the fact that more Mexican-Americans, 1.5 million as a matter of fact, live in California than in any other state. The Mexican-American, the nation's second largest minority group, faced the same problems of poverty and discrimination as other minority groups; but in addition they have a language handicap. For the typical Mexican-American child grows up in a home where the parents speak little or no English. Naturally, the language spoken in the home, Spanish, becomes the child's language. This Mexican-American child, often from a low income family, then enters school and runs into the language barrier.

Senators, for a minute, imagine what it would be like if you or your youngster were to enter the first year of school where the language of instruction was different from the one you used and spoke at home. You would not only have to master a new language but also master a subject matter in the new language. Would it come as a surprise if you became frustrated and fell behind, discouraged and dropped out? The answer to this question helps to explain the education deficiencies of Spanish-speaking children and others whose dominant language is other than English.

The education statistics for the Mexican-American are to put it mildly, shocking. They show:

1. That one million of the 1.6 million Mexican-American children entering the first grade in the five Southwestern states will drop out before they reach the eighth grade.

2. In my state 50 percent of the Mexican-American youngsters drop out by the eighth grade.

3. That by the time Spanish-speaking youngsters have reached the third grade over 89 percent of them have repeated one or more grades.

4. That the average number of years of school completed for individuals with Spanish surnames is 7.14, for non-whites, 9, and 12.14 whites. Significantly, over the past 30 years, while the education gap between whites and blacks has been closing, the education gap between the Mexican-American with respect to both blacks and whites has increased.

5. That in my state, Spanish surname students comprise 14 percent of California's school age population but less than one-half of one percent of the students at the University of California's seven campuses are Mexican-Americans.

6. That Mexican-Americans account for more than 40 percent of the students classified by school districts as "educable retarded".

These facts, as the statistics so dramatically illustrate, show that the schools have not been communicating with Spanish-speaking youngsters. No communication—no learning! It is as simple as that.

Let me go back for a moment to the last statistic I cited. A study done this year for the California State Department of Education showed that Mexican-American youngsters, labeled by the school system as "educable retarded" made remarkable increases in I.Q. test scores when such tests were administered in Spanish. This study, which I understand was the first of its kind in the nation, saw some childrens' I.Q. increased by 28 points with the average climbing 13 points. These 13-point average increases incidentally, would have placed these youngsters above the mentally retarded level. Children below this level in my state are placed in special classes whereas above the level, they are part of the regular classes.

One wonders how many of the Mexican-Americans who make up the 40 percent of the educationally handicapped in California would be in regular classes had the test been administered in Spanish? And, how many of the large number of Mexican-American dropouts could be prevented if we substantially increased the funding of the Bilingual Education Program. I believe many, and that's why I have been such a strong advocate of this program.

The Bilingual Education Act is a commitment to reverse these statistics, to provide a solution to the education problems of Spanish-speaking children who in fact do not have an equal opportunity, an equal chance because of their inability to speak English.

Since the first project under the bilingual education program was not funded until May of this year, we naturally, do not have objective evaluations from these projects. There has, however, been studies of what happens when we force learning in a language that is unfamiliar to the youngster as well as evidence from bilingual programs started prior to the federal Bilingual Education Act.

First, it is interesting to note that Russia seems to have a more enlightened policy in its approach to this problem than we do. Fifty percent of the Russian population have a mother tongue other than Russian. Russia in 1938 reversed its former policy of insisting that instruction be in Russian and permitted instruction in language other than Russian. As a result, a great increase in both literacy and the use of the Russian language occurred. Experimental programs in such countries as Sweden, Mexico and the Philippines indicate similar results. In the Philippine ILOILO experiment begun in 1948, experimental groups were taught reading, math and social studies in their local language in the first and second grades. At the third year, they were switched to instruction in English. Within six weeks, the performance of the experimental group in all subjects tested, including English, exceeded a control group who were instructed only in English beginning in the first grade.

Last year, I made reference to the Puerto Rican experience where, in effect, the United States attempted to impose the English language, sometime to the exclusion, sometime along with the mother tongue of Spanish. Columbia University researchers gave tests to some 69,000 youngsters to make a comparison between those who had been instructed in English, which was foreign to them, and those who learned through Spanish. They then compared both group scores with youngsters from the United States. They found that Puerto Ricans taught in English were markedly retarded. Those, however, taught in Spanish, not only equalled but exceeded U.S. students on the Mainland. Columbia University researchers attributed this astonishing result to the fact that the "facility with which Spanish is learned makes possible the early introduction of content into the primary curriculum".

Mr. Bruce Gaardner, former chief of the Modern Language Section, Office of Education, told the Bilingual Education Committee in 1967 "now, this has extraordinary implications. What they are saying is that because the authoritarian academicians over the years, over the centuries, always adjusted the writing system of Spanish to make it correspond to the spoken language, there is a very close match between the Spanish writing and Spanish sound. We did not do it in English. We could have, but we did not. They did it in Spanish. They did it in Spain. Therefore, there are no reading problems, as we know them in Spanish-speaking countries. The extraordinary implication is that if the Spanish-speaking children of our nation were allowed to use Spanish as one of the mediums of instruction along with English, not only would their handicapped bilingualism disappear, but there is a strong likelihood that they would have a decided advantage over their English-speaking schoolmates simply because Spanish is an easier language to work with in the elementary schools."

The Indian Education Subcommittee on which I serve came across some interesting facts that are instructive along these lines. In the 1800's, prior to the Federal Government taking control of the Cherokee affairs, the Cherokee Indians, using their native language, and bilingual materials, were able to achieve a literacy rate of 90 percent which, incidentally, was a higher literacy rate than the white population of Texas and Arkansas. Today, following the Federal Government's taking over, the picture is bleak as 40 percent of the Cherokees are functionally illiterate and their school dropout rates in public schools are as high as 75 percent.

In my State of California, I examined a report of the Marysville, California School District after the second year of an experimental bilingual program. The report said: "analysis of the data tend to support the hypothesis that Spanish-speaking pupils are better able to learn where they use their native language and have systematic instruction in English as a second language".

Mr. Chairman, these, then, are the limited objective data that are available. I am proud to say that the Bilingual Program, like the Dropout Program, holds schools accountable for results. Spanish-speaking youngsters in the Bilingual Program must do as well as Anglos in the fundamentals while they are learning English as a second language. It is my understanding, based on discussions with Dr. Leon Lessinger that we will have at the

end of this fiscal year some of the hard objective data that the Appropriations Committee naturally is very interested in. However, there is substantial subjective evidence that the bilingual approach is working. I have talked to many teachers, to students, and to parents and the reports that I have received indicate that the pupils are doing better, are happier, have more confidence and are more willing to participate in their class where their language and heritage is an integral part of the school.

Mr. Chairman, I asked my staff, in cooperation with Dr. Eugene Gonzales, of the California State Department of Education, to contact some of the bilingual project directors in California and share their up-to-the-minute thoughts with respect to the Bilingual Program. I ask unanimous consent that this be made part of the record at the conclusion of my testimony. (See exhibit 1.)

So, Mr. Chairman, insofar as the second largest minority group in this country, the Mexican-Americans, we seem to have the educational breakthrough that we all are looking for. The Bilingual Education Program offers the hope, based both on limited objective evidence available, and considerably more subjective evidence of remedying the sad educational statistics that I cited earlier. With the means at hand, we are doing so little.

Furthermore, we should be supporting the Bilingual Program not only because of its great potential of eliminating a national liability, but also because bilingual should be regarded as a national treasure, one that should be developed for both a better America and a better world. Modern means of transportation are, in effect, shrinking the distance between nations and the world's peoples. We can expect in the 1970's travel between peoples of the world unparalleled in the history of mankind. Bilingual Americans are and will become even more a great national asset. Rather than allow such an asset to waste it should be developed to its fullest potential.

My city of Los Angeles, where the largest concentration of Mexican-Americans in the nation is found, was not funded under the Bilingual Education Act despite the obvious critical need. Applications from California alone exceeded the national appropriation for the Bilingual Program last year. In total, 315 applications from 40 states added up to $41 million was received by the Office of Education for Fiscal Year 1969. It is estimated that for this fiscal year that between 500–600 applications will be received.

The Senate should once again seize the initiative and substantially increase the funds available to the Bilingual Education Program. Although I believe that the program should be fully funded at the $40 million figure in view of the magnitude of the problems, and of the program's potential; if the Committee is unable to do that, I believe the bare minimum, even given the real fiscal problems that we face, we should provide this year is $30 million.

In conclusion, I would ask unanimous consent that a floor statement I made on October 13th on my amendment No. 231 to H.R. 13111, providing an additional $20 million for the development of personnel in vocational-technical education be printed in the record. (See exhibit 2.)

---

EXHIBIT 1

RESPONSE OF PROJECT DIRECTORS IN ANSWER TO TELEPHONE QUESTION CONCERNING ITEMS THAT COME TO MIND AS A RESULT OF THE BILINGUAL PROGRAM

BARSTOW

Mr. CHAVEZ. There is a need for more in-service training for both teachers and aides; the co-mingling of attitudes so we could have a cohesive program; an awareness on the part of the teachers to problems which were otherwise hidden from them. Learning as a cognitive process is the same in Spanish as in English. This is what we would primarily be interested in.

BRENTWOOD

Mr. YAÑEZ. Actually the parents have been coming to the school. We had an open house with almost 90% turn-out. Mexican-American people who had decided to come to school have been coming to our dinners. A Mexican lady said, "We are glad you are here because we have somebody with whom to communicate." Before she had never attended any meeting. The parents are more relaxed about the fear their children will come to school and not be understood. More of the children are coming to school with smiles rather than grim looks. Our project had a page spread in the Brentwood newspaper. I feel it is a tremendous program; I had been in the classroom for fourteen years and feel this is the right direction to go, especially when you have a 40% Mexican-American enrollment in your schools. We are setting up a barbecue; we had a breakfast and open house; I spoke to the Lions Club. (Not Title VII but the Brentwood program is to be part of a movie. Officials in Washington phoned and asked if they would be in the movie. They are not telling the story of Title VII but they want to show how we teach the Spanish-speaking in America and how we treat the Spanish in Brentwood.)

The children were timid at first. It is a good feeling trying to get the people involved and it has affected the attitude of the parents and children. The parents feel now that the children might finish school and amount to something. The program has made a tremendous impact in Brentwood and I am trying to let the people know what is happening.

CALEXICO

Mr. LOPEZ. 1. We are trying to set up a truly bilingual situation. This is very difficult because we do not have any ESL two-language level proficiency. In our program we have one-third English speaking, one-third bilingual with greater proficiency in English, and one-third Spanish speaking. That is the makeup of the class and we have one teacher and one aide. The teacher has given instruction to each level but as far as language is concerned there are no materials available so we are in the process of developing a curriculum. We want to make certain the children are keeping abreast.

2. We need help in the writing of curriculum because teachers do not have the expertise to write curriculum. . . . We pursue the challenge; there is a Spanish speaking need. Before the Spanish-speaking students were put aside where we would teach them English. Now we put them all together in the classroom with English speaking students and it creates a challenge to the classroom teachers simply because of the different levels of language proficiencies in English and Spanish. Another problem is to find people who can find the time to evaluate. There are a lot of proposals so it is difficult to spend the time that is required. We do have the evaluators at least two days of the week for the rest of the year because the evaluator has to be involved in classroom development.

Through this particular type of program we have actually developed a greater cooperation or socialization with all three different levels of the speaking groups. Previously the three distinct groups would segregate themselves, now they all socialize together. We do need some more time for the development of curriculum. All of the curriculum development should be put together in one little soup kettle and should be used by all. Teachers developing materials are basically pack rats, they don't like to share discoveries.

CHULA VISTA

Mr. JUAREZ. I notice a growing awareness on the part of school personnel and community people about the needs of the youngsters this program is intended to reach. This is perhaps the most hopeful thing.

Secondly, since we have been reviewed in the South Bay area we have found that the existing resources are very numerous and it is tapping the youthful environment. There is an awareness and uniqueness to the bilingual and bicultural environment that exists here. The inter-district plan has permitted the people involved to begin to communicate about areas of community concern and teachers have met in teacher sessions. We have been able to have dialogue between elementary, junior high school and high school teachers for the kind of instructional program that is needed in a bilingual program.

One of the things that holds much promise is a growing cooperation on the part of the school and home as it relates to the learner that we are going to reach. This will develop into a positive thing that has come out of the program so that the school and the home will both be communicating and both be promoting the instructional growth of the student.

COMPTON

Mr. GOODMAN. 1. We have had a tremendous community response; children who have never responded before in the classroom are now bubbling. Parents and aides have noticed children beginning to talk, in fact you can't shut them up. By using the language of communication we have actually opened up the youngsters. The children now respond in a normal classroom as regular normal children when Spanish is used as a language. This has been noticed by teachers, aides, and parents. We thought of taking one child to the principal, but realized that he was simply overly enthusiastic; the children are communicating.

2. Teachers who formerly had these youngsters have remarked they didn't know the children could respond. The children are happy; attending school regularly; learning their ABC's in Spanish, and learning them quickly. We have had a tremendous success with the program. These observations come from teachers other than bilingual teachers; they come from bilingual aides who worked with the youngsters in a regular classroom state; this became notable the third day of the program. We notice these factors becoming very distinct.

The children in the bilingual program respond; they respond in Spanish. They have been characterized as being silent in the English classroom but they are not that way in the Spanish classroom; they communicate and interact; they do not feel stereotyped. This is established by bilingual teachers, aides and other teachers. The children appear to be learning at a faster rate in Spanish since we are teaching the basic subject matter in their language. They surprise us; they pick up their numbers faster in Spanish. Some of the materials have stimulated them. English is taught as a second language. It appears that as we give the instruction in Spanish, the transference into English is extremely easy. They pick it up easily. I have worked before under ESL and it was very difficult because you were not working with the Spanish language. . . . The struggle we had when we worked only with English is gone. We use ESL techniques but both teachers have remarked that the youngsters pick up English so quickly. We did not expect this influence upon the other language to be so quick. The children are aware that they live in an English speaking country. They continue to ask in Spanish how to say the same thing in English and we discover that once they have a little word in Spanish, the English word slips right in. We think the program has been very successful so far. The teachers are thrilled with it. There is so much to be done that the program development has slightly overwhelmed us; we unlocked a reservoir; we have touched a linguistic resource. We have Spanish speaking parents

born in Compton who say they wish they had this opportunity. It is too early to measure but we are developing measurement devices; we can only tell of what we have seen. This information comes from other than classroom teachers. The bilingual teachers are amazed; they had no idea how vibrant and alive, very active these children could be—just normal Ameriacn youngsters. The overwhelming factor is that they are so happy; very happy. It appears the home is quite happy. The parents decided. The program has its problems. Our concept in Compton is to develop original curriculum material as it pertains to the child. It is original; because of my background we actually develop our lesson from originality. The material that I was able to get are Spanish language books developed for children who speak Spanish and live in a Spanish speaking environment. We do not use dual English-Spanish books. The youngster will be taught to read and write. In the English classes they will be taught from English language materials that we use in our own schools. We will not use translated materials. We will use only foreign language materials that have been successfully used in Mexico and Latin America. The curriculum material will be original and designed for Spanish speaking children who live in the United States. It is really bilingual. Both of our project teachers are teaching Spanish daily in our high school. Teachers in the school have asked to borrow our materials already to help the youngster who is not in our program.

EL MONTE

Mr. RODRIQUEZ. My immediate reaction is something that one of the parents said the other day. This parent is of Mexican ancestry but speaks nothing but English at home. Without realizing the child was growing up without hearing Spanish. After being in his class for a few weeks the child goes home speaking Spanish and wants to speak nothing but Spanish. The first thing she learned was how to greet her grandfather in Spanish. They were thrilled. (I actually talked to the mother in the sentences preceding this—she was in Mr. Rodriquez's office and was so pleased with her little girl's progress, Bernice.)

When we spoke to parents while we were organizing the class we interviewed maybe all thirty of the parents of the children in our class and half of the other class. Not one parent objected to the program; they all wanted their child in it. We haven't run across one who has held back; there is no negativism. The children go around singing Spanish songs they learn in class. We have a parents' meeting every Wednesday from 1:30 to 2:30. The teachers follow through on some of the lessons for the week and carry it on to the parents. A child brought home a painting and the parent scolded her so the teachers carried on a painting class. They indicated that you should praise everything a child brings home. We discussed the program; we had a finger painting exercise so the lesson was reinforced. We have to encourage, not discourage. We ask them to discuss—tell me about it. We will bring the child out and have him become expressive.

We decided to put out a little newspaper every two weeks. (The lady in the office to whom I spoke—Bernice) has a daughter who is a high school senior who is quite artistic who is going to draw a cartoon for the newspaper. We plan to send the people at home stories of what is going on in class in both languages.

Have you heard of TV Education Channel 28 Ahora/Today. What is being done with the Mexican American today will have a little program on the bilingual program.

FRESNO COUNTY

Mrs. JOWETT. 1. At the present time it would appear to us that the instructional materials that we are using indicate that progress is being made with the children that is either equal to or above what would ordinarily have been expected and was evidenced in previous years. We have only been in the program a month.

2. We are finding that the majority of the children involved in the program seem to be able to work with a greater degree of independence than we noted before.

3. The interest in the second language or learning Spanish is high and the response on the part of the Mexican American children, although they are not necessarily proficient in Spanish, is very good. The Anglo children have also evidenced interest in learning another language although we have not been in this phase of the program long enough to form any kind of definite opinion, it appears that the Anglo children are responding in much the same manner as the Mexican American children who are not proficient in Spanish. We are beginning to see more interest on the part of the community as we have had an opoprtunity to meet with community representatives.

GONZALES

Mr. LICANO. The most important item—the kds are really responding to the program. We had a similar program without Title VII but it wasn't as organized as this one and the kids are really responding and doing very well up to this point. It wouldn't be possible without funds to provide the materials and personnel for the program.

HEALDSBURG

Mr. KATELEY. 1. This is meeting one of the needs that we have had in California in districts that have had a high percentage of Mexican-American children.

2. Being new we don't know how well it will work. The funding level doesn't seem nearly enough to do the job envisioned but it is a job that is really a priority item to attack.

LA PUENTE

Mr. KEOHANE. The information was given by Mr. Clonts, Assistant Superintendent, because of Mr. Keohane's illness.

1. We have employed thirty bilingual parents who are providing instruction to some 900 students since September 1.

2. More Spanish culture is being taught in the primary grades as a result of this project.

3. More of the Mexican-American parents are inter-acting with the principals and teachers in the schools through parent conferences and coming to hear about the bilingual program.

Our project has several objectives; to speak Spanish and English; and to get the school and the Mexican-American community to act together. We have been able to do this by taking these thirty parents, have people come to them and have them go into homes. Shortly we are starting the third phase in which Mexican high school students will be tutoring in homes in the evenings and after school. With this increased emphasis on the bilingual project and people pushing the Mexican culture as part of the study we have been buying more materials relating to the Mexican-American culture. We discuss the textbooks with parents and students. One is *Mexican-American—Past, President and Future* by Julian Nava. These kinds of materials are used more in the classroom as a result of this program. Also ESL material is being used.

One of the good things about the program is the fact that good evaluation techniques are built into it so that at the end of a year, or five years, we will know whether we accomplished what we set out to do.

LOS NIETOS

Mr. GRIJALVA. An item that immediately comes to mind is the number of mothers and aides that we have involved in our program; also, the number of volunteers has been exceptional. We have people from Whittier, from the U.C.L.A. Nursing corps, people from the Child Guidance Center and a child guidance off-campus group from one of the high schools has affiliated itself with us. We have seven volunteer parents involved in the program. Our professional evaluator has tested the program. The reaction has been tremendous. A lot of bright-eyed, bushy-tailed children are being encouraged at just the right age.

This will show up in evaluation in the future. I have been tremendously impressed with the volunteer program. We have the list documented with signatures and the hours and the reports are filed with Head Start.

UKIAH

Mr. DE LA PENA. There has been a lot more concern expressed for the Mexican-American child and the Indian child. We have had teachers call us about a certain child and our office has been sort of a place where teachers having problems with the Mexican children have been calling to see what is going on. We are now in the planning stage; we can't actually do anything yet. My reaction is that there is considerably more interest in the Mexican American child and the problems of the Indian child. It seems that all of a sudden the Mexican-American child and the Indian child exist; before they were a non-entity.

SAN FRANCISCO

Mr. CHEW. The project is going very well in terms of the objectives of the original program, to help 25 Chinese children. The kids are learning English and they have nowhere to go but up because they all started with zero. We have 25 first graders who have all been here less than two years in a self-contained class. We use English and Chinese to teach. We begin with conversational English to help students with their understanding like stating in English to get in line, close the door, etc., by constant repetition using sentences and commands with the action. The products are the children themselves; they are even able on their own to say please give me a pencil, etc. We work on their vocabulary and sentence structure. We don't teach grammar as a subject, we hope they will learn grammar by constant usage of English. We have arranged some trips to schools and other places so they will learn about the needy communities, etc. Most are students from the Chinese Ghetto in Chinatown. We try to open their vistas. In addition to the audio-language English the children do have a regular schedule which will cover other subject matters such as music, reading, writing, spelling, math and social studies.

FRESNO CITY

Mr. ALLISON. My understanding was that Senator Murphy wanted a "grass roots" reaction on the impact so far of Title VII. So far, as happens in any new program, we are working out the bugs and annoyances that come with implementing a new program such as we are putting into Winchell School. To date the best and most encouraging reaction has been the reaction of the parents of the childern in the program in last week's "Back to School" night. There was a good deal of favorable comment among the parents of the children in the four classes. In fact the effect upon the four Title VII teachers was, according to Principal Bill Hansen, to reassure them that what they were doing was producing positive results and attitudes in the community. The teachers had felt somewhat insecure because of the profound change in the curriculum of the bilingual program. Special pleasure was expressed by some Mexican-American parents that their language and cultural background was being emphasized. One parent, obliged to move to another area of Fresno, was asking how he could get an inter-district transfer so that his child could continue in the bilingual program. This is a tentative and subjective impression but we were very pleased with this reaction among the parents.

EXHIBIT 2

STATEMENT OF SENATOR GEORGE MURPHY, REPUBLICAN, OF CALIFORNIA, ON INTRODUCTION OF AN AMENDMET TO LABOR-HEW APPROPRIATIONS BILL PROVIDING ADDITIONAL FUNDS FOR DEVELOPMENT OF PERSONNEL IN VOCATIONAL EDUCATION

Mr. President. I rise today to offer an amendment to H.R. 13111, a bill making appropriations for the Departments of Labor-Health, Education, and Welfare for fiscal year 1970. My amendment is very simple. It will have the effect of increasing by $20 million the total amount of funds made available for Parts C, D, and F of the Education Professions Development Act, with the additional $20 million earmarked for the development of personnel in vocational-technical education. Currently the U.S. Office of Education has indicated an intention to spend only $5,750,000 for training vocational education personnel. There is ample evidence that this sum is totally inadequate, and my amendment proposes to earmark the additional funds so that our educational system can begin to attract new personnel to the field of vocational-technical education, and in order that existing vocational personnel might be upgraded and retrained.

Mr. President, my colleagues in the Senate who are concerned about the problems posed by increased inflation may question my introduction of this amendment. I share their concern and I must admit that I have been hesitant about supporting increased spending at this time. I am, however, persuaded that there is an overwhelming and critical need for additional training funds to meet the personnel needs in vocational and technical education. These needs are especially severe in my own state of California.

I introduce my amendment at this time in order to bring this matter to the immediate attention of my colleagues. The Senate Labor-HEW Appropriations Subcommittee, so ably chaired by the distinguished Senator from Washington, Mr. Magnuson, will begin hearings on H.R. 1311 this month. In the interim, however, I hope that the other members of the Senate will investigate the training needs for vocational-technical personnel in their own states and will come to the support of my amendment.

There is no lack of facts to substantiate the need for increased and improved vocational technical education programs throughout the country. These facts have been presented to Congress before, and they clearly and persuasively indicate that education in the United States does not meet the needs of the majority of American youth. For example:

80% of American youth in 1966 dropped out of school before graduation from college, but less than 20% had acquired skills with which to enter the job market.

60% of the students attending high school left to enter the world of work rather than going on to college, yet less than one in four was enrolled in a vocational education program while in high school.

In light of these facts our national educational priorities have been incorrectly set:

14 federal dollars were invested in universities in 1966 (proportionately more in subsequent years) for every one dollar invested in vocational education programs.

4 federal dollars were invested in remedial training programs during that same year for every one dollar invested in preventive vocational education programs.

To correct this imbalance, Congress voted last year to authorize an expenditure of over $750 million beginning in Fiscal Year 1970 for a new and improved vocational education program. I am pleased to have been the author on the Senate side of Part G of the 1968 Amendments which provides funds for cooperative vocational education programs. This technique for preparing persons for work has much potential, and is a great untapped resource for vocational education, as well as for other education.

Aware of the fact that neither innovation nor expansion can occur unless there is sufficient professional teaching and administrative personnel, Congress made provision in the 1968 amendments for the training of vocational education personnel. The training component of the 1968 Vocational Education Amendments (an amendment adding Part F to the Education Professions Development Act) authorized a 1970 expenditure of $35 million for training purposes. I ask unanimous consent, Mr. President, that a fact sheet describing the components of Part F be included in the Record immediately following my remarks.

Those of us in the Senate who worked to perfect the Vocational Educational Amendments of 1968 were hopeful that the newly authorized programs would be adequatly funded in 1970. We were heartened when the House Appropriations Committee increased President Johnson's and President Nixon's budget allowance for vocational education, and we were even more encouraged when the full House of Representatives voted to add more than $131 million to the Committee bill, making a total of $488 million.

Mr. President, neither the House Committee nor the full House, however, increased the funds for the training of vocational education personnel—and these are key people who must administer the $488 million of programs and staff the schools. The thrust of the Vocational Education Amendments of 1968 is to modernize vocational-technical training, to make it available to individuals, and areas, not now being served. These changes cannot take place unless there is an adequate supply of trained teachers, coordinators, and administrators. The new vocational education programs may be doomed to failure if Congress does not act now to provide additional training funds for vocational personnel. New institutions can be built and new teaching methods devised, but the schools cannot operate and the new curricula cannot be implemented without an increased supply of adequately trained vocational and educational personnel.

The needs for training and retraining vocational and technical education personnel are just as startlingly clear as the needs for establishing new and better schools. The facts are these:

Enrollments in the public vocational-technical education program are rising and will continue to rise at an accelerated rate, requiring many new teachers. Information available to the Office of Education indicates that enrollments in public vocational-technical education programs will probably reach 8,555,000 in 1969 and increase to 17,250,000 by 1975. Past experience has shown a teacher-student ratio of about 1:50 which would mean that the 1969 teaching force would be approximately 171,400. If the ratio remains the same, the teaching manpower requirement in 1975 based upon the above enrollment projections would be 345,000. Other professional and para-professional support personnel needed to staff vocational education programs throughout the country would be in addition to the above estimates.

Producing additional teachers is a problem since most universities do not offer the proper teacher training programs in vocational-technical education. Although universities and colleges in most States offer teacher training in vocational education areas such as homemaking, industrial arts, agriculture, and trade and industrial education, few offer training in teaching the more technical occupational skills and in new and emerging occupational areas. Very few universities and colleges offer comprehensive advanced degrees designed to develop leadership personnel for vocational-technical education.

Further, the problem of shortage is compounded by the fact that many states have not had the staff or financial assistance necessary to properly assess their needs. The State boards of vocational education, in nearly one-half of the states have not been able in the short time since the enactment of the vocational education amendments to submit a prospectus or plan to make them eligible for funding under Section 553 of Part F. This includes some states which most desperately need to update and expand vocational education programs.

In the states which have accomplished this assessment, however, the response has been overwhelming. Tentatively eligible requests for financial assistance from educational agencies and institutions for 1970 Fiscal Year funds from states which have submitted a plan as of August 1 deadline totalled $34,-772,633, or slightly under the amount of the authorization. These facts underscore the need for massive financial and technical assistance to institutions of education and state boards of vocational education if these training needs are to be met.

So that you may fully appreciate the need for training additional vocational technical education personnel and for retraining presently employed staff, I would like to present a case study by bringing to your attention the problems faced by the State of California in the area of recruiting, training and retraining vocational-technical education personnel.

The information and statistics I am about to present were supplied by the State Department of Education in California.

The State of California currently has some 9,500 vocational and technical education teachers who will be attempting to meet the skill development needs of approximately 1,000,000 secondary, post-secondary, and adult students in California. Earlier in my remarks, Mr. President, I quoted Office of Education figures which indicated that the usual ratio of students to teachers, nationwide, was 50 to 1. In California that ratio is close to 100 to 1, an appalling state of affairs. We cannot deny that the shortage of personnel is a very severe problem.

It is not the only problem, however. Two additional factors compound the issue. One problem revolves around the fact that our rapidly advancing technology has left currently employed teachers far behind in up-to-date knowledge of their subject matter. Recent studies, entitled, *Profiles of Trade and Technical Teachers*, by Melvin L. Barlow and Bruce Reinhart, substantiate this claim. The median age of trade and industrial education teachers employed in 1966–67 was 45.9 years, and the median age when they began teaching was 36.8 years. The majority of these teachers at that time, and I am certain that the situation has not changed, had been away from active participation in the occupation for which they were giving instruction for approximately 8 years. The study concludes it was safe to assume that many of them had "not kept current with changes occurring in the technology of teaching." A second study completetd in 1969, in which 286 leaders responsible for vocational educational programs at the local level in California were contacted, found that the highest priority for the improvement of instruction was "the maintenance of teacher exposure to the latest developments in their subject area, both technical and pedagogical."

The second problem concerns the fact that existing vocational education personnel are simply not adequately trained to cope effectively with the special needs of the major minority groups within the State—the Mexican-Americans, Negroes, and others—who constitute enrollments in vocational education in increasing numbers. A study currently being completed by the University of California underscores this fact.

The State of California Department of Education is very concerned about these problems and desires to take immediate steps to meet the needs of retraining existing personnel and recruiting and training new teachers. They desperately need additional

assistance, however, in order to accomplish this.

The State Department of Education has outlined the vocational-technical education needs of the State of California and carefully constructed a plan of operation to meet those needs. This plan, I have been informed by officials in California, was submitted to the Bureau of Educational Personnel Development for funding. In order to be implemented the California plan requires an expenditure of over $4 million during the next three years, with $892,000 needed for 1970–71. Over this three-year period, nearly 2,000 persons would be trained or retrained. Overall the emphasis would be on improving the quality of teaching in vocational education areas, alleviating the shortage of qualified teachers, and developing a cadre of "master teachers" to teach in places where there are high concentrations of disadvantaged, handicapped, and minority students.

Mr. President, at the current level of resource allocation, there would be no hope of funding the California State Comprehensive Plan. The three-year request submitted by the State of California by itself is nearly ⅘ of the total request for Part F in 1970.

At the present level of funding—$5,750,000—I have been informed (and somewhat reluctantly) that the Vocational Education Training Branch of the Bureau of Educational Personnel Development could fund projects under Sec. 552 involving 160 persons, projects under Sec. 553 involving 3825 participants, and continue projects from 1969 involving 70 teachers. If my amendment were adopted and $20 million was made available to the Vocational Education Training Branch, however, the situation would change. Instead of 4055 participants nationwide, projects could be funded in which 13,495 persons were trained or retrained to be vocational technical education teachers. This is a substantial number and would constitute a good effort to meet current needs.

Mr. President, the failure of American education to meet the job entry needs of today's youth continues to constitute a serious waste of human resources. Vocational education must become an integral part of the educational experience of those students who are planning to enter the job market without continuing their education at the college level. It cannot and should not be assigned a second-class status. The need for vocational education experience is particularly acute for the members of minority groups, for the handicapped, and for those seeking to break the cycle of poverty. For these people the lack of job entry skills may prove the crucial obstacle in a society with an increasing demand for a skilled labor force and an ever-decreasing need for unskilled workers. The proposed level of funding for vocational personnel funding is too low to make an impact, too inadequate to begin to meet the vocational education training needs.

One of the most important and rapidly growing educational institutions in our society is the junior college. These institutions, many of which call themselves comprehensive community colleges, have developed at the rate of one per week, and they offer unusual opportunities to prepare persons for the world of work by offering the 13th and 14th year of education. California, as my colleagues know, has been the pioneer and leader in the community college movement. The last time I checked, there were approximately 90 community colleges in the state, and it was expected that there would be 100 by the early 1970's. Of the total student freshman and sophomore population in California, approximately 85 per cent are enrolled in community colleges. Secretary Finch and the Administration are aware of the importance of community colleges.

Professor John Nealon of Rutgers University, in a recent study, entitled, "The Outlook for Adequate Faculty in Public Postsecondary Vocational Education," reported: "The essential facts are that of the entire working force, less than 15% have baccalaureate or advanced degrees. The balance are employed in the occupational areas where the formal education required of the average worker is shifting upward at an increasing rate. A 12th grade education soon will no longer suffice and the great body of our working force will require one to two years of postsecondary training to be considered for the more desirable and higher paying paraprofessional positions."

Professor Nealon developed statistics showing the types and number of teachers that must be prepared for vocational education programs at the postsecondary level alone. He finds that by 1974 we must almost double our present efforts in preparing personnel for postsecondary programs of vocational-technical education.

The Vocational Education Amendments of 1968 was a landmark bill charting a new direction for vocational education. Educators with whom I have spoken are challenged by both the Act's great potential and the societal problems to which the bill is addressed. But as magnificent a blueprint as it is, the key to the Act's success will not be its form, but its implementation. And this means that meeting the personnel needs is crucial to the success of the entire vocational education program. We simply cannot vote funds for bricks and mortar, experimental programs, books and equipment without providing adequate money to train teachers to serve in those schools to run those programs to use that equipment.

An appropriation of $20 million for the training of vocational education personnel will be a move in the right direction.

Mr. President, I ask of my colleagues that between now and the time H.R. 13111 is reported to the Senate floor, they investigate the situations in their own states. I am certain that each of you will find the shortages just as acute, the inadequacies of present vocational and technical education personnel just as severe as those I found in California. I believe there will be unanimous agreement as to the critical nature of this problem. I hope the Senate will support an appropriations of $20 million for vocational education personnel training for Fiscal Year 1970.

---

## LEAD-BASED PAINT POISONING

Mr. KENNEDY. Mr. President, last Friday, I introduced a bill designed to encourage local communities to develop and implement intensive programs to eliminate the dangers of lead-based paint poisoning. This is a disease that tragically affects more than 200,000 children in the United States each year. My bill will make funds available to eliminate that hazard for many residents of our Nation's slum neighborhoods.

On Sunday, December 7, the Washington Star reported on the hazards of lead poisoning in an article written by Peggy Thomson. Miss Thomson has presented a stirring but grim picture of the incidents of childhood lead poisoning in Washington, D.C. I am pleased to ask unanimous consent to have printed in the RECORD her very revealing presentation carried by the Washington Star.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LEAD POISONING: CHILD KILLER

(By Peggy Thomson)

Linda Peterson, at five, is a sparkly-eyed runabout who holds up a cup when she wants bread and growls in special ways to call her twin sister or her brother. She has recently learned to say Mommy and Daddy and to feed herself with her hands, though these are things she did easily when she was one and a half.

Linda became ill in the summer of 1966. She began to stagger about like a drunk, couldn't keep food on her stomach. One doctor prescribed for an ear infection; another, at Freedman's Hospital, for a sore throat.

When Linda's mother appealed to Childrens Hospital, her daughter was admitted for tests, and then fell into a four-day coma. The diagnosis was acute lead encephalopathy brought on by Linda's eating of leaded plaster and paint.

A recurrence later in the summer left Linda blind (her vision is still severely impaired), unable to walk or to talk. She has been subject since to what her mother calls sieges, when she foams at the mouth and jumps up and down. Though Linda has improved slightly over the past two years, the damage is permanent.

It's such a familiar story, give or take a detail, that people who care about lead poisoning aren't so much saddened as enraged. A man-made preventable disease, without even a bad gene or a virus to blame, goes on hitting children like Linda year after year.

Two things make lead poisoning a disease of the slums. One is that paint, flaking from old walls, is apt to be high in lead (though top coats from the last 20 years were probably done with lead-free paint).

The other is that children from the old housing, "lead-belt" areas tend to have pica, which is an appetite for things that are not food. A classic study on pica was made during the mid-Fifties at Childrens Hospital, linking the disease with emotional needs. Mothers of children with pica, it was found, either worked away from the home during the day and or were themselves dependent, perhaps depressed, persons, many of whom had pica and followed a Southern practice of eating clay and starch.

While infants normally explore the world by mouthing, many poor city children go at it compulsively and much beyond infancy, eating paper, string, putty, cloth or ashes. By preference, the children may concentrate on paint and plaster sweetly flavored with lead acetate. If they do, they need to take in only a small amount regularly—say a chip the size of a postage stamp several times a week for two months—to have downed a lethal dose.

Linda, according to her mother, not only ate the crumbles of plaster and paint that fell from behind the radiator, she chewed her way along the living room window sill and up and down the door jamb. To this day Linda swoops down on bits of broken glass. She swallows cigaret butts, matches, newspaper, when she can get them. And she shoves a chest over to her bedroom window to reach the paint around the upper panes.

No one caught the early signs of Linda's poisoning. There may not have been any. Or there may have been irritability, drowsiness, a little constipation or diarrhea—a cluster of symptoms as one doctor remarked that could describe half the city's kids in summertime.

In the advanced stage the symptoms mimic those of other diseases, so that only a doctor attuned to the possibility of lead poisoning finds it and even he must order a specific test for lead to be sure. Most doctors, perhaps nine out of ten, don't think of lead even when a child enters the hospital in a coma or convulsions. They may treat the child for seizures and send him home again when he gets well.

A further troublesome characteristic of the disease is that it keeps an unpredictable time table. It goes from gut to soft tissue to bone and may then be released into the blood quite suddenly, setting off an acute attack when the child hasn't swallowed any lead for months.

Once the disease is spotted for certain, however, the treatment is known. The patient should be hospitalized, thus removing him from the source of lead; then he is given a series of injections of agents which draw lead from the blood into the urine.

Even with the best treatment though, five percent of the hard-hit children die. One quarter of the children who recover are brain damaged. And virtually all who have recurrences are, like Linda, severely brain damaged. The reason for recurrences is not hard to spot. Once the children are released, lead-free, from the hospital, they return to the environment in which they first contracted the disease, and resume their old habits.

Because this deceptive disease has roots in rundown housing and poverty it takes a combined medical-legislative-administrative program to combat it. No such program has been undertaken in the Nation's Capital, though there are some signs that the pressure of publicity and legal action is beginning to get to the city's bureaucracy.

Childrens Hospital almost alone has been vigilant. The D.C. Department of Health has been slow to act either to alert health professionals and the public or to initiate a screening program among the city's 50,000 one-to-six-year-olds living in dilapidated housing. The Department of Licenses and Inspections has been slower, dragging its heels on even requesting regulations against lead paint from the City Council.

The few doctors and health officials working on the disease (none of them full time) are out of touch with each other for long periods of time. During the first half of this year, Washington's minimal procedures for attacking the disease broke down. Almost no one seemed to notice.

Most cases of lead poisoning go undetected. Estimates from a Rockefeller University conference on lead poisoning in New York last spring were that 225,000 children in the country are affected and that in New York City alone, where 700 children were treated last year, there are 5,000 children "endangered" by the lead level in their blood and 20,000 others "debilitated" by it.

In Washington, lead poisoning isn't even a notifiable disease—doctors don't have to report cases the way they do measles, for example. The Public Health Department doesn't know even how many *diagnosed* cases there are. Its books do show that for 1968, when its lab handled all the lead level tests for the city, 55 children from Childrens had dangerously high lead levels, eight from D.C. General and one from Freedmen's.

Childrens, which at least keeps a count, says it had 45 actual cases last year and 30 through September of this year. At D.C. General, Dr. T. Reichelderfer, chief of pediatrics, said in November, through his secretary, that he did not know how many cases he had either last year or this.

The guess offered by Malcolm Hope, associate director for environmental health in the Public Health Department, is that Washington has 500 lead poisoned children, more than 400 of whom, *if* his guess is correct, are unknowns.

When Rochester's Dr. Evan Charney addressed a lead workshop in St. Louis last year, sponsored by the Scientists' Institute for Public Information, he said flatly that the number of cases in a community depends on how hard people look. "If you live in an American city with a slum population and you don't have many cases of lead poisoning," Charney said, "then your health department isn't doing its job."

Some 15 years ago Childrens Hospital began its research into the causes and treatment of lead poisoning. One result was the hospital's pica clinic, set up by Dr. Reginald Lourie in 1955.

The new clinic's routine was to seek out children with pica and to test them for lead. Beyond medical service it offered help to the mothers in coping with their children's problem (in some cases funding nursery schools) and help in moving or getting rid of the paint hazard. Within the first years the number of cases seen at the hospital tripled. The number of deaths stayed about the same, but there were fewer and less severe recurrences.

Today the pica clinic continues to meet two Friday afternoons a month with about six patients and their mothers, and the staffs of the two Comprehensive Health Care clinics around the corner from the hospital follow their own pica cases with the same procedures.

Childrens still isn't doing enough, according to some. Dr. Fred Solomon, a pediatric psychiatrist at Howard University, charges that "it's professionally irresponsible for a hospital to do these marvelous studies and then to keep treating a preventable disease without trotting down to Congress to do something about it."

Dr. George Cohen, the likable, generously mustachioed physician who has headed the pica clinic for its 14 years, finds the accusation fair enough. He adds, though, that like everyone else working on lead poisoning he is very much part-time. And that by temperament he's "not a grantsman or a proselytizer. I've learned that about myself. I like to do the work."

He isn't convinced either that legislation is all that successful. "In Baltimore where the landlord can be forced to repaint," Cohen points out, "the family often moves out during the mess and then the whole matter may be dropped unless another child moves in and gets poisoned too."

Dr. Cohen thinks the answer is education—raising the level of suspicion throughout the community. That, and catching cases early. Cohen is embarked now on a pilot project to screen 100 siblings and neighbors of his present patients to learn whether in apparently symptom-free children he picks up enough evidence of lead poisoning to make a mass screening worth while.

And he is experimenting with testing techniques using hair and fingernails in the hope that he will come up with a simple, inexpensive indicator for lead poisoning that doesn't apply to 100 other things. The present test—to take a sample of blood or urine and analyze it for lead content—apparently is reliable but, as Cohen points out, it takes sophisticated equipment, highly trained technicians and about a full day to run the test in a laboratory. And the logistics of obtaining samples from large numbers of toddlers are imposing.

Dr. Jane Lin-Fu, of the Children's Bureau of the Department of Health, Education and Welfare, says her office is seeking the same ammunition by funding research into a micro-technique based on a finger prick of blood. She agrees with Cohen's priorities. "Until we get an instant mashed potato sort of thing," she says, "everyone's hands are tied."

It is worth pointing out, however, that one city, Chicago, has carried out a successful mass screening program using the present chemical blood test. Since 1966, Chicago has tested 160,000 children. Chicago simply put its manpower to the task, sending workers into the streets from 10 urban development centers to collect children for testing at public health clinics that are kept open nights and Saturdays.

Between 1955 and late last year the pica clinic at Childrens was about the only positive step made to combat the disease in the entire city. This, in spite of the fact that within the health bureaucracy there are individuals concerned about the disease and aware of the long-time, useless spinning of administrative wheels.

One of these individuals is Dudley Anderson, chief of accident prevention at the Public Health Department. Anderson came to Washington from Baltimore, which started moving against the problem 20 years ago. (Modestly, to be sure—at that time lead paint had to be removed from the building in which a child had died from the disease.)

Anderson, though, admits he finds the bureaucratic machinery hard to move on the simplest of matters, and lead poisoning, whatever else it is, is not a simple matter. In 1966 Anderson and the Health Department's lab chief submitted a $160,000 project, half the money to go for research in lead poisoning, half for a large-scale screening. The department turned down the request. Anderson says the disease simply did not have the appeal to win priority. "Here," he says, "we are always robbing Peter to pay Paul."

Labs chief Dr. G. W. H. Schepers has a less resilient attitude. A pathologist with a background of published lead research, Schepers has long been distressed by the increase of lead in the evironment. In normal brain tissue over a 30-year period he calculates it to be tenfold. He is scornful of the three grams of lead per gallon which "our badly made cars" spew into the city air. He speaks bitterly of the department's refusal to fund the research and screening project and of the meager use to which his lab has been put for testing lead levels.

In 1968 his chemist received 500 blood and urine samples for such tests, 450 of them from Childrens. "Now you know that's ridiculous," he says. "We should have handled ten times as many. I can only think," Schepers adds acidly, "people aren't much interested in lead."

One person more than casually interested in lead is a young doctor who doesn't even work in the field. He is Dr. John Mills, 29, a virologist at the National Institutes of Health and a member of the Medical Committee for Human Rights, a loosely structured group of activist health professionals characterized by Dr. Cohen as "good young fellows who don't mind kicking up some sand."

Mills simply assigned himself the task of shaking up the bureaucracy. It is to him, more than to any other individual, that credit is due for getting the District government to move—though the movement has been very slow indeed.

Mills participated in a successful stratagem to end run the bureaucracy by taking the matter to the courts. A young lawyer told the doctor of the tragic and typical case of Linda Peterson, and of the need for sharp medical facts. Mills went to the Peterson apartment, scraped paint chips from the walls with a pocket knife, and then had the paint chips tested for lead. He passed on the relevant medical information to the attorney, Herbert Muriel III. Last April, in the U.S. District Court for D.C., Muriel won from the landlord $70,000 in damages for his client.

Muriel says now that although he knew of only two similar cases prior to his and none in Washington, he never had any doubts about the case. "Article 260 section 2605 of the D.C. housing regulations states that a landlord must remove loose or peeling wall covering or paint on interior surfaces."

Muriel also remembers with a kind of wry amusement taking a deposition from the landlord. "When I asked her, 'Do you own the property at 5509 9th St. NW?' she had to ask her lawyer, 'Do I?' before she answered, 'Yes.' "

The money won in court will not undo the damage done to Linda. It may, in fact, be eaten up by the costs of putting the child in an institution, should that become necessary. But even the threat of such damage suits may convince a lot of landlords to remove the old lead paint.

In a more direct approach, more than a year ago Mills brought together Dr. Cohen, officials from Public Health and from the housing division of the Department of Licenses and Inspections—the people who work on lead poisoning in the city but who hadn't talked to each other for months. "I thought

it would be useful," Mills says, reviewing what he did, "to put together a program graded from Essential to Wouldn't-It-Be-Nice."

Among suggestions for the future were: city regulations against lead paint, public information, pica clinics for all D.C. hospitals serving children, mass screening or at least a screening of all one to three-year-olds coming from old houses who are presently hospitalized or who are being seen in clinics.

Agreed upon as immediately essential was a reporting system: all cases of lead poisoning to be reported by doctors to the housing inspectors who then would collect paint samples for testing at the Public Health lab and, where necessary, order the landlord to remove the lead paint.

The procedure was circuitous. But at least it gave doctors some control over their patients' environment. (Health would like to have done the whole job up to action against the landlord but lost out to Inspections, which claimed the exclusive right to go into the homes.) This was in November, 1968. Eight months later this "immediately essential" procedure had not begun to work.

In July Dr. Bonnie Peacock, serving her first year with the Child Health Center on W Street near Childrens, got it started by threatening a tantrum. She demanded to be told what the city's health officials would be willing to recognize as an emergency if not what she had at the time.

What she had, at Childrens, were four patients, all suffering from lead poisoning and all from the same address—1330 U St. NW. She had Maurice Peele, Melissa Johnson and the two Cooper children, MacArthur Jr., and Natalie, 18 months old and hospitalized for the third time in six months. Dr. Peacock also was treating 16 other patients for lead poisoning at the time. Over the past eight months she had requested paint analyses from the Health Department lab for each one, without getting a single response.

Both Cooper children were ready to be released though it was unthinkable to return them to their apartment. The mother had broken down over the suggestion of a convalescent home. The family hadn't money for a move. And the landlord, Leslie Hayes, at a request for repairs had in turn hollered at the Coopers that he wasn't their babysitter, sent a painter to spray over the flaking radiator with a $1.10 can of paint, and threatened to raise the rent or put the family out.

Dr. Peacock's explosion surfaced the news that the Department of Licenses and Inspections had assigned only one of its housing inspectors to collect paint samples. He was away on two weeks leave. (This inspector later explained to a reporter his backlog of paint requests by saying he only did them in the course of other inspections in the same neighborhood. "I'm not supposed to use a lot of gas," he said.)

Anderson, at Health, was appealed to next. He had no authority to enter a home, but he arranged for the health lab's analytic chemist to accompany an inspector to the U Street address and to show him how to collect samples.

Within two days the teaspoonfuls of paint were slipped into envelopes, labeled and tested. The lab chemist leached out the lead content, measured it with an atomic absorption spectrophotometer and telephoned his findings: for the Coopers' apartment, four percent lead. (One half teaspoon of that contains 220 micrograms of lead, or 40 times a child's safe absorption, though the body in any case can't absorb anywhere near that much lead at one time.)

Under broad regulations against hazardous conditions, the L&I department ordered the landlord to remove within 18 days all the paint from the bedroom windowsill and the living room walls, which were found on repeat tests to be 16 percent lead. The landlord, declaring himself to be a sorely injured party, complied.

The landlord has a point. In many cases he didn't put on the offending paint. And getting it off is both tricky and expensive. Sanding sends up a cloud of toxic dust. Burning makes fumes and is a hazard in itself. The method favored by George Erickson at the Department of Housing and Urban Development, who seems to have done the only effective worrying about the problem in the city, is to use a water rinsable solvent, then apply a steamer (the kind that's rented for wallpaper removal) and scrape off the loosened paint with a wide knife. He thinks the technical people ought to come up with something better. Paint removal, his way, costs about $100 a room.

The case for a city-wide paint removal program, however, is compelling not only from the humanitarian point of view. It also would make economic sense. A Baltimore chart lists costs as: paint removal for a row house from $250 to $1,200; treatment for lead-poisoned child $1,800; treatment of a child with moderate brain damage $17,000, or severe brain damage $222,000.

Under the circumstances some kind of tax credit might be an appropriate incentive to the landlord, health officials feel, or a large-scale paint removal job covering a neighborhood might be contracted out to local labor. "We can't rule that out," says one official, "just because we'd be improving somebody's property."

Just as Dr. Peacock's agitated call a number of things have happened here, including a lively flow of paint chips through the health lab and a series of seminars put on by Public Health for the housing inspectors. At the first of the seminars Carroll Swanson, acting housing administrator, announced that paint inspections would get top priority and that inspectors would be trained to spot pica or chewed paint in the course of their rounds and to make referrals to the Public Health nurse.

Swanson has also announced that his department is drafting for the City Council regulations requiring the removal of lead paint where it's accessible to children. The date when these may be expected has been moved up several times, to Jan. 1.

Thus there are some signs that Washington is moving against what has been called the silent epidemic. But Washington, just as other cities, has a long way to go.

The disease now is well enough known that bills to combat it have been introduced in Congress. Rep. William Ryan, D-N.Y., has introduced three bills in the House, one to fund lead poisoning detection and treatment programs, the other two having to do with eliminating lead paint from old housing. In the Senate, Sen. Ted Kennedy, D-Mass., is sponsoring similar legislation.

But the disease still is so little known that these bills are given very little chance to be enacted into law.

Meanwhile, there will be more cases like that of Linda Peterson. Many of them—perhaps most of them—will go completely undetected or will be diagnosed incorrectly.

It is pertinent to recall a report written by Dr. Lourie of Childrens Hospital, over a decade ago. "We saw the same children over and over again being brought in for de-leading," Lourie wrote, "and each time with evidence of more residual brain damage. We were seeing mental retardates and institutional vegetables created right under our eyes."

And it is pertinent to recall that, as of now, many children suffering from the disease are not even lucky enough to be taken to Childrens Hospital.

## THE NEW CONSERVATION

Mr. NELSON. Mr. President, on November 19, 1969, I introduced the Environmental Quality Education Act, which now has the cosponsorship of 14 Senators. The main purpose of the proposed legislation to emphasize the educational side of our environmental crisis. We cannot improve the quality of our environment and our lives by simply relying on technological solutions. We have to increase our understanding of this crisis and expand the conservation constituency through bold and innovative programs in education. We have to establish the goal of developing a new conservation ethic.

This implies that attitudes and values are in need of review, change, or revision. Education, I believe, is the best way to encourage such a change in a democratic society.

Dr. Lynn White, Jr., has touched on many of these crucial values which demand soul-searching in his provocative article entitled "The Historical Roots of Our Ecological Crisis," published in Science magazine.

Dr. White maintains that many facets of our ecological crisis are rooted in or derived from our Judeo-Christian heritage. He says:

> By destroying pagan animism, Christianity made it possible to exploit nature in a mood of indifference to the feelings of natural objects. What we do about ecology depends on our ideas of the man-nature relationship.

But the ecological crisis will continue, he concludes, until we reject the idea that nature has no reason for existence save to serve man.

Man has the capacity to distort and destroy his environment to the point where he will, in a short time, eliminate himself. Man is an endangered specie. He is part of the environment. He can no longer exploit, manage, and use our natural resources with the same impunity as in the past.

Human ecology, the heart of a national program in environmental education, will improve the quality of our lives by teaching us how to listen to the environment and heed its warnings. This is the path to the new conservation.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objetcion, the article was ordered to be printed in the RECORD, as follows:

THE HISTORICAL ROOTS OF OUR ECOLOGIC CRISIS

(By Lynn White, Jr.)[1]

A conversation with Aldous Huxley not infrequently put one at the receiving end of an unforgettable monologue. About a year before his lamented death he was discoursing on a favorite topic: Man's unnatural treatment of nature and its sad results. To illustrate his point he told how, during the previous summer, he had returned to a little valley in England where he had spent many happy months as a child. Once it had been composed of delightful grassy glades; now it was becoming overgrown with unsightly brush because the rabbits that formerly kept such growth under control had largely succumbed to a disease, myxomatosis, that was

[1] The author is professor of history at the University of California, Los Angeles. This is the text of a lecture delivered December 26, 1966, at the Washington meeting of the AAAS.

deliberately introduced by the local farmers to reduce the rabbits' destruction of crops. Being something of a Philistine, I could be silent no longer, even in the interests of great rhetoric. I interrupted to point out that the rabbit itself had been brought as a domestic animal to England in 1176, presumably to improve the protein diet of the peasantry.

All forms of life modify their contexts. The most spectacular and benign instance is doubtless the coral polyp. By serving its own ends, it has created a vast undersea world favorable to thousands of other kinds of animals and plants. Ever since man became a numerous species he has affected his environment notably. The hypothesis that fire-drive method of hunting created the world's great grasslands and helped to exterminate the monster mammals of the Pleistocene from much of the globe is plausible, if not proved. For 6 millennia at least, the banks of the lower Nile have been a human artifact rather than the swampy African jungle which nature, apart from man, would have made it. The Aswan Dam, flooding 5000 square miles, is only the latest stage in a long process. In many regions terracing or irrigation, overgrazing, the cutting of forests by Romans to build ships to fight Carthaginians or by Crusaders to solve the logistics problems of their expeditions, have profoundly changed some ecologies. Observation that the French landscape falls into two basic types, the open fields of the north and the *bocage* of the south and west, inspired Marc Bloch to undertake his classic study of medieval agricultural methods. Quite unintentionally, changes in human ways often affect nonhuman nature. It has been noted, for example, that the advent of the automobile eliminated huge flocks of sparrows that once fed on the horse manure littering every street.

The history of ecologic change is still so rudimentary that we know little about what really happened, or what the results were. The extinction of the European aurochs as late as 1627 would seem to have been a simple case of overenthusiastic hunting. On more intricate matters it often is impossible to find solid information. For a thousand years or more the Frisians and Hollanders have been pushing back the North Sea, and the process is culminating in our own time in the reclamation of the Zuider Zee. What, if any, species of animals, birds, fish, shore life, or plants have died out in the process? In their epic combat with Neptune have the Netherlanders overlooked ecological values in such a way that the quality of human life in the Netherlands has suffered? I cannot discover that the questions have ever been asked, much less answered.

People, then, have often been a dynamic element in their own environment, but in the present state of historical scholarship we usually do not know exactly when, where, or with what effects man-induced changes came. As we enter the last third of the 20th century, however, concern for the problem of ecologic backlash is mounting feverishly. Natural science, conceived as the effort to understand the nature of things, had flourished in several eras and among several peoples. Similarly there had been an age-old accumulation of technological skills, sometimes growing rapidly, sometimes slowly. But it was not until about four generations ago that Western Europe and North America arranged a marriage between science and technology, a union of the theoretical and the empirical approaches to our natural environment. The emergence in widespread practice of the Baconian creed that scientific knowledge means technological power over nature can scarcely be dated before about 1850, save in the chemical industries, where it is anticipated in the 18th century. Its acceptance as a normal pattern of action may mark the greatest event in human history since the invention of agriculture, and perhaps in nonhuman terrestrial history as well.

Almost at once the new situation forced the crystallization of the novel concept of ecology; indeed, the word *ecology* first appeared in the English language in 1873. Today, less than a century later, the impact of our race upon the environment has so increased in force that it has changed in essence. When the first cannons were fired, in the early 14th century, they affected ecology by sending workers scrambling to the forests and mountains for more potash, sulfur, iron ore, and charcoal, with some resulting erosion and deforestation. Hydrogen bombs are of a different order: and fought with them might alter the genetics of all life on this planet. By 1285 London had a smog problem arising from the burning of soft coal, but our present combustion of fossil fuels threatens to change the chemistry of the globe's atmosphere as a whole, with consequences which we are only beginning to guess. With the population explosion, the carcinoma of planless urbanism, the now geological deposits of sewage and garbage, surely no creature other than man has ever managed to foul its nest in such short order.

There are many calls to action, but specific proposals, however worthy as individual items, seem too partial, palliative, negative: ban the bomb, tear down the billboards, give the Hindus contraceptives and tell them to eat their sacred cows. The simplest solution to any suspect change is, of course, to stop it, or, better yet, to revert to a romanticized past: make those ugly gasoline stations look like Anne Hathaway's cottage or (in the Far West) like ghost-town saloons. The "wilderness area" mentality invariably advocates deep-freezing an ecology, whether San Gimignano or the High Sierra, as it was before the first Kleenex was dropped. But neither atavism nor prettification will cope with the ecologic crisis of our time.

What shall we do? No one yet knows. Unless we think about fundamentals, our specific measures may produce new backlashes more serious than those they are designed to remedy.

As a beginning we should try to clarify our thinking by looking, in some historical depth, at the presuppositions that underlie modern technology and science. Science was traditionally aristocratic, speculative, intellectual in intent; technology was lower-class, empirical, action-oriented. The quite sudden fusion of these two, towards the middle of the 19th century, is surely related to the slightly prior and contemporary democratic revolutions which, by reducing social barriers, tended to assert a functional unity of brain and hand. Our ecologic crisis is the product of an emerging, entirely novel, democratic culture. The issue is whether a democratized world can survive its own implications. Presumably we cannot unless we rethink our axioms.

### THE WESTERN TRADITIONS OF TECHNOLOGY AND SCIENCE

One thing is so certain that it seems stupid to verbalize it: both modern technology and modern science are distinctively Occidental. Our technology has absorbed elements from all over the world, notably from China; yet everywhere today, whether in Japan or in Nigeria, successful technology is Western. Our science is the heir to all the sciences of the past, especially perhaps to the work of the great Islamic scientists of the Middle Ages, who so often outdid the ancient Greeks in skill and perspicacity: al-Razi in medicine, for example; or ibnal-Haytham in optics; or Omar Khyyám in mathematics. Indeed, not a few works of such geniuses seem to have vanished in the original Arabic and to survive only in medieval Latin translations that helped to lay the foundations for later Western developments. Today, around the globe, all significant science is Western in style and method, whatever the pigmentation or language of the scientists.

A second pair of facts is less well recognized because they result from quite recent historical scholarship. The leadership of the West, both in technology and in science, is far older than the so-called Scientific Revolution of the 17th century or the so-called Industrial Revolution of the 18th century. These terms are in fact outmoded and obscure the true nature of what they try to describe—significant stages in two long and separate developments. By A.D. 1000 at the latest—and perhaps, feebly, as much as 200 years earlier—the West began to apply water power to industrial processes other than milling grain. This was followed in the late 12th century by the harnessing of wind power. From simple beginnings, but with remarkable consistency of style, the West rapidly expanded its skills in the development of power machinery, labor-saving devices, and automation. Those who doubt should contemplate that most monumental achievement in the history of automation: the weight-driven mechanical clock, which appeared in two forms in the early 14th century. Not in craftsmanship but in basic technological capacity, the Latin West of the later Middle Ages far outstripped its elaborate, sophisticated, and esthetically magnificent sister cultures, Byzantium and Islam. In 1444 a great Greek ecclesiastic, Bessarion, who had gone to Italy, wrote a letter to a prince in Greece. He is amazed by the superiority of western ships, arms, textiles, glass. But above all he is astonished by the spectable of water wheels sawing timbers and pumping the bellows of blast furnaces. Clearly, he had seen nothing of the sort in the Near East.

By the end of the 15th century the technological superiority of Europe was such that its small, mutually hostile nations could spill out over all the rest of the world, conquering, looting, and colonizing. The symbol of this technological superiority is the fact that Portugal, one of the weakest states of the Occident, was able to become, and to remain for a century, mistress of the East Indies. And we must remember that the technology of Vasco da Gama and Albuquerque was built by pure empiricism, drawing remarkably little support or inspiration from science.

In the present-day vernacular understanding, modern science is supposed to have begun in 1543, when both Copernicus and Vesalius published their great works. It is no derogation of their accomplishments, however, to point out that such structures as the *Fabrica* and the *De revolutionibus* do not appear overnight. The distinctive Western tradition of science, in fact, began in the late 11th century with a massive movement of translation of Arabic and Greek scientific works into Latin. A few notable books—Theophrastus, for example—escaped the West's avid new appetite for science, but within less than 200 years effectively the entire corpus of Greek and Muslim science was available in Latin, and was being eagerly read and criticized in the new European universities. Out of criticism arose new observation, speculation, and increasing distrust of ancient authorities. By the late 13th century Europe had seized global scientific leadership from the faltering hands of Islam. It would be as absurd to deny the profound originality of Newton, Galileo, or Copernicus as to deny that of the 14th century scholastic scientists like Buridan or Oresme on whose work they built. Before the 11th century, science scarcely existed in the Latin West, even in Roman times. From the 11th century onward, the scientific sector of Occidental culture has increased in a steady crescendo.

Since both our technological and our scientific movement got their start, acquired their character, and achieved world dominance in the Middle Ages, it would seem that

we cannot understand their nature or their present impact upon ecology without examining fundamental medieval assumptions and developments.

MEDIEVAL VIEW OF MAN AND NATURE

Until recently, agriculture has been the chief occupation even in "advanced" societies; hence, any change in methods of tillage has much importance. Early plows, drawn by two oxen, did not normally turn the sod but merely scratched it. Thus, cross-plowing was needed and fields tended to be squarish. In the fairly light soils and semiarid climates of the Near East and Mediterranean, this worked well. But such a plow was inappropriate to the wet climate and often sticky soils of northern Europe. By the latter part of the 7th century after Christ, however, following obscure beginnings, certain northern peasants were using an entirely new kind of plow, equipped with a vertical knife to cut the line of the furrow, a horizontal share to slice under the sod, and a moldboard to turn it over. The friction of this plow with the soil was so great that it normally required not two but eight oxen. It attacked the land with such violence that cross-plowing was not needed, and fields tended to be shaped in long strips.

In the days of the scratch-plow, fields were distributed generally in units capable of supporting a single family. Subsistence farming was the presupposition. But no peasant owned eight oxen: to use the new and more efficient plow, peasants pooled their oxen to form large plow-teams, originally receiving (it would appear) plowed strips in proportion to their contribution. Thus, distribution of land was based no longer on the needs of a family but, rather, on the capacity of a power machine to till the earth. Man's relation to the soil was profoundly changed. Formerly man had been part of nature; now he was the exploiter of nature. Nowhere else in the world did farmers develop any analogous agricultural implement. Is it coincidence that modern technology, with its ruthlessness toward nature, has so largely been produced by descendants of these peasants of northern Europe?

This same exploitive attitude appears slightly before A.D. 830 in Western illustrated calendars. In older calendars the months were shown as passive personfications. The new Frankish calendars, which set the style for the Middle Ages, are very different: they show men coercing the world around them—plowing, harvesting, chopping trees, butchering pigs. Man and nature are two things, and man is master.

These novelties seem to be in harmony with larger intellectual patterns. What people do about their ecology depends on what they think about themselves in relation to things around them. Human ecology is deeply conditioned by beliefs about our nature and destiny—that is, by religion. To Western eyes this is very evident in, say India or Ceylon. It is equally true of ourselves and of our medieval ancestors.

The victory of Christianity over paganism was the greatest psychic revolution in the history of our culture. It has become fashionable today to say that, for better or worse, we live in "the post-Christian age." Certainly the forms of our thinking and language have largely ceased to be Christian, but to my eye the substance often remains amazingly akin to that of the past. Our daily habits of action, for example, are dominated by an implicit faith in perpetual progress which was unknown either to Greco-Roman antiquity or to the Orient. It is rooted in, and is indefensible apart from, Judo-Christian teleology. The fact that Communists share it merely helps to show what can be demonstrated on many other grounds: that Marxism, like Islam, is a Judeo-Christian heresy. We continue today to live, as we have lived for about 1700 years, very largely in a context of Christian axioms.

What did Christianity tell people about their relations with the environment?

While many of the world's mythologies provide stories of creation, Greco-Roman mythology was singularly incoherent in this respect. Like Aristotle, the intellectuals of the ancient West denied that the visible world had had a beginning. Indeed, the idea of a beginning was impossible in the framework of their cyclical notion of time. In sharp contrast, Christianity inherited from Judaism not only a concept of time as nonrepetitive and linear but also a striking story of creation. By gradual stages a loving and all-powerful God had created light and darkness, the heavenly bodies, the earth and all its plants, animals, birds, and fishes. Finally, God had created Adam and, as an afterthought, Eve to keep man from being lonely. Man named all the animals, thus establishing his dominance over them. God planned all of this explicitly for man's benefit and rule; no item in the physical creation had any purpose save to serve man's purposes. And, although man's body is made of clay, he is not simply part of nature; he is made in God's image.

Especially in its Western form, Christianity is the most anthropocentric religion the world has seen. As early as the 2nd century both Tertullian and Saint Irenaeus of Lyons were insisting that when God shaped Adam he was foreshadowing the image of the incarnate Christ, the Second Adam. Man shares in great measure God's transcendence of nature. Christianity, in absolute contrast to ancient paganism and Asia's religions (except, perhaps, Zoroastrianism), not only established a dualism of man and nature but also insisted that it is God's will that man exploit nature for his proper ends.

At the level of the common people this worked out in an interesting way. In Antiquity every tree, every spring, every stream, every hill had its own *genius loci*, its guardian spirit. These spirits were accessible to men, but were very unlike men; centaurs, fauns, and mermaids show their ambivalence. Before one cut a tree, mined a mountain, or dammed a brook, it was important to placate the spirit in charge of that particular situation, and to keep it placated. By destroying pagan animism, Christianity made it possible to exploit nature in a mood of indifference to the feelings of natural objects.

It is often said that for animism the Church substituted the cult of saints. True; but the cult of saints is functionally quite different from animism. The saint is not *in* natural objects; he may have special shrines, but his citizenship is in heaven. Moreover, a saint is entirely a man; he can be approached in human terms. In addition to saints, Christianity of course also had angels and demons inherited from Judaism and perhaps, at one remove, from Zoroastrianism. But these were all as mobile as the saints themselves. The spirits *in* natural objects, which formerly had protected nature from man, evaporated. Man's effective monopoly on spirit in this world was confirmed, and the old inhibitions to the exploitation of nature crumbled.

When one speaks in such sweeping terms, a note of caution is in order. Christianity is a complex faith, and its consequences differ in differing contexts. What I have said may well apply to the medieval West, where in fact technology made spectacular advances. But the Greek East, a highly civilized realm of equal Christian devotion, seems to have produced no marked technological innovation after the late 7th century, when Greek fire was invented. The key to the contrast may perhaps be found in a difference in the tonality of piety and thought which students of comparative theology find between the Greek and the Latin Churches. The Greeks believed that sin was intellectual blindness, and that salvation was found in illumination, orthodoxy—that is, clear thinking. The Latins, on the other hand, felt that sin was moral evil, and that salvation was to be found in right conduct. Eastern theology has been intellectualist. Western theology has been voluntarist. The Greek saint contemplates; the Western saint acts. The implications of Christianity for the conquest of nature would emerge more easily in the Western atmosphere.

The Christian dogma of creation, which is found in the first clause of all the Creeds, has another meaning for our comprehension of today's ecologic crisis. By revelation, God had given man the Bible, the Book of Scripture. But since God had made nature, nature also must reveal the divine mentality. The religious study of nature for the better understanding of God was known as natural theology. In the early Church, and always in the Greek East, nature was conceived primarily as a symbolic system through which God speaks to men: the ant is a sermon to sluggards; rising flames are the symbol of the soul's aspiration. This view of nature was essentially artistic rather than scientific. While Byzantium preserved and copied great numbers of ancient Greek scientific texts, science as we conceive it could scarcely flourish in such an ambience.

However, in the Latin West by the early 13th century natural theology was following a very different bent. It was ceasing to be the decoding of the physical symbols of God's communication with man and was becoming the effort to understand God's mind by discovering how his creation operates. The rainbow was no longer simply a symbol of hope first sent to Noah after the Deluge: Robert Grosseteste, Friar Roger Bacon, and Theodoric of Freiberg produced startlingly sophisticated work on the optics of the rainbow, but they did it as a venture in religious understanding. From the 13th century onward, up to and including Leibnitz and Newton, every major scientist, in effect, explained his motivations in religious terms. Indeed, if Galileo had not been so expert an amateur theologian he would have got into far less trouble: the professionals resented his intrusion. And Newton seems to have regarded himself more as a theologian than as a scientist. It was not until the late 18th century that the hypothesis of God became unnecessary to many scientists.

It is often hard for the historian to judge when men explain why they are doing what they want to do, whether they are offering real reasons or merely culturally acceptable reasons. The consistency with which scientists during the long formative centuries of Western science said that the task and the reward of the scientist was "to think God's thoughts after him" leads one to believe that this was their real motivation. If so, then modern Western science was cast in a matrix of Christian theology. The dynamism of religious devotion, shaped by the Judeo-Christian dogma of creation, gave it impetus.

AN ALTERNATIVE CHRISTIAN VIEW

We would seem to be headed toward conclusions unpalatable to many Christians. Since both *science* and *technology* are blessed words in our contemporary vocabulary, some may be happy at the notions, first, that, viewed historically, modern science is an extrapolation of natural theology and, second, that modern technology is at least partly to be explained as an Occidental, voluntarist realization of the Christian dogma of man's transcendence of, and rightful mastery over, nature. But, as we now recognize, somewhat over a century ago science and technology—hitherto quite separate activities—joined to give mankind powers which, to judge by many of the ecologic effects, are out of control. If so, Christianity bears a huge burden of guilt.

I personally doubt that disastrous ecologic backlash can be avoided simply by applying to our problems more science and more tech-

nology. Our science and technology have grown out of Christian attitudes toward man's relation to nature which are almost universally held not only by Christians and neo-Christians but also by those who fondly regard themselves as post-Christians. Despite Copernicus, all the cosmos rotates around our little globe. Despite Darwin, we are *not*, in our hearts, part of the natural process. We are superior to nature, contemptuous of it, willing to use it for our slightest whim. The newly elected Governor of California, like myself a churchman but less troubled than I, spoke for the Christian tradition when he said (as is alleged), "when you've seen one red-wood tree, you've seen them all." To a Christian a tree can be more than a physical fact. The whole concept of the sacred grove is alien to Christianity and to the ethos of the West. For nearly 2 millennia Christian missionaries have been chopping down sacred groves, which are idolatrous because they assume spirit in nature.

What we do about ecology depends on our ideas of the man-nature relationship. More science and more technology are not going to get us out of the present ecologic crisis until we find a new religion, or rethink our old one. The beatniks, who are the basic revolutionaries of our time, show a sound instinct in their affinity for Zen Buddhism, which conceives of the man-nature relationship as very nearly the mirror image of the Christian view. Zen, however, is as deeply conditioned by Asian history as Christianity is by the experience of the West, and I am dubious of its viability among us.

Possibly we should ponder the greatest radical in Christian history since Christ: Saint Francis of Assisi. The prime miracle of Saint Francis is the fact that he did not end at the stake, as many of his left-wing followers did. He was so clearly heretical that a General of the Franciscan Order, Saint Bonaventura, a great and perceptive Christian, tried to suppress the early accounts of Franciscanism. The key to an understanding of Francis is his belief in the virtue of humility—not merely for the individual but for man as a species. Francis tried to depose man from his monarchy over creation and set up a democracy of all God's creatures. With him the ant is no longer simply a homily for the lazy, flames a sign of the thrust of the soul toward union with God; now they are Brother Ant and Sister Fire, praising the Creator in their own ways as Brother Man does in his.

Later commentators have said that Francis preached to the birds as a rebuke to men who would not listen. The records do not read so: he urged the little birds to praise God, and in spiritual ecstasy they flapped their wings and chirped rejoicing. Legends of saints, especially the Irish saints, had long told of their dealings with animals but always, I believe, to show their human dominance over creatures. With Francis it is different. The land around Gubbio in the Apennines was being ravaged by a fierce wolf. Saint Francis, says the legend, talked to the wolf and persuaded him of the error of his ways. The wolf repented, died in the odor of sanctity, and was buried in consecrated ground.

What Sir Steven Ruciman calls "the Franciscan doctrine of the animal soul" was quickly stamped out. Quite possibly it was in part inspired, consciously or unconsciously, by the belief in reincarnation held by the Cathar heretics who at that time teemed in Italy and southern France, and who presumably had got it originally from India. It is significant that at just the same moment, about 1200, traces of metempsychosis are found also in western Judaism, in the Provencal *Cabbala*. But Francis held neither to transmigration of souls nor to pantheism. His view of nature and of man rested on a unique sort of pan-psychism of all things animate and inanimate, designed for the glorification of their transcendent Creator, who, in the ultimate gesture of cosmic humility, assumed flesh, lay helpless in a manger, and hung dying on a scaffold.

I am not suggesting that many contemporary Americans who are concerned about our ecologic crisis will be either able or willing to counsel with wolves or exhort birds. However, the present increasing disruption of the global environment is the product of a dynamic technology and science which were originating in the Western medieval world against which Saint Francis was rebelling in so original a way. Their growth cannot be understood historically apart from distinctive attitudes toward nature which are deeply grounded in Christian dogma. The fact that most people do not think of these attitudes as Christian is irrelevant. No new set of basic values has been accepted in our society to displace those of Christianity. Hence we shall continue to have a worsening ecologic crisis until we reject the Christian axiom that nature has no reason for existence save to serve man.

The greatest spiritual revolutionary in Western history, Saint Francis, proposed what he thought was an alternative Christian view of nature and man's relation to it: he tried to substitute the idea of the equality of all creatures, including man, for the idea of man's limitless rule of creation. He failed. Both our present science and our present technology are so tinctured with orthodox Christian arrogance toward nature that no solution for our ecologic crisis can be expected from them alone. Since the roots of our trouble are so largely religious, the remedy must also be essentially religious, whether we call it that or not. We must rethink and refeel our nature and destiny The profoundly religious, but heretical, sense of the primitive Franciscans for the spiritual autonomy of all parts of nature may point a direction. I propose Francis as a patron saint for ecologists.

## SALUTE TO UNDERWRITERS LABORATORIES

Mr. SMITH of Illinois. Mr. President, permit me to ask that you grant me your attention for a few moments to discourse briefly on a subject having to do with life, liberty, and the pursuit of happiness. I shall not digress beyond that theme but do wish, because it is important, to trace the growth in the United States of the science and technology of preservation as it has a bearing on the welfare of all of the people of our great country.

If, as I stand before you, I seem more erect, or my chest expands beyond its norm, it will be the result of pride. For what I want to talk about originated in my own dear State of Illinois, whence it has grown to national and international importance.

It is a sad but true fact that our lives today are exceedingly complex: That the pressures on us all and the demands on our time are almost more than anyone can cope with. The days flee by with much left undone and only the most pressing matters handled. As a result, we fail sometimes, nay, frequently, to take cognizance of, to recognize, to appreciate how well off we are and why.

The fire siren in the night causes shudders of fear. But when the siren is silent there is no thought of fire. A burglary makes headlines. But when our possessions are secure in home or bank or store or museum, there is no news story.

Which, I ask, which, is the greater story?

Senators will not find in any compilation of statistics how many millions of people have had no accidents; how many billions of dollars of buildings and contents did not burn; how many homes, offices, and other places had no thefts.

I think there is no question as to which is the bigger story.

Happenstance? Not at all.

Will of God? I doubt it.

Planned? Yes. Definitely.

It came about in this manner:

In 1893, the world was dazzled by a spectacular display of a new kind of electric lighting which illuminated the interior and exterior of the buildings of the Great Columbian Exposition at Chicago—the first large-scale public use of Thomas Edison's invention: the incandescent electric lamp. The effect enchanted all who saw it, and those who only saw pictures or heard about it were also enthralled.

That, Mr. President, was the opening of a new era—a new era for better things for mankind.

But all was not completely serene at the exposition. The novel wiring and equipment caused sporadic fires. Especially vulnerable was the grand Palace of Electricity. Romanesque in design, indestructible in appearance, it was actually a flammable shell of jute fire and plaster, crisscrossed by a series of new and untried electrical hookups.

At this point in history there appeared on the scene an engineer named William Henry Merrill, who was hired to find the reasons for these electrical fires and to prevent them.

As well as being an excellent engineer, Merrill must have been a man of great foresight and imagination. Certainly he was a man with an idea for which the time was ripe.

Evidently he realized that this new form of electricity would revolutionize the world. Perhaps he also envisioned the enormous, emerging technological explosion which was to take place in many fields. At any rate, he had the wisdom to see the opportunity, yes, and the need, to employ science to limit the destructiveness of science.

So, after finishing his work at the Columbian Exposition, Merrill, with two assistants and $350 worth of scientific equipment, set up, over the horse stalls of a fire station in Chicago, a laboratory for the purpose of testing for safety. That was in 1894. Seventy-five years ago.

I stand before you relating this story for it is of great import. From that modest start 75 years ago has come the largest safety-testing organization in the world. I speak, of course, of Underwriters Laboratories, that unique and remarkably effective, independent public service organization which originated in my State, and from whose good works we all benefit in many ways, albeit unbeknown to most of us.

As I said at the beginning of this address, I would speak of life, liberty, and the pursuit of happiness. And that we should take stock of how well off we in the United States are, and why.

Senators will recall that in the last 75

years, our country has had the greatest social and technological development any country, in any time, has ever achieved. Our greater productivity has given us the highest gross national product and highest standard of living of any nation in the world. In our populous country, more people enjoy more comforts, conveniences, and pleasures than those in any other. As a people, we own more property, have more possessions, go more places than any other people in the world.

This means, of course, that we have more lives to lose, we have more property to burn or destroy, we have a greater exposure to the possibility of accidents. And taking all these factors into consideration, the remarkable and wonderful fact is that the United States is the safest country of all to live in.

Why? How did this come about?

Let me tell about it.

Simultaneously with the birth of Underwriters Laboratories 75 years ago, there has been developed in this country a safety network of highly specialized, related organizations and groups, the work of each of which complements, extends, and implements the work of the others. The eye, the center, the focal point of this safety network, on which the effectiveness of the whole depends, is Underwriters Laboratories.

The great contribution which Underwriters Laboratories has made to this outstanding national safety record begins with its exacting, technical work of developing safety standards that spell out how things you and I and our wives and children use, and should perform, if we are to give a good account of themselves and not, through some failure, endanger life, limb, or property.

It becomes apparent what a big order this is when we realize that the scope of this unique organization takes in, first, the prevention of the loss of lives and property by fire; second, the prevention of bodily injury and loss of lives from accidents; and, third, the prevention of loss of possessions by burglary, robbery, and theft.

To safeguard the public from this myriad of potential hazards, Underwriters Laboratories has, to date, developed and published 250 comprehensive safety standards on as many different broad subjects. These standards represent 75 years of work and untold thousands upon thousands of dedicated, expert man-hours, not only by UL engineers but by collaborating specialists in many fields of business, industry, and government. In the fields in which it works, no other safety organization in the world has produced so many standards to safeguard consumers.

The raison d'être for this great UL standard-making activity is, of course, the fact that for 75 years, more and more manfacturers of all sorts of devices, materials, and systems, wishing their output to be as free of hazard as is economically feasible, have sent their products to Underwriters Laboratories for tests to determine whether they meet the requirements of these widely recognized UL safety standards.

These standards are the guidelines for the extensive testing done by Underwriters Laboratories. To test such a vast variety and volume of products, UL has four large testing stations outfitted with the most modern scientific safety testing equipment in the world. These unique facilities are valued at $20 million—a far cry from Merrill's little $350 laboratory where it all started.

Staffing these facilities are nearly 2,000 trained and technical personnel, many of them professional engineers. This is the largest staff of its kind to be found anywhere, devoted exclusively to safety work. They test, in these facilities, upward of 26,000 new products each year.

One gets some idea of how extensively the work of Underwriters Laboratories protects all of our people when it is realized that today more than 800,000 different active catalog numbers of products in over 5,000 different categories have passed the tests and are being produced by 13,000 manufacturers. More than a million units of some single catalog numbers are produced in a year. And this has been going on in increasing volume for 75 years.

The third phase of UL's work, following standard making and testing, is inspection. The 450 UL inspectors, working out of nearly 200 U.S. cities and in 26 foreign countries, regularly visit the factories to determine that current production complies with the requirements of the safety standards. As many as 130,000 factory visits are made each year for the purpose of testing and inspecting products as they come off the production line, to check the manufacturer's own quality control procedure, and to supervise the placing of UL labels and insignia on products that pass. The number of products manufactured each year which carry the UL insignia to indicate they meet safety requirements runs into the billions.

The far-reaching results of Underwriters Laboratories work contribute importantly to the safety of all of us in the United States wherever we may be—at home, at work or at play. And our safety is further enhanced by the fact that the other Members of what I have called the safety network rely on and implement the findings of Underwriters Laboratories in such a way that throughout our great country we have a remarkable degree of safety for all our people.

We have fewer building fires because architects and engineers, in designing structures, specify materials and systems which have passed UL tests.

We have safer electrical installations because the National Electrical Code, the most universally adopted set of safety regulations in the land, calls for the use only of "recognized" wiring supplies and materials—which term is generally understood by contractors and inspectors to mean those which have passed UL tests.

We are safer wherever we reside or work or play because fire departments, building inspection departments, insurance inspectors, and other regulatory authorities of all divisions of Government throughout the United States, make an eflort to insist on products and materials which have passed UL tests.

We are wiser in our choices of what to purchase for enlightened consumers and most retailers know the meaning of the UL in a circle on appliances and many other consumer items.

And so it goes to increase our safety.

Time, the strictest judge of verity, has proved the correctness of Merrill's concept that science can limit the destructiveness of sience. As a result of what was started 75 years ago in my own native State of Illinois, as a result of the implementation of UL's work by the many members of the safety network, all of us in the United States are far safer than we might otherwise be.

I salute and congratulate Underwriters Laboratories on its accomplishments during its first three quarters of a century.

## THE FOOTBALL SEASON CLIMAX

Mr. FULBRIGHT. Mr. President, I have observed that in recent days a number of Senators have risen to extoll the virtues of college football teams in their respective States.

I can well understand their pride, for indeed the teams of the University of Montana, Penn State, and the University of Michigan, among others, all have outstanding records.

I would merely point out, however, that we also play football in Arkansas.

I suspect that a number of Senators were reminded of this last week by the publicity surrounding the game between the University of Arkansas and the University of Texas. We were pleased to have a number of distinguished guests in our State for that game, including, of course, President Nixon.

To my regret the game did not end exactly as I would have liked, for Texas won by a 15 to 14 score. However, for much of the game it appeared that Arkansas would triumph, and it truly was a fitting climax for the 100th anniversary of collegiate football.

As as result of that loss, it was my pleasure to treat the Senators from Texas and their wives to a dinner of Arkansas pork spare ribs. I hope that next year we will be dining on Texas beef steak.

As a conclusion to their fine season, the Arkansas Razorbacks will meet the University of Mississippi in the Sugar Bowl on New Year's Day. I am sure that Coach Frank Broyles' team will once more perform in a manner which will make all Arkansans proud.

As Mr. Francis Stann, a sports writer for the Washington Evening Star, said:

> Arkansas-Texas was one game that lived up to its stupendous billing. It did little to further Penn State's claim to top ranking in the nation because if Texas is truly No. 1, Arkansas can't be far behind.

In addition to the Razorbacks, I would like to call attention to another fine Arkansas team—the Arkansas State University Indians.

For the second consecutive year the ASU Indians have won the Southland Conference championship. This year the Indians were undefeated in conference play. Last year they had no losses and only one tie in the conference.

I would like to point out that, as in

the case of Arkansas in the Southwest Conference, Arkansas State is the only non-Texas team in its league. However, I am pleased to note that the Arkansas teams are able to more than hold their own against the Texas clubs.

Coach Bennie Ellender's Arkansas State team will play Drake University in the Pecan Bowl on December 13 in Arlington, Tex. These two teams tied during the regular season and the bowl game should be a good one.

While I am on the subject of football, Mr. President, I would also like to offer my congratulations to Dan Pike of De Queen, Ark., and the U.S. Naval Academy; Terry Stewart of Fort Smith, Ark., and the University of Arkansas; and Charles Longnecker of Little Rock, Ark., and the U.S. Air Force Academy.

These three outstanding young men from Arkansas were among only 11 National Football Foundation Scholar-Athletes for 1969. They were selected for outstanding football ability, combined with academic achievement and leadership.

Along with all Arkansans, I am proud of the remarkable records that these three have made.

## TOWARD AN HONORABLE PEACE

Mr. MURPHY. Mr. President, since President Nixon stated the administration's objectives and plans relative to Vietnam, a great many Californians have sent me letters and telegrams expressing their support of the President and our wonderful country. Their views on this most important matter are not dissimilar to those expressed by John P. Roche, whose column was published in the Washington Post of November 14, 1969, and by David Lawrence, whose remarks appeared in U.S. News & World Report of November 17, 1969.

It is a fact that those who so vocally oppose our distinguished President in the streets do harm to the honorable objectives of their duly elected representatives in their quest for a just peace and the self-determination of the people of South Vietnam and the free world. This has been most effectively expressed by Messrs. Roche and Lawrence. I ask unanimous consent that their columns be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Nov. 14, 1969]

IMPORTANCE OF NIXON VIET SPEECH LIES IN EFFECTIVENESS AGAINST HYSTERIA

(By John P. Roche)

Since my readers, whether favorable or critical, would hardly have been holding their breath awaiting my reaction to President Nixon's Vietnam address, I have held back comment until some perspective could be established. Needless to say, I thought it was a first-rate speech—serious, frank, and direct. I personally could have spared the side shots at the Johnson administration, but then I recall that in the early 60s we Democrats blamed everything but bad weather on poor Ike.

What was important about the President's speech was its effectiveness in countering the politics of hysteria that has dominated discussions of Vietnam these last three years. The critics of the war managed to seize the commanding rhetorical heights. A singularly talented lot, they have utilized with devastating effectiveness the best Madison Avenue techniques. We got the political equivalent of cigarette slogans—the "immoral war," the "corrupt and unrepresentative Saigon regime" etc. I actually heard a radio interview a while back which began with the commentator asking "How do you justify this vicious, immoral war?"

Of course, what disturbs most Americans about the war is not its alleged immorality. They have become increasingly disturbed by our seeming incapacity to win it. To put it differently, a substantial majority of our people became convinced that the United States government simply didn't know what it was doing. They are quite aware, as Mr. Nixon said, that the North Vietnamese cannot humiliate the United States. Thus they take refuge in bitterness and its Siamese twin, isolationism.

It is interesting in a mordant way to watch the historical growth of this sense of disillusionment. The Gallup rating on President Johnson's handling of the war took its first massive dip at the time of the Buddhist "riots" in the spring of 1966. (I put riots in quotes because I witnessed several of these events and I have seen better riots on any random Saturday night in South Boston, but the American journalists in Saigon really give these trivial demonstrations a ride.)

The real drop in confidence, however, came in the wake of the Tet offensive in January, 1968. In military terms, Tet was a shambles for the North Vietnamese, but politically it was a master stroke. Indeed, I argued at the time that this was its purpose, and evidence that has come in since confirms this judgment.

As the average American became more and more convinced his government was the prisoner of events rather than their master, his sense of rage and frustration increased. Simultaneously, the crescendo of anti-war sentiment went over the rational edge into the abyss of hysterics. And because the majority was sullen and bitter, the antiwar militants had the field virtually to themselves.

But what seemed, particularly to European observers, to be a massive antiwar movement in fact had two components: those who were antiwar (a quite small minority) and those who were opposed to losing the war. In political terms, the first priority for those supporting the war had been to divide these two segments. We tried but were unsuccessful, largely because the whole energy of the Johnson administration was devoted to putting out the fire, to coping with a savage, resourceful enemy that had gotten the jump on us in 1965. This is no excuse—excuses have no place in politics.

What President Nixon has hopefully accomplished is precisely the correct strategy. He has indicated to the "silent majority" that our government is in control of events, that we are not drifting from one desperate improvisation to another with no end in sight. If his analysis of the failings of his predecessor seems harsh, his courage in nailing his colors to the mast must be admired by all those who feel that our commitment in Vietnam cannot be betrayed without fearful implications for the future of world peace.

---

[From the U.S. News & World Report, Nov. 17, 1969]

WHO IS PROLONGING THE WAR?

(By David Lawrence)

The United States is militarily the most powerful nation in the world. Certainly a tiny country like North Vietnam would never have been able to deprive an American army of victory if the commanders of our forces had been permitted to use military strategy and air power in the customary ways.

Who interfered with our own military operations? Who in this country prevented our armed services from using their maximum strength? Who, indeed, must accept the responsibility for the long list of casualties? This would never have been so large if American forces had been authorized to employ the military means necessary to attain victory.

But ever since we went to the aid of the South Vietnamese, there have been pressures inside the United States. These have been called "political." Basically they were influences which catered to pacifist elements and sought to sway the uninformed citizens who never really knew how or why the war was being lost.

General William C. Westmoreland, who commanded U.S. ground forces in Vietnam for four years and now is Chief of Staff of the Army, revealed in an interview in this magazine on Sept. 29, 1969, some of the frustrations of our military commanders. He said:

"One of the interesting things about this war is that responsibility has been divided. I had the U.S. ground war in the South, Admiral Sharpe had the air war in the North. The political, psychological, economic factors implicit in this entire equation were vested in the Ambassador in Saigon and the Secretary of State. Also, operations were conducted in the territory of an ally who exercised sovereign authority over his land and his people and control of his troops.

"No U.S. authority short of the President had cognizance over the entire conflict. Therefore, the President had to get into all sorts of details. And he had many pressures brought to bear on him—numerous factors to consider: international opinion, domestic opinion, as well as the military situation. The war has been more than military. I'm not unaware of the many complex factors that had to be considered."

Psychological warfare is in some respects as important as military operations. The newspapers, radio and television are filled with pronouncements from persons, inside and outside of Congress, who have publicly denounced the foreign policy of their Government in the middle of a war.

In Hanoi, everything said in this country is studied carefully day by day. The Red Chinese and the Soviets also note that the United States seems to be wavering and apparently is unwilling to pursue the war to a military decision.

When President Johnson acceded to the wishes of the "anti-war" elements and announced that he would halt the bombing of North Vietnam in the hope of initiating peace negotiations, the enemy was sure that the critics of the Vietnam war within the United States were making headway. Hanoi concluded that it was just a question of time before America would have to acknowledge a humiliating defeat and withdraw from Asia altogether.

For more than a year now the United States has made every effort to get a constructive peace settlement. But North Vietnam has refused to negotiate meaningfully. Encouraged no doubt by both Peking and Moscow, Hanoi feels that it needs only to wait a year or two and all American troops will be withdrawn. Then the Saigon Government could be ousted and a Communist-controlled regime would take over.

Many people in America think that the Vietnam war is a remote affair and that the United States "has no business" in Asia. This is an erroneous concept because the underlying issues can make the difference between world war and world peace.

The safety of nearly every country—in Asia, Europe and Latin America—is at stake and will be threatened if Communism achieves a victory in Vietnam.

Speeches and statements being made day after day in the United States decrying American policy are giving "aid and comfort" to

the Hanoi Government and are prolonging the war.

The demonstrations by so-called "peace" groups are helping to prolong the war.

The carping criticisms by politicians who mistakenly think they are currying favor with the public are also prolonging the war.

The war could be ended honorably by the President if he were given the wholehearted support of the American people.

If we could develop right now a united America, the fighting in Vietnam would be promptly terminated. We could, for instance, announce the date of a cease-fire. If it were not respected, we would be able to retaliate immediately with maximum military power.

When the enemy becomes convinced that the United States means what it says and that the dissenters in this country are a small minority, peace will come soon in Vietnam, and we might well avoid World War III.

## WASHINGTON TOURMOBILES

Mr. MURPHY. Mr. President, one of the prime duties of the Department of the Interior, National Park Service, is the presentation and interpretation of historic and cultural points of interest within the Federal Mall in Washington, D.C. The National Park Service envisioned a shuttle service that would provide transportation to points of interest on the Mall and also offer an accurate, comprehensive commentary on the Nation's Capital.

This program would help relieve the critical parking situation on the Mall, and at the same time it would tell of America's heritage to people from all over the world. From its inauguration date, March 17, 1969, to the present, more than 350,000 visitors have been carried by Landmark's Tourmobiles.

Mr. President, it is my understanding that the National Capitol Historical Society is planning to have the Tourmobiles include the Capitol in their routes, and I join that organization in the hope that this will soon be a reality. The Department of the Interior and the National Park Service are to be commended for creating this program, as is Landmark Services for implementing it.

I ask unanimous consent to have printed in the RECORD a description of the tour, and the schedules, as published in the Landmark Services pamphlet.

There being no objection, the information was ordered to be printed in the RECORD, as follows:

SIGHTSEEING IN WASHINGTON, D.C.

The newest way to enjoy our nation's heritage is aboard a Landmark Services Tourmobile!

Landmark Services offers a high calibre, convenient and inexpensive way for you to see the shrines, monuments, and historical points of interest that are part of our national heritage. To make your trip more interesting and meaningful, a specially-trained Landmark Services Narrator will be aboard each Tourmobile to point out sights of interest, fill in the historical background, and up-date you on what is happening in our government today. No advance planning is necessary.

A Tourmobile leaves frequently from designated stops—all day—every day. Get on and off as many times as you like at no extra charge. Landmark Services shows you Washington, D.C. the easy, enjoyable way.

Tourmobile stops are marked inside this brochure. The stops are designed to place you within easy walking distance of all major points of interest. Don't fight the congestion, just leave your car at your lodging or a nearby commercial parking lot (also indicated on map), or take a bus or taxi to any Tourmobile stop.

Landmark Services Tourmobiles operate daily except Christmas Day. 9:00 a.m. to 10:00 p.m. (April 15th thru Labor Day). 9:30 a.m. to 5:30 p.m. (Remainder of the year).

EAST MALL ROUTE STOPS

Adults, $1.
Children (2 through 11) 50 cents.
Prices and hours subject to change.

## LEAGUE OF WOMEN VOTERS LAUNCHES NATIONAL VOTING RIGHTS CAMPAIGN

Mr. PROXMIRE. Mr. President, the ability and right of the women of the Nation to enter into the political arena on an equal basis with men was first recognized on a national level with the ratification of the 19th amendment to the Constitution. The vanguard of this movement was the National Women Suffrage Association, which is known today as the League of Women Voters of the United States.

The league's various actions throughout the years have dispelled the notion for all time that women are not able to participate in all forms of political activities. This organization has provided, and continues to provide, a valuable service to the American public through its political activities.

Recently I received an announcement from the League of Women Voters on its plan to make 1970 the "year of the voter." This project, I feel, typifies the value of the league in organizing the citizenry of this Nation to participate in political affairs. I wish the league the best in its worthwhile effort to make 1970 the "year of the voter."

I ask unanimous consent that the League of Women Voters announcement entitled "LWVUS Launches National Voting Rights Campaign" be printed in the RECORD.

There being no objection, the announcement was ordered to be printed in the RECORD, as follows:

LWVUS LAUNCHES NATIONAL VOTING RIGHTS CAMPAIGN

With the Year of the Voter as its theme, the League of Women Voters of the U.S. today announced that it will spearhead a national campaign during 1970, designed to emphasize the franchise as the basis of American democracy and to remove the remaining inequities in the nation's electoral system.

"There is still much unfinished business before we can reach the goal of full participation in the democratic process," Mrs. Bruce B. Benson, President of the national League, told a meeting of 19 major organizations who were asked to participate in the drive.

These organizations, and many other national and local groups who will be briefed on the Year of the Voter program, are being asked to "do their own thing" in the nonpartisan effort. "This means," said Mrs. Benson, "that those who are concerned during the coming year with strengthening the franchise, will have a framework in which to operate more effectively."

The League, which celebrates its 50th anniversary in 1970, decided to launch this public service activity rather than spend its time on "self-congratulatory birthday events." For 160,000 League members in 1,300 communities, the Year of the Voter will also be an opportunity to commemorate the 50th anniversary of woman suffrage (19th Amendment to the U.S. Constitution) and the 100th anniversary of Negro Suffrage (15th Amendment).

The Year of the Voter campaign culminates on November 3, 1970, when 34 senators, 435 congressmen, 30 governors and thousands of other state and local officials will be elected. "If public and private groups across the country support this effort," said Mrs. Benson, "we can have the largest off-year election turnout in history."

A special year of the voter logotype for use during the anniversary year, was commissioned by the League from New York graphics designer Beau Gardner. It will appear on publications, letterheads, postage-meter dies, newsletters and other community print media, tv spots and League Voter Service materials which are distributed throughout the U.S. The logotype will also be a central visual element in promotional materials produced specifically for the 50th Anniversary, such as buttons, bumper stickers and shopping bags.

"We are giving the logotype and background," said Mrs. Benson, "to all organizations who believe that the right to vote is the cornerstone of American democracy. Others are free to adopt the Year of the Voter logo as their own. Since intentionally, it embodies no visual elements identifying it with the League, it should prove effective for a variety of purposes and organizations.

The President, members of Congress and Governors will be asked to consider special Federal, state and local efforts supporting the Year of the Voter; and the cooperation of business and labor communities will also be sought.

Attending today's luncheon were representatives of the Republican National Committee, Democratic National Committee, National Governors Conference, Leadership Conference on Civil Rights, National Association for the Advancement of Colored People, National Urban League, American Civil Liberties Union, Civil Liberties Clearing House, U.S. Catholic Conference, National Council of Churches, Anti-Defamation League of B'nai B'rith, United Auto Workers, Committee on Political Education (AFL–CIO), Chamber of Commerce of the U.S., National Federation of Young Republicans, Washington Home Rule Committee, National Student Association, Public Affairs Council, and the Nation YWCA.

## GOODELL TO OPPOSE GRAND JURY PRESENTMENT POWER ON SENATE FLOOR

Mr. GOODELL. Mr. President, yesterday the Senate Judiciary Committee reported the Organized Crime Control Act of 1969, to the Senate floor.

A provision of the bill would allow the grand jury, on majority vote, to submit a presentment to the court, first, concerning noncriminal misconduct, nonfeasance or neglect in office by a public officer or employee as the basis for a recommendation of removal of disciplinary action,

or second, stating that after investigation of a public officer or employee it finds no misconduct or neglect in office by him, provided that such public officer or employee has requested the submission of such presentment, or third, proposing recommendations for legislative, executive, or administrative action in the public interest based upon stated findings.

Such a presentment shall be submitted to the court who will approve and accept it for filing only if the above requirements are met, and if the report is based on facts revealed in the course of an authorized investigation and is supported by the preponderance of the evidence.

A presentment concerning noncriminal misconduct of a public official—first, above—can be accepted only if the named individual had been afforded an opportunity to testify before the grand jury prior to the filing of the presentment. Any other presentment must not be critical of a named individual.

The proposal also offers a procedure by which a public official may file an answer to a presentment critical of him, as well as providing machinery for an appeal of the presentment. At the appropriate time the U.S. attorney must deliver a true copy of the same to the appropriate agency for removal or disciplinary action against the named individual, but if a criminal action is pending the court may seal the presentment until the matter is disposed of.

If the court is not satisfied that all these requirements are met, it may direct that additional testimony be taken before the same grand jury or it may direct that the presentment shall be sealed and not be filed as a public record. Finally, this section defines public officer or employee as "any officer or employee of the United States, or any State or any political subdivision, or any department, agency, or instrumentality thereof."

Mr. President, this proposal causes me grave concern. I believe it to be unwise both as a matter of constitutional law and as a matter of public policy.

A presentment is a public charge of misconduct—not involving an accusation of criminal conduct—which carries the importance of a judicial document, but lacks its principal attribute—the right to answer.

It is frequently confused with an indictment, and the distinction between the two is usually lost on the public at large.

When released to the public it inflicts irremedial injury upon the reputation of the accused. It effectively denies him due process of law because he does not have a proper forum to respond to the charges.

Admittedly the bill now before the Senate makes an attempt to meet this problem by providing for the appearance of the accused before the grand jury. It also permits him to file a report in reply and to appeal if necessary. Yet, there is substantial doubt as to the practical effectiveness of these "protections."

The proceedings would still not be adversarial and the accused official apparently would have no right to counsel before the grand jury, no right to call witnesses on his own behalf, and no right to cross-examine his accusers. Thus only one side of the story would be effectively presented—that of the Government.

Historically, a potential accused who appeared before a grand jury was not afforded these rights because he would later enjoy them and the full protection of due process when the case was disposed of on the merits at trial. The accused named in a presentment does not have that opportunity.

The provision in the bill allowing for the filing of a report by the accused in answer to the grand jury's report would not have the dignity and force of the quasi-judicial condemnation by the jury; it would be considered by many to be merely the usual denial.

This proposal is directly contrary to existing Federal case law and policy which holds that the traditional function of the grand jury is to accuse individuals of crime and to protect the innocent. Federal law also authorizes grand juries to perform an important investigative function by aiding the Government with its power of subpena in complex, criminal investigations in a variety of areas, including organized crime and fraud, but such proceedings are conducted in secret and its findings cannot be disclosed, except insofar as an indictment is returned.

Illustrative of the present Federal law which holds that a grand jury is without power to issue a presentment is the case of *Application of United Electrical Radio and Machine Workers*, 111 F. Supp. 858, SDNY, 1953. In that case, a Federal grand jury was investigating labor unions whose members took the fifth amendment in answer to questions concerning alleged Communist affiliation.

The grand jury rendered a presentment detailing these facts and recommended to the NLRB that it revoke the certifications of the unions, and to the Congress that it amend the Taft-Hartley law. The grand jury indicted no one, saying that the evidence was insufficient.

While the report did not specifically mention anyone, the names of certain individuals were "leaked" to the press by the foreman and prosecutor. In a very forceful opinion, the court ordered the report expunged. The function of the grand jury, the court said, is, first, to accuse, and second, to protect the innocent. Such a report is not permissible, beyond the powers of the grand jury, and deprives the individual of the right to defend himself.

The grand jury being an appendage of the court, such a report is an abuse of the constitutional principle of separation of powers. The court then observed that once the grand jury determines whether there is or is not sufficient evidence to indict:

> It may not then issue a report based upon information derived during the course of its secretive inquiry, directed to the executive and legislative branches, which touches upon matters within their exclusive authority. The grand jurors, like the members of the judiciary, are not accountable to an electorate. Their hearings, being secret, are not amendable to informed evaluation by the public and are unsuited to make the determinations which our Constitution has allotted to the executive and the legislative. (III F. Supp at pp. 864–865)

The great weight of authority is that such presentments exceed the power of the grand jury, 111 F. Supp. at page 866, citing numerous authorities. While many State courts have allowed general presentments which do not single out individuals, they have uniformly condemned specific censure by the grand jury, the same, at pages 867–868 citing cases and authorities.

The court recognized that it was not dealing with presentments of a general nature touching on conditions in the community. This type presentment may serve a valuable function and may not be amendable to challenge, the same at page 869.

Finally, the court stated that the disclosure of the presentment and of the names of the individuals involved violated rule 6(e), Fed. Rules Crim. Proc., regardless if the disclosure be considered as unofficial acts of individuals or as an official act of the grand jury as a body:

> In sum, constitutional considerations, the Federal Rules of Criminal Procedure, persuasive State authority, *public and private interest*, lead me to hold, as I do, that the issuance of the report in question was (1) beyond the power of the Grand Jury and (2) was in violation of the secrecy requirement." (Id. at p. 869) (Emphasis supplied)

The provision also raises another serious constitutional issue, in addition to the question of the due process rights of the accused.

A Federal grand jury's report against local and State officials is a clear intrusion into local matters if no Federal law has been violated. It may represent an unconstitutional infringement upon the sovereignty of State and local governments.

This problem—a Federal grand jury reporting on noncriminal conduct of State officials—appeared in the case of *In re Petition for Disclosure of Evidence Before Oct. 1959 Grand Jury*, 184 F. Supp. 38 (ED Va., 1960). Here, the grand jury was told to only indict or ignore the individuals under investigation.

Instead, the grand jury said that although it did not have enough evidence to indict, the evidence they did have on named State and local officials was requested to be sent to the city mayor and State Governor.

The court, on motion to expunge, said that although the grand jury felt "morally compelled" to bring a serious issue to the attention of the authorities, it should only have asked that the evidence be turned over to local officials without saying more.

The court felt that, first, the tenor or purport should not have been made known since it violated the secrecy of the grand jury proceedings, and second, it was an infringement upon the provinces of State and local governments. It is of note here that the city wanted the evidence for administrative disciplinary action only, while the State wanted the evidence for criminal prosecution purposes.

Rule 6(e), the court continued, in referring to "preliminary to or in connection with a judicial proceeding" did not refer just to Federal proceedings but to State proceedings as well.

In this light, the court expunged every-

thing except the recommendation that the evidence be forwarded. Accordingly, the State was able to have access to the evidence but only after the Federal prosecution was terminated and then only for the purpose of an independent inquiry rather than as evidence itself.

The court made a final and appropriate observation that since rule 6(e) does not apply to witnesses themselves, the State if it desired—and it is only their province to decide—could call these witnesses before its own grand jury.

Another case highlighting the jurisdictional issue is *In the Matter of The Report of the Grand Jury*, 4 U.S. DC Hawaii 780 (1911). In an investigation of two teachers regarding immoral practices in a local high school, the Federal grand jury found no facts upon which to base an indictment but contrary to the court's instructions filed a presentment condemning the witness' failure to testify and concluded by saying the teachers were unfit to teach.

Observing that there is no question of the worthy motives or good faith of the grand jurors, the court expunged the report on the grounds it, first, violated the secrecy of the grand jury, and second, commented on matters outside the jurisdiction of the court.

Supporters of this provision argue that the National Crime Commission appointed by President Johnson recommended that Federal grand juries be authorized to issue such reports.

Its task force report on organized crime, however, does not support or go as far as the proposed bill. The report merely states—at page 16—that "when a grand jury terminates, it should be permitted by law to file public reports regarding organized crime conditions in the community."

The recommendation restricts the use of a report to organized crime conditions only, and in a presumably general context, without naming specific individuals.

The Organized Crime Control Act of 1969 contains many useful provisions which will increase the capacity of law enforcement officials to cope with the powerful, resourceful and elusive organized criminal elements that pose such a serious threat to the welfare of the Nation. I will support these provisions.

I cannot, however, support those portions of the bill which relate to grand jury reports. They represent a serious erosion upon individual liberties—long protected in the Federal system—of those suspected of serious wrongdoing. I shall therefore introduce an amendment to strike these provisions from the bill on the floor of the Senate, and ask for the support of my colleagues in this effort.

## POLLUTION OF THE ENVIRONMENT

Mr. MOSS. Mr. President, for several years I have been calling attention to the fact that we are polluting our environment in the United States. Our waters are polluted, our skies are polluted, and solid wastes dot the landscape. Even in the beautiful State of Utah, which I represent, we have water and air pollution which is creating for our people severe environmental problems.

One of the fine communities of our State, some 30 miles distant from Salt Lake City, is Tooele. It is located in the valley west of the Salt Lake Valley and is generally considered to be in the wide open spaces. But smog has come to Tooele. The Tooele Transcript, published in that city, has set forth in an editorial the problems that confront us as the result of air pollution. I commend the Transcript for its alertness and forthrightness in calling attention to this problem and ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Tooele (Utah) Transcript, Dec. 5, 1969]

SMOG CAUSES A BITE WITH A DEEP BREATH

There's a bite to the air we breathe these days and much of the beauty of Tooele's valleys and hills is hidden by a cloud of smoke that spills around the point of the mountain into our area.

Air pollution control is no longer something for health officials only to worry about. Atmospheric conditions over the last couple of weeks have clearly shown it to be a problem of concern to every citizen.

The seriousness of the problem is pointed up by the events of the last few days. Some drug stores in the Salt Lake Valley have reported an increase in sales of drugs for respiratory ailments. A rash of traffic accidents have been reported, and Wednesday an $850,000 jet aircraft crashed and burned. These accidents may have been related to poor visibility because of the smog.

The time has come for residents of this area to let authorities and those who may be contributing to the contamination know that they want something done to stem the problem.

Because automobiles are one of the major causes of air pollution it should be made illegal for buyers of new cars to remove exhaust control devices. Periodic inspection and a system of fines could insure that the devices would be kept in operating condition. Hydro-carbons in the form of unburned fuels are the principle offenders here.

Such devices do add to the cost of operating a vehicle, but the last few days have shown that not using them costs in other ways.

Tooele City officials should accelerate their search for an adequate garbage dump and bring an end to the burning of refuse.

Emissions from Kennecott Copper Corporation operations are clearly one of the major causes of air pollution in this area. Perhaps as much as 300 tons of sulphurous fumes escape into the air each day from Kennecott plants. Most of this is in the form of sulphur-dioxide or sulphur-trioxide.

Sulphur-trioxide is not particularly harmful. It just fogs up the place. But sulphur-dioxide is harmful when inhaled. It causes a chemical reaction in the mouth and throat which forms sulphuric acid. This is what has caused the burning sensation often felt in recent days.

Kennecott officials and officials of other industries have stated that effluents from their plants are of great concern to them. What the public wants to know is what is being done to reduce them. Maybe these companies—including the smelter near Tooele—are doing all they can do and they must be given credit for what has been accomplished. But every area where possible contamination may originate must be explored and solutions sought. And the public should be informed of every action taken.

## A GIANT IS LEAVING THE SENATE

Mr. BROOKE. Mr. President, the December issue of Nation's Business contains an excellent and deserved tribute to our friend and colleague, the distinguished senior Senator from Delaware.

JOHN WILLIAMS always merits our deepest respect and attention, but his efforts in the last few weeks have truly been gargantuan. He has detected and helped to correct innumerable flaws in the tax bill. He has stood on the floor of the Senate day after day, defending the public interest and serving as a beacon and a guide for many of his less fiscal-minded colleagues. Seldom has he deserved our praise more than at the conclusion of the consideration of this lengthy and complex tax proposal.

It is for this reason that I take particular pleasure in asking unanimous consent to have printed in the RECORD the text of the article entitled "A Giant Is Leaving the Senate."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A GIANT IS LEAVING THE SENATE

When John J. Williams decided in 1946 he wanted to run for the U.S. Senate, he was a small town Delaware feed grain merchant without political experience, a following or connections in his party's state organization.

"I couldn't use that old line about my friends urging me to run," he recalls candidly. "I don't remember anybody ever asking me. In fact, most of my friends thought it was a pretty farfetched idea."

And the assumption by a 42-year-old novice that he could enter state politics at the top certainly didn't sit well with Delaware's Republican leaders.

"I had never met the state chairman," Mr. Williams says. "He was a little peeved that someone would be so brash as to announce a Senate candidacy without talking to him. But I went into it on the principle a man has a right to seek office in this country without the consent of anybody."

Most politicians, when asked why they pursue public office, come up with high-flown answers about service to nation and mankind, etc. John Williams' explanation is far more direct: "I thought I'd like to try it and I did."

"Oh, I'd been pretty concerned as a businessman about the trend in the country toward too much centralization of power in Washington," he adds. "But I didn't have any great, noble drive."

Drive or no drive, he began traveling around the state, working long, gruelling days, to make himself and his views known.

Veteran Delaware Republicans, anticipating a Democratic victory, had shied away from making their party's Senate race. By the time they sensed that a Democratic success might not be inevitable after all, that the national mood was for a change after the long Depression and war years, Mr. Williams was well ahead for the nomination.

He went on to defeat the Democratic incumbent by nearly 12,000 votes out of 113,500 cast.

Sen. Williams had entered the feed grain business with his brothers immediately after finishing high school and leaving the family farm. Now, a brother took over responsibility for the store.

"There was nothing big about it, but we made a living," the Senator recalls. "He did

all right after I left, so I guess I wasn't as important as I thought I was."

INTO THE BIG TIME

In Washington, the political novice and small businessman, lacking a college education and possessing a speaking style that ranged from an almost inaudible whisper to a rasp, joined a body composed mostly of lawyers or professional men—men long on political experience, on education, on knowledge of big business and finance, and on dramatic oratory.

But it was the grain merchant from Millsboro, Del., who was to rock the Truman Administration with disclosures of staggering corruption in the Internal Revenue Service and elsewhere in government, who was to assail the conduct of Sherman Adams in another Administration and was to bring about the downfall of Bobby Baker in still another. And John Williams' grasp of high-level economics and tax policies acquired through long, hard work and study, was a major factor in forcing Lyndon Johnson to surrender and accept spending limits in return for Congressional passage of the 10 per cent income tax surcharge.

Now, at 65, Sen. Williams has announced he will retire when his present term ends in 1970. He is approaching the final year of his Senate days, working and fighting as hard as ever for causes he has championed from the moment he arrived—honesty, efficiency, and economy in government.

He has earned a title given few others in the nation's history: "The conscience of the Senate."

In the late 1940's, information came to Sen. Williams of graft in key federal tax offices across the country. He began digging, but, in his unflagging insistence on accuracy and fairness, it would be more than two years before he made his first speech on the subject.

The trail led slowly but inexorably from lesser lights in regional offices to the highest echelons of Internal Revenue, the Justice Department and the White House itself. Resignations, indictments and convictions followed.

But party lines play no role in Sen. Williams' outlook on governmental ethics.

Sherman Adams, known as the "assistant president" during the Eisenhower Administrations, came under fire in 1958 for accepting gifts, including a $2,400 rug, from an industrialist having problems with government agencies. Sen. Williams was as outspoken as he had been when a Democrat was in the White House. "There can be but one code of ethics for public officials," he told the Senate.

"I condemned the deep freezes," he said in a reference to a famous gift to a Truman aide, "and I will not defend the rugs now."

ENTER THE BAKER CASE

It was a brief, newspaper account of a civil suit that launched the Senator on one of the best-known of his many battles against corruption in government. A disgruntled owner of a vending machine company had filed suit against Robert G. "Bobby" Baker, secretary to the Democratic Senate majority. The owner said he had paid Baker for help in obtaining a contract that went somewhere else.

"I wasn't interested in where any contract went," Sen. Williams recalls, "but I did want to know why a Senate employee was being paid to get somebody a contract."

He began digging into the affairs of Baker, the ex-page who had risen to the influential secretary's post under the patronage of the majority leader at the time, Lyndon B. Johnson of Texas. The Delaware Senator wanted to know whether Baker had used the job to further what turned out to be extensive, outside business interests.

"It just descended like an avalanche," Sen. Williams says. "In a short period of time I had developed enough information that I was convinced something was bad."

He took it to Senate leaders, suggesting a meeting with Baker. "I wanted to outline the things that bothered me and Baker could respond. Then I—and they—could evaluate his responses." Baker could not be reached for an initial meeting.

A second meeting was arranged after a firm pledge from Sen. Mike Mansfield, Mr. Johnson's successor as majority leader, that Baker would be there. But Sen. Mansfield arrived alone, downcast. Baker had resigned.

"We can't stop here," Sen. Williams commented. He insisted on the full-scale investigation that led to Baker's conviction of income tax evasion, theft and conspiracy to defraud the federal government. The shock waves set into motion by the Baker case launched a new era of concern on Capitol Hill about standards of conduct expected for Congressional members and staffs.

The Senate adopted a code of ethics providing for a combination of public and private reports on financial interests. Sen. Williams says that development was "a giant step forward," but more should be done.

"IT'S HOW YOU GOT IT"

He advocates establishment of procedures, with proper safeguards, for evaluating Congressional income tax returns when doubts arise. He sees little value in a proposal pressed frequently by Senate liberals to require public disclosure of financial holdings as of a given date each year.

"It's not what you own, it's how you got it," the Senator says. "The tax return is the key."

Sen. Williams has been constantly at work on issues less-publicized than Capitol Hill ethics.

He has clashed with government officials repeatedly as he has issued well-documented broadsides of waste and inefficiency in housing, agriculture, public works, welfare and many other programs.

A mark of the fairness that has won him high praise from other Senators in both parties in his unfailing practice of giving advance notice to anyone he intends to talk about in connection with inefficiency or dishonesty.

The accomplishment Sen. Williams ranks as the high point of his career as a legislator was the passage in 1968 of the bill making spending cuts the price the Johnson Administration had to pay for approval of the 10 per cent income tax surcharge.

"I'm certainly not proud to have a tax attached to my name," says Sen. Williams, co-author of the bill. But he seen a far more overriding consideration: "I am thoroughly convinced that if Congress had not acted on both taxes and spending—they had to be tied together—the American dollar would be gone today."

He adds a cautionary note: "We're not out of the woods yet. Merely raising taxes and putting the money into the government spending stream further aggravates the situation."

Conceding that spending limit loopholes later eroded the impact of the original bill, Sen. Williams says that's why he fought all the harder in 1969 not only for greater cuts but for ironclad assurances they will be made.

NOBODY'S PERFECT

Looking back over his years in the Senate, would he have done anything differently?

"Oh, goodness, yes," he responds quickly with a smile. "You make a lot of mistakes. I often wonder what I was thinking about on some of them."

(His candor once threw off a Democratic opponent who declaimed from a campaign platform that he just couldn't understand how Sen. Williams had voted the way he did on a certain issue. The Senator's reply: "I don't understand why I voted that way either. At the time it seemed to be the right thing to do—but it wasn't.")

One place where Sen. Williams will leave no mark after 24 years in the nation's capital is the party-going scene which many of his colleagues frequent. While his mail is heavy with the invitations that all Senators—particularly senior members—receive to cocktail parties, dinners, receptions, diplomatic functions and the like, he rarely attends any of them.

He lives quietly in Washington throughout the week and spends his weekends in Delaware, often at favorite hunting or fishing sites.

The Williamses have a daughter and three grandchildren. When he came to the Senate, Sen. Williams boasted of being "the youngest grandfather" in the membership. The passage of time has enabled him to escalate to the claim of being "the youngest great-grandfather in the Senate."

His decision to retire was made in characteristically direct fashion—he cited his long-held view that no Senator should embark on a new term after 65.

The Senator has no specific plans for retirement years—that feed grain business no longer is in the family—but guarantees, "I'm not going home and prop my feet up. I'm not going to lose interest."

He's concerned about the nation's future, and holds that violence and anarchy, on campus or city street, "cannot be defended or tolerated and must be dealt with affirmatively."

At the same time, he adds, "we adults have to recognize that, as we start to correct the situation, we have to look at our own houses.

"When men holding high positions of trust betray that trust, we are creating in the minds of young people an element of doubt about the moral standards we are following ourselves and are asking them to follow."

RESPECTFUL OPPOSITION

John Williams is a conservative by anybody's yardstick.

But it was one of the most liberal of liberal Democrats, William Proxmire of Wisconsin, who said of him:

"I feel he is the one member of this body who is its most able sentinel. I hope . . . that this remarkable man will reconsider his decision to retire."

And another Democrat, Majority Leader Mansfield, summed up Sen. Williams' career in a fashion that will draw little dissent from those who have followed it:

"He has been a giant and his departure from the Senate will leave a void that will be almost impossible to fill."

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. BROOKE. I yield.

Mr. TALMADGE. Mr. President, I had occasion to read that article, and I wanted to have it printed in the RECORD also. I compliment the distinguished Senator from Massachusetts for having done so.

Mr. President, I have served on the Committee on Finance for 11 years with the distinguished Senator from Delaware. I know of no member of that committee who is more knowledgeable, more sincere, or more dedicated in the field of taxes and other matters over which the Committee on Finance has jurisdiction. His retirement from the Senate at the completion of his term will be a tragic loss to this body and a tragic loss to our country.

I join the Senator from Massachusetts in commending the services of the distinguished ranking minority member of our committee.

Mr. BROOKE. Mr. President, I certainly thank the able and distinguished Senator from Georgia, for whom we all have great respect. His very kind and appropriate remarks are most welcome.

## THE RACE TO SAVE THE COUNTRY'S CAPACITY FOR DEFENSE

Mr. GURNEY. Mr. President, I ask unanimous consent to have printed in the RECORD an article entitled, "U.S. Leaders Engage in Race To Save Capacity for Defense," written by Mr. William S. White.

The article, published in the Washington Post of Saturday, November 29, 1969, concerns what Mr. White calls "the grisly allegations that American troops murdered 109 civilians in the South Vietnamese village some 18 months ago."

Mr. White states his fear that this incident may be used as a vehicle for "denuding the Nation of the power to defend peace with justice."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. LEADERS ENGAGED IN RACE TO SAVE CAPACITY FOR DEFENSE

(By William S. White)

The Nixon administration, the highest officers of our armed services and the leaders in Congress on military affairs are all now engaged in a desperate race with time and fate to save this country's whole basic capacity for national defense.

This is the crucial meaning of President Nixon's sudden decision to renounce any use by the Unted States of bacteriological weapons in any circumstances and to bring to life a long-moribund international accord of 1925 that would pledge its signers against any first-strike use of poison gas.

That the President's action is substantially important in its own right is, of course, obvious and undeniable. Still, to keep the thing in perspective it must be added, first, that the United States never intended to use germ warfare and, second, that gas as an effective weapon has, in fact, been outmoded and essentially irrelevant since World War I. Moreover, no informed man in Washington can doubt that Mr. Nixon was moved to undertake these dramatic commitments by considerations not solely confined to their own merits.

He was motivated as well, in this columnist's understanding, by a most urgent need to help still the open-ended antimilitary clamor arising from the grisly allegations that American troops murdered 109 civilians in a South Vietnamese village some 18 months ago.

For these frightful charges—and all should withhold final judgment upon them until the sworn processes of justice have run their full course—have inflicted upon the entire American military establishment the most destructive psychological wounds it has ever known. For they have cropped up as an ugly climax to what was already a campaign of unexampled vehemence within the largely pacifist-minded new left to discredit the very concept of using, or even having, military force in the contemporary world.

Already, too, thousands upon thousands of collegiate young men had been openly demeaning military service itself, often from the sanctuaries of personal exemption from the draft. Already, too, American officers who had repeatedly put their lives on the line in this country's defense had been regularly undergoing from New Left senators a form of hostility and contempt never before seen in our national life.

Now, the stories of the horror of that hamlet in Vietnam have set off a public revulsion that is entirely understandable—but which in the high emotionalism of these current days could readily be carried beyond all reason and into a spirit of condemnation of the very existence of an adequate defense structure.

Thus it is that if these stories turn out to be indeed true, the men responsible will have done the honorable profession of American arms incomparably more harm than any Benedict Arnold ever did.

The most far-out of the peace-at-any-price forces, here and abroad, have instantly and predictably seized upon these unthinkable allegations as somehow proving that the entire American policy of assisting a tortured and invaded South Vietnam is at best futile and at worst actively evil. There is no logic here—but there is passion in plenty.

They cry out in the American Senate and they march and "demonstrate" in London and elsewhere against the interests of a whole country, a whole people and a whole Army whose true record in its totality has been one of gallantry and self-acrifice. They do not cry out, they do not "march," here or elsewhere, against the wholly confirmed murder of countless thousands of South Vietnamese civilians by the Communists.

Now, this is not said to condone, by so much as a chemical trace of excuse-making, what on first information seems to have happened in the province of Quang Ngai. For it is, of course, perfectly true that no amount of Communist savagery can justify savagery on our side. And yet it will be the saddest day in our national story if this dreadful episode should become the excuse and the vehicle for denuding this nation of the power to defend peace with justice. This is the nature of the problem now.

---

## ALTERNATIVE TO PRETRIAL DETENTION

Mr. ERVIN. Mr. President, the issue of preventive detention has evoked wide editorial comment since the introduction of the administration's proposal, embodied in S. 2600, that supposedly dangerous defendants be imprisoned for 60 days prior to trial.

Two of the most penetrating editorials have been published in the New York Times, one on July 16, just after S. 2600 was introduced; the other on November 26. These editorials quite correctly emphasize the important, underlying fact that the clearly constitutional, as well as practical, solution to the problem of crime on bail is speedy trial rather than preventive detention.

As the earlier editorial appropriately points out, the trial of any criminal suspect believed dangerous can be accelerated while we pursue the long-range goal of major court reform so necessary in guaranteeing speedy trial for all. It also properly suggests that prison reform must accompany court reform. Our jails and prisons are plagued by problems of assaults, narcotics, and homosexual rape, as well as general turmoil and unrest. Preventive detention would subject an untold number of individuals, many of them innocent, to these problems and would increase, rather than reduce, and existing criminal tendencies.

The second editorial singles out one of the ways in which S. 2600 would radically alter our traditional concept of criminal justice in this country. That editorial cogently points out that preventive detention would reverse the fundamental premise that a man is innocent until proved guilty.

Mr. President, because these New York Times editorials are so apropos of our consideration of the preventive detention issue, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Times, July 16, 1969]

LAW, ORDER, AND CIVIL RIGHTS

The Nixon Administration's proposal for preventive detention of "dangerous" defendants in Federal criminal cases reflects the same disturbing tendency to bypass constitutional rights that has flawed some other recent Administration moves in its crusade for law and order.

Like the Justice Department's assertion in Chicago last month of unfettered powers to eavesdrop in national security cases, the preventive detention bill seeks to curb criminal activity by means that threaten the innocent. Reacting to widespread opposition to the eavesdrooping claim, Attorney General Mitchell appeared to retreat somewhat in this area Monday when he told a news conference he's phasing out a lot of electronic eavesdropping in the national security field.

But the President again risked infringement of civil liberties when he asked Congress to give Federal narcotics agents authority to break into residences unannounced to seize drug evidence quickly.

The detention bill would permit the imprisonment of a suspect for up to 60 days without bail if a judge found a "substantial probability" that the defendant was guilty as charged, and also determined after a hearing that release of the defendant would be a danger to the community. Among those who could be detained are narcotics addicts charged with any crime of violence; persons charged—but not necessarily convicted—with two violent crimes; and others charged wtih such "dangerous crimes" as bank robbery or the sale of narcotics.

In spite of an attempt to provide safeguards, this measure directly contravenes the principle that a man is presumed innocent until proved guilty, which is at the heart of American criminal law. It extends discretionary power to judges that perilously skirts guarantees that were carefully spelled out in the Bill of Rights to protect the innocent. The pertinent amendments—the Fourth through the Eighth—were based on bitter experience with governmental abuse in criminal cases dating back to Magna Carta days.

The problem of crimes committed by suspects while free on bail awaiting trial is a serious one. It has become more acute recently, partly because of bail reforms that limit—but do not entirely prevent—the practice of imposing prohibitive bails, but principally because court congestion has caused prolonged delays between indictment and trial.

The surest way to ease this problem of potentially dangerous criminals at large, without perverting justice, is to reform the court system so that all defendants receive the speedy trial to which they are entitled under the Constitution. Pending such long overdue reform, the cases of suspects deemed dangerous could be advanced on court calendars to minimize delays in meting out justice.

Beyond this, the danger from criminals on bail is related to the larger problem of failures of the correctional system. Too many men revert to anti-social behavior even after they have theoretically discharged their debt to society. Prison reform must go hand-in-hand with court reform if the public is to be spared the compound dangers of repetitive offenses.

---

[From the New York Times, Nov. 26, 1969]

GUILTY—UNTIL INNOCENT

The confrontation between the Administration and the Senate Judiciary Subcommittee on Constitutional Rights over pre-

ventive detention is a classic example of totally opposite attitudes on criminal justice today. Reduced to plain language, the Administration wants to change the system so that an accused person is guilty until proved innocent.

Attorney General Mitchell is pushing hard for amending the Bail Reform Act in order to cut down crime, especially in Washington His proposal would empower a judge in any Federal jurisdiction to lock up a defendant without allowing bail on the broad and highly personal grounds of being a "danger to the community." Under the amendment, suspects with a past criminal record would be a prime target for turnkeys, but so would other defendants where there is a "probability" of "ultimate conviction."

Senator Ervin of North Carolina, chairman of the Constitutional Rights Subcommittee, is strongly opposed to this simplistic solution to ending crime in the streets. He believes that the Administration bill is a punitive measure that affords no protection but merely convicts and imprisons without due process, violating sections of the Bill of Rights guaranteeing access to counsel, opportunity to participate in preparing a defense and reasonable bail.

The increasing national rate of criminal activity is appalling. But speeding up the trial process represents a better answer than pretrial imprisonment to the danger that a freed prisoner may commit a crime while out on bail. More prosecutors and judges should cut the delay between indictment and trial.

The constitutional rights of accused persons cannot be nullified because the wheels of justice grind too slowly. Unquestionably, there are specific situations in which public safety requires that an arrested person be kept in custody, but the most rigid limitations must be put on the judicial exercise of such detentive authority. The Mitchell proposal is too wide open to abuse to meet that requirement. It reverses the basic judicial concept of innocence until found guilty after a court trial.

## FINANCIAL NEEDS OF PRIVATE UNIVERSITIES

Mr. PERCY. Mr. President, Dr. Edward H. Levi, president of the University of Chicago, submitted a state of the university message to the university trustees on November 4 of this year. To obtain educational excellence in an institution of higher learning a superhuman burden is placed upon its officers and faculty. These men are required to assume the role of financier, architect, planner, negotiator, arbitrator, sales manager, and almost every other phase of professional life. One wonders how university officials have the time to devote attention to the issues of education in the midst of these other responsibilities. They manage to do so, however, while also succeeding in developing an improved physical plant, new course structures, improved student relationship, and expanded services to government and humanity. The problems are almost beyond comprehension, at times, and, as this report so starkly indicates, the central problem, perhaps, or the "nitty gritty" of the university administrators' life revolves around trying to make financial ends meet.

We in the Senate have been struggling these past weeks in an effort to enact tax reform legislation. On many occasions this debate has turned to the subject of charitable and educational giving and the issue of tax benefits claimable by those who give to charitable and educational causes. The tax bill contains many provisions for closing loopholes through which taxpayers can avoid shouldering their fair share of the cost of government. This is all to the good. At times, however, efforts have been made to apply stronger sanctions against potential givers than were warranted by the facts or justified under the benefits that would be obtained by society.

We must weigh the value that will be received by a charitable or educational institution against a benefit received by one donating money or property to such an institution. Whenever I felt the former overweighed the latter, I supported efforts to benefit education and charitable enterprises. The message by Dr. Levi was an important factor in helping me determine my course of action because it demonstrated how essential it is to encourage adequate giving to these private, independent, innovative institutions.

As Dr. Levi stated:

> The strength of the university is in the individual scholar, the individual student, the tradition of scholarship, the precious and mysterious collaboration which sometimes occurs among scholars . . .

I might add that the strength of a free society depends upon the strength and independence of its institutions, especially those devoting themselves to educational pursuits. As I have frequently indicated, Government is generally unable to assume as capably the vital functions performed by these institutions and individuals. It is having a difficult enough time attempting to perform its present tasks. Yet, to maintain the strength of these private institutions costs money now, and will require vastly expanded sums in the future.

The financial burdens upon the University of Chicago, as presented by Dr. Levi, clearly demonstrate this need for adequate funds and the problems in obtaining them. Ten years ago, the university's endowment income was greater than faculty salaries; today, it barely goes half way in meeting costs. To meet current operating costs, gifts, endowment, and sundry income make up 52 percent of the budget. In 1959, the university counted on receiving $7,186,000 in gifts to support the budget; this year, to balance the budget will require over $19,000,000 in gifts.

There is a widespread belief that in a society of general affluence, such as ours, and under conditions where federal support is substantial, private universities lack any major financial problems. Nothing could be further from the truth. Educational institutions, if they are to perform their true mission, are unable to take advantage of technological breakthroughs like businesses in order to achieve economic growth. There can be no hope of keeping abreast of general economic growth. The need to maintain a low teacher-student ration, pay adequate salaries to attract competent faculty, and expand into new educational fields means that costs are going to keep rising, faster than returns on investment income can support.

Mr. President, we must strive to preserve the incentives for individuals to give to private educational and charitable institutions. It is for this reason that over the past several weeks of tax debate I have introduced and supported legislation designed to prevent a tax being imposed on foundations, requiring a substantially larger payout by foundations currently to educational and charitable activity and preserve the incentive for private philanthropy which I consider an essential point of the genius of our private sector. Through such means we will be able to maintain a free society.

Because of their general application to all private institutions of higher learning, I ask unanimous consent that Dr. Levi's statement be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

AN ADDRESS BY EDWARD H. LEVI, PRESIDENT, UNIVERSITY OF CHICAGO, NOVEMBER 4, 1969

The Statutes of the University provide for the Senate to meet not less than once a year to hear a report from the President and to discuss matters of University interest.

Changes in the last 10 years give some perspective on the nature of our University and its problems. During the period, faculty size increased by 45 per cent; students by 40 per cent. Increases were general, though uneven, throughout most of the University. Within the Divisions, the largest increase in both faculty and student numbers was in the Humanities. The smallest increase in student numbers was in the College and in The Pritzker School of Medicine. The smallest increase in faculty numbers was in the Divinity School and in the Physical Sciences. Eighteen major buildings were completed. Among them are the Wyler Children's Hospital, Searle Chemistry, the Laird Bell Law Quadrangle, the Center for Continuing Education, Woodward Court, the A. J. Carlson Animal Research Facility, the new High School Building, Pierce Tower, the completely redone Cobb Hall, Goldblatt Pavilion, the Astrophysics and Space Research Building, Social Service Administration, the Mott Building, the High Energy Physics Building, and the just dedicated Hinds Research Laboratory. During the 10 years, the University spent more than $70 million in building construction. Four new buildings are now going up: the Regenstein Library, the Social Services Center, the Pick International Studies Center, the Ben May Cancer Research Laboratory. For student housing, in buildings constructed and acquired, the University spent more than $23 million.

At the beginning of the 10 year period, it was reported that endowment income exceeded the salary commitments for the tenured faculty. In 1959 total faculty compensation for professors and associate professors was $6,761,000. Endowment income was $6,939,000. This comforting proportion, if that is what it was, no longer exists. Total faculty compensation for professors and associate professors today is $18,377,000, and endowment income is $11,632,000. Total faculty compensation for all ranks at the University is now $25,661,000. In 1959 it was $9,353,000. During a period when endowment income increased 68 percent, the total budgets went up 148 percent; student fee income went up 189 percent and student aid 394 percent. Total faculty compensation rose 174 percent, average faculty compensation 91 percent, with the greatest percentage increase at the instructorship level. I am sure it will sur-

prise many of our faculty to know, either because they regard the figure as too high or too low, or just plain mythical, that the average faculty compensation with fringe benefit is now $22,072. In 1959 it was $11,560. We, apparently, stand third among the universities of our country in faculty salary level, and perhaps somewhat higher if the comparisons are made more precise. A few years ago we stood second.

As is well known, the period was a time of substantial increase in government contracts and grants for research. Over the 10 years, the regular budget of the University, from its unrestricted funds, rose 149 percent. Restricted funds increased 97 percent, while government grants and contracts went up 247 percent. Of the three divisions where government contracts and grants are largest, the greatest increase—582 percent—was to the Biological Sciences; then a 500 percent increase to the Social Sciences, and a 269 percent increase to the Physical Sciences. The ranking is somewhat different for increased expenditures from the University's own funds, including restricted funds, where among the Divisions and the College, the greatest percentage increase went to the College, then next to the Humanities, then to the Physical Sciences, the Biological Sciences and the Social Sciences. In 1959, 21.55 percent of the total adopted budget was for expenditures to be made possible through government grants and contracts; an additional 5.11 percent came from overhead allowances, largely governmental. The comparable figures for the adopted budget this year are 28.41 percent and 5.04 percent. An overview of the sources of income which make possible the University's total budget is as follows: government and overhead, 33.45 percent; tuition, 18.70 percent; patient fees, 18.66 percent; gifts, 16.43 percent; endowment and sundry, mainly endowment-like, income, 12.76 percent. In 1959, that endowment and sundry, mainly endowment-like, income amounted to 18.82 percent.

The figures on the sources of income for the total budget serve to emphasize, of course, the importance of federal support for individual faculty research and which frequently provides student support. But they also indicate the great dependence upon private funds, where gifts and endowment and sundry, mainly endowment-like, income amount to almost 30 per cent of the total budget. This point is made sharper if attention is focused on the sources of income which make possible the University's regular and restricted budgets.

If we leave out self-balancing funds and expenditures for the hospitals and clinics and the Industrial Relations Center, and only include federal funds for faculty salaries and overhead, the picture is as follows: tuition 32.67 per cent; gifts 27.51 per cent; endowment and sundry income 24.31 per cent; overhead, largely governmental, and government support to faculty salaries, 15.51 per cent. Thus gifts, endowment and sundry income amount to almost 52 per cent of these budgets.

It is no pleasure for me in a general talk on the state of the University to give so much weight to these figures. I do so only because of their overwhelming importance. The reality which we must face is shown by the following: In 1959 we counted on a total of $7,186,000 in gifts to support the budget. Of this amount $1,752,000 was projected as unrestricted for the purposes of the regular budget. We ended that year with a surplus of $325,000. This year, in order to balance the budget, we must project $19,328,000 in gifts, of which $9,328,000 would be for unrestricted purposes. If $9,328,000 is required, in order to arrive at that figure, it appears likely we may have to use $5,690,000 from the $25 million challenge grant which was given to us by the Ford Foundation. Indeed, in order to get $6,751,000 in unrestricted gifts last year, we had to use $4,269,000 from the Ford challenge grant. If we have to use $5,690,000 from the Ford challenge grant this year, and let us hope this proves to be unnecessary, that will almost use up what remains of the entire $25 million from Ford. A hole of $5,690,000 in our budget in future years, even at current levels, is the equivalent of 20 per cent of the regular budget of the College, the Divisions, the Schools and the Library.

Another point must be stressed. The budgets of which I have been speaking do not include capital expenditures. They never have. These funds must be raised on their own outside the budget. Emergency capital expenditures which must be made—and there always seem to be some—unless otherwise raised are a call upon those same unrestricted gifts needed to maintain existing budgets. Desperate pleas for the University to complete the amount required to put up a building, which has been only partially financed, are also a call upon these same funds unless other gifts are raised or restricted funds can be tapped for this purpose. A good example of the problem of getting financing for new buildings is the Basic Biology Building, much needed, much planned. This is now estimated to cost $13 million, of which $5,480,000 has been raised. I do not wish to make us more miserable by pointing out in passing that most new buildings, when completed, do not carry with them, nor do they engender, funds for their maintenance.

This may well be the financial situation of the private university of quality in the United States in the year 1969. This is, in any event, our present outlook. It is a difficult picture to present. The figures are, of course, complicated, subject to interpretation. They inadequately reflect complexities and nuances. There is a wide-spread belief that because the society is affluent, private universities cannot really find themselves in this kind of a bind. There is a natural hesitancy, although I find myself not sharing it, to give news which might be regarded as discouraging either within the institution or to potential donors. Donors, it is said, do not rise to the opportunity of giving money for deficits. It has sometimes been suggested that if private universities were brighter in the way they invest their funds, capital gains would have done much to close the gap. Our university has, indeed, divided its funds to permit more adventuresome investments with possible payouts above a lower annual income when this is not prohibited by the terms of the gift. But this kind of enterprise will not greatly diminish the necessity for added gifts and additional income. There is also a widespread belief, sometimes shared by faculty, that because of the rise of federal support, private institutions do not have a special financial problem. But we do have. Compare the extraordinary effort to build 18 new buildings on this campus for $70 million over a 10 year period with the almost instant campuses which have been able to arise within some state systems. The partnership which state and private institutions have, and should have, in our system of higher education ought not obscure the fact that between them, sources of funds are somewhat different; problems and strengths are not always the same.

The general burden which is upon the University is that its productivity increases more slowly than does productivity in the economy as a whole. William G. Bowen, Provost and Professor of Economics and Public Affairs at Princeton University, studied combined data furnished by Chicago, Princeton, and Vanderbilt, and information supplied him by the Office of Education for private universities in general. He found that the cost per student over the 10 year period from 1955 to 1965 in the three universities combined showed an average annual rate of increase of 7.3 per cent, and that the data for all private universities indicated an average annual rate of increase in cost per student of 8.3 per cent.

"At the root of the cost pressure besetting all educational institutions," Professor Bowen writes in a study published by the Carnegie Commission on Higher Education, "is the nature of their technology. Over the long run, even if the universities were to have the most progressive leadership and were to shed many of their conservative biases, the odds seem slim indeed that they can hope to match the remarkable record of productivity growth achieved by the economy as a whole . . . And it is the ability of the universities to keep pace, year after year, with economy-wide productivity gains which is crucial for their cost position."

He concludes: "the economic implications of the technology of education would lead us to expect costs per student to rise inexorably, even if universities avoided all temptations to embrace new fields and new techniques, to accept broader responsibility in the world at large, to educate more graduate students relative to undergraduates, and to do more research."

And this cost problem falls most heavily upon the major private universities. "The conscientious supervision of a student's independent work is the essence of high-level graduate education, and it is an important element in the undergraduate preparation of highly qualified students . . . it is hard to see how any significant savings in faculty time are to be achieved here. In short, the very nature of the educational mission of the major private universities makes it unlikely they will benefit to any great extent from whatever technological innovations do occur. The same comments can, of course, be applied to other institutions which emphasize graduate education or the small group mode of undergraduate instruction characteristic of many liberal arts colleges."

Our present state, our quality, our financial situation—the fact we are here—are the results of decisions made to attempt to reinvigorate the University as the Institution it had always been, after the forced budget cuts of the early '50s, the flight of the faculty, the struggle to exist in the community. The question was whether the University could continue to attract faculty, begin to rebuild facilities and add new ones, do the things it ought to do within the community, and maintain that excellence in teaching and research without which there would be small reason to have a University of Chicago. Departments of undoubted eminence required reassurance; new areas of inquiry consistent with the basic interdisciplinary unity of the University had to be developed. Weak departments needed to be convinced the fault lay within, not without. These efforts gained considerable momentum and success by 1959. With the leadership of President Beadle, they were strenuously renewed. To these efforts, essentially efforts of the faculty, we owe the University's present undoubted ability in most of the traditional disciplines, and its equal primacy in some areas further developed during the period, such as nonwestern studies. Of course, we have many inadequacies of varying degrees of seriousness, including sometimes ourselves. It is perhaps small comfort to realize a satisfied university is not a good one. The opportunity for much that has been achieved came because of the success of the $160 million campaign for funds made possible by the Ford Foundation's $25 million challenge grant and the efforts of members of the Board of Trustees and friends of the University. Of course, it was realized the end of this money-raising effort would find the

University with important unmet academic needs and continuing financial pressures. It was, perhaps, good it was not fully realized how acute these might be in part, because of the special vicissitudes of this period. But the $160 million drive was projected as only the first leg of an effort to raise $360 million. We have $200 million to go, and this, whether we can obtain it or not, may be too little. I should remind you that with or without a drive, our present level of operations requires us to raise $20 million a year to keep going, and without the Ford challenge grant, we are not now achieving this.

During the last year we have continued to build upon the strength which prior successes have made possible. The Physical Science Division now has the excellent new facilities for Chemistry and Geophysics, along with the new Astrophysics and Space Research and High Energy Physics buildings. Looking at Psychology and the divisiveness which seemed to overtake it as soon as it moved into the first adequate quarters it ever had, one is churlishly reminded that new buildings need not a department make. But I am sure these new facilities have already helped greatly—even with Psychology. I am told that Far Eastern Languages is positively enjoying its tenancy in one of the buildings vacated by Geophysics.

This has been a year when we have been unusually hurt through faculty losses due to death, retirement or resignation. This has been the case, for example, in Political Science, Economics, Middle Eastern Studies, History, and Divinity School, Physics, the Biological Sciences, including among other areas, Surgery, Physiology, Biophysics, and Medicine. But remarkable new appointments have been made last year and this, and that, after all, is the ultimate test. Moreover, there is the happy indication, as in History, Economics, Political Science, Law, Education, the Divinity School, Business, Mathematics, Physics, and Astronomy and Astrophysics, of increasing success in finding young scholars of unusual accomplishment. This last list is not intended to be exhaustive. It spells good fortune for the University if there are major or, for that matter, any omissions.

The strength of the University is in the individual scholar, the individual student, the tradition of scholarship, the precious and mysterious collaboration which sometimes occurs among scholars and cannot be measured in time spent or under the banality of communication. It has been the good fortune of the University to have had many great scholars throughout the years. We have them now. As colleagues, we value them—young or old—sometimes for their wisdom, always for their insight; when they have it. Fortunately we do not always know who the great scholars are—in addition to a Chandrasekhar, a Zachariasen, a Huggins, a Mulliken, a Beadle. I would name others—they come readily to mind—but the longer the list the greater the trouble I will be in if there are obvious omissions. We surely do not know all those who will become great scholars. This helps us to approach each other with civility, tolerance and skepticism. In any event, I believe it is correct to state that this institution knows a university begins with the individual.

But even though a university should not have all the facilities it craves, physical arrangements, access to materials and special equipment can shape or can be indispensable to the work of the scholar and the education of the student. In our expectation, the Regenstein Library already casts a glow. Graduate students may once more become accustomed to that kind of individual inquiry and study which proper library arrangements encourage, and which we have not had in many years. Even when we complain, which we frequently do, we are fortunate in the availability of many facilities within and without our institution, such as the still functioning Fermi Institute cyclotron, extending its borrowed time, Argonne's ZGS, the 12-foot bubble chamber which began operating at Argonne last month, the coming National Accelerator Laboratory at Batavia. These are only a few examples. The hospitals and clinics are another. To one who works in a field where, despite the commotion about the behavioral sciences, a library is the main requisite, there is sometimes a particular awe in knowing such things as the unique development and use of electron microscopy now taking place, to be aware of the seven instruments relaying information on particles in space, to see the lunar samples, realizing how they were obtained and brought back for analysis. One might feel book-bound, even miniaturized.

I suppose I mention these quite random examples of special facilities, as a preface to making the point that even this university, or perhaps particularly this university, cannot have all the facilities it wants or could well use. It cannot have all the faculty it would like to have. It is quite proper that a flow of memoranda, pointing out our present limitation, should come from faculty and department chairmen and from students. Distinguished departments frequently point out they have achieved great distinction with a faculty too small in numbers, if comparisons are made to departments elsewhere. The complaint is made so often one wonders whether it does not describe a cause for excellence. We are reminded continually that our computing capacity falls far short of that available at many smaller institutions.

We are continually being told that if the University wishes to maintain a strong position in a particular area, we must be willing to take on major capital costs. This university, whatever its future, need not cry out for sympathy. There is virtue in some of our limitations. We have been and are a small university; the expansion of the last ten years preserves this quality. We are the most unified, the least aggregated, of the major private universities. We are a combination of college, graduate divisions and professional schools, which unlike a frequent model, does not rest upon a mass of undergraduates to pay the bill. We entered graduate work from the very beginning, and not in response to government contracts, because we thought there was a special place for a unified institution which would seek to increase and transmit knowledge. There is a price for this attempted unity. It imposes a limitation on size. It forces a persistent questioning as to the relationship of old and new activities to the University as a whole. We learned long ago that we could not do everything, and we discovered that because of this limitation we could do a good deal. This does not mean that at times we have not departed from this kind of ideal conception. Moreover, many of our unmet needs and deficiencies are not only serious, they are notorious. The record of the last years carries a triple and probably perennial message: an extraordinary amount can be accomplished; everything takes so long; an enormous amount remains to be done.

This year, upon the recommendation of the Dean of the College and of the College Council, the size of the College's entering class was reduced from 730 to 500. The action was primarily taken because of shortages in space in the University residence halls, the desire to undouble 133 rooms to single occupancy, the felt necessity to create better quarters for head residents in six of the undergraduate residential houses as part of a long-term program to induce faculty to take part in the cultural life of these houses. The shortage and inadequacies of our residential facilities have been known for a long time. Ten years ago about half of our student body commuted to the University from the homes of their parents. I remember a detailed explanation from one of the University's leading social scientists why this would always have to be the case.

But today this is true for only about 3 per cent of our student population. More than 40 per cent of our students live in University residence halls or University apartments, and an equal number find housing for themselves in the immediate neighborhood of the University. There have been changes also in what is regarded as attractive or suitable housing. The University began planning for more adequate residential units at least 7 years ago. Innumerable faculty and student committees have passed upon a variey of plans. The projected student village, which has been frequently approved, would give a considerable segment of the student body the kind of housing they seem to favor. We need some donors. I do not know whether to be depressed or encouraged by the fact that it took about 25 years from the time of initial planning to the beginning of the construction of the Regenstein Library.

The reduction in the size of the College gives to the faculty of the University an unusual opportunity to work with undergraduates in small groups. This should be one of the characteristics of undergraduate training at Chicago, as indeed it should be, and frequently is, at the graduate level. I am not sure I know what a small group is, and I am not specifying a particular method of instruction. What is important is the ability to reach and work with the individual student, and this can be done in a number of ways. A growing number of undergraduates are taking part in research activities with senior faculty with what are described as surprisingly excellent results. There should be more such possibilities.

In the autumn of last year, the Committee of the Council began discussing looking toward the broadening of the University Senate which then consisted of professors, associate professors, and those assistant professors who had completed three years' full-time service on academic appointments. The faculty Council voted to recommend the inclusion of assistant professors who had completed one year's full-time service on academic appointments at any rank. The change was approved by the Board of Trustees prior to the election of the present Council. The Council, created in 1944 and consisting of 51 elected members, has been a unique institution in the governance of a university. It was an attempt, and I believe a successful one, by the Board of Trustees, after consultation with the President and a faculty committee, to build what the Trustees described as "a coherent scheme of administration." The Statutes describe the Council as "the supreme academic body of the University, having all legislative powers except those matters reserved to the Board of Trustees, the Office of the President, or the other Ruling Bodies." It has "jurisdiction over (1) matters affecting more than one Ruling Body, and (2) any action of any Ruling Body which substantially affects the general interest of the University." In setting up the Council, the Trustees also provided for an elected Executive Committee, 7 members of the Council chosen annually by the Council, with an elected spokesman who serves as the channel of communication between the Committee and the Council. This Committee meets every two weeks during the autumn, winter and spring quarters, frequently more often, and again according to the original plan, the President is required to keep "the Committee informed as far as practicable on all matters of general University interest." For some reason, other institutions are now showing intense interest in how the Committee and the Council function. They have functioned well.

Two years ago I urged the Deans to encourage the creation of effective student-faculty committees or councils in all of the

academic areas of the University. The Council has strongly and repeatedly endorsed this proposal. More than 60 of these committees are now in operation. Their importance depends, of course, on how they are used and the amount of faculty and student involvement in their work. It goes without saying that the exchange of views and the process of deliberation among faculty and students will not work if the faculty does not play a full role. The committees represent a necessary opportunity for mutual enlightenment, and they can contribute greatly to the programs and operations of the University.

This has been an interesting year. Some overall impressions remain. They are not startling. I trust they go beyond particular issues. The coherence and direction of this University depend upon its faculty. The institutional arrangements which have been perfected make this clear. It could hardly be otherwise in view of the kind of university this is. The institutional arrangements go beyond the Council to the other Ruling Bodies, the Schools, the Divisions, the College, and to the Departments and Collegiate Divisions. The exercise of responsibility by the faculty depends upon these bodies having regular meetings, and not just in time of stress. The greatest number of College faculty now have joint appointments in some other academic unit. Partly as a consequence of this, some departments are now much larger than they were. These departments must find new ways of achieving understanding and interchange among their members. There is much work to be done. No one can look at higher education today without wondering about the correctness of much of the structure which has been created. It is perhaps natural that some of the most thoughtful inquiries into our present forms of education and direction for research have begun in some of the professional schools. There is a sense in which these schools have assigned tasks. They are aware of problems to be solved—problems which affect the well-being of society, of mankind, of individuals. They are reminded continually of the inadequacies of our knowledge. They cannot be satisfied with a training of students which merely duplicate their predecessors.

The pressures they feel must be upon all of us. The University as a whole and each of its areas in some ways must share these concerns. We must give constant thought to the kind of contribution—the kind of advancement of knowledge and understanding—which can be made from here. Because we cannot do everything, we must select those things we can do and which make a difference. This means we must know ourselves and the kind of institution which this can become. It means we must overcome a defeating self-pride.

I would not be true to myself or to you if I did not state my admiration for this faculty, collectively and individually, for the members of the Council and the Deans, Masters, and Chairmen who have carried a greater administrative burden than anyone would have known. Three great Deans have won the right to shed this burden. Two of them, Wayne Booth and Alton Linford, have returned to scholarly pursuits. The third, George Shultz, perhaps finds his arduous duties as Secretary of Labor as even something of a vacation.

Universities must respond and change. Their greatness, if they have it in any measure, is not to be found in their ability to express a popular will. They are very much of the society, but they are also separate from it. They are in themselves places of criticism, discovery, and dissent. They must often go it alone, just as the individual scholar must find his own way. They may not be the most important institutions in the world. If they lose their character, they have no importance at all.

I have taken pains to describe to you some of the practical difficulties which this University must face. We should not be fearful for this University's future. We should, rather, hope that in our hands it will continue to be worthy.

## SMALL BUSINESS SUBCOMMITTEE TO CONDUCT STUDY OF FRANCHISING

Mr. WILLIAMS of New Jersey. Mr. President, I invite the attention of Senators to two timely, important articles entitled "A Business of Your Own—The Growth of Franchising," and "Hard Work, Long Hours, a 15-Percent Return," published in U.S. News & World Report of December 8. I ask unanimous consent that the two articles be printed at the conclusion of my remarks.

I say these articles on franchising are timely and important because over the last several years the franchising system of doing business has experienced phenomenal growth. Franchising now accounts for $90 billion per year in annual sales. This is slightly more than 10 percent of our entire gross national product.

I was amazed to learn that there are over 600,000 franchised businesses in this country, most of which are small. Because of the enormous recent growth of franchising and the many implications it has on our entire economy, I have scheduled hearings on franchising before my Small Business Subcommittee on Urban and Rural Economic Development for January 20, 21, and 22. To my knowledge, no committee of Congress has ever before attempted a truly broad study of the entire franchising field. We will make every effort to explore the franchising concept in our effort to make small businessmen and potential small businessmen better informed and intelligently cautious in their franchising aspirations.

The subcommittee will hear witnesses representing the International Franchise Association, the National Association of Franchised Businessmen as well as representatives from Federal regulatory agencies, celebrities from the television, motion picture and sports world, and small businessmen who maintain and operate their own franchised business. One thing we want to determine is whether franchising can establish an effective formula for enabling the local small retailer to stage a comeback.

Mr. President, I commend the editors of U.S. News & World Report for their excellent treatment of this complex subject. We can all benefit from a thorough reading of these articles, which serves as a timely preface to our January hearings.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

### A BUSINESS OF YOUR OWN—THE GROWTH OF FRANCHISING

For millions of American families, a long-cherished dream is to have "a little business of our own."

Now that dream is sparking a whole new industry—franchising—that is changing the face of retailing in this country.

The explosive growth in franchising shows up in a host of businesses. They run the gamut from hamburger, chicken and pizza drive-ins to beauty salons, nursing homes, car washes, carpet-cleaning stores and mobile-home dealerships.

Scarcely a community across the United States has escaped the retailing revolution.

There are franchises to sell ice cream, burglar alarms, household pets, auto supplies, doughnuts, income tax services and bridal accessories.

Almost every day the papers hold out fresh lures for the individual who wants to be his own boss. For example—

A physician in Sacramento, Calif., hopes to franchise a method he has developed for permanently sewing hair to bald scalps.

An auto-racing driver is launching a network of retail service centers for owners of foreign cars and "personal" American cars.

A New England executive talks of franchising a chain of "mini-theaters"—highly automated movie houses with low overhead and limited seating capacity, but showing first-run films.

A New Jersey firm offers franchises for the sale of its health-promoting whirlpool baths.

A company in Texas is looking for people to market its program for "motivation, personal development, sales training and management development."

#### HOW IT WORKS

Franchising basically is a system under which an individually owned business is run as though it were part of a large chain.

The small enterpriser signs an agreement and pays a fee for the privilege of using the parent company's trade marks, designs, equipment, products and management know-how. The parent company is called the "franchisor," the individual operator the "franchisee."

When a company's brand name is nationally advertised or widely known, the franchised store, it's claimed, has "instant" pulling power—something that might take years of promotion and investment for a man starting from scratch.

Says Jerry Kosseff, head of Franchise Analysts & Consultants, a Los Angeles firm: "Nine out of 10 persons who start businesses without the help of franchising fail. But 9 out of 10 who do have franchising help succeed."

" 'Get-rich-quick' schemes are nothing new to the business world," says Harry Winokur, founder and president of Mister Donut, a 14-year-old enterprise. However, he asserts, "The basis of franchising is so sound that companies which adhere to its principles and have salable products will continue to grow at a faster pace than the economy."

Partly for this reason, the Small Business Administration in Washington is showing increasing interest in the franchise idea. It recently granted $50,000 to the University of Wisconsin's graduate school of business to study the impact of franchising on small business and the general economy.

SBA has published a series of pamphlets for people interested in starting their own businesses, and for small manufacturers eager to expand sales through franchised outlets.

Other franchising developments are stirring in Washington.

The U.S. Department of Commerce has just issued a booklet listing nearly 300 firms with franchises "available to qualified persons regardless of race, color or national origin."

The Justice Department and the Federal Trade Commission are preparing reports for Congress on the pros and cons of franchising.

Bills are pending in the House and Senate to provide a greater degree of protection for holders of franchise contracts. Some franchisees have complained that their contracts were canceled just when they had built up prosperous businesses.

A nonprofit trade group, the National As-

sociation of Franchised Businessmen, Inc., has been set up in Washington to provide "assistance, information, or consultation" to existing investors or potential investors in franchised businesses.

ANCIENT HISTORY

Franchising is no newcomer to the American business scene. One of the oldest firms in the country, the F. W. Woolworth Company, for a time after its founding 90 years ago franchised its stores. The big auto and tire companies long have franchised most of their dealers.

Just in the past few years, however, franchising has rocketed to boom levels.

Some date the surge of development to the years just after World War II, when GI's returning from military service wanted to get into business for themselves, and often were able to do so with Government loans.

In any case, the system has grown to the point where almost 30 cents of every retail dollar is spent through franchised channels—about 90 billion dollars a year, all told.

How does a typical franchise operation work out in practice?

Suppose you have just invested in a popular franchise: an agreement with a nationally known doughnut firm to run a retail shop in your community.

You pay a franchise fee—in a range of $7,000 to $12,000—for the right to use the firm's trade name and its promotional materials.

You rent a shop—with advice from the parent company as to the location and interior layout—and buy from the franchisor the equipment for making doughnuts. You might also agree to buy ingredients, paper bags, cartons and other supplies from the parent firm.

Your contract provides that you must follow instructions in detail.

In return, the franchisor agrees not to sell a similar franchise to anyone in your immediate neighborhood. He promises, also, to give you marketing help, advice and training, and to answer questions that may arise as you go along.

If you are fortunate, and everything goes according to plan, within two or three years you should be getting an annual income of anywhere from $15,000 to $20,000 from a shop of typical size, after paying all expenses of the business, says the management of one national doughnut firm.

THE PITFALLS

While the franchising boom has produced some remarkable success stories, it also has created pitfalls for the unwary.

Some communities have become saturated with franchised stores, particularly those in the fast-food field. Newcomers find choice locations gone and competition rough.

"If you don't have the sites to put up your stores, you're out of business," according to Donald King, a real estate specialist who is executive vice president of Mister Donut. The reason, he adds, is the "terrific competition to get good locations. Everyone wants the same spots, and not too many good ones are available. The key is to know which is the right one for your future franchise, and then lease it at the right price."

In some instances, it's suggested, companies were organized primarily to unload franchises on unwitting buyers.

The attorney general of Michigan, in a complaint filed late in October against a cosmetics firm, accused the company of defrauding Michigan residents. The complaint charged the company with "concentrating on the sale of franchises rather than on the sale of cosmetics."

Income-reporting practices of some franchising companies have come in for criticism by financial authorities.

Leonard M. Savoie, executive vice president of the American Institute of Certified Public Accountants, said on November 18 that the promotion and sale of some franchises, and the financial reports on their operations, have led to "certain overindulgences." He referred specifically to financial statements which report as current income fees that are due to be collected over future years. This can lead to overstated income by the parent firm, he added.

Supporters of the franchise system assert that it represents the "last frontier" of the independent businessman.

At a time when economic assets are tending to be concentrated in big business concerns, they say, franchising gives the small operator access to top-quality advice and managerial talent.

Franchising, it's contended, is one way to keep competition alive at the retail level. It is seen, too, as a method for developing business opportunities and jobs for the economically disadvantaged and for minority groups.

THE CURRENT OUTLOOK

Several trends stand out in today's franchise operations.

One is a move toward diversification by franchise managements.

For example, Mutual Franchise Corporation, of Boston, started as a chain of fast-food, self-service restaurants.

Recently, it moved to acquire Mobile Brake Sales and Service System, a specialized brake-relining service.

AAA Enterprises, Inc., a franchisor of mobile-home dealerships, has expanded into the retail carpet business, and also operates a franchise chain for the preparation of income tax returns.

A second development is a big increase in the number of franchise firms that are "going public." About 75 franchising companies now have stock that is publicly held, according to a recent estimate, and many more new franchise-company stock issues are in registration at the Securities and Exchange Commission.

Still another recent development has been the use of big names in the sports or entertainment fields to head up newly organized franchising ventures. Some of the more volatile issues in the stock market lately have been such "celebrity-sponsored" enterprises.

Ahead, experts predict, is expansion into many service operations, including financial, real estate and advertising.

"Franchising has had its share of growing pains," says David Slater, president of Mutual Franchise Corporation. "Right now, it is plagued by tight money, heightened competition and rising costs.

"Still, I can't think of an area with more promise for people who are willing to work hard and stick with a venture until it begins to pay off."

---

HARD WORK, LONG HOURS, A 15-PERCENT RETURN

(Interview with Dr. Charles L. Vaughn, executive director, Center for the Study of Franchise Distribution, Boston College)

Q. Dr. Vaughn, why are we hearing so much about the franchise business these days?

A. For one thing, we have seen some spectacular rags-to-riches developments in this field. They involve names that people are familiar with—McDonald's hamburgers, Kentucky Fried Chicken, Midas Muffler, Howard Johnson's restaurants and motor lodges—and scores of others.

Then, too, franchisors are good at publicizing their activities. Some of this exuberance has spilled over into the stock market, where stocks of some firms offering franchises have been active—not always for sound reasons.

Basically, though, I think franchising keeps making news because it is a way for the little fellow to get started in his own business—often with modest capital and with a good chance for success.

Q. Is this a new idea?

A. No. Franchising goes back to the early years of this century, though the emphasis has changed recently. The first franchisors were production men—auto makers, soft-drink manufacturers, oil producers—who were looking for a way to get their product to market.

In the case of Coca Cola, franchises to bottle and sell the drink were practically given away in the early days just to get the product to consumers. It's only in recent years that franchising has started to boom at the retail level.

Certainly the most successful developments in the fast-food field—hamburgers and fried chicken—offer little that's new in terms of product. But selling them has been given a new twist through standardization of quality and taking the product out to where consumers are—along the highways and in busy shopping areas.

Q. How fast is franchising growing?

A. We estimate the annual growth rate, over all, at about 10 per cent. The food field seems to be growing the fastest. The number of retail outlets there is increasing at a rate of 20 to 25 per cent a year.

Q. How big is the franchise business now?

A. All told, there are close to 600,000 franchised outlets in the U.S. They include auto dealerships, gasoline service stations, stores offering auto products and services, and such other types of retail outlets as restaurants and snack shops, pet stores, and a wide range of service-type businesses.

Q. Is there danger that the market for some of these things will get saturated—just too many outfits competing for the consumer's dollar?

A. It is getting harder to find good locations for some kinds of businesses, but I don't agree that we are approaching saturation. Remember that back in the early 1950s people were saying we had about reached the limits of ownership of television sets. Yet today we have households where there are two or three sets. The same can be said for car ownership and even home ownership. We're finding more and more families in the market for a second home—a vacation property. As long as our population continues to grow and our standard of living continues to rise, I think there will be a continued expansion in many lines of franchising.

Q. Are there dangers for the individual who is thinking of investing money in a franchised business?

A. Yes, there are many pitfalls, and the man who is thinking of getting into a franchised business needs to be aware of them:

First, a person taking out a retail franchise has to be prepared to work hard—put in long hours and maybe work a six or seven-day week. In that respect, franchising is no lazy man's way to get rich quick.

Second, a franchise holder has to be willing to follow instructions. That is one of the contradictory things about franchising: The big appeal lies in having your own business, but the chances for success are greatest when you hew strictly to the line your boss, the franchisor, has laid down. Many big franchising companies have told me they do not want to do business with a fellow who goes off on his own, who tries to develop new ways of doing things. The parent company has worked out products and processes and marketing plans that it has tested under all sorts of conditions. It doesn't want one of its franchisees upsetting the applecart.

Q. Does the parent company have close control over the people it licenses?

A. Yes. The franchisee has to sign a contract that spells out the terms under which he will operate. Generally, he must make a continuing payment—a royalty—that amounts to a percentage of his annual gross sales.

After two or three years in business, a man may tend to forget how he happened to

get started in it. He may not realize that he owes much of his success to the advice and supervision and quality controls of the franchisor. If he had gone into business on his own, the chances are 2 to 1 that he might have failed in a couple of years.

Q. Why do you say the man who operates a franchised business has a better chance for success than the man who has started out on his own?

A. The parent firm offers a great deal of know-how: management assistance, advice on hiring help, how to keep books, how to maintain strict standards of quality.

Often it provides a financial backstop that the man starting a business on his own can't get.

In the case of the better-known franchising setups, the businessman gets the benefit of an established name—something that can be a very valuable property.

Q. Would you suggest that the man who is going to invest money in a franchise get legal advice before he signs a contract?

A. Absolutely. He should consult his lawyer and his banker and perhaps an accountant. He may want to check with his local Better Business Bureau as to the reputation of the company with which he is considering signing up.

You will find that any reputable franchisor will be more than willing to give a prospective licensee the names of some of his franchise holders. I usually suggest that the prospective investor take a list of names and make a random selection out of that list—not just go to names the franchisor selects.

Q. What should he ask these people?

A. He will want to find out whether they are satisfied with their working arrangements with the parent company, how hard they have to work, what the drawbacks of the businesses are as well as the advantages. He will want to satisfy himself that the parent firm is stable and well financed, that its product has wide consumer acceptance, that the company has had experience in dealing with independent businessmen.

CHECKLIST FOR GOING IT ALONE

Q. Where can a person go for information about opportunities in franchising?

A. A basic source is a booklet published by the U.S. Department of Commerce: "Franchise Company Data." It is supplied free, and it lists some 250 to 300 franchise businesses and describes each one briefly. It also contains a checklist of points for a prospective franchisee to keep in mind. It's important to note that this booklet is in no sense an endorsement of any of the firms listed, nor does it offer any guarantees of success in any particular field.

Then there are many current books and magazines devoted to franchising. Here at Boston College Center we have published a folder that describes our activities and lists sources of information about the franchise field.

Q. What sort of return on investment can a person expect from putting money into a franchise?

A. We have been trying to work out some estimates, but there is no strict rule of thumb. One of the big fast-food chains says that after the first year or two in business, the franchise holder ought to get an annual return of 14 or 15 per cent. But this company also cautions that this sort of yield presupposes hard work, long hours and strict attention to detail.

Q. Does franchising offer a way for minority groups with limited capital and experience to get a start in business?

A. Yes. Franchisors are accustomed to dealing with untrained people who need advice and guidance and close supervision.

Often the two barriers that Negroes find when they try to get into business are lack of capital and lack of knowledge of where to turn for advice and assistance. On the latter score, franchise companies generally are top-notch. Their executives are not business-school theoreticians; they have been through the school of hard knocks. They are men who know how to train people for a specific type of retail venture.

GETTING STARTED ON A SHOESTRING

Q. Is shortage of capital a hindrance for people who would like to start a franchised business?

A. It is a problem, but steps are being taken to improve that situation.

For example, the Small Business Administration has been relaxing its lending policies, particularly to help members of minority groups. And when you have a nationally known name on a franchise operation, you'll usually find a lender more willing to put up some money than if you were starting a business from scratch with just your own name on it.

Q. Suppose a man has bought a franchise and after a year or two wants to get out of it. Is that hard to do?

A. One characteristic of franchising, as opposed to a company-owned outlet, is that the franchisee can sell his business to someone else. In that sense, he is an independent entrepreneur. Usually he can find a buyer to take over his business, or in some cases the parent company will help him find a buyer. Generally, however, the parent firm has to approve the buyer.

Q. Do you find interest in the franchise field growing?

A. Yes. We get inquiries here at the Center from all over the world—France, Australia, Finland, even from Czechoslovakia and some of the other Iron Curtain satellites.

Every spring we sponsor an international conference on franchising. The next one will be April 2–4, 1970, and already we are getting inquiries and requests for information. Last year we had 700 registrants when we had planned for only 300. Next year we expect about 1,000 registrants, although we may have to limit attendance.

Q. What specific advice would you offer the person trying to decide whether to take on a franchise?

A. Basically, he needs to size up his own risk quotient. That boils down to answering three questions: How much risk can he afford? How much risk is he willing to take? And what sort of return can he expect to get from that risk?

The man who is getting along in years—say, 50 to 55 years old—can't afford to take as many chances with his capital as the man in his 30s who still has time in his working years to recoup losses he might suffer.

There are plenty of risky franchises being offered today, and on some of them a man might as well put his money into a Las Vegas slot machine or bet on a horse. I would be leery of a new firm offering franchises with no record of accomplishment and no tested market for its product.

Only after weighing the risks and the possible rewards should an individual venture into franchising. But I am convinced that this is a field that still has great growth ahead and that offers opportunity for the man who is willing to give his full time and attention to a business he is temperamentally suited to run.

## DRAFT REFORM

Mr. KENNEDY. Mr. President, since I last placed in the RECORD a number of items relating to the establishment of a lottery for determining the order of induction into military service, a number of important evaluations of it have appeared in the press. I think it important that they, too, be generally available in one place to Senators. Consequently, I ask unanimous consent that these materials be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Washington Post]

MARYLAND UNIVERSITY STUDENT SAYS DRAFT LOTTERY SYSTEM WAS RIGGED

(By Aaron Latham)

A University of Maryland student claims that, statistically speaking, the draft lottery was rigged so that those born in the first half of the year won and those in the second half lost.

Brian Reid, a mathematician who ran a computer check on the lottery results, said yesterday that draft officials evidently placed the dates in the big glass bowl in chronological order with January buried at the bottom and December on top.

When the numbers were drawn Sunday, December birthdates fared the worst with an average ranking of 121. November was close behind at an average of 149, October at 182 and September at 157.

The average January ranking was 201, February 202, March (which had the highest average ranking) 226, April 203, and May 208.

Reid says that there are "between five chances in a thousand and five in a hundred thousand that the draw was actually a random selection." Those are the odds that each birthday had exactly the same chance as every other.

Meanwhile the Los Angeles Times reported that John E. Ware, a student at the University of Southern California, conducted a similar statistical analysis and came up with the same results.

He concluded that the results were "too unusual, too bizarre," to have depended entirely on chance.

The draft next year will be based on the Washington lottery, with those whose birthdays were drawn first called first.

Reid says that the draft officials fell into the same trap that many television shows do: they assume that by putting cards in a drum and stirring them they will get a random sampling.

The birthdates drawn Sunday, each encased in a plastic capsule like the prizes in a gum machine, were placed in a glass bowl and stirred with a spade. He says that this is not good enough to give everyone an equal chance.

Ware says that in lotteries, as in the shuffling of cards, "Too many things are biased, too many things can occur."

Both Reid and Ware agree that it would have been more equitable to base the draft on a table of random numbers generated by a computer.

Reid is a 20-year-old senior physics major and his birthdate, Oct. 6, was ranked 87th. Ware is 27.

[From the Washington Post, Dec. 4, 1969]

CHURCH LEADERS PLAN AID TO DRAFT RESISTERS

(By William R. MacKaye)

DETROIT, December 3.—The General Assembly of the National Council of Churches tonight narrowly defeated a proposal that the agency accept and "hold in trust" a draft card proferred by a 21-year-old draft resister.

Delegates agreed 228 to 184 to accept the card, which was offered by James D. Rubins, a student at Hope College in Holland, Mich., in the face of legal opinion by counsel that the action would be a violation of the selective service act.

But council president Arthur S. Flemming, in response to a point of order, ruled the measure had lost for lack of the two-thirds majority required under the rules.

Flemming's ruling stirred repeated efforts

by the measure's backers to find some technique by which they could associate themselves with what many called Rubins "act of conscience."

Finally Flemming ruled that council procedures permitting the formal recording of minority dissent would permit the preparation of a document on which delegates and others could subscribe themselves as individuals supporting the young Reformed Church member.

The document is to be readied for signatures Thursday.

Earlier the council, in another demonstration of the increasing opposition to the Vietnam war among its constituent members, called for an international investigation of atrocities against Vietnamese civilians allegedly committed by American servicemen.

The delegates also said they would welcome a congressional investigation, but they said the "belated" Army investigation now under way "is quite inadequate."

The tone of the debate on the war was set during the morning by a speech delivered to the assembly by former ambassador to Japan Edwin O. Reischauer.

Reischauer asserted that American policy toward Asia in general and Vietnam in particular has been deeply corrupted by racism.

As evidence of what he termed the "good mentality" to which governmental officials have succumbed, Reichauer cited the charges filed against 1st Lt. William L. Calley Jr. in connection with the Mylai incident.

The specifications, said Reischauer, charge the officer with responsibility for the deaths of "Oriental human beings."

"What is that adjective doing there?" he asked.

"We have to correct this sort of thing before we can play the sort of role we must play in the world."

Stressing that he has opposed the war for a long time, Reischauer urged other war critics in the council and elsewhere not to overact and force abandonment of the "useful residual roles" the United States may still have in Southeast Asia.

In still another action related to the war debate, an ad hoc committee of the council described a move to create a joint committee sponsored by the National and Canadian Council of Churches that would minister to draft resisters and deserters who have taken refuge in Canada and their families.

Council members reported that an estimated 50,000 draft-age Americans are now in Canada and that about 30,000 are in the process of acquiring permanent residence status there.

A resolution asking the council to give its official blessing to the pastoral project is to be brought before the assembly Thursday.

Preoccupation with the Vietnam issue, particularly the protracted and sometimes passionate debate on the request that the council accept Rubins draft card, tended to overshadow a reiteration by James Forman of his call for reparations for black people.

Foreman, who has played little part since July in the reparations program backed by the Black Economic Development Conference, told the delegates they were deceiving themselves if they thought the reparations demand would wither away.

"People who believe in the Black Manifesto will forever be a plague on the racist white churches and Jewish synagogues," he said.

He spoke with particular harshness of efforts he said some predominantly white churches had initiated to persuade "house niggers" in their denominations not to back the Manifesto demands.

This effort, he declared, has been "most blatant" in the United Methodist Church, the mainly white church that has the largest Negro constituency.

Foreman also charged that the FBI is seeking to obtain indictments against every officer of the Black Economic Development Conference "on orders of Attorney General John Mitchell.

(Federal grand juries in Detroit and South Bend, Ind., acting under the direction of Justice Department officials, are known to have subpoened and questioned church leaders and others about the conference's activities.)

[From the New York Times, Dec. 4, 1969]

QUESTIONS AND ANSWERS ON DRAFT

(By David E. Rosenbaum)

WASHINGTON, December 3.—Since the draft lottery was conducted Monday night, the national Selective Service headquarters, local draft boards and newspaper offices have been deluged with telephone calls from persons with questions about their draft status.

Following are some of the most frequently asked questions and their answers:

Q. Who was affected by the lottery?

A. Men born between Jan. 1, 1944, and Dec. 31, 1950. In other words, men who have had their 19th birthday by Jan. 1 but not their 26th.

Q. Who will be affected by future lotteries? A. Only men whose 19th birthday occurs in the calendar year in which the lottery takes place. They will be liable for the draft in the following year—the one in which their 20th birthday occurs.

Q. So the talk about drafting only 19-year-olds is not precisely correct.

A. Right. Men without deferments will be vulnerable to the draft in the year in which they have their 20th birthday. Some, therefore, will have passed their 20th birthday when they are drafted. But the period of liability to the draft is only one calendar year.

Q. What happens if I do not have a deferment and I am not drafted in the year I am in the pool.

A. Then you will be safe from the draft forever. At least unless there is a national emergency.

Q. In what order will men be drafted?

A. They will be drafted in the order their birthday was picked in the lottery. Men born on Sept. 14 were assigned No. 1 because that date was picked first. They will be the first to be drafted. Nov. 9 was the 80th date picked, and men born on that day received No. 80. They will be drafted after men with No. 79 and before men with No. 81. Within a given birthday, men will be drafted in the order in which the first letter of their last name was picked in another drawing.

Q. What about men with deferments? Will they be drafted anyway? A. No. Men with deferments will not be drafted as long as they have deferments.

Q. My birthday is on Feb. 11. I am 20 years old and was assigned No. 150 this year. Now I have a deferment and will not be drafted in 1970. Will I be assigned another number in next year's lottery to apply in 1971? A. No. Absolutely not. You, like all men now between 19 and 26, will retain always the number you drew Monday night.

Q. Well, what happens when I lose my deferment in some future year? A. You will go into the draft pool with the number 150, even though men in future lotteries with Feb. 11 as a birthday will have a different number.

Q. Is there any way I can get my number changed? A. No.

Q. What happens if I lose my deferment in June and the number 150 has already been passed in the sequence?

A. You will be drafted just as soon as you pass physical examination and are otherwise processed. In other words, you will be drafted almost immediately.

Q. What if when I lose my deferment in June my number, No. 150, has not been reached in the sequence? A. You will not be drafted until the number is reached.

Q. I will be 26 years old in March, 1970. Will I be drafted if my number has not been reached by my birthday but is reached later in the year? A. No. Once you pass your 26th birthday, you are free from draft liability.

Q. What if my number is reached and I receive my induction notice just before my 26th birthday? Can I appeal the induction notice, which will take time, until after my birthday and then escape the draft?

A. Once you start the appeals process, you are liable for induction even if your birthday is passed by the time your appeals are exhausted.

Q. What if I keep my deferment past my 26th birthday? Is my period of liability extended? A. No. If you have a deferment on your 26th birthday you are safe from ever being drafted unless there is a national emergency.

Q. What about the rule that if you have a deferment your period of liability is is extended until you are 35 years old? A. This is technically true. But all men who are under 26 must be taken before any man 26 or over is taken. There are enough men under 26 to assure that men over 26 are not drafted.

Q. I have been hearing a lot about a loophole. I have a deferment, and my number is 165, which means I am a real borderline case. My number may be reached in the sequence and may not be. Can't I wait until late in the year and if it looks as if the number will be reached keep my deferment to wait for another year when the number might be reached? And if it looks as if 165 will not be reached, couldn't I drop the deferment, enter the pool and if I am not drafted be home free?

A. You can try all these things, and it might help. But by the time it is late enough in the year for you to know whether your number is going to be reached, it will probably be too late for the draft board to remove your deferment and change your classification to 1–A. This procedure often takes several months. If your status wasn't changed until after the first of the next year, you would have to take your chances in that year.

NATIONALLY OR LOCALLY?

Q. What numbers are likely to be called?

A. Pentagon experts say that the first third —numbers 1 to 122—are certain to be called; the last third, 245–366, certain not to be called; and the middle third not certain one way or the other. One expert who has done careful calculations believes the cutoff number will be somewhere between 165 and 195.

Q. Is the sequence applied nationally, or is it my place in the sequence within my own draft board that counts?

A. It is the sequence in each local board that matters. But the cutoff number between those who are drafted and those who are not will not vary much from board to board. This is because draft quotas are allotted to each draft board on the basis of the number of 1–A's in that board.

Q. In what order will conscientious objectors be called to report for civilian work? A. They will be called in the same sequence as the draft sequence.

Q. If I am in graduate school without a deferment, can I have my induction postponed until the end of the school year when my number is called? A. Yes. But you will be taken at the end of the school year.

Q. What if I am an undergraduate without a deferment? Can I finish the school year before I report for induction? A. Yes.

Q. What will be the size of next year's draft pool? A. About 850,000 men will be eligible for the draft in 1970.

FUTURE POOLS

Q. What about in future years? A. It is expected that pools in the few years after 1970 will contain about 700,000 men. But this is a less precise than the 850,000 figure.

Q. Then wouldn't my chances of being drafted be less next year than in future years because the pool is bigger? A. Possibly. But it is also possible that draft calls will be lower in future years, especially if President Nixon is successful in scaling down the number of American troops in Vietnam.

Q. How many men will be drafted in 1970? A. About 250,000.

---

DRAFT BOARDS ARE PREPARING TO IMPLEMENT LOTTERY PLAN

(By David E. Rosenbaum)

Special to the New York Times

WASHINGTON, December 2.—With hundreds of thousands of young men having learned their place in the draft sequence from last night's lottery, draft boards began today preparing for the January call-ups.

The 12,500 men to be drafted next month—those whose birthdays were among the first drawn in the lottery—should begin receiving their "greeting" from Uncle Sam in the next two or three weeks.

The national headquarters of the Selective Service System sent the local boards today a memorandum informing them of the official order of call established last night and instructing the boards how to rearrange their files.

HOW SYSTEM WORKS

Officials here said that within a matter of days each board should have the files of its registrants who are eligible for the draft next year arranged in the order of their birthdays were picked in the lottery.

Here is how the new lottery system works:

Men who were born between Jan. 1, 1944, and Dec. 31, 1950, and who on Jan. 1 have had their 19th birthday but have not had their 26th, were assigned a number based on the order in which their birthday was drawn in the lottery.

Thus, men born on Sept. 14 received No. 1 because that was the first date picked. Men born on Oct. 20 received No. 192 because that was the 192d date drawn, and so on.

Men born on the same day will be selected in the order in which the first letter of their last name was drawn in another random drawing.

These are the men who will be drafted in 1970. Men between the ages of 19 and 26 who do not have deferments and who are not drafted next year will no longer be vulnerable to the draft unless there is a national emergency.

If a man reaches his 26th birthday during 1970 and his number has not been called by this birthday, he will escape the draft.

Deferments are not affected by the lottery. If a man is eligible for a deferment next year, he can get it from his draft board, regardless of his place in the draft sequence.

The same regulations apply for deferments that applied before the lottery. Thus, college undergraduates can still obtain deferments until they graduate, quit school or reach the age of 24.

Most graduate students cannot get deferments. Occupational deferments are granted at the discretion of the local boards, and criteria vary from place to place. In some areas teachers are granted deferments. In others, they are not.

No one's draft classification was affected by the lottery. For instance, men who have 4–F classifications (unfit for military service for physical, mental or moral reasons) will continue to be 4–F.

FUTURE LOTTERIES

Every year hence, there will be another lottery in the fall. These lotteries will affect only men whose 19th birthday fall in that calendar year.

They will be liable for induction during the following year, the year in which their 20th birthdays occur.

Thus, next fall, there will be a lottery to assign numbers to men born in 1951. These men will be eligible for the draft in 1971. If they do not have a deferment and are not taken in 1971, they will be free of draft liability unless there is a national emergency.

Although men with deferments in the 19-to-26 age group will not be drafted next year even if their number is reached in the sequence, they will always retain the same number they were assigned in last night's lottery.

When their deferments lapse for reasons such as leaving school or quitting their jobs, they will enter the pool immediately. If their number is reached in the year in which they enter the pool, they will be drafted. If the number is not reached, they will not be drafted.

For example, John Doe, a college undergraduate, was born Feb. 11, 1949. His birthday was the 150th one drawn in the lotter, so he was assigned No. 150.

Next year, he plans to stay in college and retain his deferment. He will not be drafted. In 1971, he plans to graduate. He will lose his deferment.

Even though the 19-year-old men in next year's lottery with Feb. 11 as a birthday will be assigned another number, John Doe will always have 150 as his number. So in 1971 he will be drafted after all men with 149 as a number and before all those with 151 as a number.

If, when John Doe leaves school, No. 151 has already been reached in the sequence, he will probably be called for induction very soon because his number has been passed.

Pentagon experts believe that men whose numbers are higher than the mid-200's will probably not be called next year and will be free from draft vulnerability forever, barring unforeseen circumstances.

The numbers from 1 to about 125 are considered certain to be reached in the sequence, and these men will be drafted. Men with numbers in the middle will have a year of uncertainty.

Pentagon experts believe that 500,000 men will be immediately available for the draft in 1970 and that another 350,000 will enter the pool during the year, for a total of 850,000.

Of these, about 250,000 are expected to be drafted. Another 290,000 are expected to volunteer for enlistment.

The manpower experts are estimating that draft pools in the few years after 1970 will total about 700,000 men, or slightly fewer than in 1970.

It is also likely, they say, that draft calls will be lower in future years if President Nixon is successful in scaling down the war in Vietnam and no other conflict develops.

The rough figure of 700,000 is reached by the following arithmetic. In 1971, there will be 1.9 million 19-year-olds. About 600,000 will fail to qualify physically, mentally or morally, leaving 1.3 million qualified.

Slightly more than half of these will have student or other deferments. Of the 600,000 remaining, half will enter the service, and half will go into the draft pool. The remainder of the draft pool will consist of older men who lose their deferments and enter the pool.

---

[From the New York Times, Dec. 8, 1969]

DRAFT LOTTERY CHANGES VIEWS OF ELIGIBLES

The new draft lottery has set into motion a complex set of crosscurrents among young people that range from sharp changes in career plans to assertions from moderates and radicals that draft protests will continue unabated.

Interviews with draft-eligible young men, counselors, student activists and draft board workers in 20 cities since last week's draft lottery show the following things:

Many draft-age men appear to be relieved that they can now see their futures more clearly because they have a better idea of their chances of being drafted.

Both moderate and radical young people say that they will continue to protest the draft until the entire Selective Service System is eliminated, although some concede that the lottery has caused a division on the draft among the young.

Some of those who are now least vulnerable to the draft have dropped plans to pursue deferred careers such as teaching and are seeking to get out of military reserve commitments they had made before they were "safe."

There is some evidence that those who are now most vulnerable to the draft have been "radicalized" against the war in Vietnam, while those with the lowest risk have lost some of their antagonism.

College and occupational deferments continue as the most popular means of avoiding the draft, while a minority still says it prefers jail or exile to military service.

Military experts say the draft pool for the coming year will include about 850,000 men between the ages of 19 and 26, about 250,000 of whom will be drafted. Thus young men whose birthdays were picked in the lowest numerical third of the lottery are virtually assured of being drafted, while those in the highest third are relatively safe. Those in the middle third fall into the "uncertain" group.

THE SAFE NUMBERS

Generally, those who were awarded the "safe" numbers were jubilant. "You know, I was born a month late," said Peter Steinberg, a junior at Columbia College, who drew 366, the "safest" number. "I would just like to thank my mother."

But for others, the jubilation was tempered. The comment of Harold Kletnick, a 21-year-old University of Chicago senior, who also ranked 366th, was typical.

"I definitely didn't want to go to the Army," he said, "but I don't feel good at all about beating the system."

Others who drew high numbers said they still opposed the draft because of the "immorality of the war," the inequities that remain and the basic concept of forced military service.

Perhaps mindful of this, many in Congress, and possibly President Nixon himself, will push for more extensive draft reform next year. Mr. Nixon had asked for the lottery.

The Senate Armed Services Committee has already planned hearings for February to hear proposals for major new modifications and also for complete elimination of the draft in favor of an all-volunteer Army. But most observers agree that there is little likelihood that the draft can be ended as long as the Vietnam conflict continues.

PROTESTS TO CONTINUE

So student radicals and others say that protests against the war and the draft, which many regard as inseparable, will continue. But even the most active opponents of the draft seemed ready to concede that the lottery had taken some of the steam out of the movement.

"If the purpose of Nixon's lottery was to divide us, he's won quite a victory," observed Lawrence Cohen, a senior at the University of Pennsylvania. "Nevertheless," he said, "we must continue to refuse to participate in a Selective Service System that reduces men to animals."

Sue Ellen Dennis, a teacher in Dayton, Ohio, who has been counseling those eligible for the draft, considered the lottery an improvement but said the pressure for reforms

would continue as long as the Vietnam war made the draft necessary.

"Most resisters will continue resistance—with or without a lottery," she said. "It did help those who were uncertain, but the majority still won't buy involuntary servitude."

Cary Krumholtz, a 22-year-old graduate student who has been involved in antiwar protests at the City College of New York, also saw the lottery as divisive: "It's going to radicalize those people from 1 to 122," he said, "and I suppose it will make the ones in the [highest] third more complacent."

Cathy Kornblith, an active member of the Resistance, an antidraft organization that passed out flyers in front of draft boards in the San Francisco Bay area last Tuesday, the day after the lottery drawing, said the new system only emphasized the need for abolition of the draft.

"We'll continue our efforts," he said. "This is going to affect the need for resistance. The lottery still preys on the poor and the blacks and the Mexican-Americans."

Antidraft activists at other campuses and in cities and towns across the country reflected similar sentiments.

UNLIKELY TO BEND

Some of the opposition was clearly ideological and seemed unlikely to bend regardless of the extent of change. At Brooklyn College, Steven Eisenberg and Ira Perelson, members of the Progressive Labor wing of the Students for a Democratic Society, said in a statement that the lottery only obscured the real issue. The statement said:

"Students are fighting the imperialistic policies of the United States in Vietnam. They recognize that the draft—in whatever form—only serves to supply cannon fodder for a war that is benefiting only the capitalists."

But perhaps significantly, while antiwar activists tended to dismiss the lottery as meaningless, there were no reports of organized demonstrations in the cities or on the campuses surveyed.

This may have been due, in part, to lack of understanding of the new system. Many chose to simply wait and see. The Columbia draft counseling service reported more than 200 calls the day after the lottery—10 times normal.

David Sable, a counselor, said that more young men seemed to be gaining sophistication in avoiding the draft. In the last year, he said, "we have had more people apply for conscientious objector status than we have in the last two combined."

He also noted that some students had discussed the possibility of dropping their deferments for 1970 to take their chances in the larger pool. The 1971 pool will consist only of 19-year-olds.

DELUGED BY CALLS

Draft boards and counseling services elsewhere also reported a deluge of calls.

The Rev. Rodney Page, who conducts a draft counseling service near Portland State University in Oregon, reported the phone "ringing off the hook" with questions about the lottery. One trend, he noted, was that the likelihood of being drafted increased the pressure to seek conscientious objector status.

For many, the cold reality of a low draft number seemed to crystalize their resentment. William Tortu, a 19-year-old student at the University of Pennsylvania, who holds No. 18, said: "The lottery jolted me out of my complacency and made me realize the threat of the Army and dying in Vietnam.

"To call the lottery fair in comparison with the previous system is to call hanging fair compared to drawing and quartering."

But even those for whom the lottery was more benign had problems. Many students with high numbers were reported to be seeking ways to get out of R.O.T.C. commitments.

A Brooklyn College student who asked not to be identified because it would "sound like I'm gloating" over his No. 366, said he had planned to teach before the lottery. But now, he said, "I'm throwing it all out the window."

Others foresaw a similar pattern of young men with "safe" numbers giving up deferred status to enter the draft pool for the required period. If this happened, they said, more deferred jobs and reserve openings would be left to men with low numbers.

Some thought this could make matters more critical for men in the middle third, or "sweat zone," as one student called it.

Gary Bloom, 21, a civil engineering major at City College, explained why. Pointing a finger at a student sitting across the table from him in a campus cafeteria, he said:

"That guy there is No. 9. He knows he's going to go. People like him are going to make arrangements—leave the country, or go into a critical occupation or something. And that means that the uncertain group is not uncertain at all."

## TV COMMENTARY AND THE VICE PRESIDENT

Mr. GURNEY. Mr. President, I ask unanimous consent to have printed in the RECORD an article entitled, "TV Misses Public's Response to Agnew Speech," written by Mr. Richard Wilson, and published in the Washington Star of Monday, December 1, 1969.

It seems to me that the article is a significant contribution to the continuing dialog concerning the Vice President's recent speeches with regard to the news media. I quote the last paragraph of Mr. Wilson's article:

The listener, who likes comment, wishes along with it at least the versimilitude of fairness and wisdom, and it is perhaps the shortage of this quality in TV commentary which has caused the great majority to agree, in principle at least, with Agnew. The TV business would do better to examine itself a little further while warning of government repression.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TV MISSES PUBLIC'S RESPONSE TO AGNEW SPEECH

(By Richard Wilson)

The available evidence suggests that Vice President Spiro T. Agnew's criticism of bias in the mass media struck a responsive chord among the general public. There is nothing to suggest, however, that the tonal gradations of the responsive chord have penetrated deeply into the hushed chambers where radio-TV network policy is made.

A tonal deafness seems to have developed on what it was Agnew was talking about, with the network moguls all professing to see a dangerous frontal challenge to freedom of speech in their government licensed medium.

The radio-TV executives, therefore, may well ask themselves why it is that as many as three out of four persons think Agnew has a valid point.

The answer to that question could prove to be quite disconcerting. It may merely involve the simple conclusion of a great many people that the commentators now practicing are not qualified by background, information and depth of thought to share equal time with the President of the United States. This is the equivalent of heresy in the broadcasting business. It is unthinkable that some handsome, well-spoken broadcaster with five or 10 years experience should not be entitled to go on the air with his authoritative analysis and be listened to with the same attention and respect as the President or whomever it is the broadcaster is analyzing and judging.

Dr. Frank Stanton, president of Columbia Broadcasting System, Inc. expounds the current thought in the industry on the point. He attributes to these instant analyzers the ability to call "attention to emphases, omissions, unexpected matters of substance, long anticipated attitudes, changes of views, methods of advocacy or any other aspect of the speech." The analyzers function as critics, in other words, judging this omission or that change of attitude as it seems to strike them in the spirit of guiding and instructing the public on what they ought to think about the speech they have just heard.

In the case of the President's speech on Vietnam, Dr. Stanton points out that the text was handed out to the press and to radio-TV analyzers two hours in advance of delivery. He adds, "If a professional reporter could not arrive at some meaningful observations under those circumstances, we would question his competence." Two hours is enough, it is judged, to permit these highly skilled professionals to gather their thoughts for airing to an audience which assembled before their television sets to hear the President make a major announcement after weeks of study. Otherwise they had better look for work elsewhere than CBS.

It is at this point that a great many TV viewers turn off their sets and turn off Dr. Stanton. They are simply not convinced that the analyzers are professional enough, informed enough or profound enough to share time with the President on major U.S. policy. In the case of Nixon's speech, two hours of deep thought was not enough to reveal to the analyzers that four out of five of the listeners they were instructing would approve of Nixon's stated views on Vietnam.

The TV moguls, in their profound concerns for the right of analyzers to say anything that occurs to them after their gruelling two hours of thought, have simply missed the central point that a vast host of TV watchers do not share the respect with which the analyzers view themselves.

This would be as hard for a TV commentator to accept as for a newspaper columnist, the difference really being that many newspapers give their readers a wider choice of opinion which they can usually adequately sample by reading the first and last paragraphs and thus turn off before they become too deeply involved.

Analysis and interpretation is a great art which only a few, such as Eric Sevaried, have wholly mastered. As Sevareid handles his art, it is to explore a subject rather than to arrive at conclusions on it, and in this way to open his own mind and the minds of listeners to various inherent possibilities. This seems too inconclusive to others whose two hours of thought leads them toward conclusions they would not think so irrefutable if they could hear the concurrent comment of their listeners.

The listener, who likes comment, wishes along with it at least the versimilitude of fairness and wisdom, and it is perhaps the shortage of this quality in TV commentary which has caused the great majority to agree in principle at least, with Agnew. The TV business would do better to examine itself a little further while warning of the baleful potential of government repression.

## MRS. B. J. BANDY, DALTON, GA., A FINE AND COURAGEOUS LADY

Mr. TALMADGE. Mr. President, the Chattanooga Post recently published an extremely interesting article about Mrs. B. J. Bandy of Dalton, Ga. Mrs. Bandy is a fine and courageous lady who played a leading role in the development of the huge tufted-textile industry.

The article recounts how Mrs. Bandy and her late husband went into the tufted bedspread business in a laudable effort to pay off debts accumulated in their country store during the depression. They were determined to pay "100 cents on the dollar" that they owed, and it was this spirit that made their bedspread business such a notable success.

But even more notable is the fact that this business was the beginning of the tremendous tufted textile and carpet and rug industry of today. From this humble origin, the carpet and rug industry has grown into a $2,250 million business and a vital part of the economy of the Nation, and many States in particular. We are very proud that approximately 65 percent of the volume of this industry emanates from northwest Georgia, principally in the city of Dalton.

Mrs. Bandy is a grand lady, and she is certainly to be congratulated for the role she played as one of the principal pioneers in this important industry.

I bring this news article to the attention of the Senate and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LAUNCHED TUFTED SPREADS TO SAVE A COUNTRY STORE

(By Ronald V. Gunter)

DALTON, GA.—Mrs. B. J. Bandy looks no more like a pioneer than she does a moon maid, but she is truly one of the pioneers in one of the fastest growing and most dynamic industries in America.

The wife of the late B. J. Bandy, the man credited with being the first person to ever make a million dollars in the bedspread business, she was responsible for selling the first bedspreads that launched what became the largest single business in the industry.

Before his death in 1948 Mr. Bandy had bedspread plants in three states employing more than 1,000 persons.

Today Mrs. Bandy is the matriarch of a clan of tufting industrialists. Her son, B. J. Bandy, Jr., is vice president of Coronet Industries Inc. and was one of the founders of the firm, now one of the industry's largest.

Her daughter, Mrs. Joseph K. McCutchen, is the wife of the chairman of the boards of J&C Carpet Co. and Universal Carpets Inc. of Ellijay, Ga.

McCutchen, founder of these companies, is the holder of more than 30 major patents in tufting technology, patents that are recognized in both the United States and Europe.

Mrs. Bandy's grandson, Joe McCutchen Jr., is president of one of the faster-growing young carpet companies in the industry, Universal Carpets Inc.

Mrs. Bandy's reasons for entering the bedspread business are simple and eloquent.

"My husband and I wanted to pay our debts. You see," she says, "we were running a country store when the depression hit, and we did a large credit business. Many, many of our accounts took bankruptcy and never paid us anything. We owed our suppliers $22,000 and my husband and I were determined to pay 100 cents on the dollar for what we owed."

Besides running a country store, both Mr. and Mrs. Bandy were railroad telegraphers. Mr. Bandy still worked as a telegrapher when the depression hit.

Those were the days, she recounts, when the bedspread business was first getting off the ground.

"We went to see Mrs. Catherine Evans Whitener (the woman who made the first tufted bedspread in the area and who is credited with starting the industry), and she let us copy five different patterns of her bedspreads.

"Truly here was one of the grandest ladies and finest persons I've ever known," Mrs. Bandy says.

Mrs. Bandy hired some people to hand tuft the five bedspreads, and Mr. Bandy, still working on the railroad, was able to get passes on the railroad.

He obtained Mrs. Bandy a pass to Washington so that she could try to sell large numbers of the hand-made spreads.

"I'd never been farther away from home than Atlanta before this trip. I had one new dress, and I sat up all night long on the train. It was quite an experience," she remembers.

"I sat with my suitcase and my bundle of bedspreads. The next morning upon arriving in Washington I started walking to my first store. Frankly I didn't know you could check a suitcase in the terminal; so I carried both my suitcase and my bedspreads to Woodward & Lothrop and asked to see the buyer.

"I showed him what I had to sell. I also told him I'd never tried to sell anything before. He smiled at me and said, 'I know that,' but he was one of the nicest persons I ever met.

"He said he would take 400 spreads at $4 a spread. I was doubling our money at this price.

"I got back on the train and went to Baltimore, and at Hotchschild & Kohns I sold 200 more. I had planned on going to New York, but I turned around and came home. We had to hire people to tuft up 600 spreads. We shipped them all."

On her next foray into the buying centers she headed for the real big time and went to New York and to Macy's. Her first order there was for 1,000 if she would sell them for $3. She did and still made an excellent profit.

On subsequent trips with railroad passes she went to Chicago, Baltimore, Boston, New York and Washington and sold bedspreads by the hundreds.

"In those days I just prayed that the bedspread business would last long enough for us to pay all the $22,000 we owed," Mrs. Bandy recalls.

The Bandys had people throughout the area tufting bedspreads for them back in the days when the business was truly a cottage craft. Oftentimes the entire family, husband, wife and children, hand tufted spreads.

"It was not uncommon not to be able to ship some particular color of spreads because the creek might rise and the people tufting that color would be cut off from the main road. This type thing happened so many times," she laments.

When the wage-and-hour law came in with the New Deal, many people thought the business was doomed, but technology took over. A man took the head of an old fashioned "goose neck" Singer sewing machine and adapted it to the task of machine tufting spreads.

A new machine age was born. The Bandys were among the first to go mechanical. Mr. Bandy later bought a large plant in North Carolina; he established Southern Craft Co. in Rome, Ga., and built Bartow Textile Co. in Cartersville, Ga., then the largest in the industry.

Since his death in 1948, Mrs. Bandy has given much of her time to charitable and civic projects.

In memory of Mr. Bandy and a granddaughter who was killed in an accident at the University of Georgia, Mrs. Bandy and the McCutchen family contributed money to establish an intensive-care unit at the Dalton hospital. It now occupies an entire wing.

Mrs. Bandy has been honored by the Salvation Army with a life membership for her long-time work with and financial support of the Army.

Mrs. Bandy's admiration for the Salvation Army spans many years. Her father and brother were both physicians and her brother was killed in the trenches while serving as a doctor during World War I.

She has also been honored by two governors of Oklahoma and by former Gov. Ernest Vandiver of Georgia for her efforts and financial support in restoring the Chief Vann house near Chatsworth, Ga.

Former Oklahoma governors, Raymond Gary and J. Howard Edmonson, have cited her for her work and both made her an honorary colonel.

She also holds the title as Official Ambassador of the Cherokee Nation, an honor presented her by W. W. Keeler, now president of Phillips Petroleum Co., Bartlesville, Okla.

Today she says she enjoys playing bridge most every day and she spends a lot of time working with Dalton Junior College, where she is a trustee.

As one of the earliest pioneers in the tufting industry and as one of the more successful participants in it, Mrs. Bandy has realized great financial rewards. Her life has also been marked with great personal tragedy, but as a superactive person in many charitable and civic projects she appears to love and to live every moment of her life.

---

## RACIAL ISOLATION AND DE FACTO SEGREGATION

Mr. SCOTT. Mr. President, our distinguished colleague from Mississippi (Mr. STENNIS) has in recent weeks pointed his finger at a problem which the people of Pennsylvania and many other Northern States are not aware of—the problem of racial isolation in large, industrial urban centers of the North.

The Senator seems to overlook the fact, however, that this racial isolation has unfortunately resulted from economic and housing patterns, and not from overt acts of discrimination. In addition, the Senator overlooks the fact that racial isolation is much less severe in the North than in the South. According to statistics which I have requested from the Department of Health, Education, and Welfare for example, over 87 percent of all Negro students in the State of Mississippi attend 100-percent Negro schools. By comparison, only 3.5 percent of the Negro students in Pennsylvania attend all Negro schools. I ask unanimous consent to insert further statistics prepared for me by the Department of Housing and Urban Development comparing the school systems in Pennsylvania with those of Mississippi.

There being no objection, the statistics were ordered to be printed in the RECORD, as follows:

MISSISSIPPI AND PENNSYLVANIA—SCHOOL ASSIGNMENTS BY RACE, FALL 1968

| Reports | Mississippi | | Pennsylvania | | Jackson, Miss. | | Philadelphia, Pa. | | Pittsburgh, Pa. | |
|---|---|---|---|---|---|---|---|---|---|---|
| School systems reporting | 106 of 148 | | 568 of 610 | | 1 | | 1 | | 1 | |

Mr. SCOTT. I agree with the recent statement made by the distinguished Senator from New Jersey (Mr. CASE), who said:

> Two wrongs do not make a right. We must get at the problems in the North, but not at the expense of our efforts to correct even more severe problems in the South.

The above figures demonstrate that there are very severe segregation problems in the South brought about by, until recently, enforced legal segregation. Senator STENNIS, to my understanding, would desire to offer an amendment to the presently pending and already very late HEW appropriations bill before this body. This amendment would provide, again I understand, that Federal funds would be cut off to any school district wherein was located a school which was "predominantly" Negro and a school which was "predominantly" white not either under court order to desegregate or having an HEW-approved desegregation plan or presently providing the busing of students from one school to another.

This is a complicated and complex proposal which deserves the most far-reaching consideration of the Senate. It is my hope that the Senate leadership will attempt very hard to get commitments for hearings on the matter intended to be proposed by Senator STENNIS. Over a month ago I said to this body that I would normally object to such a provision as being legislation on an appropriation bill. The issue of de facto segregation in the North has long deserved the serious consideration of this body. I want to be recorded as in favor of considering ways and means whereby racial isolation in the North can be reduced and eliminated. However, de facto segregation has its roots in serious economic and social problems which are found in central cities. I would, for example, like to see permanent and well-considered legislation on this subject with appropriate Federal funds authorized and appropriated for clearly delineated purposes. Any rider to an appropriation legislation would only have an effect for 1 year. Therefore, I would hope that the Senate would immediately proceed with the HEW appropriation legislation soon to be before us and that the Senate leadership would proceed to join me in urging hearings on this matter at the earliest time next session. The problem with which we are faced is to not risk diminishing our attacks on the quite worse desegregation problems in the South. There is no reason to believe that the situation in the North, however serious and disheartening it may be, would in any way justify diminishing the pressure for desegregation in the South. I would hope that substantive and far-reaching legislation would evolve which would have as its purpose enforcing all the laws and all the decisions of the Supreme Court equally in all parts of the United States. I am firmly in support of such legislation and urge that the appropriate subcommittees and committee of this Congress diligently proceed to deliberate this matter for the full consideration of the Senate.

## CRISIS IN ENVIRONMENTAL QUALITY

Mr. McINTYRE. Mr. President, 200 years of neglect have brought about a crisis in environmental quality that may well pose the greatest challenge mankind has ever faced.

Just a few years ago concern over this crisis was limited almost exclusively to professional ecologists, conservationists, and a few far-visioned public servants.

Now, and none too soon, the crisis is beginning to come home to all the people.

In the last decade we have seen increased reaction at the national level. But the reaction has been sporadic and uncoordinated. Piecemeal laws have been enacted to meet piecemeal problems with piecemeal funding. And this response, of course, falls far short of meeting a challenge that is nothing less than a crisis in the quality of life itself.

In the crucial need to rise to that challenge, motivation of the private citizenry is the single most important factor, for it will be their concern, their demands, their efforts that will influence the Congress and the State legislatures to take the measures, however costly, to preserve our Nation in recognizable and livable form.

In my own State of New Hampshire, this private initiative is emerging in encouraging and effective fashion. A unique new approach to environmental problems, an approach called New Hampshire—Tomorrow, aims at meeting the environmental crisis in a most positive way.

New Hampshire—Tomorrow is a cooperative venture by Dartmouth College, the Society for the Protection of New Hampshire Forests, the Spaulding-Potter Charitable Trusts, and the New Hampshire Charitable Fund—along with help from Ford Foundation.

This program is designed to meet the needs of New Hampshire towns and villages offering the assistance of expert planners and providing options to solving specific environmental problems. The approach is practical for it recognizes that concern must first be mobilized at the local level before effective action can be taken.

It recognizes that many towns are in a position to do much on their own to preserve environment as well as to restore it, and yet New Hampshire—Tomorrow also recognizes the importance of the

programs and prerogatives of the State and Federal Governments and seeks to complement them.

I am certain that the future will see an accelerating assault on the problems of environment, more research, more funding, more governmental assistance at every level, and I shall work for all of this. But for me it is particularly heartening to see such an auspicious beginning being made in the communities of my own State.

Mr. President, because of the importance of this program, I ask unanimous consent to have printed in the RECORD an editorial originally published in the Concord, N.H., Monitor and later reprinted in the Berlin, N.H., Reporter. It not only provides further description of the program and its goals, but also offers it important support.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

NEW HAMPSHIRE—TOMORROW

A unique program is underway in New Hampshire dedicated to finding ways and means of controlling, and improving, the state's most precious and perishable resource—natural beauty.

The program is called "New Hampshire—Tomorrow," and nothing quite like it, as far as we can determine, ever has been undertaken before.

It is practical, forward-looking and imaginative. It is an experiment in the concrete steps necessary to control our environment, to identify needs and to determine how best those needs can be met.

"New Hampshire—Tomorrow" is a cooperative undertaking by Dartmouth College, the Society for the Protection of New Hampshire Forests, the Spaulding-Porter Charitable Trusts and the New Hampshire Charitable Fund—with help from the Ford Foundation.

It is an exercise in feasibility, for the program is aimed at helping local communities, with minimum expense, undertake conservation projects or initiate corrective action to preserve and enhance the livability of our surroundings.

The Spaulding-Potter Trusts have granted "New Hampshire—Tomorrow" a total of $100,000 over a two-year period to get its "process of accomplishment" program off the ground.

Just yesterday, the Ford Foundation announced it had granted the New Hampshire Charitable Fund $84,650 to participate in the plan that will identify needs, encourage local action, provide expert advice and try to determine how goals can be accomplished.

The New England Regional Commission, a federal agency with offices in Boston, has chipped in $15,000. And still other federal funds may become available once the program gets under way.

Dartmouth College's contribution consists of headquarters and research facilities and the services of a full time water expert, or hydrologist.

For Dartmouth, it is a significant step forward, for the institution for too long has held itself aloof to the pressing problems of the state in which it has been situated for 200 years.

Dartmouth also will provide advisory teams of geographers, economists and scientists to help local communities tackle the sometimes seemingly unsurmountable problems of environmental control—cleaning up polluted streams, enhancing scenic vistas, creating land preserves, and abolishing unsightly junkyards, used car dumps, etc.

The thrust of "New Hampshire—Tomorrow" will be to find the means to accomplish limited local projects—and not to accomplish those projects itself. It will not draw up a master plan for beautifying our environment, but its activity may lead to the development of state policy toward this end.

Among other things, the program will provide legal help to local citizen groups that seek to improve the quality of their community environment.

In other words, the program is designed to guide and assist, and not dictate.

One of the most imposing tasks of "New Hampshire—Tomorrow" will be to educate and inform. Comparatively few persons recognize fully the gravity of the problems that will face New Hampshire in the next decade if the state's natural beauty is allowed to deteriorate at the present pace.

It is an historic undertaking stimulated largely by Concord Atty. Eugene C. Struckhoff. The enthusiastic backing he has received is indicative of the degree of importance attached to the nationwide problem of environmental control.

## HUNGER IN AMERICA

Mr. MONTOYA. Mr. President, many of us will be looking forward to celebrating the holidays through religious observance, gift exchanges, and sitting down with family and friends to a specially prepared dinner.

Unfortunately some Americans will barely have enough money to pay for rent and a subsistence diet, let alone sit down to a sumptuous dinner. Millions of Americans throughout our affluent United States will go to sleep Christmas day hungry, wondering if they will be able to stretch their food to the end of the week.

The recent White House Conference on Hunger in Washington did one very important thing; it underscored and brought to an even larger audience the cold hard facts—we have millions of hungry people living in America who need assistance. The Select Committee on Nutrition and Human Needs, of which the Senator from South Dakota (Mr. McGOVERN) is chairman, brought this fact to the attention of Congress and the American people earlier this year. Now the Nixon administration, realizing the gravity of the problem, called a White House conference to further dramatize the situation and draw up recommendations for the administration to act upon. It is my fervent hope that they do so very soon.

Congress has voted for more food stamp funds. The administration has endorsed the stamp-out-hunger plea and the recent hunger conference has recommended a course of action-now. Many New Mexicans go to sleep hungry every night. This must not continue.

My own formula for demonstrating the Government's resolve is by doing something immediately. To this end I have sent President Nixon a letter asking him to declare a National Stamp Out Hunger Week beginning December 21. This would require the Secretary of Agriculture to issue a directive providing sufficient free food stamps and commodities to all needy welfare recipients so all Americans will have a holiday dinner.

Unquestionably we in America must view the presence of hunger in the world's richest nation with alarm. Neglect and apathy in the past have made the solution to hunger more difficult each day. It is time we acted to follow the principles of our Founding Fathers, who wrote in the Constitution that we must "promote the general welfare."

Mr. President, I ask unanimous consent that the text of my letter to President Nixon be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON APPROPRIATIONS,
*Washington, D.C., December 9, 1969.*

President RICHARD M. NIXON,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: This past week the White House Conference brought to the attention of millions in America that we must do something as soon as possible to feed the hungry and malnourished Americans blighted by hopeless poverty.

I was very pleased to read your address delivered at the White House Conference on Hunger. In line with your endorsement to stamp out hunger I would like to urge you to do the following:

(1) Declare the week of December 21st 1969 as National Stamp Out Hunger week.

(2) In the spirit of the White House Conference on Hunger and recommendations set forth, begin a nationwide campaign immediately to distribute a free Christmas food stamp/commodity package to all poverty-level families during this week.

The best way I know to indicate to the many "have-not" people in America that the national leadership means business when they say stamp out hunger is my action. My own state of New Mexico is a case in point. The White House Conference may be remote and confusing to many, but if in line with the declared policy of the Administration an unprecedented act was undertaken to provide sufficient food for all the needy on Christmas, they will be more receptive and responsive to the food assistance programs you initiate in 1970.

Sincerely,

JOSEPH M. MONTOYA,
*U.S. Senator.*

## GOODELL PLAN SUPPORTED

Mr. McGOVERN. Mr. President, the response to a recent nationwide public television broadcast on the question, "Should Congress Adopt the Goodell Proposal Requiring Complete Withdrawal of All Combat Troops From Vietnam by December 1, 1970," indicated that 68 percent of the respondents favor the bill, with 32 percent opposed. As one who has long advocated our disengagement from the self-defeating involvement in Vietnam, I was gratified by this demonstration of support for the proposal of the distinguished Senator from New York (Mr. GOODELL).

I ask unanimous consent that a summary sheet on the response to this debate be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

THE NATION RESPONDS TO THE ADVOCATES ON VIETNAM

(By Robert Fisher, executive editor)

OCTOBER 28, 1969.

In response to the nationwide public television broadcast debating the question, "Should Congress Adopt the Goodell Proposal Requiring Complete Withdrawal of All Combat Troops from Vietnam by December 1, 1970," the Advocates received 2,151 letters (2,917 signatures) from 39 States. Of the people writing in, 68 percent favored the bill, 32 percent were opposed.

During the October 19 broadcast viewers heard Sen. Charles Goodell support his bill (S. 3000) and heard Senators Barry Goldwater and Gale McGee in opposition. Sen. Charles Mathias, as yet uncommitted, was the principal guest to whom the arguments were addressed.

The Advocates, a new, live, Sunday evening public affairs television series (10:00 p.m. EST), seeks to bring people into politics. Each week arguments are heard on both sides of an important "decidable question." At the end of each broadcast, viewers are encouraged to act on the question. The Advocates' staff has undertaken to tabulate views received and pass them on to the respondents' elected officials. The Advocates, as a program, takes no position on any issue debated.

The following is a detailed breakdown of the mail response to our Vietnam broadcast:

| State | Pro | Con | Total |
|---|---|---|---|
| Alabama | 3 | 4 | 7 |
| California | 310 | 92 | 402 |
| Connecticut | 15 | 9 | 24 |

## "WE ARE ALL PILGRIMS"

Mr. GOODELL. Mr. President, Thanksgiving Day was an opportunity for all of us to reflect upon the traditions of our country and the meaning of these traditions today.

I would like to call to the attention of my colleagues a Thanksgiving editorial by radio station WNEW in New York City. In this period of disillusionment and skepticism, I think this editorial speaks to all Americans.

Mr. President, I ask unanimous consent that the text of this excellent editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A THANKSGIVING WEEK COMMENTARY BY RADIO STATION WNEW, NEW YORK CITY

Every Thanksgiving we recall the Pilgrims as a noble hardy band of pioneers who landed at Plymouth, Massachusetts in 1620, faced a dreadful winter but survived to reap a great harvest. Commemorating this nation's riches and the Pilgrim's courage is a national tradition.

So is the Pilgrim's crisis of spirit.

Financed in part by merchants who created them—accompanied by dissenting strangers—decimated by scurvy and pneumonia—saved ironically by the Indians they had come to serve with the Gospel—and uncertain in self-government, the Pilgrims were plagued with their own doubts. And so are we.

Even today—some of us reap great harvests while others labor in hard, unproductive soil. The process of building a colony into a nation included mutual trust and civil war.

Confirming our destiny has sometimes taken us far beyond our borders. Sometimes bearing arms.

And now in just such a time we are at odds with ourselves about the cause and purpose of our commitment in Vietnam.

We are facing one of the many hard winters since 1620. And because of it we are reminded of just how uniquely Thanksgiving summarizes our origins, trials and triumphs under one flag—a flag which allows us to pull together while arguing in which direction.

The American Flag does not belong to just some of us. It cannot be coveted as a partisan symbol. It cannot be hailed or dishonored for personal politics or prejudices. It is the banner of the very liberty we have to wrestle over what we believe is best for it.

To fly the American Flag on Thanksgiving Day is to give evidence of that liberty and to prove that the Flag represents all of us in our diversity and to rescue it from those who would make it a symbol of division.

If you have an American Flag—fly it.

Fly it for all of us. With all of our differences we are all Americans. We are all Pilgrims.

## SEGREGATION IN THE SCHOOL DISTRICTS OF NEW YORK

Mr. STENNIS. Mr. President, according to the 1968–69 HEW school survey, there was a total of 3,364,090 students in the elementary and secondary public schools of New York. Of this total, 2,601,708, or 77.3 percent of the total enrollment, were white; 473,253, or 14 percent, were Negro students; 263,799, or 7.8 percent were Spanish-speaking Americans; 19,620, or 0.6 percent, were classified as Orientals; and 5,710, or 0.1 percent were American Indians.

The HEW's IBM data reflects that there are 17 school districts in the State of New York with at least one school with a minority group enrollment of over 80 percent. However, in 14 of these cities, or school districts, there is an aggregate Negro enrollment of 403,127, or 85.2 percent of the total State Negro student enrollment in the New York City schools alone.

Let us take a look at New York City. It has a total enrollment of 1,363,067, of which 467,365, or 43.9 percent, are white, 334,841, or 31.5 percent, are Negro, 244,302, or 23 percent, are Spanish-speaking Americans, 15,573, or 1.5 percent, are classified as Oriental, and 1,526, or 0.1 percent, are American Indian students.

In New York City, there are 119 schools which are 99 and 100 percent minority group segregated, which have a Negro enrollment of 89,957, or 19 percent of the city's total Negro student enrollment. There are 207 schools having a Negro student enrollment of 146,575—43.7 percent of the city's total Negro enrollment—that are 95 to 100 percent minority group segregated. There are 269 schools with an aggregate Negro enrollment of 173,791—or 51.9 percent of the city's total Negro enrollment—in schools that are 90 to 100 percent minority group segregated. There are 322 schools with a total Negro enrollment of 201,462—or 60.1 percent of the city's total Negro enrollment—where the minority group enrollment is 80 to 100 percent. There are 18,865 white students—or 4 percent of the city's total white student enrollment—attending these 322 schools that are 80 to 100 percent minority group segregated. There are 82,794 white students—or 17.7 percent of the total white student enrollment—attending 50 to 100 percent minority schools.

Now let us look at the white majority schools. There are 211 schools which are 80 to 100 percent white, which are attended by 17,994 Negro students—or 5.3 percent of the city's total Negro student enrollment. In all, there are 393 majority white schools in New York City, and 65,490 Negro students—or 19.5 percent of the city's total Negro enrollment—attend these majority white schools.

In the public schools of the city of Buffalo there is a highly segregated Negro minority. Buffalo has a total enrollment of 72,115, in 101 schools, of which 43,942—or 60.9 percent—are white, 26,381—or 36.6 percent—are Negro, and 1,792—or 2.5 percent—are from other minority groups.

In the Negro majority schools, there are 16 schools with a total of 11,562 Negro students, which is 43.8 percent of the total Negro enrollment in Buffalo public schools, which are 99 and 100 percent Negro. There are 21 schools, with 66,122 Negro students—or 61.6 percent of the city's total Negro student enrollment—that are 95 to 100 percent Negro segregated. 19,268—or 73 percent of the city's total Negro students—attend majority Negro schools, and 27 percent attend majority white schools.

1,821, or 4.1 percent of the total white student enrollment of Buffalo, attend majority Negro schools, and 95.9 percent of the white students attend majority white schools.

There are a number of other interesting city school districts in New York State. For example, there is Rochester, which has a Negro student enrollment of 13,679, which is 28.9 percent of the total public school enrollment of the city, where there are six schools that are 90 to 100 percent Negro segregated.

In Utica, which has a Negro enrollment of only 11.8 percent, has one school that is 93.6 percent Negro.

Newburgh, N.Y., where the Negro student enrollment is only 23 percent of the total school enrollment of the city, has two schools which are 99 percent and above Negro segregated.

Monticello, N.Y., with only a 17.3 percent Negro student enrollment, has one school that is 100 percent Negro.

These facts and figures are presented for future consideration by the Senate of a national policy regarding integration of the races in the public schools of the State.

I ask unanimous consent to have information relating to the State of New York printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

NEW YORK STATE TOTAL

| Representing | 87 | 6,054 | 251 | 762 | 7,154 | 152,204 | 159,358 |

Mr. JAVITS. Mr. President, the Senator from Mississippi (Mr. STENNIS) today introduced a series of figures relating to the concentration of children of minority families in certain schools and school districts in my State of New York.

I ask unanimous consent that the remarks I make will immediately follow the remarks of Senator STENNIS in the RECORD. I have advised Senator STENNIS that I will be doing this, so he is apprised of it and is entirely willing to have me do what I am doing.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a chart which was prepared at my request by the office of Civil Rights of the Department of Health, Education, and Welfare.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

MISSISSIPPI AND NEW YORK, SCHOOL ASSIGNMENTS BY RACE

| Reports<br>School systems reporting<br>Schools reporting | Mississippi<br>106 of 148<br>770 | | New York<br>686 of 760<br>4,292 | | Buffalo, N.Y.<br>1<br>101 | | Jackson, Miss.<br>1<br>56 | | New York City<br>1<br>853 | |

| Nonminority | 231,924 | 50.8 | 2,601,708 | 77.3 | 43,942 | 60.9 | 20,793 | 53.6 | 467,365 | 43.9 |
| Total all students | 456,531 | 100.0 | 3,364,090 | 100.0 | 72,115 | 100.0 | 38,773 | 100.0 | 1,063,787 | 100.0 |

| Distribution of Negro Students | Percent Negro students assigned to— | Number of schools | Percent Negro students assigned to— | Number of schools | Percent Negro students assigned to— | Number of schools | Percent Negro students assigned to— | Number of schools | Percent Negro students assigned to— | Number of schools |
|---|---|---|---|---|---|---|---|---|---|---|
| 100 percent Negro schools | 87.4 | 269 | 1.6 | 10 | 5.6 | 4 | 94.6 | 19 | 1.8 | 6 |
| 99–100 percent Negro schools | 92.4 | 281 | 4.6 | 24 | 28.2 | 11 | 94.6 | 19 | 4.2 | 13 |
| 90–100 percent Negro schools | 92.7 | 283 | 16.3 | 91 | 61.3 | 22 | 94.6 | 19 | 15.2 | 50 |
| 80–100 percent Negro schools | 92.7 | 283 | 22.3 | 133 | 65.0 | 24 | 94.6 | 19 | 21.9 | 79 |
| 50–100 percent Negro schools | 93.3 | 292 | 44.9 | 292 | 72.6 | 28 | 97.0 | 22 | 48.4 | 192 |
| 0–49 percent Negro schools | 6.7 | 478 | 55.1 | 4,000 | 27.4 | 73 | 3.0 | 34 | 51.6 | 661 |

| Distribution of nonminority (white) students | Percent white students assigned to— | Number of schools | Percent white students assigned to— | Number of schools | Percent white students assigned to— | Number of schools | Percent white students assigned to— | Number of schools | Percent white students assigned to— | Number of schools |
|---|---|---|---|---|---|---|---|---|---|---|
| 100 percent white schools | 12.1 | 86 | 12.4 | 635 | 0.0 | 0 | 12.6 | 5 | 1.9 | 6 |
| 99–100 percent white schools | 25.8 | 138 | 39.4 | 1,572 | 1.4 | 2 | 55.8 | 19 | 2.6 | 11 |
| 90–100 percent white schools | 79.3 | 358 | 74.2 | 2,904 | 31.6 | 24 | 95.0 | 30 | 19.5 | 95 |
| 80–100 percent white schools | 94.9 | 439 | 86.1 | 3,301 | 76.3 | 53 | 95.8 | 31 | 48.2 | 211 |
| 50–100 percent white schools | 99.6 | 478 | 96.3 | 3,722 | 95.9 | 72 | 98.4 | 34 | 82.1 | 394 |
| 0–49.9 percent white schools | 0.4 | 292 | 3.7 | 570 | 4.1 | 29 | 1.6 | 22 | 17.9 | 459 |

Mr. JAVITS. This chart demonstrates that the concentration of specifically Negro children in all-black schools in the State of New York is almost in inverse ratio to their concentration in the State of Mississippi, in that 87.4 percent of all Negro students in Mississippi attend schools which are 100 percent black while in New York, only 1.6 percent of the Negro students attend such schools.

At the other end of the scale, in Mississippi, in schools that have from zero to 49.9 percent Negro enrollment, there are only 6.7 percent of the State's Negro schoolchildren; whereas, in New York,

in 478 such schools, there are 55.1 percent of the Negro schoolchildren.

The essence of the point is this: I know what Senator STENNIS is trying to prove. I agree that where there is segregation on grounds of color, which violates law—that is, violates the Federal Civil Rights Act of 1964 and the Constitution—then I say we should have equal treatment everywhere, and we have actually had an injunction issued in Mount Vernon, N.Y., against the school districts because they were guilty of de jure segregation.

But where you have patterns of residence in a State like New York that bring about what I consider to be an undue and very unfortunate concentration of minority children in a given school, then there must be an effort directed through educational parks, through local busing, and through general pedagogical policies, even though there is some inhibition in using Federal funds and State funds for those purposes. The present Commissioner of Education, James Allen, was New York State's education commissioner and is a leader in the field of combating segregation. New York is striving in every way to dispel the de facto segregation which exists by virtue of housing patterns, and it has the most outstanding antidiscrimination laws in the country that seek to break open these housing patterns. I think there is no comparison between a State that is dug in and still clinging to the last vestiges of segregation as social and legal policy—such as the State of Mississippi—and a State that is leading the Nation in dealing with the problems attributable to housing patterns that lead to de facto school segregation—such as the State of New York.

I thought that distinction should be made very clear, back to back, as it were, with the presentation made by the Senator from Mississippi.

## CONCLUSION OF MORNING BUSINESS

Mr. BYRD of West Virginia. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

## TAX REFORM ACT OF 1969

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the unfinished business.

The PRESIDING OFFICER. The bill will be stated by title.

The BILL CLERK. H.R. 13270, the Tax Reform Act of 1969.

The PRESIDING OFFICER. Without objection, the Senate will resume its consideration.

Under the previous order, the question is on agreeing to the amendment (No. 389) of the Senator from Tennessee (Mr. GORE).

Mr. GORE. Mr. President, I ask unanimous consent that the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. GORE. Mr. President, I congratulate President Nixon upon a competent, well-prepared performance last evening. He demonstrated an awareness of the consideration foremost in the minds of the people and, of course, therefore apt to be submitted. I found myself in disagreement, of course, with his threat to veto the tax bill if it contained, when it reached him, the increase in personal exemption and the social security provisions that have been added. These remarks, however, are simply a preface to what I have to say with respect to the pending amendment.

Every tax amendment to the pending bill for which the senior Senator from Tennessee has voted will save revenues. That is true of the amendment increasing the personal exemption. That amendment, now in the bill, will cost $100 million less in lost revenue than the provisions for rate changes for which it was substituted. The President recommends the rate changes, but opposes. as I understood him, the increase in the personal exemption. My amendment will cost $100 million less than the provisions which the President recommends; so a veto could not be justified on the grounds of fiscal responsibility. Indeed, if measured in that regard, the rate changes for which my amendment was substituted would cost the Treasury more.

Mr. President, the amendment which the Senator from Delaware and I offer, which is now pending, would strike from the bill three new big loopholes recommended by the administration, and unfortunately approved by the Committee on Finance and included in the bill.

Mr. CURTIS. Will the Senator yield for 10 seconds at that point?

Mr. GORE. I yield.

Mr. CURTIS. All those provisions are supported by the Treasury Department, are they not?

Mr. GORE. I understand so. But why? What justification is there to permit the railroads to start taking tax deductions now for tunnels completed in 1850? There is no justification. Yet the administration recommended it, and unfortunately, as I say, the committee approved it and it is in the bill.

Not only will it permit railroads to start taking tax deductions now for tunnels built 100 or 150 years ago, but also deductions for the grading of the roadbeds. Oh, Mr. President, they will take a tax deduction for the Golden Spike—the grade for the Golden Spike that connected the transcontinental railroad just after the Civil War. But this is recommended by the same President who threatens to veto a bill because it raises the personal exemption for a dependent from $600 to $800.

I do not wish now to refight the battle about personal exemptions. I wish now to strike from the bill loopholes recommended by the administration and approved by the committee that would cost $720 million per year.

This should be called the syndicate loophole—or loopholes—because it opens the way for high bracket income tax payers, people in the 70-percent bracket, to combine into an investment syndicate to buy tax deductions from railroads, from housing combines, and from manufacturing combines with respect to pollution abatement. I shall not, in the now severely limited time for debate, undertake to spell it out in detail. Senators will find some illustrations in the speech which I made yesterday. At this point, I shall take only 2 or 3 minutes to illustrate.

A railroad wishes to acquire $100 million worth of rolling stock, including locomotives. It cannot use the rapid amortization deductions, because it is not realizing a profit. This is the kind of railroad that one would think would need the benefit, but the benefit flows to the railroad that is already making a profit. Tax deduction is not worth anything to a fellow who does not owe taxes.

The railroads, though in a losing position, go to a bank. The railroad's bank puts together a syndicate of 70 percent or 65 percent bracket taxpayers. The bank loans the syndicate $1 million on the basis of the railroad's ability to make "rental" payments sufficient to pay interest and principal on the loan. Payments are made by the railroad directly to the bank and do not even go through the syndicate.

What is the net result of this transaction? The syndicate members do not realize any cash flow benefit since the rent and the loan payments equal each other.

In the first year of the transaction the interest deduction and the rapid amortization deduction would more than offset the rental income for the syndicate members.

Their profit comes solely from the excessive deduction generated by the new loophole.

They would get a $200,000 deduction in year one for the rapid amortization to use against their other income.

Mind you, Mr. President, this $200,000 deduction in this instance goes to the high bracket syndicate investor. And it is this loophole that is created by the pending bill and recommended by the administration.

The Senator from Delaware and I wish to strike it out and save to the Treasury $720 million a year.

To continue this example, this $200,000 deduction compares to a proper deduction under the straightline method of depreciation of only about $71,000. Thus, the first year "profit" for the syndicate is 70 percent of $140,000 or $98,000. This comes out of the U.S. Treasury.

This "profit" is not an economic profit from the transaction; it is solely the result of tax profiteering—trafficking in tax deductions.

Thus, over a five-year period, the syndicate will realize a profit of almost $500,000 from tax reductions. Yet they have not put up one dime of their own money.

I should emphasize that railroads will still be able to use regular accelerated depreciation for rolling stock as under present law. My amendment does not affect those rules at all. But it does strike out unjustified new rules.

Mr. PEARSON. Mr. President, will the Senator yield for a question?

Mr. GORE. I yield.

Mr. PEARSON. Really, one of the very, very serious problems in the country today, and particularly in the transportation field, railroads, is the enormous shortage of boxcars. This does not just affect the great wheat lands. It is not seasonal any more. It occurs throughout the whole United States and in every part of the United States, caused by a shortage of cars, caused by cars in very bad repair through the failure of the ICC to properly execute the powers which Congress has given them. Because the traffic flows from West to East, the eastern railroads, through a per diem rate which is much too low, retains the cars in the East.

I understood that this particular provision in the tax bill was to provide, in lieu of the 7-percent investment tax credit, some means for the railroads to have additional funds with which to build boxcars. I am not sure that they would do it. However, that is the argument that is made.

We are today to the point where we are beginning to talk in terms of the Federal Government subsidizing the construction of passenger trains and actually constructing and building boxcars and leasing them to the railroads or individuals.

Mr. GORE. Mr. President, I thank the able Senator.

A great deal is being done here under the name of rolling stock.

The syndicate loopholes, the taking of tax deductions for tunnels built under the Rocky Mountains 100 years ago is not going to improve the rolling stock situation.

Mr. PEARSON. I concur.

Mr. GORE. The 20 minutes allotted to the supporters of the amendment is now down to 5. I must reserve the remaining 5 minutes for the distinguished senior Senator from Delaware.

Mr. President, I yield the remaining time to the Senator from Delaware.

Mr. WILLIAMS of Delaware. I am ready to yield back the time.

The PRESIDING OFFICER. Who yields time?

Mr. GORE. Mr. President, I would think the opponents of the measure would like to use some time.

Mr. CURTIS. Mr. President, how much time remains for the opponents?

The PRESIDING OFFICER. Twenty minutes.

Mr. CURTIS. Mr. President, I yield myself 8 minutes.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 8 minutes.

Mr. CURTIS. Mr. President, let us get the amendment in perspective. It is greatly urged in this country that the taxpayers carry the full load on the matter of pollution. It is also greatly urged that the taxpayers carry the full load for housing and for the poor.

It is an established fact that most transportation systems in other countries are government-owned. Here in the United States, we are not following that procedure. We are putting private capital to work.

The provisions that the Senator from Tennessee would strike out are just and reasonable and sound.

Mr. President, I should like to speak in opposition to the Gore amendment. It would repeal the provisions of the bill for rapid amortization of rehabilitation expenditures for low- and moderate-income housing; for rapid amortization of the cost of new railroad rolling stock and for certain related provisions; and for rapid amortization of the cost of air and water pollution control facilities. Each of these provisions is strongly in the national interest.

Mr. GORE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield briefly.

Mr. GORE. Mr. President, I believe the Senator misspoke himself. He said the amendment would repeal these provisions. It would strike them from the bill. They are not in the existing law. This is a new loophole.

Mr. CURTIS. I thank the Senator.

They would provide important incentives to private business to solve pressing domestic problems.

The rapid amortization of rehabilitation expenditures for low-cost housing will provide a strong investment incentive in favor of rebuilding existing housing facilities. The provision is limited to facilities for families of low- or moderate-income consistent with the policies of the Housing and Urban Development Act of 1968. It does not apply to hotels, motels, or other facilities used primarily on a transient basis. The qualifying expenditures on any housing unit are limited to $15,000 and must exceed $3,000, thus insuring substantial but not luxurious rehabilitation. A recapture rule is provided to insure that if the facility is later sold, the tax benefit will be recaptured as ordinary income to the extent of any gain. And this amendment calls it a loophole. Thus, there is no possibility of abuse.

A 5-year writeoff of this nature is a powerful and effective incentive to rebuilding and rehabilitating existing housing facilities. It will result in rehabilitation of deteriorating neighborhoods and slum areas. It will do this with private capital, saving the taxpayers' money.

The provision is strongly supported by the Department of Housing and Urban Development and by the Treasury Department. Mr. President, in view of our housing crisis and the condition of our inner cities, we cannot afford not to provide an incentive of this nature to rehabilitation of our existing large supply of apartment buildings and other rental housing facilities. These facilities have been allowed to deteriorate to such an extent that they are frequently no longer useful or adequate for family use.

The railroad amortization and related provisions are urgently needed at this time to provide a special incentive for construction of additional rolling stock. The repeal of the investment credit will deny railroads the existing tax benefit they obtain on modernizing their equipment and increasing their facilities. It will benefit the nonprofitable railroads to the same extent as profitable railroads since it extends to leasing companies and will be reflected in lower car rentals. The House bill provided a special 7-year amortization provision, and there were strong pressures to provide an exception to repeal of the investment credit for railroads. As a matter of fact, the Finance Committee did so vote at one time.

The provisions of the Senate Finance Committee bill were developed by the Treasury Department to deal with the special problems of the railroad industry and are completely in lieu of the provisions of the House bill and any exception to the repeal of the investment credit. They are strongly endorsed by the Department of Transportation.

The most critical need is for additional freight cars to relieve the shortage during the harvest season and move our farm crops to market. The provisions of the bill are carefully designed to insure that they will meet our most critical needs. The Secretary of the Treasury with the advice of the Secretary of Transportation is to issue regulations indicating particular classes of cars or locomotives which are not in short supply. After 1972, rolling stock which are in these classes will not be eligible for the 5-year writeoff. The Senate Finance Committee report clearly indicates that railroads are expected to use these new provisions to increase their level of investment in rolling stock, and particularly in rolling stock which is in short supply. The report also states that the extent to which they do, or do not, so invest in additional equipment in order to sustain and improve railroad service will be taken into account in issuing the regulations as to equipment which is or is not in short supply.

These provisions will go a long way toward helping improve railroad efficiency, reducing freight car shortages during seasonal periods of critical need, and improving the ability of railroads to finance the acquisition and modernization of equipment. They deserve our wholehearted endorsement.

The provision for 5-year writeoff of the cost of installing air and water pollution control facilities in existing plants also deserves our complete support. Again, this provision has been narrowly limited to achieve a very specific purpose. The revenue cost will reach a maximum of only $120 million in the long run. It applies only to installation of facilities in existing plant, thereby recognizing that it is much less of a burden on industry to incorporate antipollution equipment in plants constructed in the future. It is also limited to the portion of the cost of the facilities that would otherwise have been depreciated over the first 15 years of the life of such equipment, so that it does not provide an undue tax benefit with respect to equipment having a very long life.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CURTIS. May I have 2 additional minutes?

Mr. LONG. I yield 2 additional minutes to the Senator from Nebraska.

Mr. CURTIS. This provision recognizes the absolute need to deal with a major national problem today—environmental pollution. Our rivers, lakes, streams, and atmosphere are becoming increasingly "dirty." Smog is no longer a Los Angeles condition; we find it in

nearly every major industrial city in the United States. Congress has addressed itself to the problem in a number of ways, but the responsibility and burden must really be placed on privtae industry. Existing factories which attempt to curb pollution by installation of anti-pollution equipment face significant increases in capital costs, accentuated by repeal of the investment credit. Such expenditures do not result in any increase in profitability; they are in a real sense a total loss to the company. The burden is greatest with respect to existing plants where the equipment cannot be incorporated in the design of the facilities or the productive processes, but must be "added on." The bill recognizes this difference and allows the tax benefit only with respect to existing plants.

Mr. President, the increasing magnitude of our pollution problem fairly demands that we provide some tax benefit, some incentive, for installation of pollution control equipment. The provision of the bill will replace the investment credit in this respect and provide even greater incentive in the narrower and more specific areas to which it will apply.

Mr. President, these three provisions will provide major incentives to private industry to help us meet important national objectives. They will encourage the private sector to shoulder the burden in meeting our housing, transportation, and pollution control needs—three of our most important domestic problems. I strongly urge their adoption.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. LONG. I yield 1 additional minute to the Senator from Nebraska.

Mr. BOGGS. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. BOGGS. Mr. President, I commend the distinguished Senator from Nebraska for the position he has taken. I support the committee language on amortization of equipment that will be used for pollution abatement, as well as the other items the Senator has discussed so eloquently.

I wish to ask the Senator one question. It appears to me that there is no danger that this incentive to achieve clean water and clean air would open a loophole into which industry could push a new blast furnace or elevator and call it "pollution equipment." The deduction would be available only after the facility was certified as a pollution abatement facility by the appropriate State and Federal agencies. Is that correct?

Mr. CURTIS. The Senator is correct. And it does not apply to new structures, because they can be designed to eliminate the problem.

Mr. BOGGS. Mr. President, the language of the section we are discussing permits industry to amortize the cost of pollution abatement facilities in a 5-year period. It would be applicable for the full cost of equipment with a normal life of 15 years or less. If the equipment has a normal life beyond 15 years, part of the equipment would be amortized over the regular depreciation basis, part under the accelerated schedule.

This provision, I believe, is a necessary incentive to assure that each of us will find a cleaner and better environment as quickly as possible. To assure that this vital end is accomplished rapidly, the Finance Committee wrote into this section a provision that this amortization would be available only if the abatement equipment is placed into operation by the end of 1974.

There is no danger that this incentive to achieve clean water and clean air would open a loophole into which industry could push a new blast furnace or elevator and call it "pollution equipment." The deduction would be available only after the facility was certified as a pollution abatement facility by the appropriate State and Federal authorities.

Such incentive will implement our national policy of environmental enhancement. This is a policy laid down in large part in legislation that has come from the Subcommittee on Air and Water Pollution, on which I have the honor to serve as ranking Republican.

Let me give two examples. The Federal Water Pollution Control Act declares a "national policy for the prevention, control, and abatement of water pollution." The Clean Air Act was written, according to its language, "to protect and enhance the quality of the Nation's air resources so as to promote the public health and welfare and the productive capacity of its population."

But such improvements cost vast sums of money. This is not a modernization from which industry will profit. It is a modernization for the public health and welfare. Pollution comes from two major sources, industry and government. The Federal Government helps local communities battle pollution. It is only equitable to offer this small advantage to industry.

Our environmental quality standards require industry to meet those standards, or the Government will go into court in an abatement proceeding, seeking to close the plant down. This is a weary and tedious process. I believe it is a far wiser approach to offer the private sector an inducement, such as the committee's proposal. In return for an amortization schedule that would cost the Treasury $15 million in 1970, the private sector will install equipment to give every American a cleaner, healthier, and better environment in which to live.

According to the Cost of Clean Water, a study by the Department of the Interior, private industry faces a cost of as much as $2.6 billion to pay for the backlog of water pollution control facilities in the period from now through 1973. According to estimates prepared by the Department of Health, Education, and Welfare and contained in the study, the Cost of Clean Air, industry faces another 3.2 billion dollar bill for the control of particulate matter and sulfur dioxide emissions into the air we breathe. This cost from next year through 1974 may underestimate in part the full needs, for it was partially based on information for only 85 metropolitan areas and selected industries.

This expense will produce no private profit. Rather, it will produce a public benefit for each and every American. It will clean the air across this Nation. It will improve the quality of life across this Nation. It will enhance the environment in each of the 50 States of our Nation. Rather than providing any private loophole, this provision of the tax bill creates an incentive that will result in a great public benefit.

Mr. LONG. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Louisiana has 8 minutes.

Mr. LONG. How much time remains for the proponents?

The PRESIDING OFFICER. Five minutes.

Mr. LONG. I yield 4 minutes to the Senator from Maine.

Mr. MUSKIE. I thank the Senator from Louisiana.

Mr. President, I rise to oppose that portion of the Gore amendment which has to do with the amortization of pollution control facilities in the case of both air and water.

As chairman of the Subcommittee on Air and Water Pollution, I have been concerned, as have all my colleagues on the subcommittee, including the distinguished Senator from Delaware (Mr. BOGGS), with the problem of stimulating the construction of waste treatment facilities in the public sector.

This year, with the cooperation of the distinguished Senator from Louisiana (Mr. ELLENDER), Congress has approved the appropriation of $800 million for the construction of municipal waste treatment plants. This action on the part of Congress is consistent with the rising surge of interest and concern on the part of the people of America that we deal effectively with the pollution threat to our air and water.

Although in the subcommittee we do not have jurisdiction over tax legislation, the subcommittee—going back to 1966 in the report on the 1966 Clean Water Restoration Act—has advocated tax incentives to mount an industrial effort comparable to the public effort.

Mr. President, I ask unanimous consent that there be included in the RECORD at this point, a statement from that committee report.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

A number of witnesses testified on the need for tax incentives as a means of reducing the cost of noneconomic pollution control facilities. This is not a matter over which the Senate Public Works Committee has jurisdiction but it affects the overall effort to meet water pollution control and abatement needs. This committee strongly recommends that the appropriate congressional committees give consideration to tax relief proposals for industrial pollution control activities.

For the most part, pollution control does not provide a return on an investment to an industry. Installation of pollution control devices is costly and, in many cases, nonremunerative. The billion dollars of capital investment which will have to be made by the industrial sector for the benefit of the entire society will place a substantial burden on corporate resources, and ultimately on the general public.

Mr. MUSKIE. Mr. President, I ask

unanimous consent to have printed in the RECORD a letter which I addressed to the distinguished Senator from Louisiana, the chairman of the Committee on Finance, with regard to this matter on July 29, 1969.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JULY 29, 1969.

HON. RUSSELL B. LONG,
*Chairman, Senate Finance Committee,*
*New Senate Office Building,*
*Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to your request for comments and recommendations on pending legislation which would extend the income tax surcharge, I would like to propose changes to Sec. 168 which provides rapid amortization for air and water pollution control facilities investment.

This section has two major faults. First, the section does not take into account the provisions of the Federal Water Pollution Control Act or the Clean Air Act. Second, the requirement for the development of minimum performance standards is inconsistent with existing policy and would delay environmental improvement programs for several years.

As you know, Federal pollution control legislation has recognized the primary responsibility of the states and local government to control pollution. Federal responsibility is primarily directed to reviewing state standards to assure consistency with the national policy of the enhancement of air and water quality. Federal authority is provided for in those cases where the states have failed to carry out their responsibility to set or enforce standards.

Also, I am sure you are aware that these laws have been in effect for several years, the Water Quality Act since 1965 and the Air Quality Act since 1967. The procedures set forth by these acts are now being implemented by the States.

Any requirement for minimum performance standards would seriously delay effective implementation of these laws during the development of such minimum standards. Furthermore, because the regional approach is an integral part of effective air and water quality programs, minimum national standards would not be relevant to the specific problems of any given region.

Finally, minimum performance standards as defined in H.R. 12290 would be tantamount to national emission standards, a concept carefully evaluated and rejected in favor of the regional approach to air quality in 1967.

I have developed an amendment to Section 168 which I believe assures consistency with the Federal pollution law without jeopardizing the usefulness of special tax incentives for pollution control investment.

My amendment would:

1. Require certification from the state as to conformity with plans for implementation of air or water quality standards;

2. Provide Federal review of state certification to assure consistency with the purposes of the Federal Water Pollution Control Act or the Clean Air Act;

3. Eliminate the requirement for minimum performance standards;

4. Provide for annual state review, during the period of accelerated depreciation, to assure that facilities operate in the manner for which they were certified; and,

5. Disallow use of the tax deduction to the extent that such facilities produce income.

I sincerely hope that members of your Committee will give serious consideration to this amendment.

Sincerely,

EDMUND S. MUSKIE,
*U.S. Senator, Chairman, Subcommittee on Air and Water Pollution.*

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. RIBICOFF. Mr. President, no man in this country has done more in the field of controlling air and water pollution than the Senator from Maine. I am sure the distinguished Senator from Maine would agree that we will never solve the problem of air and water pollution unless we have the cooperation of private industry.

Mr. MUSKIE. I agree wholeheartedly with the Senator.

Mr. RIBICOFF. Is it not a fact that one of the great problems we have is the problem of costly installations and antiquated plants for air and water pollution devices?

Mr. MUSKIE. The Senator is correct.

Mr. RIBICOFF. What it often means is that an old company, which might be required to pay large sums for air and water devices, might determine that it is cheaper to go out of business rather than to undertake the rehabilitation of these old plants in the industrial sections of our Nation. Is that correct?

Mr. MUSKIE. The Senator is correct.

Mr. RIBICOFF. It is my understanding that through the landmark work of the Senator, the Congress this year has committed itself for an expenditure of $800 million in the entire field of water pollution alone. As a matter of public policy if we do not have an overall program that involves private industry, our public commitment will not achieve the result we seek. Is that correct?

Mr. MUSKIE. The Senator is correct. Under the Air and Water Quality Control Act we undertook to apply standards of quality in the cities which have air pollution problems, and all streams which have water pollution problems, and there are many of them. To apply those standards we must have the cooperation of industry.

Mr. RIBICOFF. The Senator may be interested in the fact that the act is so written by the Committee on Finance that the amortization deduction is available only when the facility is certified by the State and Federal agency.

The PRESIDING OFFICER (Mr. BAYH in the chair). The time of the Senator has expired.

Mr. LONG. Mr. President, I yield 1 additional minute.

Mr. RIBICOFF. So we tie up certification with State and Federal agencies.

Mr. MUSKIE. These are not profitmaking facilities. The language to which the Senator referred is part of the language I recommended to the committee to avoid the possibility that these facilities would be profitmaking facilities. What we are concerned with are facilities that deal wholly with control and regulation of pollution; no profit would be made from them, but there is still an investment to be made by the industry.

This tax relief is only a stimulation to industry to make the investments called for by air and water quality standards.

Mr. RIBICOFF. In addition, these amortization tax writeoffs are available only to old plants and not to new plants.

Mr. MUSKIE. The Senator is correct.

Mr. RIBICOFF. Mr. President, each day it is becoming more evident that man is destroying his environment. Each year, he pumps millions of tons of waste into the sky and dumps huge amounts of sewage and contaminants into streams and rivers.

Only the foolish can expect nature to be able to continue to absorb this pollution.

In the last 5 years, Congress has laid the foundation for a national effort against this problem by adopting comprehensive air and water pollution control legislation. And just a few short weeks ago, the Senate voted $1 billion to help our Nation's municipalities construct waste treatment plants.

But, by themselves, these efforts will not be enough.

To launch a truly comprehensive assault against air and water pollution, private industry, which is a major source of this waste, must be encouraged to purchase and utilize the best pollution abatement equipment available.

It has been estimated that it will cost industry $32 billion to control water pollution by the year 2000.

Private industry and municipalities will pollute two-thirds of our streams, the National Academy of Science predicts.

Forty percent of the contaminants in our atmosphere come from industry and utilities.

The bill before us now, will greatly encourage private industry's purchase of equipment to end this destruction of our environment by allowing it to amortize the cost of the equipment over a period of 5 years rather than over the period of the equipment's useful life.

We must be realistic.

Pollution abatement equipment is costly.

Pollution abatement equipment does not add to a company's profits.

Unless industry is encouraged by the enactment of a tax incentive, real progress in ending industrial pollution will take much longer than this Nation can afford.

By asking the public to bear a small share of the cost of abating industrial pollution, we will bring clean air and clean water much sooner to our Nation.

The committee's bill is very tightly drafted to encourage cooperation by industry without creating a loophole.

I support this bill.

The PRESIDING OFFICER. Who yields time?

Mr. GORE. Mr. President, I yield such time as he may use to the senior Senator from Delaware.

Mr. WILLIAMS of Delaware. Mr. President, in the bill before the Senate we have reduced the rate at which every taxpayer can depreciate his property for tax purposes, and that includes farm buildings and property used by small businesses. This was done by denying the use of the 200-percent declining balance method for all nonresidential property. Thus, taxpayers will only be able to depreciate the property under the 150-percent declining balance method.

That is true with respect to all groups of American taxpayers except these three

groups mentioned here which had lobbies strong enough to get special consideration. I recognize a good argument can be made on any one of these proposals, but I do not see why they should be singled out and allowed to depreciate their property in 5 years when we are making it more difficult for other taxpayers in America.

SPECIAL AMORTIZATION PROVISIONS

The committee bill adds three new special incentive provisions to the tax law. These special provisions allow a 5-year writeoff: for low-cost rental housing rehabilitation expenditures, for pollution control equipment, and for railroad rolling stock. In 1970 these special incentive provisions would cost the Government $155 million. This cost would eventually rise to $555 million a year.

Congress has already authorized an expenditure of $800 million to subsidize the correction of the pollution problem.

The special rehabilitation expenditure provision in the bill allows 5-year amortization of costs incurred in rehabilitating buildings for low cost rental housing—for up to $15,000 of costs per dwelling unit. This provision applies to expenditures before 1975.

It should be pointed out that in this bill, in addition to this provision, under certain conditions we have also allowed these persons to defer the capital gains treatment which would arise when they sell the housing. They could not only depreciate the property in 5 years, but they could sell it and reinvest in other similar property and pay no capital gains tax.

This would open a major loophole which will not benefit those tenants using this low cost housing. It is a landlords' amendment.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. AIKEN. Would it apply to individually owned homes or only to rental housing?

Mr. WILLIAMS of Delaware. No. Only to rental housing.

The special pollution control provision allows 5-year amortization of the costs of pollution control facilities added to existing plants. The amount amortizable is limited to the part of the facility's cost which is proportionate to the first 15 years of its useful life. A facility must be certified by the appropriate State and Federal authorities to be eligible for this special amortization. This provision applies to facilities placed in service before 1975.

The special railroad provision allows 5-year amortization for new railroad rolling stock—including locomotives—placed in service after 1969. The amortization is available either where the rolling stock is owned by a railroad or where it is owned by a person who leases it to a railroad—4-year amortization is allowed for rolling stock placed in service during 1969. If otherwise available, the investment credit also may be claimed on rolling stock subject to this fast amortization. Effective after 1972 the Secretary of the Treasury may determine which classes of rolling stock are no longer in short supply, and these classes will then cease to be eligible for the fast amortization. This provision applies to rolling stock placed in service before 1975.

The railroad package included in the bill also allows the cost of railroad gradings and tunnel bores, which at present may not be written off, to be amortized over a 50-year period. In addition the package allows railroads to write off rolling stock repair costs up to 20 percent of the rolling stock's original cost each year.

These special incentives included in the bill are an unwarranted and inappropriate use of the tax laws. There has been no adequate showing that these special incentives will, in fact, help to achieve their respective goals. More than likely these special incentives will only serve to provide undue tax benefits to a small number of taxpayers in the eventual large amount of $555 million a year.

Mr. GORE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. GORE. Mr. President, in the colloquy just engaged in on this side of the aisle by the Senator from Maine (Mr. MUSKIE) and the Senator from Connecticut (Mr. RIBICOFF), both of them made commendable statements about the need for pollution control, but nothing that either one of them said had any bearing on the syndicate loophole. The same example I pointed out in the RECORD with respect to syndicate investment in a railroad locomotive would apply to an investment in machinery for pollution control. The Senator said they make no profit out of this. Of course not. But the syndicate will buy it under this loophole.

Mr. WILLIAMS of Delaware. Mr. President, I do not see why we should make the depreciation rate so much more liberal for these groups while at the same time we are restricting the depreciation rates allowed to all other American taxpayers, whether it be depreciation on a farm in Vermont or a poultry farm in some other State.

I have always felt we should allow more rapid depreciation rates for all buildings and equipment, but depletion rates should apply to all taxpayers, not just to a few select groups.

Mr. PEARSON. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I have no time remaining.

Mr. LONG. Mr. President, I yield myself such time as I have remaining.

The PRESIDING OFFICER. The Senator has 3 minutes remaining.

Mr. LONG. Mr. President, this amendment should be rejected. There may be some merit to some parts of the Gore amendment but there are other parts that are totally without merit. For example, the House of Representatives sent us a provision that would cost the Treasury $400 million by allowing a 5-year writeoff on pollution-control devices. The Senate committee reduced that to a provision which would cost less than one-third that much—only $120 million a year. The Senate committee would provide a 5-year amortization between now and 1974 for pollution-control devices which are installed, not on the new plants that will be built—they get no advantage—but on existing plants.

As far as people who own and operate plants are concerned, the requirement to install pollution control equipment is nothing more than a burden imposed upon them by Government. They do not want pollution-control devices. We are making them install this equipment under State and Federal law, and we now are allowing them 5 years to write it off. The equipment does not improve the operation of the plant.

It is an added cost to them which they do not want.

We are imposing the burden on them. So we are easing that burden by giving them 5 years to write off the costs of installing them in existing plants.

With regard to the second item, which would cost more than the other two put together, the $15,000 allowance is for rehabilitation of housing units in slum areas. It would allow no more than $15,000 per unit for rehabilitation of housing in slum areas. That provision was asked for by Secretary Romney of the Department of Housing and Urban Development. It initially was agreed to by the House, and then was approved by the Senate Finance Committee. It is an incentive of $330 million to provide poor people with better housing.

What on earth is wrong with that? I have not yet heard the first argument developed. If we want people living in slums in Washington, New York, Philadelphia, or elsewhere, to have better housing, cleaner housing, fewer rats, and more sanitation, then vote against the Gore amendment.

If the Senator wants to come back and offer his railroad amendment again, he can, but I submit that we need more new railroad rolling stock. The Treasury has recommended it. I think it should be agreed to.

I hope the amendment will be rejected.

The PRESIDING OFFICER. All time on the amendment has now expired.

Mr. GORE. Mr. President, I ask unanimous consent that the time be extended by 4 minutes, with 2 minutes to a side.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee? The Chair hears none, and it is so ordered.

The Senator from Tennessee is recognized for 2 minutes.

Mr. GORE. Mr. President, for the last week, it has been rolling stock. Now it is pollution we hear about. No one defends the change of words. On page 443 of the bill it changes the House requirement from "owned" to "used." This opens up the syndicate loophole. And it is a big one.

Let me read what a committee of experts on pollution recommended. The committee was made up of representatives of the Bureau of the Budget, Treasury Department, Council of Economic Advisers, Water Resources Council, Office of Science and Technology, Department of the Interior, Department of Commerce

Department of HEW, and the Resources of the Future Committee.

What do they say?

In summary, clearly tax writeoffs are not needed nor are they a desirable form of offering further assistance to industries.

Mr. President, this is not a profit-making undertaking except for the syndicates. That is what the provision in the committee bill makes possible.

Mr. MUSKIE. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. MUSKIE. The report to which the Senator refers was made by the same representatives from the last administration who opposed a continuing grant program for waste treatment.

Mr. LONG. Mr. President, the Senator quoted from a report that considered the proposal relating to new plants as well as existing plants. It was partly because of that logic that the committee said it would not allow a rapid tax writeoff, or any tax advantage, for pollution control equipment in new plants. The people who build new plants will have to do it themselves by designing pollution control equipment and processes into their new plants, and they will receive no special tax advantage. In doing so, we save $280 million out of $400 million. The $120 million we retained applies to any situation where someone is required to add to an existing plant pollution control devices which are of no productive advantage to them whatever. These are costs which we will let them write off over 5 years.

Mr. MILLER. Mr. President, will the Senator from Louisiana yield?

Mr. LONG. I yield.

Mr. MILLER. The Senator from Tennessee read something to the effect that writeoffs would be no incentive. I hope he does not mean by that that the base would not be entitled to regular depreciation or to a double declining balance depreciation for that is another form of writeoff. The quick amortization is another form of writeoff. Thus, I do not see that that is responsive to the problem.

Mr. CURTIS. Mr. President, I ask unanimous consent that a letter from the Acting Secretary of the Treasury concerning the Gore amendment be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF THE TREASURY,
*Washington, D.C.*

HON. CARL T. CURTIS,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR CURTIS: This is in response to your request for the Treasury Department's views with respect to Amendment No. 389, introduced by Senator Gore. The purpose of the amendment is to strike from the bill the provisions for 5-year amortization for the cost of rehabilitation of low-income housing, railroad rolling stock and pollution control facilities.

The Treasury Department opposes the amendment.

The first of these provisions will encourage the rehabilitation of low-income rental housing units which is needed if we are to provide adequate housing for all our citizens. The provision for amortization of railroad rolling stock will alleviate the critical shortage of railroad cars and has been provided in lieu of any exception to the investment credit. While we have been concerned about the amortization of pollution control facilities, we believe that the provision in the Senate bill has been sufficiently narrowed to prevent abuse.

It is important to note that all three of these provisions expire on January 1, 1975, thereby giving assurances that they will not be continued unless they accomplish the desired purpose.

Sincerely yours,

CHARLES E. WALKER,
*Acting Secretary.*

CONGRESS SHOULD NOT WEAKEN THE PROGRAM FOR POLLUTION CONTROL

Mr. RANDOLPH. Mr. President, it is vital to the maintenance of national policy of air and water pollution control that the language of section 704 of H.R. 43270, as reported by the Finance Committee, be retained. The investment credit with respect to pollution facilities is essential if we are to maintain and advance our efforts to protect our air and water environment from pollution.

Massive private investment in industrial air and water quality control devices are needed to insure that our production processes do not destroy the environment in which we live. Two recent reports, "The Cost of Clean Water," Senate Document 90–65, presented to the Senate January 10, 1968, and "The Cost of Clean Air," Senate Document 91–40, June 1969, describe in detail the magnitude of the private investment required.

The clean water report indicates that the cash outlays needed to meet industrial waste treatment requirements for fiscal years 1969 through 1973 are between $2.6 and $4.6 billion. The clean air report estimates the cost of control of just particulate emissions and sulfur oxides at between $266 and $500 million for fiscal years 1971 through 1974.

Until a better method of stimulating needed private investment and Government assistance to private industry in reaching this important public goal is achieved, the investment credit represents the best-known technique. The revenue loss entailed in this approach will be offset many times by the reduction in other public investments to counteract environmental degradation. Next year, the Committee on Public Works will look into other ways and means of effectively accomplishing the result we seek. In the meantime, the provisions of section 707 of the bill offer the best hope for insuring the full participation of the industrial community in our earnest efforts for a better, cleaner air and water environment.

The PRESIDING OFFICER. All time on the amendment has now expired.

The question is on agreeing to the amendment of the Senator from Tennessee (Mr. GORE).

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the role.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Montana (Mr. METCALF), and the Senator from Missouri (Mr. SYMINGTON), are necessarily absent.

I further announce that, if present and voting, the Senator from Missouri (Mr. SYMINGTON) and the Senator from Montana (Mr. METCALF) would each vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "nay."

The result was announced—yeas 3, nays 92, as follows:

[No. 194 Leg.]

YEAS—3

| | | |
|---|---|---|
| Aiken | Gore | Williams, Del. |

NAYS—92

| | | |
|---|---|---|
| Allen | Gravel | Murphy |
| Allott | Griffin | Muskie |

NOT VOTING—5

| | | |
|---|---|---|
| Anderson | Metcalf | Symington |
| Goldwater | Mundt | |

So Mr. GORE's amendment was rejected.

Mr. CURTIS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the House had passed a bill (H.R. 15090) making appropriations for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes, in which it requested the concurrence of the Senate.

## ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H.R. 13767) to authorize the appropriation of funds for Fort Donelson National Battlefield in the State of Tennessee, and for other purposes, and it was signed by the Acting President pro tempore (Mr. HUGHES).

## HOUSE BILL REFERRED

The bill (H.R. 15090) making appropriations for the Department of Defense for the fiscal year ending June 30, 1970,

and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

AMENDMENT NO. 364

Mr. McCARTHY. Mr. President, on behalf of myself, the Senator from California (Mr. CRANSTON), the Senator from Illinois (Mr. PERCY), the Senator from Oregon (Mr. HATFIELD), the Senator from Nebraska (Mr. CURTIS), and the Senator from Kentucky (Mr. COOK), I send to the desk an amendment and ask for its consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. McCARTHY. Mr. President, I ask unanimous consent that further reading of the amendment be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCARTHY's amendment (No. 364, as modified) is as follows:

On page 148, strike out lines 23 through 25 and in lieu thereof insert the following:

"(A) by striking subsection (g) and by redesignating subsection (d) as subsection (g), and"

On page 149, strike out lines 1 through 3 and in lieu thereof insert the following:

"(B) by striking out subsections (a), (b), (c), (e), (f), and (g) and inserting in lieu thereof the following:"

On page 153, strike out lines 15 through 25, and on page 154, strike out lines 1 through 16, and in lieu thereof insert the following:

"(C) INCENTIVE CHARITABLE DEDUCTION.—The limitations in subparagraphs (A), (B), and (D) shall not apply in the case of an individual for a taxable year beginning on or after January 1, 1970, who satisfies the requirements of (i) of this subparagraph and who makes the election in (ii) of this subparagraph.

"(i) ELIGIBILITY.—In order to be eligible for the incentive charitable deduction, in the taxable year and in eight of the ten preceding taxable years, either:

"(a) in a taxable year beginning on or after January 1, 1970, the amount of his charitable contributions to charities described in section 170(b)(1)(A), plus the amount of income tax (determined without regard to chapter 2, relating to tax on self-employment) paid during such year in respect of such year or preceding years, exceeds 90 percent of the taxpayer's taxable income for such year, and the amount of his charitable contributions to charities described in section 170(b)(1)(A) exceeds 60 percent of the taxpayer's taxable income for such year. For purposes of this provision the amount of charitable contributions for any taxable year beginning after December 31, 1963, shall be determined without the application of section 170(d)(1), and taxable income shall be computed without regard to:

"(i) this section,

"(ii) section 151 (allowance of deductions for personal exemptions), and

"(iii) any net operating loss carryback to the taxable year under section 172.

In lieu of the amount of income tax paid during any such year, there may be substituted for that year the amount of income tax paid in respect to such year, provided that any amount so included in the year in respect of which payment was made shall not be included in any other year; or

"(b) in a tax year beginning before January 1, 1970, the taxpayer satisfied the qualifications of section 170(b)(1)(C) and 170(g) as in effect for such tax year.

"(ii) ELECTION.—For taxable years beginning on and after January 1, 1970, a taxpayer who satisfies the eligibility requirements of (i) above may elect (at such time and in such manner as the Secretary or his delegate by regulations prescribes) to have section 170(b)(1)(C) be applicable to him. As a condition to such election the taxpayer shall agree:

"(a) that if his taxable income, computed with regard to this section, is less than 20 percent of his adjusted gross income, his taxable income shall be 20 percent of his adjusted gross income.

"(b) that no amount of charitable contributions made in the taxable year or any prior taxable year may be treated under section 170(d)(1) as having been made in the taxable year or in any succeeding taxable year, and

"(c) that he shall file annual information returns with respect to each taxable year referred to in section 170(b)(1)(C)(i)(a) in accordance with regulations prescribed by the Secretary or his delegate specifying the dates, amounts, and recipients of each contribution and the nature of the property contributed, which reports shall be made available to the public pursuant to regulations prescribed by the Secretary or his delegate."

(4) On page 169, strike out lines 4 through 24 and on page 170 strike out lines 1 through 6.

(5) On page 170, strike out lines 8 through 13 and redesignate subparagraphs (B) and (C) as (A) and (B), respectively.

Mr. LONG. Mr. President, I ask unanimous consent that debate on the pending amendment be limited to 40 minutes, to be equally divided between the Senator from Minnesota and the manager of the bill.

Mr. GRIFFIN. Mr. President, what is the number of the pending amendment?

Mr. McCARTHY. No. 364.

The PRESIDING OFFICER. Amendment No. 364, with modifications.

Mr. HRUSKA. Mr. President, may we have an explanation of its nature?

Mr. McCARTHY. I hope to explain it, after the agreement on time limitation is reached.

The PRESIDING OFFICER. For the information of the Senate, the Senator from Minnesota has the floor. The Senator from Louisiana has made a unanimous-consent request that the time be equally divided.

Mr. LONG. I temporarily withdraw that request, Mr. President.

The PRESIDING OFFICER. The Chair inquires of the Senator from Minnesota, does he request that his amendment be considered en bloc? Technically, it is a series of amendments.

Mr. McCARTHY. I ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MILLER. Mr. President, I ask for order.

The PRESIDING OFFICER. The point of the Senator from Iowa is well taken. The Senate will be in order.

Mr. LONG. Mr. President, I ask unanimous consent that further debate on the amendment be limited to 40 minutes, to be equally divided between and controlled by the Senator from Minnesota and the manager of the bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Who yields time?

Mr. McCARTHY. Mr. President, I yield myself 3 minutes.

This amendment would add a provision to the bill before the Senate to provide, not for unlimited charitable deductions, but for charitable deductions in excess of what the Senate bill now provides.

Under existing law, charitable contributions deductions for individuals are limited generally to 30 percent of the taxpayer's adjusted gross income. An exception to this rule permits the taxpayer an unlimited charitable deduction if in 8 of the preceding 10 taxable years, the total of the taxpayer's charitable contributions plus the income taxes he has paid exceed 90 percent of his taxable income.

The committee bill proposes to reduce the amount that anyone can deduct as charitable contributions to 50 percent of his taxable income, this to take place over a 5-year period.

As the law has worked out, a few high income taxpayers using this provision have wound up paying little or no income tax at all, since they have contributed virtually all of their taxable income, or the equivalent of their taxable income, to charity. Both H.R. 13270 and the Finance Committee version of the bill provide for complete repeal of the unlimited charitable contributions deductions provision, to be phased out over a 5-year period. By that time such taxpayers would be permitted to deduct no more than 50 percent of their adjusted gross income for charitable purposes.

My amendment proposes to retain a modified version of the old provision. What is involved is that which is basic to the allowance of charitable deductions generally: the recognition and encouragement, and the incentive that we give in the tax law, to unusually large contributors to charity. It is in keeping with the tradition of philanthropy in this Nation.

Under the amendment which I have offered, charitable taxpayers who give up to 80 percent of their adjusted gross incomes to charity in 8 out of 10 years would be given some special consideration. If taxpayers choose to use this provision, they would be required to pay income tax on at least 20 percent of their adjusted gross income, and reduce it, thereby, from a 100-percent exemption to 80 percent, with taxes having to be paid on the remaining 20 percent.

Moreover, in order to tighten the provision, the combined total of charitable contributions and income taxes would still have to exceed 90 percent of the taxable income of the individual who took advantages of this provision. The amendment also requires that at least 60 percent of the adjusted gross income be contributed to public charities, as described in section 170(b)(1)(A), which tends to guarantee that the majority of such contributions will be used for immediately public purposes.

This is the substance of the amendment. There is no question of principle involved, since the principle is exactly

that which is involved in allowing the potential 50 percent charitable deduction for all taxpayers. The only difference is in the amount which a taxpayer might be permitted to contribute; and his eligibility depends upon his contributing in 8 years out of 10 the equivalent of 90 percent of his taxable income to charity, or to paying it in taxes.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield to the Senator from California.

Mr. CRANSTON. I want first to say that I think the Senator has offered an amendment that is of great constructive value. I believe with the Senator that we should encourage charitable giving, to allow for the diversity and creativity in our society that is brought about by use of such funds in the way that they would be used when given in accordance with the amendment the Senator has proposed.

Mr. President, I should like to ask if this is not quite similar to an amendment that was offered by the administration to the tax reform bill earlier this year?

Mr. McCARTHY. Substantially. It contains principles almost identical to those offered by the administration.

Mr. CRANSTON. The administration offered an amendment, though, that was quite similar, except that, as I understand it, the administration proposal was more restrictive. And the Senator's amendment calls for annual reports on contributions. It also provides that 60 percent of the amount given must be given to public charities, not to private foundations, thus causing the broadest possible use in the general public interest and not for use by private foundations that might not be to that degree in the public interest.

Mr. McCARTHY. The Senator is correct.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. McCARTHY. Mr. President, I yield myself an additional 2 minutes.

The PRESIDING OFFICER. The Senator is recognized for an additional 2 minutes.

Mr. McCARTHY. Mr. President, with respect to the 100 percent of adjusted gross income, 20 percent would be taxable under the amendment. At least 60 percent would have to go—although we might have the whole 80 percent go—to public charity, public foundations, and at most only 20 percent could go to private foundations.

This involves roughly 100 substantial taxpayers. For the most part, they are the easiest ones to supervise and watch, because they give large amounts and generally give to one or two foundations or charities, and, in one or two cases, to a particular school or charity that is almost entirely dependent upon the contributions from one large contributor.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. McCARTHY. Mr. President, I yield 5 minutes to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 5 minutes.

Mr. CURTIS. Mr. President, I hope that the McCarthy amendment prevails.

When someone gives to an orphanage, that is not a tax dodge. That is not a tax shelter.

When someone gives income to arrest cancer, that is not a tax dodge. That is something that is done in the public interest.

When someone gives to spread their religious faith throughout the world, that is not a tax dodge. That is something that is done in the interest of humanity.

It has been the law for some time that if an individual gave all of his income to charity, if his giving plus his taxes equals 90 percent of his income for 8 out of 10 years, he can have an unlimited tax deduction.

The pending bill repeals that provision. I oppose that repeal. The McCarthy amendment would restore it in part. It would provide that an individual can give up 80 percent, if 20 percent of his income is subject to tax.

What is wrong with giving? What is wrong with giving all of one's income to charity.

The story is told of the widow's mite who gave all that she had and will be told as long as civilization stands.

There is nothing wrong with a tax law that encourages people to give all of their income to charity. There are other provisions of the bill that discourage charity. There is the repeal of the unlimited deduction. There are changes with respect, in certain instances, to the giving of appreciated property. However, there is something else.

I refer to the minimum standard deduction. I have in my files a letter from a lady who worked in Washington. Her salary was $6,000 a year. She gave $600 to charity and religious purposes. Her coworker also received $6,000 a year and gave a total of $15 to religious and charitable causes. Under the minimum standard deduction both were treated alike for tax purposes.

The minimum standard deduction seems to be a provision we will have to live with. However, there are so many sections of the bill that constitute an outright attack upon charity that we must enact the McCarthy amendment. Large givers are needed by our most valued institutions.

How does one receive the benefit of the McCarthy amendment? He has to have given his income away to the extent that it amounts to 90 percent of his income and taxes for 8 out of 10 years.

Someone must be very much interested in good causes, or they would not qualify.

To receive this privilege one has to give thousands of dollars away for which he receives no tax deduction. However, after one earns that right—this bill would take it away from them. The McCarthy amendment would restore 80 percent of it.

Make no mistake about it, a gift to a genuine charity is not a tax dodger. A gift to charity lessens the burden of government and does not increase it.

There is not a good cause supported out of the generosity of people's hearts that, if it were to fail, would not add more to the expense of government, locally, statewide, and nationally.

Mr. President, I beg that we enact the pending amendment and once again say to a taxpayer, "If you genuinely and truly give your income away, it will not be taxed."

There are those who say, "Well, a person should pay some tax."

The McCarthy amendment meets that test, because instead of giving an unlimited deduction, they would have to pay a tax of 20 percent.

Mr. President, I hope that the amendment is agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. McCARTHY. Mr. President, I yield 2 minutes to the distinguished Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 2 minutes.

Mr. PERCY. Mr. President, I am happy to join with the Senator from Nebraska with respect to this amendment. We had a different point of view on another amendment a few days ago. However, on this occasion we see eye to eye.

We are not talking here about a loophole.

As the Senator has pointed out, we are talking about making certain that we do not actually strangle philanthropy and the institutions that depend upon philanthropy in this country.

I think we should be very sensitive to any portion of the bill that strikes a blow at the essence of what American philanthropy has done in this country for the institutions which depend heavily upon it.

Mr. President, I add my support as a cosponsor of this very important amendment which I feel is essential not only for individuals who have contributed so heavily throughout the years to support private philanthropy through their own efforts time, and energy, and also through their great resources. They should be encouraged to do so. It is a matter of public policy to encourage and not discourage them from doing it so long as they are paying a fair and proportionate share of their income as provided in this amendment toward the support of government.

Mr. President, Government cannot itself solve the myriad of social ills that face our society today. Assistance from the private sector is vital financially. Each year, close to $20 billion is funded through charitable contributions to education, health, cultural, and other important interests. Private giving is even more essential from the standpoint of providing a diverse innovative approach to meeting our pressing urban and rural problems. And, the extensive contribution of volunteer assistance must be fully taken into account since it not only provides billions of dollars of financial assistance in kind, but also attracts a commitment by individuals to help in meeting our social needs.

When I am confronted with the financial problem faced by universities, health societies, boys clubs, YMCA's, orchestras, hospitals, and our other essential institutions, my determination to encourage increased charitable contributions to society is increased.

I recognize, Mr. President, that some individuals have taken advantage of our

tax laws to avoid the payment of a fair share of taxes. This is intolerble and enactment of the Tax Reform Act before us seeks to close these loopholes.

The present amendment is not a new loophole to permit tax avoidance. It is just the opposite—a provision to permit and encourage individuals to increase their contributions to public charities. Under this amendment, individuals would be entitled to give up 80 percent of their adjusted gross income to charities and yet would also have to have taxable income be at least 20 percent of adjusted gross income. Moreover, to meet the test of this provision, the individual's charitable contributions and income tax must exceed 90 percent of taxable income.

Adoption of this amendment should encourage the funneling of additional millions of dollars to public charities. I urge its adoption.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. McCARTHY. I yield to the Senator from New York.

The PRESIDING OFFICER. How much time is yielded?

Mr. McCARTHY. One minute.

Mr. GOODELL. Mr. President, I ask unanimous consent that my name be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOODELL. Mr. President, many of us have argued that no high-income taxpayer should be exempt from paying some portion of his total income in Federal taxes. The Senate Finance Committee moved to eliminate the exemption of individuals who give large percentages of their fortunes to charity. I approve of the direction in which the Finance Committee moved, but they went too far.

The McCarthy amendment is a good amendment. It guarantees that every high-income taxpayer will pay a substantial tax on 20 percent of his income; but, unlike the Finance Committee provisions, the McCarthy amendment would leave a large element of freedom to the high-income taxpayer to contribute to charity. This is very important. The cost of the McCarthy amendment is estimated at $25 million.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. McCARTHY. I yield 1 additional minute to the Senator from New York.

Mr. GOODELL. If we take that $25 million into the Federal Treasury, it will be taken directly from charitable causes, and then the Federal Government will have to find ways to meet the needs that were in the past met by charitable contributions.

I believe this is a fair compromise which provides that all taxpayers will have to pay a substantial tax, but will leave the money free for high income individuals to continue their important charitable contributions to programs that are essential if we are to meet our social and economic problems in this country.

The PRESIDING OFFICER (Mr. RIBICOFF in the chair). The time of the Senator has expired.

Mr. LONG. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. LONG. Mr. President, this amendment would retain much of what has been the biggest and most inexcusable loophole in the tax law.

The so-called taxpayer revolt started because a study revealed that 154 individuals who made large sums of money, most of them more than $1 million, paid little, if any, tax. That study indicated that one-third of those people who were paying nothing did so because of the provision in the law that relates to the unlimited charitable deduction.

This provision had its origin in 1924, when Congress passed a law that permitted one of the Drexel heirs, who had taken the vow of poverty as a nun, to have the advantage of an unlimited charitable deduction to meet her particular situation. Since that time, some of the most wealthy people in America have undertaken to qualify as a Philadelphia nun, and have proceeded to make money by giving money away to charity, mostly by giving appreciated property on which no tax has been paid on the appreciation. This has been the way that a great number of wealthy people, year after year, carry on the theory that they are giving all their money away to charity, when in fact they are making money by giving money away. This is the biggest, most inexcusable, planned loophole in the tax laws.

Mr. President, the charities presented statements to us, and in these 7,000 pages of testimony, I can't recall a single line to defend this big loophole, which has been on the statute books for almost 50 years. The House measured up to its responsibility and said 50 percent is the limit one can claim for charitable contribution purposes. The Senate Finance Committee has supported that provision.

The implication of this unlimited charitable contribution—and the Senator would limit it to 80 percent of adjusted gross income, whereas it used to be 100 percent—is that wealthy people have the right to determine where their tax money goes and for what their tax money is to be spent, although the rank-and-file taxpayers do not have the privilege of determining where their tax money goes. There is no reason for that. That is a concept of economic royalism that is out of date, and the time has come when these people should pay taxes just as everybody else does.

Mr. President, this provision can benefit only a few people. Who can afford to give away 80 percent of his income 10 years in a row, unless he is very wealthy?

This deduction is the way by which many people who would owe taxes to the Government have escaped taxation. It is the most difficult loophole to defend. Not a single witness dared even try to defend it. Not even the charities which benefit from it would speak in favor of this provision. It would hurt the image of the Senate, if the Senate, at this late date, after the House and the Senate Finance Committee have closed it, should support this loophole.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. WILLIAMS of Delaware. Mr. President, I support the position of the chairman of the committee. As he pointed out, under existing law by giving away 90 percent of his income to charity for 8 out of 10 years a taxpayer can get an unlimited charitable deduction for tax purposes, and he can use in those contributions appreciated property without paying the capital gains tax.

The committee bill provides that he can give away up to 50 percent of his income; but 20 percent of it must be in cash, and only 30 percent of it can be in appreciated property.

According to the staff, which has examined this amendment, by striking out those provisions a man presumably could have an income of $1 million a year and give away 80 percent of it; but the 80 percent could be all in appreciated property, and he could keep the million dollars in cash. If that is so we are opening a Pandora's box whereby, automatically upon giving away art objects and other items, a man could end up making money by giving money away.

The Finance Committee has tried to correct this loophole, and I hope we do not open it up again. While it is only eight-ninths as bad as existing law, nevertheless, that is too bad.

Mr. LONG. Mr. President, I have no doubt that if the Philadelphia nun, one of the Drexel heirs, had known of all the tax revenue that would be lost in her name, she would have asked, if she had anything to say about it, that this provision be repealed retroactively to the day it was passed for her benefit.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. KENNEDY. As I understand from the present action of the Senate bill, we have built into the Senate bill three additional provisions or three additional incentives for charitable contributions.

First, as I understand it, the ceiling on the charitable deduction has been increased from 30 to 50 percent. Second, under the Percy amendment, the private foundations will be required to give 6 percent of their income away. Third, raising the capital gains tax to 35 percent will serve as an additional incentive for individuals or foundations to give appreciated property to colleges, universities, and other charities, because they know very well that if they sell the property, they will have to pay a larger capital gains tax.

Moreover, with respect to charitable contributions of appreciated property, the Senate has already declined to include the appreciated value in the 5-percent minimum tax.

Under the present bill, therefore, we already built in additional kinds of incentives to our citizens—especially our wealthiest citizens—to make contributions to universities and foundations as well as to various other charitable organizations.

Mr. LONG. We think we have retained significant incentives, and we think that more money will be made available to charity as a result of what we have done in this bill. This is particularly true with regard to the pay-out provisions passed by the House, which we have increased by action on the Senate floor, that will

make foundations distribute larger sums for charitable, educational, and similar purposes. I do think that, on the whole, what we have done here will result in a larger amount being given to charity.

Mr. KENNEDY. Mr. President, I wish to ask the Senator from Louisiana if he would not agree with me that what really started the taxpayers' revolt this year was the disclosure of the tremendous loophole available to wealthy citizens able to take advantage of the unlimited charitable deduction. As I understand it, this amendment seeks to reestablish that concept. Is that correct?

Mr. LONG. Yes. This amendment would leave all but 20 percent of it in effect.

Mr. KENNEDY. Instead of what it was under the Philadelphia nun provision.

Mr. LONG. The nun provision was unlimited. Very wealthy persons could totally eliminate their tax liability by gifts to charity. This amendment would permit them to deduct up to 80 percent of their income as a charitable contribution. The committee bill would limit the deduction by preventing these taxpayers from deducting more than one-half of their income in the form of charitable contributions.

Mr. McCARTHY. It is true that under existing law people have avoided paying taxes because of a contribution, but if this amendment were agreed to, taken along with what the committee recommended, they could no longer offset all their income.

The Senator wants people to make contributions to charity. These people are not making contributions to charity out of other people's money.

Mr. LONG. I am not saying people would necessarily give to charity to make money, but I am saying that under the Senator's amendment it is possible for a man to deduct up to 80 percent of his adjusted gross income by donations to charity.

Mr. McCARTHY. Yes.

Mr. LONG. And it is the judgment of the committee to limit such deductions to 50 percent of adjusted gross income. Furthermore, the amendment definitely fosters the concept that a wealthy person should be permitted to determine how his tax money is to be spent while people who do not earn that much money are not allowed to make such a decision.

Mr. McCARTHY. We determine it by saying what is deductible in the first place. It is a question of whether it is 80 percent or 50 percent. That is the entire question involved.

Mr. LONG. Mr. President, if we were to agree to the amendment we would be making it possible for those 150 persons who made more than a million dollars and paid no taxes, to be in a position to determine for themselves how 80 percent of their income would be spent. We think that to let them make that decision with regard to 50 percent of their income is generous. Not a single one of the charities which appeared before the committee asked for continuation of this Philadelphia nun provision.

Mr. McCARTHY. I am not defending the Philadelphia nun rule.

Mr. LONG. The Senator is buying 80 percent of it.

Mr. McCARTHY. We will have our hypothetical nun around this Chamber for the next 50 years.

Mr. LONG. Not if the Senate agrees with my position.

Mr. McCARTHY. It is like the case of the hypothetical widow.

Mr. LONG. Mr. President, if we can defeat this amendment offered by the Senator from Minnesota (Mr. McCARTHY) and pass the bill without that amendment, we will not hear any more about the Drexel nun.

Mr. McCARTHY. They used to use the Drexel nun to defend the provision; now, it is the other way around.

Mr. CURTIS. Mr. President, the real issue here is the beneficiary. That is the issue. Many hospitals are staying open because some wealthy person picks up the deficit. We could go on and on with other matters. To think of talk about a tax shelter is nonsense. The issue at stake here is the beneficiary.

Under the bill you can give 50 percent in one shot. If it is to one's advantage, he can raise contributions to 50 percent in 1 year. Under this proposal, you have to work your way up in 8 out of 10 years.

It is the orphanages and research groups, the colleges and hospitals and religious organizations that have a stake in this matter, and not a tax shelter for any individual.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield to the Senator from New York.

Mr. JAVITS. Mr. President, I have listened to this debate with great interest because although I am much in favor of encouraging honorable charitable giving, I had not intended to challenge the decision to repeal the unlimited charitable deduction. I think the Senator from Minnesota (Mr. McCARTHY) makes a point that I am fully sympathetic to. The point endemic in the argument of the Senator from Louisiana is that people cried out against the 155 taxpayers who may have avoided taxes through charitable contributions but not against the philanthropists themselves or philanthropy. Philanthropists still are one of the most recognized and highly respected groups in this country. It should also be noted that the charitable deduction is only one of several means by which tax liability may be reduced. In fact, I understand that only about one-third of those taxpayers utilized the unlimited deduction. The great bulk of those taxpayers used other means, such as the oil depletion allowance and other preferences which we are eliminating from the bill, to escape taxation.

The Senator from Minnesota is correct in pointing out that the balance of the public interest is to encourage rich people not to sit on the money, or to pay it in taxes, but to use it in the ways that have been described and which benefit society. We are making foundations pay out the funds contributed in an adequate way.

It is a close question but in my judgment it should be answered in the manner which preserves pluralism and individual initiative in our society.

I think the Senator from Louisiana makes a strong point when he says we should not allow the rich person, as contrasted with one of more modest means, to choose who will receive his tax money. I think, however, we should not ignore the fact that the charitable deduction is now 50 percent. Anyone can use the 50-percent advantage according to the Senator from Louisiana. The Senator does not explain why it is proper in the case of 50 percent and incorrect here.

Mr. McCARTHY. Mr. President, I do not think many Members are privileged today to say that no one escapes taxes.

I reserve the remainder of my time.

Mr. LONG. Mr. President, the Philadelphia nun rule becomes a device for tax avoidance with gifts of appreciated property when one pays $1 for a work of art, for example, and gives it away at an estimated value of $1,000, or when one pays $3,000 or $10,000.

The Finance Committee would permit a taxpayer to deduct gifts of appreciated property on which no taxes had been paid only to the extent of 30 percent of his adjusted gross income, although he could deduct an additional 20 percent for other contributions.

The McCarthy amendment would strike that provision and permit a taxpayer to deduct gifts of appreciated property up to 80 percent of adjusted gross income, and it would thus not only retain the so-called Philadelhia nun provision law for 80 percent of a taxpayers' income but also for gifts of appreciated property where the greatest abuse lies.

Furthermore, the committee has provided that a person who previously could deduct only 30 percent of his income for charitable contribution purposes, if he gave it to a church, could now deduct up to 50 percent of his income to give to a church. This amendment increases that limit to 80 percent but only for those people who have carefully planned, with the advice of tax counsel, to give away 90 percent of their income to charity for 8 out of 10 years. That takes careful tax planning.

Some Senators have criticized the depletion allowance. The study which we all cite indicated that 154 persons were paying virtually nothing, but only about three had achieved that result in large part because of the depletion allowance. But almost 20 times that number—52—achieved that result because of this provision in the law which the Senator for the most part would retain. This provision would still retain the philosophy of economic royalism that the rich and those who have a history of 8 years of systematic tax avoidance planned by tax counsel and accountants should be entitled to say where their tax money goes. They want to be able to continue to say where 80 percent of their income will go, although the ordinary taxpayer in this country could not say where his tax money will go.

I submit, Mr. President, that the amendment cannot be defended, certainly not to the rank and file of taxpayers in this country.

We should put an end, once and for all, to this device which has been the largest tax avoidance device consistently used by those who are able to plan to pay no taxes.

Mr. McCARTHY. I would much rather see this money go to charity than to the moon.

Mr. COTTON. Mr. President, I shall support the amendment of the Senator from Minnesota. My reason is that for the past 3 weeks, in the Appropriations Subcommittee on HEW, we have been literally buried and have been struggling with a $20 billion bill, second only to defense, covering all kinds of Government charity, research for heart, stroke, cancer, for higher elementary and secondary school education, aid to the handicapped, and aid to the blind. Every year more money is required. One reason for this is that private contributions have dried up.

If we curtail or discourage the giving to these causes, to education, for those who are ill, to the handicapped, it simply means that we dig deeper into the Federal Treasury. After all, Government charity is a pretty cold and inanimate kind of charity, and inefficient in many cases. It is simply taking money out of one pocket and putting it into the other, which has a hole in the bottom.

For that reason, Mr. President, with a clear conscience, I can support the McCarthy amendment.

Mr. KENNEDY. Mr. President, I hope that this amendment will be rejected. It appears to me that the committee has acted reasonably in closing what is generally recognized as one of the most extraordinary tax shelters in the entire Revenue Code.

This afternoon, we are being asked to reopen, at least partially, the loophole closed by the committee. If we accept the amendment, we will be encouraging a tiny percentage of American taxpayers with very high income levels to seek the benefit of a special tax provision that millions of ordinary taxpayers will be unable to reach.

If we are serious about tax justice, this amendment must be defeated. If the amendment is approved, the great majority of American taxpayers will feel that they are not being governed by a tax system that is fair or equitable.

Mr. HATFIELD. Mr. President, I ask unanimous consent that a letter I received from Mr. Don C. Frisbee, president of the Pacific Power & Light Co., be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

PACIFIC POWER & LIGHT CO.,
*Portland, Oreg., December 5, 1969.*

Hon. MARK O. HATFIELD,
*U.S. Senator,*
*New Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR HATFIELD: With the Tax Reform Act of 1969 now before the Senate for your consideration, I do want to bring some concerns of mine to your attention. In doing so, let me assure you that one cannot help but respect the constructive efforts of the House and Senate Committees toward providing meaningful, progressive legislation in this important field.

I have become increasingly aware of the dynamic forces that the independent institutions in our country which rely on the contributions of individuals and corporations inject into our American system and the importance of their financial health to our nation's future. Such organizations as the YMCA, Boy Scouts of America, many other youth, health and welfare agencies supported by the community united funds, as well as the independent colleges and universities of our land, give a great deal more to our society than they take out. The dollars contributed to this part of the private sector can be multiplied several to many times in measuring their ultimate effectiveness because of the many volunteers who participate in the activities of these institutions. This latter is a phenomenon not present in the dollars expended by federal, state and local governments in similar endeavors.

With this in mind I feel justified in urging you to concern yourself with the provisions of the Tax Reform Act of 1969 which, if enacted, will hamper the fund-raising capacity of such private agencies and institutions. The provisions involved relate to "gifts of appreciated property," "allocation of deductions" and "life income gifts." Although seemingly designed to plug tax loopholes which are advantageous to wealthy givers, the overriding fact relative to their elimination is that this would dry up a highly important source of income to these voluntary agencies and private institutions.

In addition, such organizations as the Boy Scouts of America are concerned with the application of "unrelated business income tax provisions" as they would affect the advertising in Boy Scout publications. The argument against this provision is that a majority of the advertising in such publications is limited to the exempt purpose of the agency involved. This argument appears to be sound.

It is a pleasure to be able to communicate with you.

Sincerely,

DON FRISBEE.

The PRESIDING OFFICER. All time on the amendment has now expired.

The question is on agreeing to the amendment of the Senator from Minnesota (Mr. McCARTHY).

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Montana (Mr. METCALF), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The result was announced—yeas 41, nays 54, as follows:

[No. 195 Leg.]

YEAS—41

| | | |
|---|---|---|
| Aiken | Gurney | Pell |

NOT VOTING—5

| | | |
|---|---|---|
| Anderson | Metcalf | Symington |
| Goldwater | Mundt | |

So Mr. McCARTHY's amendment was rejected.

Mr. COOPER. I move to reconsider the vote by which the amendment was rejected.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PROPERTY BEQUESTS TO AN EXEMPT ORGANIZATION

Mr. JAVITS. Mr. President, I send to the desk an amendment, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. JAVITS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

Mr. MANSFIELD. Mr. President, reserving the right to object, the amendment is short and I should like to hear it read.

The legislative clerk read the amendment, as follows:

On page 148, line 16 after the period, insert the following:

"Where an organization makes a bargain purchase of property before October 9, 1969, which is subject to a mortgage which was placed on the property more than 5 years before the purchase, and the organization pays the seller less than 10 percent of the value of his equity in the property, the indebtedness secured by such mortgage shall not be treated, notwithstanding the amendments made by subsection (d)(1), as acquisition indebtedness during a period of 10 years following the date of the transaction."

Mr. JAVITS. Mr. President, I have discussed this amendment with both the majority and the minority members of the committee. As a matter of fact, the technical drafting was done by the committee staff. It is essentially a technical amendment.

The purpose of this amendment, Mr. President, is this: Where a person donates or bequeaths property to an exempt organization, which property is subject to an indebtedness which was placed on the property more than 5 years in advance of the gift or bequest, such indebtedness will not be treated as an acquisition indebtedness for a period of 10 years, so as to meet the provisions of the bill with respect to ability to make and receive that kind of gift. Those provisions do not apply when an organization acquires property by what is called a "bargain sale." The bargain sale is a common method of donating property, and organizations which have received property in that manner are thereupon deprived of what is called the 10-year transition

period. This amendment would allow the same 10-year transition period where such property is acquired by bargain sale, provided that the donor is paid no more than 10 percent of his equity in the property.

In short, all that the amendment does is to change what the committee has already provided is this 10 percent of the equity provision.

The particular problem arose in connection with Trinity Church in New York, which ran into this kind of a situation. We submitted the proposal to the committee, and both the Senator from Delaware (Mr. WILLIAMS) and the Senator from Louisiana (Mr. LONG) worked this out with me; and, as I say, the actual text of the amendment was drafted by the staff.

I do not, and obviously they do not, feel that it violates the spirit of what the Committee on Finance was trying to accomplish by this particular provision.

Mr. TALMADGE. Mr. President, I have discussed this amendment with the distinguished ranking majority member of the Committee on Finance, and the staff has carefully reviewed the amendment. I think it has considerable merit, and I urge the Senate to agree to it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

The amendment was agreed to.

AMENDMENT NO. 399

Mr. COOPER. Mr. President, I call up my amendment, No. 399.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. COOPER. Mr. President, I ask unanimous consent that the Senate dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COOPER's amendment is as follows:

Page 454, after line 2, insert the following new section:

Sec. 707. Amortization of certain coal mine safety equipment.

(a) ALLOWANCE.—Part VI of subchapter B of chapter 1 (relating to itemized deductions for individuals and corporations) is amended by adding after section 186 (added by section 906 of this Act) the following new section:

"Sec. 187. Amortization of certain coal mine safety equipment.

"(a) ALLOWANCE OF DEDUCTION.—Every person, at his election, shall be entitled to a deduction with respect to the amortization of the adjusted basis (for determining gain) of any certified coal mine safety equipment (as defined in subsection (d)), based on a period of 60 months. Such amortization deduction shall be an amount, with respect to each month of such period within the taxable year, equal to the adjusted basis of the certified coal mine safety equipment at the end of such month divided by the number of months (including the month for which the deduction is computed) remaining in the period. Such adjusted basis at the end of the month shall be computed without regard to the amortization deduction for such month. The amortization deduction provided by this section with respect to any certified coal mine safety equipment for any month shall be in lieu of the depreciation deduction with respect to such equipment for such month provided by section 167. The 60-month period shall begin, as to any certified coal mine safety equipment, at the election of the taxpayer, with the month following the month in which such equipment was placed in service or with the succeeding taxable year.

"(b) ELECTION OF AMORTIZATION.—The election of the taxpayer to take the amortization deduction and to begin the 60-month period with the month following the month in which the certified coal mine safety equipment was placed in service, or with the taxable year succeeding the taxable year in which such equipment is placed in service, shall be made by filing with the Secretary or his delegate, in such manner, in such form, and within such time, as the Secretary or his delegate may by regulations prescribe, a statement of such election.

"(c) TERMINATION OF AMORTIZATION DEDUCTION.—A taxpayer which has elected under subsection (b) to take the amortization deduction provided by subsection (a) may, at any time after making such election, discontinue the amortization deduction with respect to the remainder of the amortization period, such discontinuance to begin as of the beginning of any month specified by the taxpayer in a notice in writing filed with the Secretary or his delegate before the beginning of such month. The depreciation deduction provided under section 167 shall be allowed, beginning with the first month as to which the amortization deduction does not apply, and the taxpayer shall not be entitled to any further amortization deduction under this section with respect to such equipment.

"(d) CERTIFIED COAL MINE SAFETY EQUIPMENT.—For purposes of this section, the term 'certified coal mine safety equipment' means property which—

"(1) is electric face equipment (within the meaning of section 305 of the Federal Coal Mine Health and Safety Act of 1969) required in order to meet the requirements of section 305(a)(2) of such Act,

"(2) the Secretary of the Interior certifies is permissible within the meaning of such section 305(a)(2), and

"(3) is placed in service before the expiration of six years after the operative date of title III of the Federal Coal Mine Health and Safety Act of 1969.

For purposes of this section, any property placed in service in connection with any used electric face equipment which the Secretary of the Interior certifies makes such electric face equipment permissible shall be treated as a separate item of certified coal mine safety equipment.

"(e) SPECIAL RULES.—

"(1) The adjusted basis of any certified coal mine safety equipment, with respect to which an election is made under this section, shall not be increased, for purposes of this section, for amounts chargeable to capital account for additions or improvements after the amortization period has begun.

"(2) The depreciation deduction provided by section 167 shall, despite the provisions of subsection (a), be allowed with respect to the portion of the adjusted basis which is not taken into account in applying this section."

(b) CLERICAL AMENDMENT.—The table of sections for part VI of subchapter B of chapter 1 is amended by adding at the end thereof the following new item:

"Sec. 187. Amortization of certain coal mine safety equipment."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after the date of the enactment of this Act.

Mr. COOPER. Mr. President, I offer this amendment for myself, the Senator from Tennessee (Mr. BAKER), my colleague from Kentucky (Mr. COOK), the Senators from West Virginia (Mr. RANDOLPH and Mr. BYRD), and the Senator from Virginia (Mr. BYRD).

Mr. President, I hope very much that the manager of the bill will be willing to accept the amendment.

Mr. TALMADGE. Will the Senator explain it, so that Senators can ascertain what it does?

Mr. COOPER. Yes. The purpose of the amendment is to permit the amortization of the cost of certain "permissible" coal mine equipment over a 5-year period. The usual period of depreciation, I am informed, is a period of 10 years. I shall explain the reason for offering the amendment.

Mr. JAVITS. Mr. President, will the Senator yield momentarily?

Mr. COOPER. I yield.

Mr. JAVITS. Before leaving the Chamber, I should like to inform my colleagues, if I could have their attention, that I am the ranking member of the Committee on Labor and Public Welfare which just handled the coal mine safety bill. That bill was drafted by the Senator from New Jersey (Mr. WILLIAMS) and myself.

One of the big problems that we had was to reconcile safety with economics. The Senator from Kentucky (Mr. COOPER) is laying before us a very grave problem affecting small miners, where we are trying to impose heavy safety precautions, and it costs money to provide them.

I should like to say to my colleagues who are interested in safety that what the Senator from Kentucky is now proposing is a way in which the small mine operator can be helped. We knew he had to be helped. We tried to get him small business loans and other things, which is a kind of long way around, but I think the Senator, with his tax amendment, has something which can directly help him, and I hope my fellow Senators will give the greatest sympathy to the Senator's proposition. I testify to my colleagues that one of the bases of the coal mine safety bill was an attempt to reconcile economics with human life. We did the best we could, but what Senator COOPER is now proposing would help us immeasurably to do justice on the economic scale.

Mr. COOPER. I thank the Senator from New York for his excellent statement. I have also been informed that the Senator from New Jersey (Mr. WILLIAMS), who was chairman of the subcommittee that had charge of the coal mine health and safety bill, also supports the amendment.

I ask unanimous consent also to add the names of the Senator from Virginia (Mr. SPONG), and the Senator from Pennsylvania (Mr. SCHWEIKER), and the Senator from Alaska (Mr. STEVENS), as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COOPER. Mr. President, on October 2 of this year the Senate passed S. 2917, the Coal Mine Health and Safety Act of 1969. On October 29, 1969, the House passed its bill. The conferees have met and it is expected that the conferees will file a conference report very soon.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. TALMADGE. Mr. President, do I understand correctly that this is the result of the action of Congress in requiring these coal mine safety devices in coal mines?

Mr. COOPER. The Senator is correct.

Mr. TALMADGE. And that the equipment must necessarily be bought, because an act of Congress has required it?

Mr. COOPER. That is right.

Mr. TALMADGE. And that the purpose of the equipment is to save human life?

Mr. COOPER. The Senator is correct. Both Houses of Congress have passed bills which include a provision requiring that "permissible" machinery be used in all coal mines by a specified date.

The provision included in both the Senate and House bills would abolish the present distinction between "gassy" and "nongassy" mines, a classification that up to this time had been preserved in the Federal Coal Mine Safety Act since its adoption. The chief purpose of proposing the merging of all mines in one classification as "gassy" mines, is to require operators of mines now classified as "nongassy" mines to purchase and install new equipment which is designated as "permissible" equipment under the Federal Coal Mine Safety Act. This equipment is designed to prevent "sparking" of the machinery which could, of course, cause the danger of ignitions and explosions in mines where a sufficient concentration of methane occurs.

Bureau of Mines statistics show that for the year 1967 there were a total of 3,191 nongassy mines employing 45,472 workers and producing 143 million tons of coal a year.

I ask unanimous consent that a compilation prepared by the Bureau of Mines be printed in the RECORD at this point.

There being no objection, the compilation was ordered to be printed in the RECORD, as follows:

NUMBER OF BITUMINOUS UNDERGROUND COAL MINES, EMPLOYMENT AND PRODUCTION BY STATES AND BY GASSY AND NONGASSY MINES—1967

| | Gassy | | | Nongassy | | |
|---|---|---|---|---|---|---|
| | Number of Mines | Employees | Production | Number of Mines | Employees | Production |
| Alabama | 17 | 3,222 | 8,443,850 | 85 | 1,633 | 739,350 |
| Arizona | | | | 1 | 3 | 969 |
| Arkansas | 5 | 61 | 93,690 | | | |
| Colorado | 23 | 1,026 | 3,008,995 | 36 | 239 | 569,915 |
| Illinois | 26 | 5,271 | 27,797,978 | 9 | 111 | 525,834 |
| Indiana | 7 | 421 | 1,564,831 | 4 | 285 | 142,483 |
| Iowa | | | | 5 | 51 | 244,917 |
| Kentucky | 32 | 3,851 | 18,996,388 | 913 | 10,687 | 42,000,000 |
| | | | | | 580 | 2,287,406 |
| Maryland | | | | 33 | 236 | 409,550 |
| Missouri | | | | 2 | 14 | 3,000 |
| Montana | | 16 | 6,200 | 12 | 41 | 22,650 |
| New Mexico | 1 | 98 | 625,000 | 7 | 22 | 4,375 |
| North Dakota | | | | 1 | 5 | 996 |
| Ohio | 18 | 2,115 | 8,922,588 | 55 | 1,244 | 4,496,000 |
| Oklahoma | 1 | 4 | 2,400 | | | |
| Oregon | | | | 1 | 5 | 1,000 |
| Pennsylvania | 68 | 13,973 | 46,110,933 | 279 | 3,007 | 8,302,238 |
| Tennessee | 7 | 57 | 135,250 | 142 | 1,924 | 4,364,750 |
| Utah | 10 | 799 | 2,785,122 | 17 | 359 | 1,478,102 |
| Virginia | 44 | 3,347 | 14,265,000 | 673 | 4,722 | 16,625,000 |
| Washington | 1 | 7 | 8,599 | 3 | 31 | 48,017 |
| West Virginia | 132 | 20,848 | 8,0348,324 | 908 | 20,181 | 61,037,451 |
| | | | | | 32 | 30,812 |
| Wyoming | | | | 5 | 60 | 118,942 |
| Totals | 392 | 55,116 | 213,115,058 | 3,191 | 45,472 | 143,453,737 |

Mr. COOPER. Since all mines are designated as "gassy" under the pending legislation, the operators of these 3,191 "nongassy" mines will be required to junk the nonpermissible machinery now used which has been installed at great cost and replace it with "permissible" equipment of greater cost. This will impose a burden which many operators cannot sustain, result in the closing of hundreds of mines, and will drive out of employment hundreds, if not thousands of miners. This drastic legislation will not only affect the mines and miners, but will result in severe economic hardship upon the communities and States in which the "nongassy" mines are located. The Bureau of Mines compilation for 1967 indicates that there were 913 "nongassy" mines in Kentucky, 908 in West Virginia, 279 in Pennsylvania, 142 in Tennessee, 55 in Ohio, 85 in Alabama, 36 in Colorado and smaller numbers in 10 other States.

Both in the Senate Labor and Public Welfare Committee and on the floor when the Senate considered S. 2917, I offered amendments to preserve the distinction between gassy and nongassy mines. I introduced statistics and geological data showing that nongassy mines are the safest mines and that there is no demonstrated need for abolishing the present distinction between "gassy" and "nongassy." However, my amendments were not agreed to.

The House and Senate conferees have agreed, first, that for all mines certain specified small electrical equipment must be made permissible within 1 year after the operative date of the act—which is 90 days after enactment; second, that heavy electrical face equipment employed in coal mines not classified as "gassy" prior to enactment of the act and which are located above the water table—which definition would include a great majority of mines now classified "nongassy"—must be made permissible within 4 years of the operative date of the act with the right to obtain extensions up to a maximum of 2 years. Thus, under this provision, all operators of the above described nongassy mines would be required at the conclusion of 6 years after the operative date to have replaced all existing nonpermissible equipment by permissible equipment.

In addition, nonpermissible equipment that has worn out is to be replaced 1 year after the operative date by equipment that is permissible.

The amendment I introduce today would permit the operators of nongassy mines located above the water table to amortize over a 5-year period the cost of heavy electrical permissible equipment that they are required to purchase and install, or the cost of converting existing equipment to a permissible condition within the 6-year period after the effective date of the act.

My amendment is limited to equipment required to be installed in this 6-year period and the 5-year amortization would not be available for equipment installed after the 6-year period has expired. In addition, the 5-year amortization provided by my amendment would not be available to write off the small horsepower equipment required to be permissible within a year after the effective date of the act. It is limited to heavy electrical face equipment and is extended only to operators of nongassy mines located above the water table. My amendment, therefore, is of limited scope and of limited duration.

I am informed by the Bureau of Mines that the useful life of coal mining equipment as determined by the Internal Revenue Service for accounting purposes is 10 years. I am informed that most operators employ straight line depreciation schedules in depreciating this equipment. During the debate on the Federal Coal Mine Health and Safety Act, statements were provided by the Senator from New Jersey (Mr. WILLIAMS), manager of the bill, concerning estimates of the cost of new equipment and of the conversion of old equipment. A letter from the Honorable Hollis M. Dole, Assistant Secretary of the Interior, addressed to Senator WILLIAMS, dated August 2, 1969, was included in the RECORD of September 25, 1969, at page 27117. In his letter, Assistant Secretary Dole stated that the Bureau of Mines has estimated the cost to be approximately $50 to $60 million. I would point out that these cost figures included the cost of converting or replacing small electrical equipment in both gassy and nongassy mines, which equipment would not be given the 5-year writeoff as proposed by my amendment. Therefore, I am informed by the Bureau of Mines that this $50 or $60-million total cost figure would be less when limited to the cost of heavy electrical equipment as provided for by my amendment.

Taking the cost estimates submitted by the Bureau of Mines, I requested the Treasury Department to give me an estimate of the revenue loss should my amendment be adopted.

In a letter dated December 8, 1969, I am informed by Mr. John S. Nolan, Deputy Assistant Secretary, that my amendment—and I read from his letter—"will result in a revenue loss of approximately $1 million per year for the next several years, reducing gradually to zero."

The new Federal Coal Mine Health and Safety Act will require many small

operators in nongassy mines to junk their existing equipment and purchase permissible equipment as required by this legislation at great expense for reasons of safety. It seems to me, Mr. President, that the least that the Congress can do is to provide, to this limited extent, financial assistance in meeting these costs. The tax reform bill provides a 5-year amortization to the railroad industry and to industries purchasing air and water pollution equipment. Certainly, the equities of the small coal operator are equal, if not greater, than the industries helped by the 5-year amortization provided in this bill.

Mr. President, reconversion must take place under S. 2917 which is now in conference, within a minimum of 6 years. In my judgment, based upon the letter from the Treasury Department, the overall cost of the amendment would probably be $5 million or less.

It affects approximately 45,000 miners who are working in these mines which produce about 40 percent of our bituminous coal.

It is a just amendment. Congress will enact the measure which is now in conference. Help should be given not only to the operators of the mines, but to the men employed in the mines. Keeping the mine open will continue their employment.

Mr. President, that is the basis of my argument for the measure.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. BAKER. Mr. President, I thank the Senator from Kentucky for yielding and my chairman, the distinguished Senator from West Virginia, for permitting me to speak at this time for the purpose of observing that I believe the Senator from Kentucky has done a great service to a great industry by offering the amendment.

I very much hope that it will be agreed to by the Senate as part of the bill.

It is a difficult task, that of providing for mine safety and coming to grips with the issue of whether gassy and nongassy mines should be preserved.

The Senate has worked its will in that respect. For my part, and I know, from the standpoint of the senior Senator from Kentucky, we had hoped that there would be a continuing distinction between gassy and nongassy mines. However, there is not under the present state of affairs. Therefore, it becomes essential and urgent that something be done to encourage those who operate in nongassy mines, and obviously designated so, to devote permissible equipment to the preservation of those jobs which are by and large in an area of the country that has chronic unemployment and thus promote employment of men who are, by and large, uniquely suited to only one occupation, that of mining coal.

I think the Senator from Kentucky would move a great distance in this direction and the amendment would encourage many operators of nongassy mines to devote permissible equipment to conserving those jobs, thus contributing to our area of Tennessee, Kentucky, Virginia, and West Virginia.

Mr. President, it is with great pride that I join with the Senator from Kentucky in sponsoring the amendment. I hope that the Senator promptly agrees to it.

Mr. COOPER. Mr. President, I thank the Senator from Tennessee.

Mr. President, I yield now to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, the amendment offered by the knowledgeable Senator from Kentucky (Mr. COOPER) indicates once again his very real concern for the problems of coal mining and the safety of the miners. These mining problems, particularly as relate to the smaller mines now classed as nongassy, are soon to become acute and expensive. With the Coal Mine Health and Safety Act nearing finalization in this Congress, most of these mines necessarily must install much new equipment at substantial cost to meet the strict new safety requirements. The amendment which I am privileged to cosponsor will help the smaller mining companies provide the equipment requisite to the safety of their miners. The amortization provided can be very important in the financing of the equipment changeover to satisfy provisions of the new safety measure.

Mr. President, I am very grateful that over a period of time the Senator from Kentucky has demonstrated detailed knowledge and has been realistic in evaluating legislation as it affected the mines of his own State and neighboring ones. The mines concerned in the amendment, frankly, are mostly in Kentucky.

But numerous others in Tennessee, Virginia, and southern West Virginia will have some measure of tax relief available to them under Senator COOPER'S amendment, and we are grateful to him for his alertness and his diligent attention to these matters.

Would amortization provisions, I ask the Senator from Kentucky, usually apply over a period of 10 years?

Mr. COOPER. That is the information we receive from the Department of the Interior and the Department of the Treasury. The usual depreciation is over a period of 10 years.

Mr. RANDOLPH. Mr. President, the Senator's amendment would reduce that to a period of 5 years.

Mr. COOPER. The Senator is correct.

Mr. RANDOLPH. And the letter the sponsor has referred to indicates that the cost to the Federal Government would not be a substantial sum.

Mr. COOPER. It would be $1 million a year for several years. It would then decrease to zero. The reason it would decrease to zero is that it ends as soon as the mines are reequipped in the 6-year transition period.

Mr. RANDOLPH. Mr. President, I am sure the estimate is correct. The estimate is that it would cost the eligible mining companies from $50 million to $60 million for this equipment.

Mr. COOPER. The letter is addressed to the committee of the Senator from West Virginia. The Committee on Labor and Public Welfare had charge of the bill. The letter was addressed to the Chairman of the Labor Subcommittee Senator WILLIAMS by Hollis M. Dole, Assistant Secretary of the Interior.

He states:

Since, in fact, the upgrading of non-permissible equipment would be expected to be a mixture of field conversion and purchase of rebuilt or new equipment, a more realistic cost estimate would be between $50 and $60 million.

Mr. President, I ask unanimous consent that the letter of Assistant Secretary Dole of the Interior Department and the letter of Deputy Assistant of the Treasury Nolan and a summary I have prepared explaining the amendment be printed at this point in the RECORD.

There being no objection, the letter and summary were ordered to be printed in the RECORD, as follows:

ESTIMATES OF THE COST OF CHANGING NON-PERMISSIBLE ELECTRIC FACE EQUIPMENT TO PERMISSIBLE CONDITION, BY THE DEPARTMENT OF THE INTERIOR

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
*Washington, D.C., August 2, 1969.*

Hon. HARRISON A. WILLIAMS, Jr.,
*Chairman, Senate Labor Subcommittee,*
*U.S. Senate, Washington, D.C.*

DEAR SENATOR WILLIAMS: Enclosed are two attachments (A & B) in response to your letter of July 5, 1969, requesting further information on the cost of changing non-permissible electric face equipment in underground coal mines to permissible condition under the procedures (Schedule 2–G) of the Bureau of Mines. These procedures are primarily designed to assure that such equipment, if maintained in permissible condition, will not emit a spark or arc and cause a mine fire or explosion.

The first of these attachments is an updating and correction of estimates previously prepared and supplied to your subcommittee in relation to the cost of changing non-permissible equipment to permissible and the time needed to accomplish it.

The other attachment is the results of a survey of underground coal mines conducted, at your request, by the Bureau of Mines in each of the 9 major coal producing States. The survey was undertaken through the Bureau's district offices and compiled here. While it included some contact with the industry, repair shops, and equipment manufacturers, it is largely a paper survey based on records and data of the Bureau, including inspection reports, etc. We have discussed informally the results of the survey with your staff.

At the request of your staff, we checked, after completing the survey, on whether a bias had been introduced inadvertently due to the small number of mines sampled in the 9 States. Time did not permit a greater sampling. We have concluded that the samples for at least 3 of the States, Virginia, Kentucky, and West Virginia, are not truly typical of the small mines in those States. Thus, a bias was, in fact, inadvertently introduced.

From the survey we have, at your request, estimated the cost of making this equipment permissible either by conversion or rebuilding. The estimates are as follows:

SMALL NON-GASSY MINES

*Estimated costs*

| | |
|---|---|
| Cost of "conversion"[1] of all equipment: | |
| Nine States only | $37,000,000 |
| County-wide basis (by extrapolation from data) | 42,500,000 |
| Cost of upgrading or using rebuilt equipment: | |
| Nine States only | 54,882,580 |
| County-wide basis (by extrapolation from data) | 63,000,000 |

Footnotes at end of table.

LARGE NON-GASSY MINES

*Estimated cost*

Cost of upgrading or using rebuilt equipment: [2]

| | |
|---|---|
| Seven States only | $13,475,650 |
| Country-wide basis | 18,100,000 |

[1] Assumes field permissibility approval will be feasible even for equipment that had never had permissible approval.

[2] Assumes that all equipment could be upgraded and none would be converted.

You also requested that we provide an estimate, based on the survey, of the costs of making this equipment permissible, through conversion, upgrading, purchasing rebuilt or purchasing new, in the case of those gassy mines with "grandfathered" equipment is still permitted under the 1952 Act. The estimates are as follows:

Grandfathered equipment, all Gassy Mines:

Cost to upgrade, $3,591,350.

Cost to rebuild, $14,158,060.

Cost new, $36,951,170.

Because of the bias mentioned above, you also asked if we could use the survey and make some estimates taking the bias into account. Probably the most appropriate way to make such an estimate is to use an average of the capital cost per yearly ton of coal produced. For these larger and more efficient mines covered by the survey a mine producing 20,000 tons per year would require an investment of about $16,000. If the equipment were used for 20 years this would represent a cost of 4 cents per ton of coal mined. There is, however, some tonnage produced in hand loaded mines where permissible equipment would not be required. On the other hand, smaller mechanized mines, also not included in the survey, would be expected to have a higher investment per daily ton than those included in the survey. In our estimate, we have assumed that these two factors are to be in balance.

Using this method then, the cost for the small non-gassy mines for the country as a whole to convert or rebuild the equipment would be $30 million.

If all the equipment could be converted rather than using a combination of conversion and rebuilt equipment, the cost would be about $21 million.

The total cost can thus be estimated at $51.7 million, broken down as follows:

Grandfathered equipment (all upgraded), $3.6 million.

Cost of upgrading or using rebuilt equipment in large non-gassy mines, $18.1 million.

Cost for converting or using rebuilt equipment in small non-gassy mines, $30 million.

These figures are lower than those in Attachment A because we have assumed that the new concept of conversion which we have discussed with your staff using field approval for permissibility will be possible and because the size of the sample in the latest survey introduced a bias. Since, in fact, the upgrading of non-permissible equipment would be expected to be a mixture of field conversion and purchase of rebuilt or new equipment a more realistic cost estimate would be between $50 and $60 million. It is probable, however, that some portion of this sum would be expended anyway due to normal replacement needs.

Another cost is that of the Government which would be appreciably higher if all the equipment were converted, since it would involve a large increase in the man-hours required for field inspections of field converted and approved equipment.

Sincerely yours,

HOLLIS M. DOLE,
*Assistant Secretary of the Interior.*

THE DEPARTMENT OF THE TREASURY,
*Washington, D.C., December 8, 1969.*

Hon. JOHN SHERMAN COOPER,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR COOPER: You have requested an estimate of the revenue cost of Amendment No. 399 to H.R. 13270, the Tax Reform Act of 1969, which you have introduced. The amendment would allow five-year amortization for certain equipment installed to comply with the Federal Coal Mine Health and Safety Act of 1969.

Treasury estimates that this amendment will result in a revenue loss of approximately $1 million per year for the next several years, reducing gradually to zero.

Sincerely yours,

JOHN S. NOLAN,
*Deputy Assistant Secretary.*

EXPLANATION OF COOPER, RANDOLPH, BYRD (W. VA.), COOK, BAKER AMENDMENT

*Purpose* is to permit amortization of the cost of certain "permissible" coal mine equipment over a five-year period. The usual period recognized by the Internal Revenue Service is ten years.

*Cost* of reequipping mines with "permissible" equipment, estimated by the Department of Interior, is $50 to $60 million. Cost, in loss of revenue, estimated by the Department of Treasury, is $1 million annually for the first several years, then reduced to no cost.

*Reason:* House and Senate conferees have agreed on a provision to be a part of the Federal Coal Mine Health and Safety Act of 1969 (S. 2917), which requires for the safety of miners that "permissible" equipment—that is, non-sparking equipment—be installed in "non-gassy" mines over a six-year period. "Non-gassy" mines number about 3,000 and employ about 45,000 men and produce about 40% of the nation's bituminous coal. These are chiefly small mines and the cost of reequipping will put many out of business and increase unemployment, unless some aid is provided.

The five-year amortization provided by the amendment is limited strictly to "non-gassy" mines located above the water table, and only to the cost of installation of heavy electrical face equipment of a permissible type or the cost of converting existing equipment to a permissible standard during the six-year transition period.

Mr. RANDOLPH. Mr. President, I do not wish to take more time except to say that this is desirable and necessary legislation. In the Coal Mine Health and Safety Act, we sought to be prudent without compromising the safety of miners. However, approval of this amendment would mean that we can be more careful in insisting that the smaller units in the industry are not put out of business with the resultant increase in unemployment.

Mr. COOPER. The Senator is correct.

Mr. RANDOLPH. And I have talked with the chairman of the Subcommittee on Labor. He is interested in the amendment and desires to support it.

I have listened to the acting chairman of the Finance Committee as he has questioned the principal author of the amendment. He indicates that he understands the problem we face in this matter.

It has been my privilege to join in cosponsoring the amendment. I do feel it is equitable. And I hope it will receive the unanimous approval of the Senate.

Mr. COOPER. Mr. President, I thank the Senator. We have conferred on the amendment and have worked out the amendment before us.

I yield now to my colleague from Kentucky.

Mr. COOK. Mr. President, although my distinguished colleague from Kentucky has said this would cost the Government $1 million a year for approximately 6 years, I think the weight of the argument is that it will cost the industry between $50 and $60 million during that same period of time.

This cost of $50 to $60 million is the direct action of Congress itself. Contrary to the Williams amendment of just a moment ago which, as the distinguished Senator from Delaware said slowly but surely pulls away this $1 million a year for approximately 5 or 6 years, the cost to the Federal Government is necessitated by the fact that the industry, by action of Congress, must expend between $50 and $60 million during that same period of time.

I say to the distinguished Senator from Georgia that the real argument is that, for the safety and protection of human life, the industry is required to pay some $60 million and Congress is asked for this opportunity to extend to the industry a rapid writeoff from 10 to 5 years at a cost to the Federal Government, for the safety of human lives, the sum of $1 million a year. I think this is the real argument, and this is the point that the distinguished Senator from Kentucky (Mr. COOPER) has so eloquently made. I hope that the committee will accept the amendment.

Mr. COOPER. I thank the Senator.

I yield to the Senator from Virginia.

Mr. SPONG. Mr. President, I commend the Senator from Kentucky for bringing this amendment to the floor. In my judgment, it is a necessary adjunct to the very fine mine safety legislation enacted earlier in this session.

I should like to associate myself with the remarks of the Senator from Kentucky and say that I am very pleased to be a cosponsor of the amendment, and I hope the committee will see fit to accept it.

Mr. TALMADGE. Mr. President, the distinguished Senator from Kentucky and the cosponsors of the amendment have made an impressive case for the amendment. It would authorize the same amortization that is already included in the bill for pollution control devices. Since this is a safety control device affecting human life, I have discussed it with the ranking minority member of the committee, and he and I are in accord that the Senate should adopt it and let us take it to conference.

Mr. COOPER. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kentucky.

The amendment was agreed to.

EFFECTIVE DATE OF ACCUMULATION TRUST AMENDMENTS

Mr. MILLER. Mr. President, I send to the desk an amendment in behalf of myself and Senators TALMADGE, MATHIAS,

ERVIN, ALLOTT, FANNIN, BROOKE, TYDINGS, PERCY, JORDAN of North Carolina, SPONG, CURTIS, BAYH, and RIBICOFF, and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. MILLER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

Page 259 (relating to effective date of accumulation trust amendments) insert after line 10:

"(C) In the case of a trust which was in existence on December 31, 1969, the amendments made by this section shall not apply to distributions made to a beneficiary before January 1, 1972, if the beneficiary elects (at such time and in such manner as the Secretary or his delegate prescribes by regulations) to have existing law apply to such distributions. If the beneficiary is the beneficiary of more than one such trust, the preceding sentence shall apply to distributions from only one of such trusts, such one to be designated by the taxpayer in accordance with such regulations: *Provided*, That the preceding sentence shall apply to distributions from two trusts where one of such trusts is for the lifetime benefit of a surviving spouse."

Mr. MILLER. Mr. President, the purpose of this amendment is to avoid undue hardship by application of the provisions of the committee bill to those cases in which income splitting is not the motive for setting up a trust.

During the committee's deliberations, it was evident that considerable abuse exists under present law relating to multiple trusts, and the committee decided to not only go along with the House but to actually tighten up still further the proposed changes in the law which will either put a stop to the use of mutiple trusts as an income-splitting device or severely hamper their use and protect the revenue.

However, there are many situations in which a trust is established without regard to income splitting. For example, a trust may be established to take care of a mentally retarded person, or to insure funds for a child's education, or to provide for a spendthrift situation of a child, or for any one of a number of socially desirable purposes. Additionally, the Congress sought to place taxpayers living in noncommunity property States on an equal footing with those living in community property States by permitting those in noncommunity property States to obtain equal estate tax treatment through the device of the marital trust. Under the law, a husband will often leave one-half of his property to his wife outright and the other half to a trust for her use and benefit for life; or he will leave one-half of his property in trust for her life, with power in her to provide by will how the remainder interest is to go, and the other one-half in trust for her life, with the remainder over to the children.

In view of these non-income-splitting types of trusts, which have a socially desirable purpose, my amendment provides that the new rules set forth in the pending bill shall not apply until after January 1, 1972, in the case of a trust established prior to December 31, 1969, with these limitations: First, a beneficiary of one or more trusts can make an irrevocable election to not have the new rules apply with respect to only one trust; and second, a beneficiary of a trust created for the lifetime benefit of a surviving spouse; namely, the widow may have an election with respect to one additional trust. As I have pointed out, this would usually be the case of a situation where both a "marital" and a "nonmarital" trust situation exists.

By postponing until January 1, 1972, the time in which the new rules would apply to these limited situations, the Treasury Department and the Congress will have adequate time to work out special rules to cover these limited situations for the future.

That special rules will be required seems certain, because, as I have said, the new rules were intended to cover income-splitting trust devices and not the typical family-type trust which is not motivated by income splitting.

I should point out that the new rules would, for the first time, include long-term capital gains for purposes of computing distributable income, and this would be done under an unlimited throwback rule. Additionally, interest would be charged on any additional tax computed under the throwback rule.

Actually, there would not be much benefit to the revenue under the unlimited throwback rule insofar as capital gains are concerned, and the table set forth below discloses this. If one makes the extreme assumption that a trust has no other income except capital gains, the trust itself would not have an effective tax rate of 25 percent until its capital gains reached $140,000.

The following table indicates that the maximum savings possible is not sufficient to provide a significant tax avoidance incentive, nor to justify a complex set of new rules to nullify the savings. The savings indicated in the table would be substantially less if the beneficiary's tax bracket were less than 50 percent or if the trust had other income in addition to the capital gain involved—which would increase its effective tax rate on such gain—

| Capital gain | Tax at 25 percent | Tax to trust[1] assuming no other income | Maximum savings |
|---|---|---|---|
| $10,000 | $2,500 | $910 | $1,590 |
| $20,000 | 5,000 | 2,190 | 2,810 |
| $30,000 | 7,500 | 3,940 | 3,560 |
| $40,000 | 10,000 | 6,070 | 3,930 |
| $50,000 | 12,500 | 8,530 | 3,970 |
| $60,000 | 15,000 | 11,150 | 3,850 |
| $70,000 | 17,500 | 13,865 | 3,635 |
| $80,000 | 20,000 | 16,670 | 3,330 |
| $90,000 | 22,500 | 19,590 | 2,910 |
| $100,000 | 25,000 | 22,590 | 2,410 |
| $110,000 | 27,500 | 25,690 | 1,810 |
| $120,000 | 30,000 | 28,790 | 1,210 |
| $130,000 | 32,500 | 31,990 | 510 |
| $140,000 | 35,000 | 35,000 | 0 |

[1] Personal exemption and deductions disregarded.

For example, if in the case of a trust having $50,000 of capital gain indicated above there were also $10,000 of ordinary income, the trust tax on the capital gain would be $11,670, and the savings would be only $830, instead of the $3,970 indicated.

Let me cite a few examples to show the hardship that would be worked by applying the new rules—including capital gains, unlimited throwback, and the 3-percent interest charge—to a single trust situation:

EXAMPLE A

Assume that A dies with a will which leaves $200,000 in trust. All of the income is to be distributed each year to his daughter, D, during her lifetime. On her death the remainder is to be divided equally between D's children who survive her. D lives for 30 years following A's death. During those 30 years the trust has capital gains aggregating $80,000. An analysis of each of the years in which such gains were realized indicates that the aggregate tax paid by the trust on such gains was $12,000. D had the benefit of such gains insofar as they resulted in higher income distributed to her during her lifetime. On D's death her only survivors are two of her three sons, G–1 and G–2, and the corpus of the trust is divided equally between them.

Under the Senate amendments the following steps would be required:

First. The trustee would be required to analyze the trust tax returns for each year during the 30-year period in which the trust realized a capital gain and to determine the tax which was in fact paid by the trust on account of such gains. If there were capital loss carryovers involved, it might be necessary for the trustee to recompute trust taxes for several years in order to determine the net tax attributable to the capital gain realized by the trust in any one year.

Second. Each of G–1 and G–2 would be required to analyze his tax returns for each year of the 30-year period during which the trust was in existence, to determine, first, the portion of the capital gain realized by the trust in any year which was deemed to have been distributed to him on termination of the trust; and, second, to determine the amount of additional tax which he would have had to pay if such capital gains had been realized by him in the year in which they were realized by the trust. If the amount of such additional tax which would have been payable by G–1 or G–2 in any year exceeds the amount of tax which was in fact paid by the trust on such gains, then the amount of such excess would be considered to be owing by G–1 and G–2 as a "throwback" tax in the year the trust terminated.

If either the trust or the beneficiary, or both, should have capital loss caryovers, a series of computations would be required with respect to such years, and it would be extremely difficult to compute both the "throwback" tax on capital gains.

EXAMPLE B

Decedent establishes a trust under his will for his child who is suffering from cerebral palsy. The trustee has the discretionary power to distribute income and principal as needed for the child. Initially the income is adequate for the

child and during the years 1970 to 1975 most of the income but none of the principal is distributed, but the trustee does realize capital gains in each year as a result of changes in the portfolio. In 1976 a substantial amount of principal is needed for the child's medical care but in that year the stock values are down and in selling assets to raise the funds the trustee realizes losses which exceed the gain previously recognized. Nevertheless, the gains realized in 1970 to 1975 would be "thrown back" to the child's returns. A throwback tax would result—the child being in a higher bracket than the trust since most of the trust income was taxable to him. The 3-percent penalty would be applicable to that part of the distribution which represented a "throwback" of trust income—as distinguished from trust capital gains.

EXAMPLE C

The decedent's will provides that the residue of his estate is to be held in trust, with all of the income to go to his two sisters, with distribution of the corpus at the death of the survivor to a niece. The trust initially consists of a farm worth $100,000 which is sold for $150,000 in 1970. The proceeds are reinvested in Government bonds to provide the maximum income for the sisters. In 1989 one of the sisters is incapacitated and some of the income of the trust is accumulated. The trust is distributed in 1990 at the death of the surviving sister and the bonds are distributed to the niece. In the niece's return for 1990 the niece would be subjected to the throwback rule. If she had any taxable income in 1970 she would have paid a higher tax than the trust on the $50,000 capital gain—since the trust had no taxable income—and she would be required to pay a throwback capital gains tax on the 1970 sale of the farm.

EXAMPLE D

A and his wife die in 1970 leaving a son age 2. After estate taxes A's entire estate of $100,000 is placed in trust for the benefit of the son. The trustee has discretion to pay out such portion of the income as is required to support the son and the remainder is to be accumulated, with distribution of the principal to the son when he attains age 21. During all years most of the income was distributed for support of the son and during most years, including 1975, all of the income was so distributed. The sole asset of the estate is a building which is condemned in 1975, at which time it was worth $150,000. The condemnation proceeds are invested in mutual funds, which make an annual capital gain distribution allocable to trust corpus. Ordinary income is paid currently to the son for his care and the trust corpus is distributed to the son when he attains age 21 in 1989. In the son's return for 1989 the capital gain realized on the condemnation of the building in 1975 and the annual capital gain distributions received by the trustee and allocated to trust corpus are reported as a result of the throwback rule.

The capital gains throwback would apply as the trustee is authorized to—and does—accumulate income. There would be a throwback tax in each year because the greater part of the trust income was always distributed and taxable to the son, and the capital gains would thus produce a larger tax when combined with his income than when combined with the lesser trust income. The 3-percent per annum interest charge would be applicable to the extent the throwback represented trust income, as distinguished from capital gain.

From these examples, it seems clear that unnecessary hardship and administrative cost would be required if the new rules are made applicable to the typical single or marital trust situation—a result which, I am sure, none of us should wish to see happen.

My amendment has been carefully drawn to limit exemption from the new rules to nonincome splitting situations, and I hope that it will be adopted. May I say that I very much appreciate the number of my colleagues who have joined with me in sponsoring this amendment, and an even larger number who have spoken to me personally to indicate their strong support for my amendment.

This amendment has been gone over very carefully with the staff of the joint committee and of the Finance Committee, and I understand that it is acceptable to the manager of the bill.

Mr. TALMADGE. Mr. President, I have examined the amendment, and the staff has examined it in detail. I also have discussed it with the distinguished ranking minority member of the committee. It is my judgment that the Senator's amendment has considerable merit and that we should take it to conference. I urge the Senate to adopt it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

CONVERSION PRIVILEGE

Mr. MILLER. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. MILLER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 234, line 20, insert the following after the word "for": "(or pursuant to the exercise of a conversion privilege contained in)".

On line 24, after the comma (,) insert: "or if gain or loss is not otherwise required to be recognized upon the exercise of such conversion privilege,".

Mr. MILLER. Mr. President, this is a clarifying amendment to accord with the intent of this provision of the bill that "exchange" includes the conversion of a convertible debenture into common stock of the issuer—in accord with the longstanding IRS view that such conversion is merely a change in form or one step in an "open transaction" wherein a debenture holder is considered as owning substantially the same bundle of rights after conversion as he owned before.

I have checked this amendment with the able staff, and they agree, as I understand it, that it is merely a clarifying amendment, and I ask that it be adopted.

Mr. TALMADGE. Mr. President, I have discussed this amendment with the distinguished ranking minority member of the committee and with the staff. We are in agreement that it is a clarifying amendment, and we think it should be adopted.

The PRESIDING OFFICER (Mr. HART in the chair). The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

AMENDMENT NO. 398

Mr. BYRD of West Virginia. Mr. President, I call up amendment No. 398 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is at the end of the bill add the following new title:

TITLE X—AMENDMENTS TO THE SOCIAL SECURITY ACT

SHORT TITLE

SEC. 1001. This title may be cited as the "Social Security Retirement Age Amendments of 1969".

ACTUARIALLY REDUCED BENEFITS

SEC. 1002. (a)(1) Section 202(a)(2) of the Social Security Act is amended by striking out "62" wherever it appears therein and inserting in lieu thereof "60".

(2) Section 202(b)(1) of such Act is amended by striking out "62" wherever it appears therein and inserting in lieu thereof "60".

(3) Section 202(c) (1) and (2) of such Act is amended by striking out "62" wherever it appears therein and inserting in lieu thereof "60".

(4)(A) Section 202(f)(1)(B), (2), (5), and (6) is amended by striking out "62" wherever it appears therein and inserting in lieu thereof "60".

(B) Section 202(f)(1)(C) of such Act is amended by striking out "or was entitled" and inserting in lieu thereof "or was entitled, after attainment of age 62."

(5) (A) Section 202(h)(1)(A) of such Act is amended by striking out "62" and inserting in lieu theref "60".

(B) Section 202(h)(2)(A) of such Act is amended by inserting "subsection (q) and" after "Except as provided in".

(C) Section 202(h)(2)(B) of such Act is amended by inserting "subsection (q) and" after "except as provided in".

(D) Section 202(h)(2)(C) of such Act is amended by—

(i) striking out "shall be equal" and inserting in lieu thereof "shall, except as provided in subsection (q), be equal"; and

(ii) inserting "and section 202(q)" after "section 203(a)".

(b)(1) The first sentence of section 202 (q) (1) of such Act is amended (A) by striking out "husband's, widow's, or widower's" and inserting in lieu thereof "husband's, widow's, widower's, or parent's", and (B) by

striking out, in subparagraph (A) thereof, "widow's or widower's" and inserting in lieu thereof "widow's, widower's, or parent's".

(2)(A) Section 202(q)(3)(A) of such Act is amended (i) by striking out "husband's, widow's, or widower's" each place it appears therein and inserting in lieu thereof "husband's, widow's, widower's, or parent's", (ii) by striking out "age 62" and inserting in lieu thereof "age 60", and (iii) by striking out "wife's or husband's" and inserting in lieu thereof "wife's, husband's, or parent's".

(B) Section 202(q)(3)(B) of such Act is amended by striking out "or husband's" each place it appears therein and inserting in lieu thereof ", husband's, widow's, widower's, or parent's".

(C) Section 202(q)(3)(C) is amended by striking out "or widower's" each place it appears therein and inserting in lieu thereof "widower's, or parent's".

(D) Section 202(q)(3)(D) of such Act is amended by striking out "or widower's" and inserting in lieu thereof "widower's, or parent's".

(E) Section 202(q)(3)(E) of such Act is amended (i) by striking out "(or would, but for subsection (e)(1) in the case of a widow or surviving divorced wife or subsection (f)(1) in the case of a widower, be) entitled to a widow's or widower's insurance benefit to which such individual was first entitled for a month before she or he" and inserting in lieu thereof "(or would, but for subsection (e)(1), (f)(1), or (h)(1), be) entitled to a widow's, widower's, or parent's insurance benefit to which such individual was first entitled for a month before such individual", (ii) by striking out "the amount by which such widow's or widower's insurance benefit" and inserting in lieu thereof "the amount by which such widow's, widower's, or parent's insurance benefit", (iii) by striking out "over such widow's or widower's insurance benefit" and inserting in lieu thereof "over such widow's, widower's, or parent's insurance benefit", and (iv) by striking out "attained retirement age" each place it appears therein and inserting in lieu thereof "attained age 60 (in the case of a widow or widower) or attained retirement age (in the case of a parent)".

(F) Section 202(q)(3)(F) of such Act is amended (i) by striking out "(or would, but for subsection (e)(1) in the case of a widow or surviving divorced wife or subsection (f)(1) in the case of a widower, be) entitled to a widow's or widower's insurance benefit to which such individual was first entitled for a month before she or he" and inserting in lieu thereof "(or would, but for subsection (e)(1), (f)(1), or (h)(1), be) entitled to a widow's, widower's, or parent's insurance benefit for which such individual was first entitled for a month before such individual", (ii) by striking out "the amount by which such widow's or widower's insurance benefit" and inserting in lieu thereof "the amount by which such widow's, widower's, or parent's insurance benefit", (iii) by striking out "over such widow's insurance benefit" and inserting in lieu thereof "over such widow's, widower's, or parent's insurance benefit", (iv) by striking out "62" and inserting in lieu thereof "60", and (v) by striking out "attained retirement age" each place it appears therein and inserting in lieu thereof "attained age 60 (in the case of a widow or widower) of attained retirement age (in the case of a parent)".

(G) Section 202(q)(3)(G) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(3) Section 202(q)(5)(B) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(4) Section 202(q)(6) of such Act is amended (i) by striking out "husband's, widow's, or widower's" and inserting in lieu thereof "husband's widow's, widower's, or parent's", and (ii) by striking out, in clause (III), "widow's or widower's" and inserting in lieu thereof "widow's, widower's, or parent's".

(5) Section 202(q)(7) of such Act is amended—

(A) by striking out "husband's, widow's, or widower's" and inserting in lieu thereof "husband's, widow's, widower's, or parent's"; and

(B) by striking out, in subparagraph (E), "widow's or widower's" and inserting in lieu thereof "widow's, widower's, or parent's".

(6) Section 202(q)(9) of such Act is amended by striking out "widow's or widower's" and inserting in lieu thereof "widow's, widower's, or parent's".

(c)(1) The heading to section 202(r) of such Act is amended by striking out "Wife's or Husband's" and inserting in lieu thereof "Wife's, Husband's, Widow's, Widower's, or Parent's".

(2)(A) Section 202(r)(1) of such Act is amended (i) by striking out "wife's or husband's" the first place it appears therein and inserting in lieu thereof "wife's, husband's, widow's, widower's, or parent's", and (ii) by inserting immediately before the period at the end thereof the following: ", or for widow's, widower's, or parent's insurance benefits but only if such first month occured before such individual attained age 62".

(B) Section 202(r)(2) of such Act is amended by striking out "wife's or husband's" and inserting in lieu thereof "wife's, husband's, widow's, or widower's, or parent's".

(d) Section 214(a)(1) of such Act is amended by striking out subparagraph (A), by redesignating subparagraphs (B) and (C) as subparagraphs (C) and (D), respectively, and by inserting the following new subparagraphs (A) and (B):

"(A) in the case of a woman who has died, the year in which she died or (if earlier) the year in which she attained age 62,

"(B) in the case of a woman who has not died, the year in which she attained (or would attain) age 62,".

(e)(1) Section 215(b)(3) of such Act is amended by striking out subparagraph (A), by redesignating subparagraphs (B) and (C) as subparagraphs (C) and (D), respectively, and by inserting the following new paragraphs (A) and (B):

"(A) in the case of a woman who has died, the year in which she died, or, if it occurred earlier but after 1960, the year in which she attained age 62,

"(B) in the case of a woman who has not died, the year occurring after 1960 in which she attained (or would attain) age 62,".

(2) Section 215(f)(5) of such Act is amended (A) by inserting after "attained age 65," the following: "or in the case of a woman who became entitled to such benefits and died before the month in which she attained age 62,"; (B) by striking out "his" each place it appears therein and inserting in lieu thereof "his or her"; and (C) by striking out "he" each place after the first place it appears therein and inserting in lieu thereof "he or she".

(f)(1) Section 216(b)(3)(A) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(2) Section 216(c)(6)(A) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(3) Section 216(f)(3)(A) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(4) Section 216(g)(6)(A) of such Act is amended by striking out "62" and inserting in lieu thereof "60"

(g)(1) Section 202(q)(5)(A) of such Act is amended by striking out "No wife's insurance benefit" and inserting in lieu thereof "No wife's insurance benefit to which a wife is entitled".

(2) Section 202(q)(5)(C) of such Act is amended by striking out "woman" and inserting in lieu thereof "wife".

(3) Section 202(q)(6)(A)(i)(II) of such Act is amended (A) by striking out "wife's insurance benefit" and inserting in lieu thereof "wife's insurance benefit to which a wife is entitled", and (B) by striking out "or" at the end and inserting in lieu thereof the following: "or in the case of a wife's insurance benefit to which a divorced wife is entitled, with the first day of the first month for which such individual is entitled to such benefit, or".

(4) Section 202(q)(7)(B) of such Act is amended by striking out "wife's insurance benefits" and inserting in lieu thereof "wife's insurance benefits to which a wife is entitled".

(h) Section 224(a) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

SEC. 1003. The amendments made by this title shall apply with respect to monthly benefits under title II of the Socal Security Act for months after December 1969, but only on the basis of applications for such benefits filed after September 1969.

SEC. 1004. Section 8332(j) of title 5 of the United States Code is amended by striking "individual, widow," in the first sentence and substituting in lieu thereof "individual is at least 62 years of age, or if his widow".

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the names of the Senator from West Virginia (Mr. RANDOLPH), the Senator from New Mexico (Mr. MONTOYA), and the Senator from Wisconsin (Mr. NELSON) may be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, this amendment, which I offered in behalf of the majority leader and myself, would lower from 62 to 60 the age at which actuarially reduced social security benefits would be made available to eligible individuals who voluntarily retire.

An estimated 3½ million persons, not otherwise eligible for benefits under social security, would become immediately eligible. Of these, an estimated 35,000 West Virginians would be eligible.

I am further advised by the Social Security Administration that, of the 3½ million who would become eligible, about 800,000 persons would actually apply for these benefits, 10,000 of whom would be West Virginians.

The short-range cost effect of adopting this amendment would be a little over $500 million in additional benefit payments. However, this initial impact would be offset subsequently, thereby resulting in no additional costs in the long run. The reason for this is that individuals who would elect voluntarily to retire at age 60 would take reduced benefits and would, therefore, receive the same net amount by the time of death that they would have been paid had they started receiving larger payments under the current system at age 62, 63, 64, or 65.

In view of the fact that this amendment would not result in any overall drain on the social security trust fund, no additional tax revenues would be necessary. Hence, it would not constitute any cost burden to either the employer or employee. It merely offers persons who have paid into social security a choice of retiring at age 60 at a reduced benefit or waiting until they are 62 to 65 to retire at a higher benefit. No individual would be forced to retire at age 60.

I think it is important to remember that there are millions of people in this country who, because of failing health or

loss of employment, are forced into retirement earlier than would otherwise be the case. As Senators know, it is becoming increasingly difficult to find employment after age 50, and sometimes even earlier. In any event, persons who cannot find employment because of age, or who are unable to get jobs because of bad health, should at least have the opportunity to voluntarily retire at an earlier age if they choose to take a reduced benefit in so doing. If individuals are denied this choice, some of them may be forced to go on welfare or they may become an additional burden upon their children or other relatives who have family responsibilities of their own.

Moreover, there are some persons who, although presently employed, would voluntarily elect to take reduced benefits at 60, thus vacating their jobs. Those jobs could then be filled by younger persons who are entering the labor market.

Mr. President, there is no sociological or other reason for drawing the retirement line at age 65. With the need for additional jobs increasing from year to year, and with the problems of cybernation and automation confronting us ever more daily, it seems to me that there is every justifiable reason for lowering the age of eligibility for retirement under social security. Those who feel it imperative to apply for their benefits early could do so. As long as there would be no additional longrun cost to the trust fund, why should we hesitate to offer Americans this choice?

This amendment will serve to alleviate hardship for persons who otherwise might be forced to retire and forced to wait a couple of additional years before being eligible for social security.

An indication as to what the exercise of the choice would mean, under existing law, those persons who elect under present law to retire at age 62 must accept a 20-percent reduction in their old age insurance benefits—in other words, five-ninths of 1 percent for every month in the period between the attained age and age 65. Under the amendment which I have offered on behalf of the majority leader and myself, the voluntary retiree at age 60 would accept a 33⅓ percent reduction in his benefits, or five-ninths of 1 percent for each month in the period between age 60 and the date the individual would attain 65.

Mr. President, I have offered this amendment a number of times during the 12 years I have been in the Senate, and the Senate has adopted the amendment upon each occasion. The House has always rejected the amendment in conference. I hope that the Senate will accept the amendment again. We should not tire in persisting. The amendment is a good amendment, and sooner or later it is going to become law. I hope that it will be this year.

I favor the payment of full benefits at age 62, but such action would constitute an additional drain on the trust fund, and I intend to press for such action when the social security bill is considered by the Senate early next year. For the present, I think we should act to lower the retirement age to 60 for all Americans who voluntarily elect to accept actuarially reduced benefits at that age.

I urge the adoption of the amendment.

Mr. WILLIAMS of Delaware. Mr. President, last night in colloquy with the Senator from Massachusetts (Mr. KENNEDY) I cited an example of a credit of $63 million for one company in Alaska under the investment tax credit. I have been advised by the staff, in looking over the Stevens amendment, that all of this company's expenditures would not be subject to the investment credit tax. While they would have an investment credit for the entire State of Alaska, it would not be in the amount I stated. The RECORD should be corrected in that respect. The cost of the Stevens amendment would be $70 million for the whole country instead of the earlier estimate as given of $300 million.

Mr. President, I ask unanimous consent that the RECORD be corrected accordingly.

The PRESIDING OFFICER. Without objection, the correction will be made.

Mr. TALMADGE. Mr. President, the distinguished Senator from West Virginia has offered an appealing amendment. It is easy to be sympathetic to the intent of the amendment. The Senate has passed the amendment twice, in 1965 and in 1967, as the Senator stated. As the Senator pointed out, the amendment is actuarially sound.

However, the Senate should be aware of the reasons the House conferees refused to accept the amendment in the past. The first reason is its budgetary impact. Although it is actuarially sound in the long run, the immediate effect of the amendment would be to increase social security payments by $600 million annually, and the Senate has already accepted quite a number of amendments that vastly increase the outflow of social security funds above the amounts under present law. The Senate has already approved amendments which will increase social security payments by about $6.5 billion a year. At a time when inflation is running rampant, we should be extremely careful about fueling further inflation.

In addition to its budgetary impact, the amendment would give people at age 60 permanently lower benefits, one-third less than they would receive at age 65. For example, a person who would be entitled to the $100 minimum voted by the Senate yesterday would only receive $67 at age 60. The reason is simple: The actuaries estimate that at age 65, a person will receive social security benefits about 15 years on the average. If he begins drawing the same total amount at age 60, 15 years' worth of payments must be spread out over 20 years, and each months' payment must be one-third less. While it can certainly be said that two-thirds of a benefit is better than nothing, the House conferees have taken the position that the Congress should not provide benefits that are permanently reduced by one-third.

One final word in conclusion. Under existing law, anyone under social security who is totally or permanently disabled can draw benefits regardless of age, so that the amendment would address itself only to able-bodied individuals at the age of 60.

Mr. WILLIAMS of Delaware. Mr. President, I join the distinguished acting chairman of the committee in expressing the hope that the Senate will not accept the Byrd amendment, as appealing as it may be. True, as the Senator points out, from an actuarial basis it is sound, but the impact on the Federal budget would be about $600 million additional per year. As the chairman pointed out regarding the bill as reported by the committee, its net result would have been to provide additional revenue of $6½ billion. The Senate has whittled that away by approving $12½ billion dollars in extra revenue loss, so that as the bill now stands we shall be losing about $6 billion in revenue instead of gaining $6 billion, even without the pending amendment, which would add another $600 million loss.

I am afraid that we cannot accept such an amendment and be fiscally solvent or responsible.

Another disadvantage to it, as people retire and as the years progress they will realize that they cannot live on that amount of two-thirds, and Congress will, as it did the other day in a previous amendment of my good friend from West Virginia, raise that minimum because it will be so low that they cannot live on it. I am not sure that we are rendering a service to these people when we hold out an incentive such as this, where they may be encouraged to retire on benefits which will not be enough over a period of time. I would, therefore, hope that the amendment would be rejected.

Mr. President, I believe we would want a record vote on this amendment, and when the Senator from Virginia has completed his remarks I shall ask for a call of the quorum in order that we may get the yeas and nays ordered on his amendment.

Mr. BYRD of West Virginia. Mr. President, I concede that what the able Senator from Delaware has said may be true, and that some persons who, at such time as the amendment takes effect, would elect to accept the actuarially reduced benefits at age of 60 might, may in later years, feel that they had perhaps erred. On the other hand, there are those who really have no choice, or who are unable to get work because of age, or who are unable to get work because of their physical condition, or who otherwise may be forced to go on welfare or to become the wards of their children. This amendment would at least give them the opportunity to make that choice.

In some cases, necessity would dictate that the individual elect to retire early. The Byrd-Mansfield amendment merely provides a choice. It is purely voluntary. If the individual elects to retire early, and if the $100 minimum is accordingly reduced, that would still be his choice.

I recognize, also, the validity of the statements made by the Senator from Georgia (Mr. TALMADGE) and the Senator from Delaware (Mr. WILLIAMS) with respect to the impact that this amendment might have upon inflation. I listened very carefully to what President Nixon said last night. In view of what the President said, and in view of the arguments which have been made here with respect to the inflationary effect which this amend-

ment might have, I wish to modify my amendment, to provide that it go into effect only when the President issues a proclamation that he has determined it to be desirable to expand consumer purchasing power by making additional persons eligible to receive social security benefits.

Mr. WILLIAMS of Delaware. Mr. President, would the Senator be willing to modify his amendment to make it go into effect when the President determined that we have a balanced budget?

Mr. BYRD of West Virginia. I would not want to modify my amendment beyond what I have already indicated. The modification I make would give the President the opportunity to trigger the effect of the amendment, and at such time as he feels that it would not have an undue inflationary impact upon the economy and might be desirable to expand consumer purchasing power, he may do so. My modifying language would leave it up to the President to trigger the amendment.

Mr. President, I offer the modification and send it to the desk and ask that it be read.

The PRESIDING OFFICER. The modification will be read.

The assistant legislative clerk read as follows:

On page 9 of the amendment strike out lines 17 to 21 and insert in lieu thereof:

"SEC. 1003. The amendments made by section 1002 of this title shall apply with respect to monthly benefits under title II of the Social Security Act for months after the month in which the President issues a proclamation that he has determined that it is desirable to expand consumer purchasing power by making additional persons eligible to receive social security benefits."

Mr. BYRD of West Virginia. Mr. President, I am ready for a vote, and I suggest the absence of a quorum in order that we might get the yeas and nays ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, I ask for the yeas and nays on this amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment (No. 398) of the Senator from West Virginia (Mr. BYRD) and the Senator from Montana (Mr. MANSFIELD), as modified. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. YOUNG of Ohio (after having voted in the affirmative). Mr. President, on this vote, I have a pair with the Senator from Missouri (Mr. SYMINGTON). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withdraw my vote.

Mr. GRIFFIN (after having voted in the negative). Mr. President, on this vote I have a pair with the Senator from Wyoming (Mr. MCGEE). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withdraw my vote.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Wyoming (Mr. MCGEE), the Senator from Montana (Mr. METCALF), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

I further announce that, if present and voting, the Senator from Montana (Mr. METCALF) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Maryland (Mr. MATHIAS) is detained on official business.

I have announced my pair with the Senator from Wyoming (Mr. MCGEE).

The result was announced—yeas 54, nays 37, as follows:

[No. 196 Leg.]

YEAS—54

| | | |
|---|---|---|
| Aiken | Harris | Moss |
| Bayh | Hart | Muskie |

PRESENT AND GIVING LIVE PAIRS, AS PREVIOUSLY RECORDED—2

Griffin, against.
Young of Ohio, against.

NOT VOTING—7

| | | |
|---|---|---|
| Anderson | McGee | Symington |
| Goldwater | Metcalf | |
| Mathias | Mundt | |

So the amendment (No. 398), as modified, was agreed to.

Mr. GRIFFIN. I move to reconsider the vote by which the amendment was adopted.

Mr. BYRD of West Virginia. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12964) making appropriations for the Departments of State, Justice, and Commerce, the judiciary, and related agencies for the fiscal year ending June 30, 1970, and for other purposes; and that the House receded from its disagreement to the amendment of the Senate numbered 21 to the bill and concurred therein, with an amendment, in which it requested the concurrence of the Senate.

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. KENNEDY obtained the floor.

Mr. KENNEDY. Mr. President, I ask unanimous consent that I may yield to the distinguished Senator from Vermont (Mr. AIKEN) without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. AIKEN. At this point, Mr. President, I would like to ask the chairman of the Committee on Finance a question for the purpose of clarifying one section of the bill.

I notice that the bill—page 297, section 421—taxes dividends in stock in all cases where there are two classes of stock outstanding and there are different distributions with regard to these two classes such as stock on one class and cash on the other class or preferred stock on one class and common stock on the other class.

However, I note that the bill also provides that under certain conditions a recapitalization may be treated as a distribution of stock or property. It is my understanding that there is no intention to alter the status of a recapitalization in which, for example, the older stockholders exchange some or all of their common stock for preferred stock and retire from the business while the younger stockholders exchange some or all of their preferred stock for additional common stock and continue to be active in the business. This has been a classic type of recapitalization which has always been considered tax free in the past. Am I correct in that there is no intention to change the status of a recapitalization of this type with a bona fide business purpose?

Mr. LONG. The Senator is correct. There is no intention to impose a tax on a bona fide recapitalization of this type, except to the extent stock is given in payment for dividend arrearages on the preferred stock.

Mr. AIKEN. I thank the chairman of the committee.

I also thank the distinguished Senator from Massachusetts for yielding to me for the purpose of clarifying this point.

Mr. KENNEDY. Mr. President, I ask unanimous consent that I may yield to the distinguished Senator from Wisconsin (Mr. NELSON) for a brief colloquy with the chairman of the Committee on Finance, without losing my right to the floor.

The PRESIDING OFFICER (Mr. PACKWOOD in the chair). Without objection, it is so ordered.

Mr. NELSON. Mr. President, I should like to ask a question of the manager of the bill for the purpose of clarification.

Section 901 of the bill as reported by the Committee on Finance would impose special limitations on contributions to pension plans of certain corporations, defined as professional service organizations.

I am anxious to make sure that this section of the bill is not intended to apply to a corporation like the Marshfield Clinic, in Marshfield, Wis. This corporation has operated a medical clinic in Marshfield, Wis., since it was organized in 1916. It employs 84 physicians as full-time employees. The Marshfield Clinic was not organized under one of the special State laws recently enacted for professional service corporations. Instead, it was incorporated in 1916 under the general business corporation law of the State of Wisconsin.

The Marshfield Clinic has the following characteristics of an ordinary business corporation: It is governed by a board of directors; it has an executive committee of directors; it issues certificates representing shares of capital stock; it is empowered to amend and has amended its articles of incorporation; it has purchased, constructed, leased, and mortgaged its assets; liability of its shareholders for its debts is limited; it has initiated suits as a corporation in the Wisconsin courts; it has continuity of life; it is liable for Wisconsin income tax as a general business corporation; it has always been subject to Federal income tax as a corporation; and it files required annual reports with the Wisconsin Secretary of State as a general business corporation.

Clearly the Marshfield Clinic was not set up to take advantage of pension plan benefits under the Federal tax law, since it was in existence for more than 25 years before the present tax treatment of employee pension plans was first enacted in 1942.

While the Marshfield Clinic is subject to no such requirement under the Wisconsin general business corporation law, its articles of incorporation provide that its shares of stock may be issued only to physicians licensed in Wisconsin and may be voted only by them.

I would appreciate it if the Senator could assure me that it was not the intention of the committee that section 901 apply to a corporation under these circumstances.

Mr. LONG. It would be my understanding that the new provision relating to professional corporations would not apply to the type of case the Senator refers to.

My reason for saying this is that although this corporation by its charter is limited to having only doctors as shareholders, this is not required by the State law under which it is organized. Nor is it my understanding that there is any indication that when this clinic was organized in 1916, this limitation in the charter was specifically required by the then-existing rules of professional ethics.

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. RIBICOFF. Mr. President, I think the chairman is absolutely correct. What we were seeking to do in the Committee on Finance was to close the loophole of those corporations which were seeking to circumvent the guidelines laid out in H.R. 10 of the so-called Keogh plan. Clinics such as the Marshfield Clinic, the Mayo Clinic, and the Lahey Clinic were established many years ago, long before H.R. 10 and the Keogh plan in 1962. They were established to give these particular services.

When a person goes to the Marshfield Clinic or the Mayo Clinic or the others, he knows he is going to a clinic. But when Dr. Jones forms a corporation, the patient thinks he is going to Dr. Jones. He does not know he is going to a corporation at all.

It is my understanding from the discussions in the Finance Committee that we specifically were determined that clinics such as described by the Senator from Wisconsin would not be covered by the changes adopted by the Finance Committee.

Mr. LONG. I believe that is true, for the reasons I indicated in my statement.

Mr. RIBICOFF. The Senator is correct.

AMENDMENT NO. 409

Mr. KENNEDY. Mr. President, I call up amendment No. 409. The amendment, which is cosponsored by the distinguished Senator from Kansas (Mr. PEARSON), proposes a tax credit for political contributions.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is at the proper place insert the following new section:

SEC. ——. INCOME TAX CREDIT FOR POLITICAL CONTRIBUTIONS.

(a) ALLOWANCE OF CREDIT.—Subpart A of part IV of subchapter A (relating to credits allowable) is amended by renumbering section 41 as 42, and by inserting after section 40 (as added by section — of this Act) the following new section:

"SEC. 41. POLITICAL CONTRIBUTIONS.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed, as a credit against the tax imposed by this chapter for the taxable year, an amount equal to one-half of so much of the political contributions as does not exceed $50, payment of which is made by the taxpayer within the taxable year.

"(b) LIMITATIONS.—

"(1) MARRIED INDIVIDUALS.—In the case of a joint return of a husband and wife under section 6013, the credit allowed by subsection (a) shall not exceed $25. In the case of a separate return of a married individual, the credit allowed by subsection (a) shall not exceed $12.50.

"(2) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the amount of the tax imposed by this chapter for the taxable year reduced by the sum of the credits allowable under section 33 (relating to foreign tax credit), section 35 (relating to partially tax-exempt interest), section 37 (relating to retirement income), and section 38 (relating to investment in certain depreciable property).

"(3) VERIFICATION.—The credit allowed by subsection (a) shall be allowed, with respect to any political contribution, only if such political contribution is verified in such manner as the Secretary or his delegate shall prescribe by regulations.

"(c) DEFINITIONS.—For purposes of this section—

"(1) POLITICAL CONTRIBUTION.—The term 'political contribution' means a contribution or gift of money to—

"(A) an individual who is a candidate for nomination or election to any Federal, State, or local elective public office in any primary, general, or special election, or in any National, State, or local convention or caucus of a political party, for use by such individual to further his candidacy for nomination or election to such office;

"(B) any committee, association, or organization (whether or not incorporated) organized and operated exclusively for the purpose of influencing, or attempting to influence, the nomination or election of one or more individuals who are candidates for nomination or election to any Federal, State, or local elective public office, for use by such committee, association, or organization to further the candidacy of such individual or individuals for nomination or election to such office;

"(C) the national committee of a national political party;

"(D) the State committee of a national political party as designated by the national committee of such party; or

"(E) a local committee of a national political party as designated by the State committee of such party designated under subparagraph (D).

"(2) CANDIDATE.—The term 'candidate' means, with respect to any Federal, State, or local elective public office, an individual who—

"(A) has publicly announced that he is a candidate for nomination or election to such office; and

"(B) meets the qualifications prescribed by law to hold such office.

"(3) NATIONAL POLITICAL PARTY.—The term 'national political party' means—

"(A) in the case of contributions made during a taxable year of the taxpayer in which the electors of President and Vice President are chosen, a political party presenting candidates or electors for such offices on the official election ballot of ten or more States, or

"(B) in the case of contributions made during any other taxable year of the taxpayer, a political party which met the qualifications described in subparagraph (A) in the last preceding election of a President and Vice President.

"(4) STATE AND LOCAL.—The term 'State' means the various States and the District of Columbia; and the term 'local' means a political subdivision or part thereof, or two or more political subdivisions or parts thereof, of a State.

"(d) CROSS REFERENCES.—

"For disallowance of credits to estates and trusts, see section 642(a)(3)."

(b) CLERICAL AND TECHNICAL AMENDMENTS.—

(1) The table of sections for such subpart A is amended by striking out the last item and inserting in lieu thereof

"Sec. 41. Political contributions.

"Sec. 42. Overpayments of tax."

(2) Section 642(a) (relating to credits against tax for estates and trusts) is amended by adding at the end thereof the following new paragraph:

(3) POLITICAL CONTRIBUTIONS.—An estate or trust shall not be allowed the credit

against tax for political contributions provided by section 41."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1969, but only with respect to political contributions payment of which is made after such date.

Mr. KENNEDY. Mr. President, I should like to indicate to the chairman of the Committee on Finance that Senator PEARSON and I are prepared to agree to a time limitation, if the chairman so desires, for the convenience of the Members of the Senate.

Mr. LONG. Mr. President, I ask unanimous consent that debate on the pending amendment be limited to one-half hour, to be controlled by the sponsor of the amendment and by the manager of the bill.

Mr. KENNEDY. One hour.

Mr. LONG. One hour, to be equally divided.

The PRESIDING OFFICER. The Senator from Louisiana said a half hour.

Mr. KENNEDY. I should like to modify the unanimous-consent request to make it 1 hour, equally divided.

Mr. LONG. I thought I said 1 hour, equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PEARSON. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized for 5 minutes.

Mr. KENNEDY. Mr. President, amendment No. 409 proposes a tax credit of up to one-half of a taxpayer's political contributions. The maximum credit would be $25 for married couples filing joint returns, $25 for single persons, and $12.50 for married persons filing separately. If an individual gives in excess of $50, he would be entitled to a tax credit of only $25; if the amount of the contribution is less than $50, the amount of the tax credit would be one-half of the contribution. For example, if the contribution was $20, the tax credit would be $10.

Mr. President, as we are all well aware, the costs of campaigning for public office are escalating almost out of control. The current issue of Congressional Quarterly demonstrates the skyrocketing costs of running for President and Congress. Reports to the Clerk of the House and the Secretary of the Senate alone show that $70 million was reported as spent in 1968 in the campaigns for Federal office. Even this estimate, however, is far too low. The Citizens Research Foundation in Princeton estimates that $100 million was spent to elect the President in 1968. The cost of political activities at all levels in 1968—Federal, State, and local—was $300 million, up from $200 million in 1964.

According to other figures, the total cost per vote for the general election campaigns in 1962 was only 19 cents. In 1968, the cost was 67 cents per vote. The increase was more than 35 percent over the past two decades, and the rise has been especially steep in the last three presidential elections.

The largest single expense in most political campaigns is the expense of broadcast time. It is primarily because of what Senator PEARSON eloquently calls the "revolutionary role of television in American politics" that the overall increase in campaign costs has been so steep. According to data of the Federal Communications Commission, the total broadcasting charges for the 1964 primary and general election campaigns were $35 million. In 1968, the charges were $59 million, up 70 percent over 1964.

The high cost of campaigning for public office has produced concern that all but the wealthy are prohibited from running for public office. President Eisenhower clearly recognized the serious nature of this problem. As he stated in an article published in January 1968:

> We have put a dollar sign on public service, and today many capable men who would like to run for office simply can't afford to do so. Many believe that politics in our country is already a game exclusively for the affluent. This is not strictly true; yet, the fact that we may be approaching that state of affairs is a sad reflection on our elective system.

Our citizens are deeply concerned over this question. They believe that inordinate attention is devoted to financing political campaigns, and that too little attention is devoted to the presentation of the issues. The belief is rampant across the country that candidates are forced to rely on a few large contributors to finance their campaigns, resulting in the creation of ambiguous relationships in which the successful candidate is obligated, or at least appears to be obligated, to his large contributors.

I believe that the time is ripe to enact legislation to meet this problem, and that the most appropriate step we can take at the present time is to enact a tax credit for political contributions. The hearings last October before Senator PASTORE's Subcommittee on Communications on the Campaign Broadcast Reform Act, sponsored by Senator PEARSON and Senator HART, and the recent report of the Twentieth Century Fund's Commission on Campaign Costs in the Electronic Era have generated intense new interest in proposals for overall reform in the area of campaign financing, including proposals for a tax credit.

Although, to my knowledge, the substance of amendment No. 409 was not specifically considered by the Committee on Finance during its public hearings or its executive sessions, the proposal has had a distinguished history in the present decade.

In 1962, President Kennedy's Commission on Campaign Costs issued its report entitled "Financing Presidential Campaigns." One of the major recommendations in the Commission report was the enactment of a tax credit for political contributions. The report states:

> The recommended credit is intended to encourage large numbers of small gifts. The bulk of presidential campagn funds available to both parties is now supplied by a relatively small group of contributors, giving sums ranging from a few hundred to several thousands of dollars. . . . We hope that this . . . incentive to small gifts will stimulate the massive giving needed by the parties. If it does not, other forms of governmental subsidy may be inevitable.

The idea of the tax credit was also pursued extensively in the 89th and 90th Congresses. In October 1966, under the leadership of the distinguished Senator from Louisiana, the chairman of the Committee on Finance, Congress enacted the Presidential Election Campaign Fund Act of 1966, Public Law 89–809. Under that act, individual taxpayers were authorized to designate $1 of their income tax to be placed in a special fund to be used for financing presidential election campaigns. Under the act, only political parties whose candidates received at least 5,000,000 votes in the preceding election were eligible for payments from the fund. Because the tax check-off provision was based on the principle of direct public financing of political campaigns, the act was highly controversial. One of its principal virtues, however, was that it served the extremely useful purpose of stimulating a far-reaching national debate on a variety of possible methods for reforming the financing of political campaigns.

In his message to Congress on the "Political Process in America" in May 1967, President Lyndon Johnson emphasized his support for the principle of direct public financing of presidential election campaigns and suggested a series of basic amendments to the original 1966 act. In addition, President Johnson recommended that Congress undertake an extensive review of other methods of financing election campaigns, by methods such as direct appropriations, tax credits or deductions, treasury vouchers, and various matching grant plans. In June 1967, after extensive controversy, Congress enacted legislation prohibiting implementation of the 1966 act until statutory guidelines under the act were enacted.

Then, in November 1967, after comprehensive hearings and executive sessions by the Senate Finance Committee on numerous proposals, the committee favorably reported H.R. 4890, the Honest Elections Act of 1967. As reported by the committee, the bill contained three principal provisions.

First, it provided an income tax credit, up to $25, for one-half of the political contributions made by a taxpayer. Most important for present purposes, all but one of the 17 members of the committee supported this provision.

Second, it provided a complete revision of the Presidential Election Campaign Fund Act of 1966, authorizing direct public financing for both presidential and senatorial elections campaigns.

Third, it contained the Johnson administration's Election Reform Act of 1967, which had already passed the Senate 2 months earlier by the unanimous vote of 87–0, and which included a series of highly desirable measures designed to improve the Federal election laws and to require full reporting and disclosure of campaign contributions.

Unfortunately, no further action was taken on these proposals by the 90th

Congress. It is for us to continue the effort.

Amendment No. 409, as proposed by Senator PEARSON and me, is identical to the tax credit provision unanimously adopted by the Committee on Finance in 1967. In essence, its provisions are as follows:

First, as I have already stated, it authorizes a tax credit for one-half of an individual's political contributions, up to a maximum credit of $25;

Second, contributions qualifying for the tax credit may be made to any candidate for public office—Federal, State, or local. The amendment thus encourages contributions not only to presidential candidates, not only to candidates for the Senate and the House of Representatives, but also to any candidate for State or local office as well;

Third, contributions qualifying for the tax credit may be made not only in connection with general elections, but also in connection with special elections or primary elections; and,

Fourth, contributions may be made not only to candidates themselves, but also to political committees organized to support a particular candidate or candidates, or to national political parties.

According to the revenue estimates made by the Treasury Department the revenue loss generated by the amendment would be in the range of $60 million for presidential election years, $30 million for non-presidential Federal election years, and $15 million for non-Federal election years. To the extent the tax credit stimulates additional contributions over and above their present level, however, the revenue loss would be increased.

Mr. President, I believe that the tax credit approach to financing political campaigns—an approach that was strongly favored by President Kennedy, by Senator Robert Kennedy and by many others—has several advantages over all other methods that have been proposed for financing such campaigns.

First, the tax credit approach will provide a significant incentive for participation in the political process by a large proportion of the electorate. One of the most important goals in recent proposals to reform the political process has been to stimulate greater public participation in election campaigns. I believe that the modest tax credit I have proposed will significantly encourage political parties and political committees to broaden their base of support by soliciting contributions from small donors. In the election year 1964, for example, there were 12 million individual campaign contributors, the overwhelming majority of whom were $1 or $2 contributors. I believe that the tax credit I have proposed will encourage more individuals to contribute, and will encourage existing contributors to raise the level of their contributions.

Second, by encouraging contributions by small donors, the tax credit will help to break down the excessive reliance by candidates on large contributors. As a result, the credit will help to restore public faith in the integrity of the election process. It will help to eliminate the ambiguous relationships created for the successful candidate, in which he is obligated, or appears to be obligated, to his large contributors.

Third, the tax credit leaves the decision on the allocation of public funds through the tax subsidy to the choice of the individual taxpayer himself. This point is the central distinction between the tax credit approach and the various proposals for the direct financing of political campaigns. Under the tax credit approach, unlike these other proposals, the Federal Government plays no part in determining which candidates or committees are to receive public funds or the amount of such funds that are to be made available to particular candidates. It is the citizen, and the citizen alone, who makes this determination.

Fourth, the tax credit offers assistance to candidates not only at the general election stage, but at the primary stage as well.

Fifth, the tax credit offers assistance to candidates not only at the Presidential level, but at the congressional, State, and local level as well. This point is especially important. Men earn consideration for the Presidency by their performance in other public office—most often Governor or Senator. The expense of nomination to a governorship or a Senate seat—especially in the large States from which most presidential candidates are drawn—is by itself a substantial barrier to all but men of wealth or their favored candidates. Thus, fair consideration for the Presidency itself requires public support for campaigns for lesser offices at all levels. This support can only come from tax incentives to individual contributions.

Mr. President, before proposing this amendment, I gave serious consideration to offering a tax deduction in combination with the tax credit. A tax deduction approach would have many of the advantages of a tax credit, especially with respect to the encouragement of individual choice and participation in the political process. However, a tax deduction would cause substantial inequities and disparities in the benefits afforded to contributors. Those in the highest tax brackets, at whom the incentive should be least directed, would receive the greatest benefits, whereas taxpayers in the lowest brackets would receive the smallest benefits.

In closing, I would also like to deal briefly with two others, but less desirable, approaches to campaign financing reform: the concept of direct public financing of political campaigns, and the concept of the matching incentive plan, both of which have frequently been offered as alternatives to the tax credit.

1. DIRECT PUBLIC FINANCING

The debate on campaign reform in the 89th Congress and the 90th Congress involved extensive discussion of the merits of direct public financing. Under this approach, Treasury funds would be appropriated to finance presidential and possibly other election campaigns. Unfortunately, extremely difficult constitutional, practical and political questions arise under this proposal:

Unless the access of minor parties to the public funds is restricted in some way, the proposal will tend to encourage or stabilize minor parties, or will lead to the artificial proliferation of such parties merely to receive the Federal subsidy. Yet, any formula limiting the funds available to minor parties is open to substantial constitutional objections based on the rights of free speech and free association under the first amendment, and to substantial political objections based on the need to avoid "locking in" the present two political parties, and on the desirability of avoiding direct governmental participation in the allocation of funds among political parties.

Unless private contributions are prohibited to campaigns financed by direct appropriations, there is a serious danger that the public subsidy will become merely an additional layer on top of private funds already solicited. Yet, if private contributions are prohibited, serious constitutional doubts will be raised as to the validity of the prohibition, and equally serious practical difficulties will be raised in enforcing the prohibition.

A direct subsidy to politcal parties will have a potentially disruptive impact on the existing structure of political parties. Traditionally, political parties have been loose combinations of local, State, and national organizations without strong central authority, and the flow of power has generally been from the local to the national organization. The direct subsidy, under which large amounts of public funds would be made available to a national party or its candidates, would reverse the flow. It would concentrate political power in the national party or candidate, and might easily lead to national domination of State and local politics.

The direct subsidy fails to stimulate individual participation in the political process. To the extent that public funds are used to finance campaigns, the stake of individual voters in the process is reduced, and there is less incentive for the political parties to broaden their base of popular and financial support.

None of the various proposals for a direct subsidy offer assistance to candidates in primary elections. Nor does the direct subsidy offer assistance to candidates at the State or local level, or, in most of its versions, to Federal candidates at other than the presidential level. Yet, the need for financial assistance is especially great in primary elections and at the congressional, State, and local levels, where fundraising is extremely difficult and where the potential influence of large contributors may be far more significant than at the presidential level or in the general election.

All of these issues received extensive discussion in the hearings and debates in the 90th Congress, but they have not yet been satisfactorily resolved. Therefore, before a proposal for direct public financing goes forward, substantial additional study will be necessary.

2. MATCHING INCENTIVE PLAN

Under this approach, which has many of the virtues of the tax credit approach, the Federal Government would encourage political parties to seek out small contributors by offering Federal grants matching of up to, say, $10 for each cash contribution.

This proposal was first given special prominence by the report in 1962 of the President's Commission on Campaign

Costs. In his subsequent message to Congress transmitting legislation to implement a number of the Commission's recommendations, President Kennedy urged Congress to study the plan as—

An original and imaginative approach that would encourage concentrated party effort in broadening the financial base of presidential campaigns.

In spite of the initial appeal of the matching plan, it has never commanded broad support. It is my understanding that as recently as 1966, a matching incentive plan recommended by the Treasury Department in lieu of a tax incentive was rejected by President Johnson for inclusion in the Election Reform Act of 1966.

In recent years, the considerations for and against the matching plan have been well canvassed. In spite of the plan's merit, I believe that the balance of considerations argues persuasively against its adoption as a method of campaign financing reform.

The most serious administrative objection to the plan is the complex Federal machinery that would be required to implement it, including the probable need for separate matched and matching funds on deposit in the Treasury. The most serious substantive objection to the plan is the enormous potential for fraud that it may entail:

For example, a political committee could solicit $10 from each of its members, double the contribution by submitting a claim for Federal matching funds, and then repay each member from the funds of the committee.

Or, a committee could obtain matching funds by spreading a large contribution among several fake "donors," without actually having secured any bona fide small contributions.

Although the impact of these potential frauds is speculative at present, I know of no remedy that might effectively negate them. The potential for fraud is far more serious than in the case of the tax credit approach, since the tax credit offers neither of the above major inducements to engage in fraud.

Thus, none of the controversies surrounding the direct public financing approach or the matching incentive plan is relevant to the approach taken in amendment No. 406, a tax credit for political contributions. Although as a matter of general revenue theory and practice, the tax code and the tax return are inappropriate vehicles to accomplish social goals such as reform of the political process, I believe that very real difficulties are inherent in all of the alternative approaches that have been discussed thus far to help meet the urgent problem of escalating campaign costs.

Moreover, whatever the advantages and disadvantages of the proposals for public financing of election campaigns, there is wide support in both Congress and the Nation for the tax credit approach. The proposal has been specifically endorsed by a number of public groups and private studies concerned with the high cost of campaign financing, including the 20th Century Fund study and the 1968 report of the Committee for Economic Development.

I believe that a tax credit for political contributions will go far to alleviate the deep national concern over the high cost of campaigning for public office. Equally important, the proposal will provide a substantial incentive for candidates, political committees, and political parties to broaden their base of popular support by seeking contributions from small donors, thus stimulating greater public interest and participation at all levels of the political process—Federal, State, and local.

It seems entirely appropriate, therefore, that the tax credit proposed in amendment No. 409 should be adopted as part of the pending tax reform bill, and I urge Senators of both parties to give it their support.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KENNEDY. Mr. President, I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 additional minutes.

Mr. KENNEDY. Mr. President, the amendment would make it less necessary for candidates for public office to rely on major campaign contributions. I think it would reach out to meet one of the very great needs which exist within our political system today. It would provide a fair and reasonable incentive for increased financing of political campaigns, especially the campaigns of those whose financial resources are inadequate to meet heavy burdens of such campaigns.

Mr. PEARSON. Mr. President, will the Senator yield to me for 5 minutes?

Mr. KENNEDY. Mr. President, I yield 5 minutes to the Senator from Kansas.

Mr. PEARSON. Mr. President, the Senator from Massachusetts has correctly stated the amount of the tax credit and the elections to which it would apply.

The thrust of the amendment is very much the same as the so-called Campaign Financing Act which I introduced 2 years ago, which was reintroduced this year as S. 1692.

Campaign spending is now increasing at such an enormous rate that although we do not have actual figures, because of spotty reporting and because of the lack of statutory obligation to do so, it is estimated that in 1956 both parties spent $155 million; by 1968 that amount had increased some $300,000. Of course, the cost of broadcasting, and particularly television today, is an enormous expense. In the last 4 years money spent in broadcasting, for instance, has doubled from $35 million to over $60 million.

It seems to me, Mr. President, that with this enormous requirement of campaign funds today, whether one is talking about a national office, the office of Governor of a great State, or even an office at the local level, we are approaching a time when not only will we find only rich men will be candidates or men with rich friends, but it seems to me that the great obligation today to finance the effort to seek public office is really threatening the integrity of our political system.

There are several alternatives and they have been talked about for a number of years, not only in the excellent report to which the Senator from Massachusetts made reference, but also in Congress we have been discussing this matter off and on for many years.

The manager of the bill today had a proposal pending last year to provide for aid in elections. I think we are getting to the point where the alternatives will be either direct appropriations or we will have some type tax credit or deduction which will leave it in the hands of the individual to participate in the political system, leaving to the individual the freedom to choose what contribution he will make and to whom he will make it. I believe that will stimulate contributions from a great many people.

I recall that in hearings before the Committee on Commerce not long ago having to do with television and radio costs, someone estimated that 95 percent of all campaign costs are made up by 5 percent of the people.

Mr. President, the Government of this country stands on a parity with other charitable contributions we make for Red Cross and the Boy Scouts. The deductions route is another possibility.

I recall that in the legislation I introduced it would provide for a contribution of $50 with one-half being used as a tax credit with larger donations of $500 to be used as deductions. But the dual approach is not utilized here. This is a step to provide greater and freer participation of all the people in the public business.

I thank the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, the concept of the tax credit was endorsed as long ago as 1962 by the President's Commission on Campaign Costs, which was headed by Alexander Heard, one of the outstanding authorities on campaign financing in the Nation. The tax credit concept was also endorsed in 1968 by the Committee for Economic Development, a bipartisan group that studied a variety of methods for better financing of political campaigns. Finally, the tax credit was endorsed by the recent report of the Twentieth Century Fund's Commission on Campaign Costs in the Electronic Era.

All three of these committees were bipartisan. Their members were outstanding individuals who have given great thought and concern to the entire problem of campaign reform. In their reports, they have proposed a variety of different proposals, but it is significant that all of them support the principle of the tax credit, whatever their other proposals.

The distinguished Senator from Kansas has introduced a number of these proposals in the form of legislation, especially the area of campaign broadcasting, and I commend him for his initiative in this area.

I would like to emphasize that the precise provisions of amendment No. 409 were approved by the overwhelming majority of the members of that committee in November 1967. Although other provisions in the bill—H.R. 4890—reported by the committee were controversial, the support for the tax credit approach was virtually unanimous.

Mr. GURNEY. Mr. President, will the Senator from Massachusetts yield for a question?

Mr. KENNEDY. I yield.

Mr. GURNEY. Would this be limited

to one contribution of $50, or could one give a $50 contribution to each of three candidates?

Mr. KENNEDY. Contributions qualifying for the credit could be divided among several candidates. However, the maximum tax credit each year would be $25 for all contributions combined.

Mr. GURNEY. But it would be limited to $50.

Mr. KENNEDY. Yes. The contributions on which the credit would be calculated would be limited to $50.

Mr. GURNEY. In other words, it would not be three $50 contributions?

Mr. KENNEDY. No.

Mr. GURNEY. It would come under only one $50 contribution?

Mr. KENNEDY. That is correct. A total of $50 in contributions.

Mr. GURNEY. I thank the Senator.

Mr. BELLMON. Mr. President, I rise in support of amendment No. 409. I am a former State chairman of a political party organization. I know how difficult it is to raise campaign funds and I know that the problem is becoming more serious each year.

I have always felt that our present laws regarding political contributions make of a political contributor a second-class citizen because those who give money to such organizations as the Red Cross, the Community Chest, youth clubs, and other organizations, enjoy a tax-exempt status which is not given to the political contributor. They do not get the same tax treatment.

I feel that as our political system endures, the cost of campaigning will go up. I see no indications that it will go down. It is high time we recognize that those who do contribute to political campaigns do so out of a sense of being a good citizen, with the desire to help preserve our system of government.

We should therefore give them the same tax treatment, or partially the same tax treatment that other citizens get. The election process in this country is the basis of our representative system. I believe it is high time we begin to encourage greater citizen participation in that process.

The pending amendment, I believe, will go a long way in that direction and I am very pleased to have the opportunity to support it.

Mr. HARRIS. Mr. President, I rise in support of the Kennedy-Pearson amendment. I commend the distinguished Senator from Kansas (Mr. PEARSON) for his long efforts in this regard, and I also commend the distinguished Senator from Massachusetts (Mr. KENNEDY) for joining him in what I think is an eminently fair and workable proposal by which we may begin to solve a tremendous problem which strikes at the heart of the future of the democratic process in this country; namely, the enormous and increasing costs of campaigning.

In the presidential campaign of 1968, the major political parties spent a combined total of 74 cents for every vote cast. That may not sound like very much when broken down in that way, but that adds up to more than $50 million spent in that presidential campaign.

Estimates by reliable organizations involved in this subject matter reveal that $300 million was spent on all campaigns in 1968, local, State, Federal, and so forth; and that this was $100 million more than was spent in 1964, and $160 million more than was spent in 1952. In other words, there was a 50-percent increase in the cost of campaigns between 1964 and 1968.

The Federal Communications Commission has reported expenditures of $58.9 million for political broadcasting in all campaigns in 1968. These are record high political campaign expenditures, 70 percent higher—for broadcasting expenditures in campaigns in 1968—than those expenditures were in 1964.

Mr. President, I think it can be seen from these staggering figures and the enormous and increasing costs involved, that the future of the democratic process in this country is very much involved in consideration of the pending amendment.

I think that most people in this country who have thought about this serious problem feel that political candidates should not be limited to those who are themselves wealthy, or to those who are financed by people with great wealth, whose interests may not necessarily coincide with the public interest.

Mr. President, not enough public attention has been brought to bear on this problem. However, I do believe that the people are becoming increasingly aware of it and are, rightly, becoming increasingly alarmed about it.

There are many plans by which we might try to meet the problem. I testified before the subcommittee headed by the distinguished Senator from Rhode Island (Mr. PASTORE) earlier this year in support of the bill pending before his subcommittee having to do with television time for candidates. But the best way to get at the problem, it seems to me, is by the tax credit method. We would be limiting the amount of money which the contributor or donor could take as a credit, and say by this amendment that he could take as a credit only one-half of his contribution up to a total contribution of $50, or a total tax credit of $25 for any individual taxpayer.

That, it seems to me, is the best way to assure that a great number of people throughout this land may be involved in the financing of campaigns and of political costs, thereby assuring that a much larger number of people will be responsible for the financing of any individual campaign, or of a political party.

In this country, we have rightly felt that it is in the public interest to grant tax incentives for charitable contributions. In this bill we have tried to plug some loopholes in that existing system.

But, basically and fundamentally, we have agreed that it is in the public interest to give a tax incentive to a person who would make a charitable contribution. Why would it not also be true, why would it not also be good public policy, to give this same tax incentive to one who wants to contribute to the workings of our entire democratic system? Our system cannot work unless good men run for office, and good men cannot run for office unless they are able to pay these enormous campaign costs. Too many men are now barred from public office because of these great costs.

Adlai Stevenson once put it rather well when he talked about the requirement that people have a right to know about the candidates and where they stand. He said that his principal purpose in appearing before a congressional committee on this general subject in 1960 was to "support a proposal, calculated, I believe, to help furnish the American people with the knowledge which is prerequisite to an intelligent exercise of their duty as electors in a free society."

That is what this amendment would do. It would help assure that every candidate and every political party would have a minimum chance to get across its case to the electorate, to get across to the people where they stand on an issue, and thereby help the people in an individual contest make a decision as to what was best for their interests and also best for their country. Also, much more important and much more fundamental, it will help make our system work.

I hope that the amendment will be agreed to.

The PRESIDING OFFICER. The Senator from Massachusetts has the floor.

Mr. KENNEDY. Mr. President, I reserve the balance of my time.

Mr. GRIFFIN. Mr. President——

The PRESIDING OFFICER. Who yields time?

Mr. LONG. Mr. President, does the Senator desire to speak in opposition to the amendment?

Mr. GRIFFIN. Yes.

Mr. LONG. How much time does the Senator want?

Mr. GRIFFIN. Five minutes.

Mr. LONG. I yield 5 minutes to the Senator from Michigan.

Mr. GRIFFIN. Mr. President, I find it very difficult to oppose this amendment on its merits. Like the college tax credit amendment and like a number of other amendments which have been tacked to this tax bill, I find this a very desirable and appealing legislative proposal. It has a lot of merit.

I am aware of the fact that if it should be adopted, it will probably be dubbed as a relief bill for politicians. I would not oppose it on that ground, but in the eyes of many I am sure this particular amendment would have that appearance.

I just believe that we are considering this legislative proposal at a most inappropriate time and in connection with a bill that is already badly overloaded.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. GRIFFIN. I yield to the distinguished Senator from Nebraska.

Mr. CURTIS. I think we should point out that contributions generally are a deduction, and not a credit. Here is the difference it makes. If this amendment passes, if an individual in the 20-percent bracket gave $50 to his church, his taxes would be reduced $10. If he gave $50 to a politician, his taxes would be reduced by $25. That priority is in reverse, according to my thinking.

Mr. PASTORE. Mr. President, will the Senator yield just a second on that very point?

Mr. GRIFFIN. I yield.

Mr. PASTORE. By the same token, if

we are going to measure it in terms of deduction rather than credit, we are going to be in the position that a person in the 50-percent bracket can give $500 or $600 and deduct it. We are not going that far. We are trying to make this every man's business. That is why we took the alternative of credit rather than deduction.

I know the argument the Senator has made, and it is the present formula. The only trouble with it is that in order to get $25 as a credit on one's tax payment, a person in the 50 percent bracket can make a contribution of perhaps $1,000, which is too much.

Mr. CURTIS. I think the deduction should be limited.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. GRIFFIN I yield.

Mr. WILLIAMS of Delaware. Referring to what the Senator from Nebraska said, we had this matter before the committee a couple of years ago. The Treasury Department at that time took a strong position against the tax credit approach on the ground that it was not feasible to operate. The Department strongly urged that if this were to be approached at all, it should be done through a deduction. At that time I think it was proposing a $100 deduction. I know the former Senator from New York, the brother of the sponsor of this measure, and I joined together in introducing a bill, which was acted on, having to do with election reform which followed the deduction approach. As the former Senator Kennedy pointed out at that time, the most important part of the legislation that was needed was election reform.

Under the existing system, these contributions can be given to candidates, either this $25 or others. The Corrupt Practices Act provides that political committees operating in two or more States must file an accurate accounting. But the District of Columbia is not a State. Therefore, a man running for public office can have a committee in his own State and have as many committees as he wishes in the District of Columbia, and no filing or accounting is provided for as to how many contributions are made and where they are coming from. That is one of the long overdue corrections needed for large deductions.

The Senator from New York at that time, Mr. Kennedy, joined with me and we introduced an amendment as a substitute for H.R. 6950. We had a Senate bill at that same time which would have carried some election reform as well as carried a provision for the money.

I would dislike to see this amendment adopted now, in light of the revenue situation.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. WILLIAMS of Delaware. May I have 1 more minute?

Mr. GRIFFIN. Mr. President, will the Senator yield me some time?

Mr. LONG. Mr. President, I yield 5 additional minutes.

Mr. WILLIAMS of Delaware. I would like the amendment not to be accepted at this time, but if it is going to be accepted, I would certainly strongly recommend that the Senator from Massachusetts include with it an election reform proposal, so the American people would be assured that, to the extent they make these contributions, there will be an accurate accounting. In addition such a proposal would clean up many of the significant abuses by much needed reforms in the election laws. I know that reform was a part of the program of the Senator's brother. The Senate passed the bill in 1967 with a number of election reforms in it, but, unfortunately, it was not accepted in the House.

I think we would make a tragic mistake by allowing such a tax credit without having provided for an accurate accounting.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. PASTORE. As a matter of fact it is the best form of policing we have, because the amount of the contribution and a description of it must be stated. If the person whose name is given does not show it in his report, he is in trouble. It is the best policing we have.

Mr. WILLIAMS of Delaware. The Senator is correct, but contributions in general under existing law are not covered under the reporting rules. The measure proposed by the Senator from New York and me in 1967 covered all contributions. Under the present proposal, if someone gave $1,000, he would get a credit with respect to $50, and the other $950 would not be accountable for at all. What is needed is full and accurate accounting for all of a contribution and for all contributions.

Mr. GRIFFIN. Mr. President, who has the floor, and how much time does he have?

The PRESIDING OFFICER. The Senator from Michigan has the floor.

Mr. GRIFFIN. How much time do I have?

The PRESIDING OFFICER. The Senator has 2 minutes remaining.

Mr. GRIFFIN. I thank the Senator from Delaware for his very important contribution. As he points out, this proposal, which of course can be considered in connection with the tax bill, has a different object altogether. This amendment involves election reform, which is a matter that deserves hearings and careful consideration aside from the fact that its adoption would involve additional revenue loss.

The President's attitude toward this tax bill, as it has been amended by the Senate, was made very clear in his press conference last night.

The American people expect tax reform. They want a tax reform bill passed. So, if we are to get tax reform legislation enacted into law, I urge my colleagues to lay such subject matters as this aside and to get on with consideration of tax reform. Such matters as campaign reform and other reforms may be desirable, but they should not be attached to the pending bill.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. PEARSON. Mr. President, may I have a half minute?

Mr. KENNEDY. I yield the Senator one-half minute.

Mr. PEARSON. I say to the Senator from Michigan that I think he is absolutely right; the proposal does need study; but it has had study. This particular concept has been gone over two or three times. It has been passed by the Senate once. The amendment does not include the basis of complete reform, but I think the bill which came out of the Rules Committee, to which the Senator from Massachusetts made reference, and passed this body, went over to the House of Representatives, and was never acted on there, has been the subject of considerable study.

I agree with the Senator from Delaware that when we really solve some of the problems connected with politics in this country, we will have a reform of the electoral system by which we will know precisely who contributed to each campaign, and how much.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Louisiana has the floor.

Mr. LONG. I yield the Senator one-half minute.

Mr. WILLIAMS of Delaware. The Senator from Kansas stated that this measure had passed the Senate once. It did not pass it, as I understand, as a tax credit. As a tax deduction proposal, it passed the Senate, along with other election reform provisions.

Mr. PEARSON. I thought it had passed as a tax credit. I could be mistaken on that.

Mr. WILLIAMS of Delaware. But I do think it is very important. I believe that election reform is more important than tax reform.

Mr. KENNEDY. Mr. President, I yield myself 1 minute. As I understand it, the election reform bill to which the Senator from Delaware has referred passed the Senate in 1967 by a vote of 87 to 0, but was not passed by the House of Representatives. A similar bill is now before the Elections Subcommittee of the distinguished Senator from Nevada (Mr. CANNON). It is my hope that this important legislation will be enacted by the 91st Congress.

Since the Election Reform Act—S. 1880—passed the Senate by the vote of 87 to 0 only 2 years ago, I think we can expect expeditious action by this body today on the question. Certainly, it is not the intention of the distinguished Senator from Kansas or myself, in offering this tax credit amendment, to detract in any way from the importance of a thorough and comprehensive election reform.

Mr. WILLIAMS of Delaware. Mr. President, would the Senator be willing to modify his amendment to accept the election reform proposals which his late brother and I cosponsored with the Senator from Illinois (Mr. PERCY) and the Senator from Hawaii (Mr. INOUYE), who at that time was the head of the central campaign committee? I have stricken from this proposal, I might say, that section which would be——

Mr. KENNEDY. Mr. President, on whose time is the Senator speaking?

The PRESIDING OFFICER. He is speaking on the Senator's time.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent, having used a part of the Senator's time, that the Senator from Massachusetts be granted an additional 5 minutes.

Mr. KENNEDY. Mr. President, we have only a few minutes. There are other Senators who wish me to yield to them.

Mr. WILLIAMS of Delaware. I was asking that the Senator from Massachusetts be permitted to have 5 additional minutes.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. WILLIAMS of Delaware. I might say that in that election reform bill, part 4 of it would have provided raising money by contributions. To conform with the Senator's amendment, that has been stricken from the bill as I have it here. But the rest of the titles that deal with reporting, I think, are very important, and I wonder whether the Senator from Massachusetts would be willing to modify his amendment to accept the reform package as a part of his proposal.

Mr. KENNEDY. If the Senator offers his amendment at the appropriate time, I would be pleased to accept it. The Senate has already voted unanimously in favor of it in 1967, and I believe that it is a major contribution to election reform and the cause of clean government. Although the provision is not directly relevant to the pending tax reform bill, I believe that it would be appropriate for the Senate to consider both provisions together.

Mr. WILLIAMS of Delaware. Paraphrasing the Senator's late brother, if Congress ever gets its hands on the money out of the Federal Treasury we will never get reform in our election laws. I think the two should be acted on together.

Mr. President, a parliamentary inquiry: As I understand, an amendment to the Kennedy amendment would not be in order until after all time on the amendment itself has expired?

The PRESIDING OFFICER. The Senator is advised that an amendment would be in order when time has expired, or by unanimous consent.

Mr. WILLIAMS of Delaware. All right. I shall propose the amendment when it is in order, after the time on the Senator's amendment has expired, because the Senator from Massachusetts apparently does not wish to join in offering it.

Mr. KENNEDY. Mr. President, exactly what is the nature of the question at this time?

The PRESIDING OFFICER. The Senator is asking when an amendment to the pending amendment would be in order, and he is advised that it would not be in order until time on the amendment has expired.

Mr. WILLIAMS of Delaware. I do not intend to offer the amendment to the amendment until after time on the Senator's amendment has expired.

The PRESIDING OFFICER. Who yields time?

Mr. LONG. Mr. President, I yield myself 9 minutes.

Mr. President, this is a letter I have received from the Deputy Assistant Secretary of the Treasury, explaining the Treasury's position on this proposal. I shall read the pertinent paragraph:

> This amendment would result in a revenue loss of $60 million per year. I am authorized to state that the administration opposes this amendment to the bill. While the principle is meritorious, the amount and scope of the credit and its technical implementation should be given careful consideration in hearings by the House Ways and Means Committee and the Senate Finance Committee before any such provision is enacted.

Mr. President, there are a number of things that I find wrong with the amendment. In the first place, the amendment would apply to any election. We have not yet found a way to properly finance Federal elections alone, much less trying to finance State and local elections. It seems to me if we are going to start a Federal program to finance elections, we ought to start out with Federal elections, and see how it works in the kind of elections over which we have jurisdiction, before we start trying to subsidize and finance State and local elections.

In the second place, there is no limitation on the uses for which the money could be spent. I was successful in placing on the statute books, some years ago, a proposal that said a person could contribute $1 of his tax money to be used to finance both the Republican and the Democratic campaigns, the money to be divided equally, with a formula that would make some of the money available, on a reimbursable basis, to a third party if that third party could qualify.

That proposal was frozen in the statute, and never permitted to go into law, because some Senators said they wanted guidelines to say what could or could not be done with the money; and we have never been able to implement those guidelines since that time.

In the third place, there is no assurance at all that the money would be channeled where it is needed. For example, most of the benefit of this proposal would go to people who were already contributing to and financing campaigns, and it would do little if anything to help people who are not able to make campaign contributions.

As George Meany has always expressed it to me, "If you want to do something to get people to help finance a campaign, permit everybody to put up $1."

If we did it that way, we would provide a $1 tax credit for everybody, so the little fellow down at the bottom would have just as much opportunity to contribute on a tax-exempt basis as the man at the top.

As a practical matter, if this proposal were put into effect, a man of modest means could not afford to take advantage of it anyway, even if he does get the benefit of half of it as a tax credit.

The Democratic Party platform spoke toward the idea of one man, $1. Here is what it said:

> To encourage citizen participation, we urge that limited campaign donations be made deductible as a credit from the Federal income tax.

That does not say allow half as a tax credit. It speaks toward the idea of one man, $1, one vote.

However, that is not in the amendment. This is a $25 deal. The man who can afford to put up $50 can get a larger tax benefit. This would not help the little fellow, the man in the 14-percent tax bracket or the man who cannot afford to pay anything. How about the man at the poverty level? It is quite possible to draft a provision where that man could have as much effect in an election as a man who is well to do financially and who can afford to put up a large contribution.

There is no way to indicate that the money raised by the proposal would be channeled where needed. It would be a case of a tax windfall to the people who are already contributing.

Mr. President, it would seem to me that this is a matter that does need more study. The Senator said something about the 20th. I would like to recall that for about 2 months, 2½ years ago, a number of Senators debated this subject. I am one of those Senators. The Senator from Delaware is another. And there are other Senators who stood on the floor and debated this issue of financial campaign contributions. And after we got through debating the matter and fighting it up hill and down dale, we finally arrived at a vote. And what we had done was neutralized—it was never put into effect.

The President appointed a group to study the matter and make recommendations. The group consisted of the most knowledgeable fellows he could find to advise him.

While they were trying to find source material to help educate them and find out what the problems were and what the various facets were, the debate on the floor of the Senate shed more light on the campaign finance problem than anything they could find anywhere in the Congressional Library or in the so-called studies of the 20th Century Fund or all the various groups put together.

I do think we might be able to come up with some suggestion that we might be able to agree upon so as to improve the situation. But merely to bring the matter to the floor of the Senate with the suggestion, "Here is how we ought to solve the whole campaign problem," under a 1-hour limitation is not the way to go at it. I do not think it could solve the problem half as well as we could by making a thorough study, getting everyone's views, and bringing out something recommended by a majority of the committee.

I do think it is a very difficult and complex problem. It is one that we cannot find a satisfactory answer for in 1 hour on the floor of the Senate without the benefit of the study that could be given to it by a group that was working on the matter to the exclusion of other things.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Sen-

ator from Massachusetts has 8 minutes remaining.

Mr. KENNEDY. Mr. President, I yield 3 minutes to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized for 3 minutes.

Mr. PASTORE. Mr. President, I would be insulting my own intelligence if I did not say at this moment that if the bill does pass the Senate, it does not have a chance of surviving in conference.

I applaud the Senator from Massachusetts for bringing up the matter. I think this is a problem that has to be decided, if not today, in the near future.

Only the other day I was reading in one of the weekly periodicals that it cost about $10 million to run for the governorship of New York. And in the mayorality contest in New York, the estimated cost for one candidate was about $3 million.

After all, it costs a lot of money to run for political office today. And the more it costs, the bigger the contributions the candidate needs. And the bigger the contributions he gets, the more beholden he becomes to the contributor.

That is a very dangerous trend in our democracy today. How to meet that problem is a very serious question as the Senator brought out.

Not long ago in exploring the cost of television time for the presidential campaign, a very distinguished committee came up with a recommendation before my Subcommittee on Communications to the effect that the networks would give the time to the presidential and vice-presidential candidates at half the cost and the other half of the cost would be picked up by the Government.

A lot of people in this country feel that the presidential campaign should be supported out of the general treasury. I do not feel exactly that way. However, I have before my committee now a bill which lists the following cosponsors: Mr. PEARSON, Mr. HART, Mr. ANDERSON, Mr. BROOKE, Mr. BURDICK, Mr. CASE, Mr. CRANSTON, Mr. DODD, Mr. EAGLETON, Mr. FULBRIGHT, Mr. GOODELL, Mr. GRAVEL, Mr. HARRIS, Mr. HARTKE, Mr. HATFIELD, Mr. HOLLINGS, Mr. HUGHES, Mr. INOUYE, Mr. KENNEDY, Mr. MCGOVERN, Mr. MATHIAS, Mr. METCALF, Mr. MONTOYA, Mr. MUSKIE, Mr. NELSON, Mr. PELL, Mr. PERCY, Mr. RANDOLPH, Mr. SAXBE, Mr. SCHWEIKER, Mr. SCOTT, Mrs. SMITH, Mr. SPONG, Mr. TYDINGS, Mr. YARBOROUGH, and Mr. YOUNG of Ohio.

If we were to circulate the bill, I think we would get the whole membership of the Senate to cosponsor it.

The bill calls upon the television broadcasters to give a reduction in rates to a person running for the Senate or for the House of Representatives.

I say very frankly that I have serious qualms about the particular bill. Talk about discrimination. This is out-and-out discrimination. This is something that applies only to Senators and Representatives.

I asked, "Don't you think we will be criticized for this?"

The reply, of course, was that we have to start somewhere. This is not the right answer.

The answer to the problem in America is to devise a procedure whereby every man in the country and every woman in the country would be able to make a modest contribution.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KENNEDY. Mr. President, I yield the Senator an additional minute.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized for an additional minute.

Mr. PASTORE. And then they could deduct this modest contribution from their income tax. Whether it should be a deduction or a credit is debatable. Whether the amount should be $25, $10, or $5 per person is debatable. But something has to happen; something has to give. Unless something gives, I am afraid we are going to be in a bad way in this country. We will have to meet the situation where, actually, it will be necessary to buy an election, and I think that would be a deplorable situation.

The idea that in some of the medium-size States it takes $500,000 to run for a Senate seat indicates that conditions are completely out of hand. As a result, campaign committee after campaign committee is running to the big givers in order to get thousand-dollar contributions and $2,000 contributions. The bigger the contribution, the more the candidate becomes beholden to the person who makes it. That is bad for democracy.

I hope that the amendment will be agreed to.

The PRESIDING OFFICER. The time of the Senator from Rhode Island has expired.

Mr. PASTORE. I ask for an additional half minute. The Senator from Massachusetts is not in the Chamber, so I will yield that much time to myself.

I say, in conclusion, that I think this is at least an example of what needs to be done. I hope the amendment will be agreed to.

Mr. KENNEDY. Mr. President, is the chairman of the Committee on Finance prepared to yield back the remainder of his time?

Mr. SCOTT. Mr. President, may I yield myself a minute, with the permission of the Senate?

Mr. LONG. I will yield a minute to the Senator from Pennsylvania. But first, did I understand the Senator from Massachusetts to say that it costs $60 million a year?

Mr. KENNEDY. The cost will be $60 million in presidential years, $30 million in nonpresidential Federal years, and $15 million in non-Federal years.

Mr. LONG. This amendment does not limit contributions to anybody.

I should say that I represent, in part, a State in which there is more intense interest in the race for governor than in a national election, as is shown by the fact that more people vote in an election for governor. I should think it might very well be that more money would be spent—and usually more money is spent—in a gubernatorial race than in a presidential race.

The Treasury states that this amendment will result in a revenue loss of $60 million a year.

Mr. SCOTT. The Senator from Louisiana had a good bill, that we did pass at the time—the $1 contribution bill.

Mr. GORE. Mr. President, will the Senator from Louisiana yield?

Mr. LONG. How much time does the Senator from Tennessee desire?

Mr. GORE. Five minutes.

Mr. LONG. I yield 5 minutes to the distinguished Senator from Tennessee.

Mr. GORE. Mr. President, many people seem entranced with tax credits. Let it be realized that a credit against taxes is the same as an appropriation of public funds. If I owe the Treasury of the United States a tax liability of $100 and Congress passes a law that I shall have a credit of $50 against that $100, it would be identically the same as if Congress put an item in an appropriation bill appropriating $50 to ALBERT GORE. That is what we are asked to vote on here.

What safeguards does the proposed amendment throw around this public money? None. It will be commingled with private campaign money.

I am one who believes that election to public office is a public function of the highest order. It is remarkable upon what a relatively few public officials the efficacy of our federal system depends. The President, the Vice President, the Members of the House, and the Members of the Senate are the only elected public officials in the Government of the United States.

Mr. LONG. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. GORE. The election of our public officials is a public function of such importance, such portent, that it should be regarded with top priority and protected against the corrupting influence of money.

The Committee on Finance reported a bill, not this year but last year, to declare election to Federal public office a Federal function of top priority, and therefore adopted the policy that such elections would be public functions, financially provided for out of public funds, and that private subsidy, private campaign expenditures, private contributions be forbidden by law. The Senate did not see fit to take the advice and recommendation of the committee.

Mr. LONG. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG. Is it not true that the Finance Committee agreed—it was controversial, but the majority agreed—that the entire cost of one seeking election in that general election should be paid for by the Government and that every penny of it should be accounted for?

Mr. GORE. Every penny accounted for, all safeguards thrown around it, and that it would then be unlawful for a rich man to use his own funds to finance a political campaign; that it would be unlawful for anyone to depend upon private subsidy it he elected to seek public office at public expense. But that is not the question here.

The question here is the expenditure of public money without any safeguards whatever, credits against taxes owed to

the Treasury of the United States, to be commingled with private campaign money. One could not tell which was which.

This is a dangerous proposal. Not only does it apply to Federal elections, election to Federal office, as did the bill to which I referred, but also, this proposal applies to election to the office of sheriff. The candidate for sheriff always gets the largest votes.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. GORE. I ask for 1 additional minute.

Mr. LONG. I yield 1 additional minute to the Senator.

Mr. GORE. I do not think this proposal has been thought out carefully. I think it is premature. It is an unwise measure, and I hope it will be rejected.

Mr. LONG. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG. I yield myself whatever time is necessary.

Mr. President, this amendment would give a $25 tax advantage to somebody contributing to the election of an assessor. I do not know about Tennessee, but if anybody does not need a subsidy to get himself elected, it is an assessor. Does the Senator from Tennessee have a practice in his State similar to that in Louisiana, where an assessor never has difficulty raising money? It is just no problem. The people whose properties he assesses generally contribute. Perhaps somebody running against an assessor might have some difficulty, but there is no problem for the assessor.

With regard to most sheriffs, they have no difficulty financing their campaigns. It is the opponent who has the difficulty. Why should we provide a subsidy to finance an encumbent sheriff or assessor in State government, when they are well financed?

This proposal would provide a subsidy for a Governor who is in a position to put pressure for contributions on every State officeholder. A Governor is in a position to put pressure on every appointed State officeholder.

Mr. GORE. To do what?

Mr. LONG. To finance his campaign.

Mr. GORE. To put up $50 in order to get $25 of it from the treasury; and then there is no safeguard here that half of it could not be refunded to the man who put it up in the first place.

Mr. LONG. The Senator is correct.

Mr. President, a Governor is in a position to call on people who serve at his pleasure.

Mr. GORE. What about a sheriff?

Mr. LONG. The same thing would be true in many instances.

He is in a position to call on the people to whom he has given the most devoted law protection, sometimes to the prejudice of others, to contribute to his campaign, with the government paying half of it.

Mr. President, there was a time in Louisiana when we used to forthrightly finance campaigns by calling upon every State employee to contribute 5 percent of his salary. This would match it, if such a practice continued today.

The PRESIDING OFFICER. The time of the Senator has expired.

Who yields time?

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Four minutes.

Mr. KENNEDY. I yield 3 minutes to the Senator from Georgia.

Mr. TALMADGE Mr. President, I rise in support of the amendment of the distinguished Senator from Massachusetts.

In 1967, the Committee on Finance approved a provision virtually identical with the amendment of the Senator from Massachusetts. In January of this year, I offered a similar provision, which is now before the Commitee on Finance.

Elections have become enormously expensive in recent years. That is particularly true in a Statewide election, a Nationwide election, or in congressional districts, where one must use television. Television is an extremely expensive but highly effective medium. It has now come to the point at which candidates for Governor, U.S. Senator, President, Vice President, and other national offices have to raise huge sums of money from some source or they must be independently wealthy.

It is my judgment that the national interest requires making it attractive for a large number of contributors to contribute small amounts to candidates for office, whether it be on a local, State, or national level. As the able distinguished Senator from Rhode Island pointedly stated a moment ago, when one receives large contributions, the obligation is greater than when one receives small contributions. I think the obligation would be much greater to a contributor who gave $10,000 to a campaign than it would be to a thousand people who gave $10 to a campaign.

I believe that this amendment will offer an incentive for the average man, whether he is employed in a filling station, a grocery store, on the farm, or in a factory, to take an interest in local, State, and national campaigns and to make modest contributions.

A leader in a particular area could go around and say, "You know, Senator PASTORE is running for reelection, or Senator X. We know you are for Senator PASTORE. We have this financing for his campaign. We hope you can give $50. The law states that one-half will be a tax credit, and therefore, it will cost you only $25."

Mr. President, I think you could raise a substantial amount of money in that way. That would be a far more desirable way than to have contributions from wealthy families or have candidates seek out people who can contribute substantial amounts or to have contributions from labor unions.

Mr. President, I think that this proposal is in the national interest and that it will stimulate small contributors to make contributions to all candidates at all levels of government.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield, if I have any time remaining.

Mr. KENNEDY. Mr. President, I yield one-half minute to the Senator from Texas.

Mr. YARBOROUGH. Mr. President, I associate myself with the statements that have been made by the distinguished Senator from Georgia. I agree that this proposal is in the national interest and it would be effective in getting a much broader base.

I associate myself with the Senator in this measure and I yield back whatever time I have remaining to the Senator from Massachusetts.

Mr. LONG. Mr. President, I ask unanimous consent that 10 additional minutes be allotted to the debate on this matter, 5 minutes for each side.

The PRESIDING OFFICER. Is there objection? The Chair hears no objection, and it is so ordered.

Mr. LONG. Mr. President, I yield 2 minutes to the Senator from Nevada.

The PRESIDING OFFICER. The Senator from Nevada is recognized for 2 minutes.

Mr. CANNON. Mr. President, for several years the Subcommittee on Privileges and Elections, of which I am chairman, has been considering the issue of contributions. I must stay that the logic for a broad base that has been made here is absolutely valid.

The unfortunate thing here is that the proposed amendment is far, far too broad and much more so than any of the amendments we sought to achieve, starting in 1961 when we first started to try to get legislation through to provide for a tax deduction to encourage broad base contributions from the American people.

In 1962, S. 2436 was introduced which would have provided for a tax credit of one-half of the contribution but not to exceed a total of $10 per year. In the alternative the bill would have provided for a tax deduction not to exceed $100. Unfortunately, that bill did not become law.

Those limitations were for candidates for Federal office on a national basis; not as has been proposed here, to every officer, constable, and every officeholder at the local level that might want to get into the race.

President John F. Kennedy made an effort to get tax credits for political contributions and President Johnson made similar recommendations but these efforts were in the field of Federal and national elections, the field that is normally legislated in by the Senate.

My latest bill, S. 734, introduced in 1969, contains a provision for a tax credit not to exceed $20.

There certainly is a lot of logic in support of this particular provision, but in view of the broadness of the proposed amendment I could not support it at this time. I do not believe it is justified by the hearings which were held. In the bill S. 734, section 40, there is provision for contributions to candidates for elective Federal office. This is what we tried to establish as a policy for supporting candidates at the Federal level.

If we cannot pass an amendment or a bill supporting those candidates at the Federal level, I would have to oppose going broadly across the field and apply-

ing it to every constable and every local officeholder.

Mr. KENNEDY. Mr. President, I yield myself 2 minutes to respond to the Senator.

Amendment No. 409 has been introduced by the Senator from Kansas (Mr. PEARSON) and me, and the Senator from Oklahoma (Mr. BELLMON) and the Senator from California (Mr. CRANSTON) have asked to join as cosponsors. The amendment is identical to the provision favorably reported by the overwhelming majority of the members of the Committee on Finance in 1967 after 6 days of intensive hearings on financing political campaigns. There were three different aspects of the bill as reported by the committee in 1967. There was tax credit provision, a provision of direct public financing of political campaigns, and a provision for tightening the existing Federal elections laws on reporting and disclosure of campaign contributions. Although there was disagreement among the members of the committee on other provisions of the bill, the committee was virtually unanimous in supporting the tax credit provision.

The tax credit amendment now before the Senate has been, then, the subject of 6 days of hearings before the Committee on Finance. It was favorably reported by the Committee on Finance in November 1967. It has been endorsed by three prestigious independent commissions, having broad bipartisan membership.

We can try to find all kinds of supposed loopholes in the amendment, and mention extreme examples, but what remains is that the issue has been carefully studied and recommended by a committee of this body. There is an extraordinary need for new incentives to broaden the base of our political parties and to encourage better methods of financing campaigns. Obviously, this amendment is not the whole answer to this complex problem, but it is a step in the right direction, and I hope that the Members of the Senate will support it.

Mr. LONG. Mr. President, when the Senator said this measure had been reported by the Committee on Finance, that was just a part of the bill having many other facets to it, including a limitation of the way in which funds could be used to prevent abuse.

I believe the Senator from Kansas wanted me to yield to him.

Mr. DOLE. I thank the Senator.

I would like to ask the Senator a question with respect to page 4 of the amendment. I understand that a person could announce for office. He could announce that he is going to run for sheriff and if he met the qualifications for holding office he would be eligible to receive funds under this bill; he would not have to stay in the race, but he could quit after 30 days and take the money.

Mr. LONG. According to page 4, line 10, to make himself eligible for this Federal money, it makes reference to an individual who "has publicly announced that he is a candidate for nomination for election to such office."

Under the amendment a man could announce that he is a candidate for constable. Then, he and his friends could all put their money in the pot and go out and have a great big party with beer and all sorts of liquid and other refreshments and have what is called a great big beer bust. Then he could withdraw, and the entire party would have been paid for 50 percent by the Treasury. How completely lacking the proposal is in limitations.

As I said, the amendment refers to an individual who "has publicly announced that he is a candidate for nomination or election to such office." There is no limitation at all on how the money is to be spent. It could be a fraternity party. All he would have to do would be to announce that he is a candidate for office, assuming that he can meet the minimum qualifications to hold such office, and the Federal Government pays one-half of it for the tax credit whether it is spent for political purposes thereafter or not.

In other words, they can have a big beer bust, as some fraternities have had from time to time, and charge one-half to the Federal Government.

The Treasury has said there is no way on earth to police it.

Mr. DOLE. We would give this same credit to estates or trusts, which I think is another mistake which should be corrected.

I commend the Senator.

Mr. KENNEDY. Mr. President, if the Senator will yield on that point, his statement is not correct. The credit is available only to individuals, not to estates or trusts, as page 5 of the amendment makes clear.

Mr. DOLE. How can we tighten up the other section that announces he would be eligible?

Mr. KENNEDY. If the "beer bust" illustration that I heard were true, I imagine that those individuals would be guilty of Federal criminal fraud, because it would be an attempt to defraud the Federal Government.

Mr. DOLE. He would not be required to stay in the race. It just says to announce. If he decided to withdraw, that would be all right because that happens frequently. That is the point I make.

Mr. KENNEDY. Then he would no longer be a qualified candidate, and subsequent contributions made to him could no longer qualify for the tax credit.

Mr. LONG. Mr. President, there is a section on page 4 of the amendment which states:

> The term "candidate" means, with respect to any Federal, state, or local elective public office, an individual who,
>
> (A) has publicly announced that he is a candidate for nomination or election to such office;

Mr. KENNEDY. That is a provision which was retained in the section by the Finance Committee.

Mr. LONG. We have a lot more in the bill than that.

Mr. KENNEDY. It was retained in there by the Finance Committee.

Mr. LONG. The Senator says it was recommended. President John F. Kennedy recommended——

The PRESIDING OFFICER. All time has now expired to the Senator from Louisiana.

Mr. KENNEDY. Mr. President, what is the time situation?

The PRESIDING OFFICER. The Senator from Massachusetts has 3 minutes remaining.

Mr. KENNEDY. Mr. President, it is my understanding that after the time expires on this amendment, there will be an amendment which will be offered by the distinguished Senator from Delaware on a provision which was enacted by this body in 1967 by an 88-vote majority.

I do not believe that we want to get away from what is the basic question now before the Senate; namely, are we going to be serious about trying to provide some kind of opportunity for those people of limited or modest wealth to run for public office in a way which has been embraced and supported by those who have given a considerable amount of time and study to the question and which has been embraced by bipartisan commissions on three different occasions, and embraced by the Finance Committee. We can quote examples here where the provision can be distorted and exaggerated, but either we are interested in providing some kind of means to provide for campaign contributions, or we are not. That, really, is the question.

Mr. PASTORE. Mr. President, the distinguished Senator from Massachusetts (Mr. KENNEDY) is not going to let this "beer party" go unchallenged, is he—the "beer party" mentioned by the Senator from Louisiana (Mr. LONG)?

Mr. KENNEDY. Why does not the Senator reply to that?

Mr. PASTORE. Yes, I will answer that if the Senator will give me the time.

Mr. KENNEDY. I yield.

Mr. PASTORE. If a group of persons got together when a fellow announced as a candidate for public office and they met to have a beer party, they would all land in jail for conspiracy. [Laughter.]

Mr. LONG. Mr. President——

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired.

Mr. KENNEDY. Mr. President, I am aware that Senators in the Chamber can look at the amendment and try to exaggerate its various provisions. The fact is, however, that after extensive hearings, the Committee on Finance overwhelmingly endorsed the very proposal I am offering today. Either we are serious about our efforts to broaden public participation in the political process, or we are not. That is the basic and fundamental issue for the Senate to consider. The amendment offers a reasonable approach to a difficult problem. It is the kind of approach that should be embraced by the Senate.

Mr. President, how much time remains to me?

The PRESIDING OFFICER. The Senator has 1 minute remaining.

Mr. CANNON. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield.

Mr. CANNON. As one who conducted the hearings in the general area of election reform, I am wondering whether the Senator would not offer to amend his amendment to limit the contributions such as we determined as a result of hearings that would be proper to——

The PRESIDING OFFICER. The time of the Senator from Massachusetts has expired.

Mr. KENNEDY. Mr. President, I ask unanimous consent for 2 minutes to respond to the Senator from Nevada.

Mr. LONG. Mr. President, I ask unanimous consent for 4 minutes, with 2 minutes to a side on this question—the time to be equally divided.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana? The Chair hears none, and it is so ordered.

Mr. CANNON. I would ask the Senator from Massachusetts if he would consider amending his amendment to conform to what we arrived at in the hearings, to reduce this to a general election for President, Vice President, and the national committees, and not try to get down to the dog catcher level, or the county assessor level, or the State and local level. If it were so amended, I would be happy to support his amendment so that we had a very clearly defined limit and some safeguards.

Mr. KENNEDY. As the Finance Committee very clearly recognized in 1967, there is a great need for financial support for candidates at the State and local level. We are all well aware of the tremendous financial burden of campaigning for office at the State level, whether it be in California, New York, Massachusetts, or any other State in the Union. The same is true of local offices, such as the Boston City Council or the mayor of New York, Chicago, or Los Angeles. It seems to me that if we are going to get people to run for the State legislatures and other statewide offices, we should provide them with a better opportunity to go to their constituencies with as broad a base of political and financial support as possible. That is the thrust and purport of the pending amendment. I think this is one of the real strengths of the amendment.

Mr. LONG. Mr. President, as I said previously, all a man has to do under this amendment is to announce he is a candidate for public office and, once announced, he can put on a big party, a barbecue with beer and other refreshments, and after they get through, and they wake up with their heads hurting the next day, the candidate can decide that he is no longer interested in making the race, and the Government picks up the tab for that big party.

I contend that the Federal Government has no business getting involved in that kind of local politics. That, at the minimum, is why this amendment should be rejected.

I think such an amendment of this kind should be carefully considered. If it is to be adopted, it should be on the basis that it—and all its alternatives—have been carefully considered.

The PRESIDING OFFICER. All time on the amendment has now expired.

Mr. WILLIAMS of Delaware. Mr. President, I call up my amendment and ask that it be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the RECORD at this point.

The text of the amendment is as follows:

TITLE III—ELECTION REFORM ACT OF 1969

SUBTITLE A—AMENDMENTS TO CRIMINAL CODE

SEC. 301. Section 591 of title 18 of the United States Code is amended to read as follows:

"§ 591. Definitions

"When used in sections 597, 599, 602, 608, and 610 of this title—

"(a) The term 'election' means (1) a general, special, or primary election, (2) a convention or caucus of a political party held to nominate a candidate, (3) a primary election held for the selection of delegates to a national nominating convention of a political party, or (4) a primary election held for the expression of a preference for the nomination of persons for election to the office of President;

"(b) The term 'candidate' means an individual who seeks nomination for election, or election, to Federal office, whether or not such individual is elected. For purposes of this paragraph, an individual shall be deemed to seek nomination for election, or election, if he (1) has taken the action necessary under the law of a State to qualify himself for nomination for election, or election, to Federal office, or (2) has received contributions or made expenditures, or has given his consent for any other person to receive contributions or make expenditures, with a view to bringing about his nomination for election, or election, to such office;

"(c) The term 'Federal office' means the office of President or Vice President of the United States, or of Senator or Representative in, or Resident Commissioner to, the Congress of the United States;

"(d) The term 'political committee' means any individual, committee, association, or organization which accepts contributions or makes expenditures during a calendar year in an aggregate amount exceeding $1,000;

"(e) The term 'contribution' means a gift, subscription, loan, advance, or deposit of money or any thing of value, made for the purpose of influencing the nomination for election, or election, of any person to Federal office, or for the purpose of influencing the result of a primary held for the selection of delegates to a national nominating convention of a political party or for the expression of a preference for the nomination of persons for election to the office of President, and includes a contract, promise, or agreement, express or implied, whether or not legally enforceable, to make a contribution, and also includes a transfer of funds between political committees;

"(f) The term 'expenditure' includes a purchase, payment, distribution, loan, advance, deposit, or gift of money or any thing of value, made for the purpose of influencing the nomination for election, or election, of any person to Federal office, or for the purpose of influencing the result of a primary held for the selection of delegates to a national nominating convention of a political party or for the expression of a preference for the nomination of persons for election to the office of President, and includes a contract, promise, or agreement, express or implied, whether or not legally enforceable, to make an expenditure, and also includes a transfer of funds between political committees;

"(g) The term 'person' or the term 'whoever' means an individual, partnership, committee, association, corporation, or any other organization or group of persons."

SEC. 302. Section 600 of title 18 of the United States Code is amended to read as follows:

"§ 600. Promise of employment or other benefit for political activity

"Whoever, directly or indirectly, promises any employment, position, comepnsation, contract, appointment, or other benefit, provided for or made possible in whole or in part by any Act of Congress, or any special consideration in obtaining any such benefit, to any person as consideration, favor, or reward for any political activity or for the support of or opposition to any candidate or any political party in connection with any general or special election to any political office, or in connection with any primary election or political convention or caucus held to select candidates for any political office, shall be fined not more than $1,000 or imprisoned not more than one year, or both."

SEC. 303. Section 602 of title 18 of the United States Code is amended—

(a) by inserting "(a)" before "Whoever", and

(b) by adding at the end thereof the following new subsection:

"(b) Whoever, acting on behalf of any political committee (including any State or local committee of a political party), directly or indirectly, intentionally or willfully solicits, or in any manner concerned in soliciting, any assessment, subscription, or contribution for the use of such political committee or for any political purpose whatever from any officer or employee of the United States (other than an elected officer) shall be fined not more than $5,000 or imprisoned not more than three years, or both."

SEC. 304. Section 608 of title 18 of the United States Code is amended to read as follows:

"§ 608. Limitations on political contributions and purchases

"(a) It shall be unlawful for any person, directly or indirectly, to make a contribution or contributions in an aggregate amount in excess of $5,000 during any calendar year in connection with any campaign for nomination for election, or election, to any political committee or candidate, to two or more political committees substantially supporting the same candidate, or to a candidate and one or more political committees substantially supporting the candidate: *Provided, however,* That nothing contained in this subsection shall prohibit the transfer of contributions received by a political committee.

"(b)(1) It shall be unlawful for any political committee or candidate to sell goods, commodities, advertising, or other articles, or any services (except as provided in section 324(b)(2) of the Campaign Funds Disclosure Act of 1967) to anyone other than a political committee or candidate.

"(2) It shall be unlawful for any person, other than a political committee or candidate, to purchase goods, commodities, advertising, or other articles, or any services (except as provided in section 324(b)(2) of the Campaign Funds Disclosure Act of 1967) from a political committee or candidate.

"(c) Whoever violates subsection (a) or (b) of this section shall be fined not more than $5,000 or imprisoned not more than five years, or both.

"(d) Subsection (b) of this section shall not apply to a sale or purchase (1) of any

political campaign pin, button, badge, flag, emblem, hat, banner, or similar campaign souvenir or any political campaign literature or publications (but shall apply to sales of advertising including the sale of space in any publication), for prices not exceeding $25 each, (2) of tickets to political events or gatherings, (3) of food or drink for a charge not substantially in excess of the normal charge therefor, or (4) made in the course of the usual and known business, trade, or profession of any person or in a normal arm's-length transaction: *Provided, however,* That a sale or purchase described in paragraph (1), (2), or (3) shall be deemed a contribution under subsection (a) of this section.

"(e) For the purposes of this section, a contribution made by the spouse or a minor child of a person shall be deemed a contribution made by such person.

"(f) In all cases of violations of this section by a partnership, committee, association, corporation, or other organization or group of persons, the officers, directors, or managing heads thereof who knowingly and willfully participate in such violation shall be punished as herein provided."

SEC. 305. Section 609 of title 18 of the United States Code is repealed.

SEC. 306. Section 611 of title 18 of the United States Code is amended to read as follows:

"§ 611. Contributions by Government contractors

"Whoever, including a corporation, entering into any contract with the United States or any department or agency thereof either for the rendition of personal services or furnishing any material, supplies, or equipment to the United States or any department or agency thereof or for selling any land or building to the United States or any department or agency thereof, if payment for the performance of such contract or payment for such material, supplies, equipment, land, or building is to be made in whole or in part from funds appropriated by the Congress, at any time between the commencement of negotiations for and the later of (a) the completion of performance under, or (b) the termination of negotiations for, such contract or furnishing of material, supplies, equipment, land or buildings, directly or indirectly makes any contribution of money or other thing of value, or promises expressly or impliedly to make any such contribution, to any political party, committee, or candidate for public office or to any person for any political purpose or use; or

"Whoever knowingly solicits any such contribution from any such person for any such purpose during any such period—

"Shall be fined not more than $5,000 or imprisoned not more than five years, or both."

SEC. 307. So much of the sectional analysis at the beginning of chapter 29 of title 18 of the United States Code as relates to sections 609 and 611 is amended to read:

"609. Repealed.
"611. Contributions by Government contractors."

SUBTITLE B—DISCLOSURE OF FEDERAL CAMPAIGN FUNDS

DEFINITIONS

SEC. 321. When used in this subtitle—

(a) The term "election" means (1) a general, special, or primary election, (2) a convention or caucus of a political party held to nominate a candidate, (3) a primary election held for the selection of delegates to a national nominating convention of a political party, or (4) a primary election held for the expression of a preference for the nomination of persons for election to the office of President;

(b) The term "candidate" means an individual who seeks nomination for election, or election, to Federal office, whether or not such individual is elected. For purposes of this paragraph, an individual shall be deemed to seek nomination for election, or election, if he (1) has taken the action necessary under the law of a State to qualify himself for nomination for election, or election, to Federal office, or (2) has received contributions or made expenditures, or has given his consent for any other person to receive contributions or make expenditures, with a view to bringing about his nomination for election, or election, to such office;

(c) The term "Federal office" means the office of President or Vice President of the United States; or of Senator or Representative in, or Resident Commission to, the Congress of the United States;

(d) The term "political committee" means any committee, association, or organization which accepts contributions or makes expenditures during a calendar year in an aggregate amount exceeding $1,000;

(e) The term "contribution" means a gift, subscription, loan, advance, or deposit of money or any thing of value, made for the purpose of influencing the nomination for election, or election, of any person to Federal office or as presidential and vice-presidential electors, or for the purpose of influencing the result of a primary held for the selection of delegates to a national nominating convention of a political party, or for the expression of a preference for the nomination of persons for election to the office of President, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution, and also includes a transfer of funds between political committees;

(f) The term "expenditure" includes a purchase, payment, distribution, loan, advance, deposit, or gift of money or any thing of value, made for the purpose of influencing the nomination for election, or election, of any person to Federal office, or as presidential and vice-presidential electors, or for the purpose of influencing the result of a primary held for the election of delegates to a national nominating convention of a political party, or for the expression of a preference for the nomination of persons for election to the office of President, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure, and also includes a transfer of funds between political committees;

(g) The term "Clerk" means the Clerk of the House of Representatives of the United States;

(h) The term "Secretary" means the Secretary of the Senate of the United States;

(i) The term "person" includes an individual, partnership, committee, association, corporation, labor organization, and any other organization or group of persons;

(j) The term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

ORGANIZATION OF POLITICAL COMMITTEES

SEC. 322. (a) Every political committee shall have a chairman and a treasurer. No contribution and no expenditure shall be accepted or made by or on behalf of a political committee at a time when there is a vacancy in the office of chairman or treasurer thereof. No expenditure shall be made for or on behalf of a political committee without the authorization of its chairman or treasurer, or their designated agents.

(b) Every person who receives a contribution for a political committee shall, on demand of the treasurer, and in any event within five days after the receipt of such contribution, render to the treasurer a detailed account thereof, including the amount, the name and address of the person making such contribution, and the date on which received. All funds of a political committee shall be kept separate from other funds.

(c) It shall be the duty of the treasurer of a political committee to keep a detailed and exact account of—

(1) all contributions made to or for such committee;

(2) the full name and mailing address of every person making any contribution, and the date and amount thereof;

(3) all expenditures made by or on behalf of such committee; and

(4) the full name and mailing address of every person to whom any expenditure is made, and the date and amount thereof.

(d) It shall be the duty of the treasurer to obtain and keep a receipted bill, stating the particulars, for every expenditure made by or on behalf of a political committee of $100 or more in amount, and for any such expenditure in a lesser amount, if the aggregate amount of such expenditures to the same person during a calendar year exceeds $100. The treasurer shall preserve all receipted bills and accounts required to be kept by this section for periods of time to be determined by the Secretary or Clerk, as the case may be.

REGISTRATION OF POLITICAL COMMITTEES; STATEMENTS

SEC. 323. (a) Each political committee which anticipates receiving contributions or making expenditures during the calendar year in an aggregate amount exceeding $1,000 shall, within ten days after its organization or, if later, ten days after the date on which it has information which causes it to anticipate it will receive contributions or make expenditures in excess of $1000, file with the Secretary or Clerk, as the case may be, a statement of organization. Each such committee in existence at the date of enactment of this Act shall file a statement of organization with the Secretary or Clerk, as the case may be, at such time as he prescribes.

(b) The statement of organization shall include—

(1) the name and address of the committee;

(2) the names, addresses, and relationships of affiliated or connected organizations;

(3) the area, scope, or jurisdiction of the committee;

(4) the name, address, and position of the custodian of books and accounts;

(5) the name, address, and position of other principal officers, including officers and members of the finance committee, if any;

(6) the name, address, office sought, and party affiliation of (A) each candidate whom the committee is supporting and (B) any other individual, if any, whom the committee is supporting for nomination for election, or election, to any public office whatever; or, if the committee is supporting the entire ticket of any party, the name of the party;

(7) a statement whether the committee is a continuing one;

(8) the disposition of residual funds which will be made in the event of dissolution;

(9) a listing of all banks, safety deposit boxes, or other repositories used;

(10) a statement of the reports required to be filed by the committee with State or local officers, and, if so, the names, addresses, and positions of such persons; and

(11) such other information as shall be required by the Secretary or Clerk.

(c) Any change in information previously submitted in a statement of organization shall be reported to the Secretary or Clerk, as the case may be, within a ten-day period following the change.

(d) Any committee which, after having filed one or more statements of organization, disbands or determines it will no longer receive contributions or make expenditures during the calendar year in an aggregate

amount exceeding $1,000 shall so notify the Secretary or Clerk, as the case may be.

REPORTS BY POLITICAL COMMITTEES AND CANDIDATES

SEC. 324. (a) Each treasurer of a political committee supporting a candidate or candidates for election to the office of President or Vice President of the United States or Senator, and each candidate for election to such office, shall file with the Secretary, and each treasurer of a political committee supporting a candidate or candidates for election to the office of Representative in, or Resident Commissioner to, the Congress of the United States, and each candidate for election to such office, shall file with the Clerk, reports of receipts and expenditures on forms to be prescribed or approved by him. Such reports shall be filed on the 10th day of March, June, and September, in each year, and on the fifteenth and fifth days next preceding the date on which an election is held, and also by the 31st day of January. Such reports shall be complete as of such date as the Secretary may prescribe, which shall not be less than five days before the date of filing.

(b) Each report under this section shall disclose—

(1) the amount of cash on hand at the beginning of the reporting period;

(2) the full name and mailing address of each person who has made one or more contributions to or for such committee or candidate (including the purchase of tickets for events such as dinners, luncheons, rallies, and similar fundraising events) within the calendar year in the aggregate amount or value of $100 or more, together with the amount and date of such contributions;

(3) the total sum of individual contributions made to or for such committee or candidate during the reporting period and not reported under paragraph (2);

(4) the name and address of each political committee or candidate from which the reporting committee or the candidate received, or to which that committee or candidate made, any transfer of funds, together with the amounts and dates of all such transfers;

(5) each loan to or from any person within the calendar year in the aggregate amount or value of $100 or more, together with the full names and mailing addresses of the lender and endorsers, if any, and the date and amount of such loans;

(6) the total amount of proceeds from (A) the sale of tickets to each dinner, luncheon, rally, and other fundraising events; (B) mass collections made at such events; and (C) sales of items such as political campaign pins, buttons, badges, flags, emblems, hats, banners, literature, and similar materials;

(7) each contribution, rebate, refund, or other receipt of $100 or more not otherwise listed under paragraphs (2) through (6);

(8) the total sum of all receipts by or for such committee or candidate during the reporting period;

(9) the full name and mailing address of each person to whom an expenditure or expenditures have been made by such committee or candidate within the calendar year in the aggregate amount or value of $100 or more, and the amount, date, and purpose of each such expenditure;

(10) the full name and mailing address of each person to whom an expenditure for personal services, salaries, and reimbursed expenses of $100 or more has been made, and which is not otherwise reported, including the amount, date, and purpose of such expenditure;

(11) the total sum of expenditures made by such committee or candidate during the calendar year;

(12) the amount and nature of debts and obligations owed by or to the committee, in such form as the Secretary or Clerk may prescribe;

(13) such other information as shall be required by the Secretary or Clerk.

(c) The reports required to be filed by subsection (a) shall be cumulative during the calendar year to which they relate, but where there has been no change in an item reported in a previous report during such year, only the amount need be carried forward. If no contributions or expenditures have been accepted or expended during a calendar year, the treasurer of the political committee or candidate shall file a statement to that effect.

REPORTS BY OTHERS THAN POLITICAL COMMITTEES

SEC. 325. Every person (other than a political committee or candidate) who makes contributions or expenditures, other than by contribution to a political committee or candidate, aggregating $100 or more within a calendar year shall file with the Secretary or Clerk, as the case may be, a statement containing the information required by section 324. Statements required by this section shall be filed on the dates on which reports by political committees are filed but need not be cumulative.

FORMAL REQUIREMENTS RESPECTING REPORTS AND STATEMENTS

SEC. 326. (a) A report or statement required by this subtitle to be filed by a treasurer of a political committee, a candidate, or by any other person, shall be verified by the oath or affirmation of the person filing such report or statement, taken before any officer authorized to administer oaths.

(b) A copy of a report or statement shall be preserved by the person filing it for a period of time to be designated by the Secretary or Clerk, as the case may be, in a published regulation.

(c) The Secretary or Clerk may, by published regulation of general applicability, relieve any category of political committees of the obligation to comply with section 324 if such committee (1) primarily supports persons seeking State or local office, and does not substantially support candidates, and (2) does not operate in more than one State or on a statewide basis.

(d) The Secretary or Clerk, as the case may be, shall, by published regulations of general applicablity, prescribe the manner in which contributions and expenditures in the nature of debts and other contracts, agreements, and promises to make contributions or expenditures shall be reported. Such regulations shall provide that they be reported in separate schedules. In determining aggregate amounts of contributions and expenditures, amounts reported as provided in such regulations shall not be considered until actual payment is made.

REPORTS ON CONVENTION FINANCING

SEC. 327. Each committee or other organization which—

(1) represents a State, or a political subdivision thereof, or any group of persons, in dealing with officials of a national political party with respect to matters involving a convention held in such State or political subdivision to nominate a candidate for the office of President or Vice President, or

(2) represents a national political party in making arrangements for the convention of such party held to nominate a candidate for the office of President or Vice President,

shall, within sixty days following the end of the convention (but not later than twenty days prior to the date on which presidential and vice-presidential electors are chosen), file with the Secretary a full and complete financial statement, in such form and detail as he may prescribe, the sources from which it derived its funds, and the purposes for which such funds were expended.

DUTIES OF THE SECRETARY AND CLERK

SEC. 328. (a) It shall be the duty of the Secretary and Clerk, respectively—

(1) to develop prescribed forms for the making of the reports and statements required to be filed with him under this subtitle;

(2) to prepare and publish a manual setting forth recommended uniform methods of bookkeeping and reporting for use by persons required to make such reports and statements;

(3) to develop a filing, coding, and cross-indexing system consonant with the purposes of this subtitle;

(4) to make the reports and statements filed with him available for public inspection and copying during regular office hours, commencing as soon as practicable but not later than the end of the second day following the day during which it was received, and to permit copying of any such report or statement by hand or by duplicating machine, as requested by any person, at the expense of such person;

(5) to preserve such reports and statements for a period of ten years from date of receipt, except that reports and statements relating solely to candidates for the House of Representatives shall be preserved for only five years from the date of receipt;

(6) to compile and maintain a current list of all statements or parts of statements pertaining to each candidate;

(7) to prepare and publish an annual report including compilations of (A) total reported contributions and expenditures for all candidates, political committees, and other persons during the year; (B) total amounts expended according to such categories as he shall determine and broken down into candidate, party, and nonparty expenditures on the National, State, and local levels; (C) total amounts expended for influencing nominations and elections stated separately; (D) total amounts contributed according to such categories of amounts as he shall determine and broken down into contributions on the National, State, and local levels for candidates and political committees; and (E) aggregate amounts contributed by any contributor shown to have contributed the sum of $100 or more;

(8) to prepare and publish from time to time special reports comparing the various totals and categories of contributions and expenditures made with respect to preceding elections;

(9) to prepare and publish such other reports as he may deem appropriate;

(10) to assure wide dissemination of statistics, summaries, and reports prepared under this subtitle;

(11) to make from time to time audits and field investigations with respect to reports and statements filed under the provisions of this subtitle, and with respect to alleged failures to file any report or statement required under the provisions of this subtitle;

(12) to report apparent violations of law to the appropriate law enforcement authorities; and

(13) to prescribe suitable rules and regulations to carry out the provisions of this subtitle.

(b) In the performance of their duties under this subtitle, the Secretary and Clerk shall coordinate their activities with the activities of the Comptroller General under the Presidential Election Campaign Fund Act of 1966 and the Senatorial Election Campaign Fund Act of 1967.

STATEMENTS FILED WITH CLERK OF UNITED STATES COURT

SEC. 329. (a) A copy of each statement required to be filed with the Secretary or Clerk by this subtitle shall be filed with the clerk of the United States district court for the judicial district in which is located the principal office of the political committee or, in the case of a statement filed by a candidate or other person, in which is located such person's residence. The Secretary or Clerk may require the filing of reports and statements required by this subtitle with the clerks of other United States district courts

where he determines the public interest will be served thereby.

(b) It shall be the duty of the clerk of a United States district court under subsection (a)—

(1) to receive and maintain in an orderly manner all reports and statements required by this subtitle to be filed with such clerks;

(2) to preserve such reports and statements for a period of ten years from date of receipt, except that reports and statements relating solely to candidates for the House of Representatives shall be preserved for only five years from the date of receipt;

(3) to make the reports and statements filed with him available for public inspection and copying during regular office hours, commencing as soon as practicable but not later than the end of the second day following the day during which it was received, and to permit copying of any such report or statement by hand or by duplicating machine, as requested by any person, at the expense of such person; and

(4) to compile and maintain a current list of all statements or parts of statements pertaining to each candidate.

PROHIBITION ON CONTRIBUTIONS IN NAME OF ANOTHER

SEC. 330. No person shall make a contribution in the name of another person, and no person shall knowingly accept a contribution made by one person in the name of another person.

PENALTY FOR VIOLATIONS

SEC. 331. Any person who violates any of the provisions of this subtitle shall be fined not more than $1,000 or imprisoned not more than one year, or both.

STATE LAWS NOT AFFECTED

SEC. 332. (a) Nothing in this subtitle shall be deemed to invalidate or make inapplicable any provision of any State law, except where compliance with such provision of law would result in a violation of a provision of this subtitle.

(b) The Secretary and Clerk shall encourage, and cooperate with, the election officials in the several States to develop procedures which will eliminate the necessity of multiple filings by permitting the filing of copies of Federal reports to satisfy the State requirements.

PARTIAL INVALIDITY

SEC. 333. If any provision of this subtitle, or the application thereof, to any person or circumstance is held invalid, the validity of the remainder of the subtitle and the application of such provision to other persons and circumstances shall not be affected thereby.

REPEALING CLAUSE

SEC. 334. (a) The Federal Corrupt Practices Act and all other Acts or parts of Acts inconsistent herewith are repealed.

(b) In case of any conviction under this subtitle, where the punishment inflicted does not include imprisonment, such conviction shall be deemed a misdemeanor conviction only, and shall not carry with it a loss of citizenship.

CITATION

SEC. 335. This subtitle may be cited as the "Campaign Funds Disclosure Act of 1969".

SUBTITLE C—MISCELLANEOUS

SEC. 351. There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this title.

SEC. 352. This title shall take effect January 1, 1970.

SEC. 353. This title may be cited as the "Election Reform Act of 1969".

TITLE IV—PROHIBITION UPON CERTAIN CAMPAIGN PRACTICES IN FEDERAL ELECTIONS

SOLICITING VOTES NEAR POLLING PLACES; PAYING FOR TRANSPORTATION OF VOTERS

SEC. 401. (a) Chapter 29 of title 18 of the United States Code (elections and political activities) is amended by adding at the end thereof the following new sections:

"§ 614. Soliciting votes near polling places

"(a)(1) Except as provided in subsection (b), it is unlawful for any person, during the hours during which any polling place used in any Federal election is open for voting in such election, to solicit, or cause to be solicited, within five hundred feet of such polling place, any person to vote for or against any candidate in such election, in any manner or by any means whatsoever, including, but not limited to—

"(A) handing out campaign cards, pictures, or other campaign literature of any kind or description whatsoever; and

"(B) placing or displaying political signs, pictures, or other form of political advertising.

"(2) Any person who violates paragraph (1) shall be fined not more than $500, or imprisoned not more than six months, or both; and if the violation was willful, shall be fined not more than $1,000, or imprisoned not more than one year, or both.

"(b) Subsection (a)(1) shall not apply to the placing or displaying—

"(1) of political signs, pictures, or other political advertising on private property (other than property being used as a polling place) by the owner, lessee, or lawful occupant thereof, or by any other person with the consent of such owner, lessee, or occupant; or

"(2) of campaign cards or other campaign material on a table or shelf near a polling place at a location designated under a State law which provides for placing and displaying of campaign cards or other campaign material under conditions in which voters may select such material free from influence, solicitation, or suggestion of any kind.

"(c) For purposes of this section, the term 'Federal election' means any general, special, or primary election held solely or in part for the purpose of electing or selecting any candidate for the office of President, Vice President, presidential elector, Member of the Senate, or Member of, or Resident Commissioner to, the House of Representatives.

"§ 615. Paying for transportation of voters

"(a)(1) Except as provided in subsection (b), it is unlawful for any person to pay any other person for the transportation of any individual to enable such individual to vote in any Federal election.

"(2) Any person who violates paragraph (1) shall be fined not more than $500 or imprisoned not more than six months, or both; and if the violation was willful, shall be fined not more than $1,000, or imprisoned not more than one year, or both.

"(b) Subsection (a)(1) shall not apply to—

"(1) the payment by any person for his own transportation, or

"(2) the payment by any person for the transportation of another person who is accompanying him if such transportation is to enable both such persons to vote in the Federal election.

"(c) For purposes of this section, the term 'Federal election' means any general, special, or primary election held solely or in part for the purpose of electing or selecting any candidate for the office of President, Vice President, presidential elector, Member of the Senate, or Member of, or Resident Commissioner to, the House of Representatives."

(b) The analysis of chapter 29 of title 18 of the United States Code is amended by adding at the end thereof the following:

"614. Soliciting votes near polling places.
"615. Paying for transportation of voters."

EFFECTIVE DATE

SEC. 402. This title shall take effect on January 1, 1970.

Mr. PASTORE. Mr. President, I understand that this is a 25-page reform amendment?

Mr. WILLIAMS of Delaware. Twenty-four pages.

The PRESIDING OFFICER. This is an amendment to the Kennedy amendment; is it not?

Mr. WILLIAMS of Delaware. Yes.

Mr. PASTORE. Mr. President, here we are dilly-dallying. Maybe we should have the amendment read.

Mr. WILLIAMS of Delaware. I have no objection. If the Senator wants it stated.

Mr. PASTORE. We have a 25-page document here, have we not?

Mr. WILLIAMS of Delaware. Mr. President, do I not have the floor?

The PRESIDING OFFICER. The Senator from Delaware has the floor.

Mr. WILLIAMS of Delaware. Mr. President, this is not a 25-page amendment, but even if it were, it would still be worth reading. This was title III of the Election Reform Act as passed by the Senate in 1967. It has been lifted out of that bill verbatim as it was voted on and passed by the Senate. At that time, the Senate was passing a proposal to allow up to $100 as a deduction and not a tax credit. I will discuss the tax credit a little later and state why I cannot support the amendment of the Senator from Massachusetts, even if my amendment to his amendment were to be adopted. The Senator from New York and myself insisted at that time that if Congress were going to adopt a proposal using Federal money, we would need some form of election reform and an accounting system attached to it.

Certainly full public accounting of all campaign expenses is long overdue.

Mr. President, the amendment which I have sent to the desk is a revised version of S. 1880 that was accepted by the Senate in 1967. The only thing that is changed in this amendment from what was passed in 1967 by, I think, an 88-to-nothing vote is the effective date—from 1967 to 1969.

Mr. PASTORE. Is that the only change?

Mr. WILLIAMS of Delaware. That is the only change.

Mr. PASTORE. All right; I will accept it.

The PRESIDING OFFICER. Is the amendment intended as a substitute for the Kennedy amendment?

Mr. WILLIAMS of Delaware. No. It is an amendment to the Kennedy amendment. This is an amendment to insert certain language. It does not affect the financing provisions of the amendment of the Senator from Massachusetts as it is now pending.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. KENNEDY. As I understand it, and as the Senator has stated here this afternoon, his amendment is exactly the same measure—S. 1887—which passed this body in 1967 by a vote of 87 to zero?

Mr. WILLIAMS of Delaware. That is correct.

Mr. KENNEDY. The Senator's amendment reaches the basic questions of reporting and disclosure of campaign contributions. I think those are the fundamental aspects of the bill that passed and are included in the amendment of the Senator from Delaware. Is that correct?

Mr. WILLIAMS of Delaware. I have not checked the vote, but I think it is correct. I think it was 88 to zero. The Corrupt Practices Act provides that campaign committees operating in two or more States must make an accurate accounting for their contributions and expenses but committees operating in only one State are not concerned. The District of Columbia is not a State. Therefore, candidates in any one of the 50 States can operate as many committees as they wish in the District of Columbia, and there may be committees back in their State, and no accounting is required.

Let me read from a general explanation of the bill passed in 1967:

(1) Reporting of campaign expenditures made and contributions received is required of candidates for nomination to Federal office in primary elections and political conventions, as well as for election in general and special elections.

(2) Reporting is required of presidential and vice presidential candidates for nomination or election.

(3) Full reporting of expenditures made for candidates for nomination or election to Federal office and contributions received for the candidates is extended to political committees operating in only one State, which make such expenditures and receive such contributions of more than $1,000 a year.

(4) Disclosure to the public of information contained in reports filed by candidates and political committees is required.

(5) The statutory limitations on expenditures by candidates for the Senate and House and by national political committees are eliminated.

(6) The provisions of present law dealing, in general, with prohibitions on various types of activity designed to influence voters improperly, on soliciting political contributions from Federal employees, and on certain political contributions and expenditures (secs. 597, 599, 600, 602, 608, and 610 of title 18) are made applicable with respect to all candidates for Federal office and all political committees supporting them which make expenditures or receive contributions of more than $1,000 a year. In addition political committees are prohibited (sec. 602 of title 18) from soliciting contributions from Federal employees, and the $5,000 limitation in section 608 of title 18 is applied to the aggregate contributions made to a candidate himself and all political committees supporting him.

The amendment was debated at that time. I see no reason for extended debate. I understand the Senator from Massachusetts has no objection to this amendment and will accept it.

Mr. KENNEDY. I have no objection to it. I have had the opportunity to talk with the Senator from Kansas, and we are willing to accept it.

Mr. PASTORE. Mr. President, will the Senator yield for a clarification?

Mr. WILLIAMS of Delaware. I yield.

Mr. PASTORE. Do I understand this provision does not apply when committees are only in one State?

Mr. WILLIAMS of Delaware. Oh, yes, it would apply. The law now reads "in two or more States."

Mr. PASTORE. What is meant by "full reporting" under the amendment of the Senator from Delaware?

Mr. WILLIAMS of Delaware. Under the bill as it passed the Senate and under this amendment all committees established in a State or in the District of Columbia will be required to report.

Mr. KENNEDY. Mr. President, I am willing to accept the amendment.

Mr. WILLIAMS of Delaware. Mr. President, I understand unanimous consent is required to accept the amendment. I ask unanimous consent that this amendment may be accepted as a modification.

The PRESIDING OFFICER. It would take unanimous consent, because the yeas and nays have already been ordered.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that the amendment of the Senator from Massachusetts be modified to include my amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The question now is on the amendment of the Senator from Massachusetts, as modified. The yeas and nays have been ordered, and the clerk——

Mr. PEARSON. Mr. President, has all time been yielded back, or how much time remains?

The PRESIDING OFFICER. All time has been yielded back.

Mr. PEARSON. Are we ready for a vote?

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that each side be given 5 additional minutes.

The PRESIDING OFFICER. Is there objection?

Mr. LONG. I have no objection.

The PRESIDING OFFICER. Without objection, each side is given 5 additional minutes on the Kennedy amendment, as modified.

Mr. WILLIAMS of Delaware. Mr. President, if the Senator wanted time——

Mr. KENNEDY. Mr. President, may I ask what the consent agreement was?

Mr. WILLIAMS of Delaware. I thought the chairman of the committee wanted some extra time.

Mr. KENNEDY. If the chairman desires additional time, I do not object. I am prepared to vote on the amendment. If the chairman desires more time——

Mr. LONG. Mr. President, I ask unanimous consent to have 5 additional minutes.

The PRESIDING OFFICER. If there is no objection, 5 additional minutes are granted to each side.

Mr. LONG. Mr. President, we have before us a bill which should be passed. I do not know why certain Senators have the impression that this is the bill above all bills to which they must offer their amendments. Next I suppose we will have a constitutional amendment offered to this tax bill. We have social security amendments on it, and now we have a corrupt practices law as an amendment to the tax bill—actually as an amendment to an amendment which contains a political campaign financing proposal.

This could go on forever. Next thing we know, we will have an appropriation offered on the tax bill.

I urge that the amendment be rejected and that we try to keep the bill what it was originally—a revenue bill, hopefully a tax reform bill.

We are tacking all sorts of proposals onto the bill. The President, on a nationwide television broadcast last night, said that if the bill stands as the Senate has amended it so far, he will have to veto it. How much more do we want to add to the bill with that kind of a Presidential comment on it? Do not the Senators think they have burdened the bill enough without adding anything more?

Mr. WILLIAMS of Delaware. Mr. President, if the amendment offered by the Senator from Massachusetts is to be adopted, I think the amendment I have offered to it is very important. As I told the Senator from Massachusetts before I offered my amendment to his amendment, I do not think this is the time we should offer either his amendment or this proposal to a revenue measure. I do not think this is the appropriate method in which to act on election reform. I know the Treasury Department today and in the past has opposed the tax credit approach because it means complications on the income tax returns. So I hope the amendment of the Senator from Massachusetts is defeated, even though my amendment has been accepted.

However, my point is that if the Kennedy amendment should be adopted it should not be adopted without including meaningful election reform that will require full public accounting.

Mr. LONG. Mr. President, we have the very proposal that in a prior Congress tied up the two Houses of Congress, without any resolution for an extended period of time, being added to a bill which the President has threatened to veto. It started out as a $7 billion bill. At last count, it was about a $15 billion bill. One of these days we ought to stop burdening this bill down with provisions that really have nothing essentially to do with the bill and work out something that can be sent to the President's desk and which can become law.

If this amendment is added on the bill, it will be one more problem and one more provision that we will have trouble working out if we are to lay a bill on the President's desk that he will sign.

Mr. HATFIELD. Mr. President——

The PRESIDING OFFICER. The Senator from Oregon.

Mr. MANSFIELD. Mr. President, how much time was allowed?

The PRESIDING OFFICER. Five minutes on each side.

Mr. KENNEDY. Mr. President, I am prepared to yield back my time. How much time does the Senator from Oregon want?

Mr. HATFIELD. Mr. President, I move to lay the pending——

Mr. LONG. Does the Senator want time? I am prepared to yield back the remainder of my time.

Mr. CANNON. Mr. President——

Mr. HATFIELD. Mr. President——

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I move to lay the pending amendment on the table, and ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay

on the table the amendment of the Senator from Massachusetts, as modified. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Montana (Mr. METCALF), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The result was announced—yeas 50, nays 45, as follows:

[No. 197 Leg.]

YEAS—50

| | | |
|---|---|---|
| Allen | Ervin | Miller |
| Allott | Fannin | Murphy |
| Baker | Goodell | Percy |
| Bennett | Gore | Randolph |
| Boggs | Griffin | Russell |
| Brooke | Gurney | Saxbe |
| Byrd, Va. | Hansen | Schweiker |
| Byrd, W. Va. | Hartke | Scott |
| Case | Hatfield | Smith, Maine |
| Cook | Holland | Smith, Ill. |
| Cooper | Hruska | Sparkman |
| Cotton | Javits | Stennis |
| Curtis | Jordan, N.C. | Thurmond |
| Dole | Jordan, Idaho | Tower |
| Dominick | Long | Williams, Del. |
| Eastland | McCarthy | Young, N. Dak. |
| Ellender | McClellan | |

NAYS—45

| | | |
|---|---|---|
| Aiken | Hollings | Nelson |
| Bayh | Hughes | Packwood |
| Bellmon | Inouye | Pastore |
| Bible | Jackson | Pearson |
| Burdick | Kennedy | Pell |
| Cannon | Magnuson | Prouty |
| Church | Mansfield | Proxmire |
| Cranston | Mathias | Ribicoff |
| Dodd | McGee | Spong |
| Eagleton | McGovern | Stevens |
| Fong | McIntyre | Talmadge |
| Fulbright | Mondale | Tydings |
| Gravel | Montoya | Williams, N.J. |
| Harris | Moss | Yarborough |
| Hart | Muskie | Young, Ohio |

NOT VOTING—5

| | | |
|---|---|---|
| Anderson | Metcalf | Symington |
| Goldwater | Mundt | |

So the motion to lay on the table was agreed to.

Mr. LONG. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. McCLELLAN. Mr. President, I move to lay that motion on the table.

Mr. GRIFFIN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TAXES ON EXCESS BUSINESS HOLDINGS

Mr. SCOTT. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. SCOTT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

Beginning with line 25 on page 106 strike all through line 3 on page 107 and insert the following: "for tax under section 4943 (relating to taxes on excess business holdings) applied, in the case of a disposition before January 1, 1975, without taking section 4943(c)(4) into account, and it receives in return an amount which equals or exceeds the fair market value of such property at the time of such disposition or at the time a contract for such disposition was previously executed (without regard to any sales"

On line 6 page 107, strike "market)", and insert the following: "market) in a transaction which would not constitute a prohibited transaction (within the meaning of section 503(b) or the corresponding provisions of prior law)".

Mr. SCOTT. Mr. President, it is my understanding that this amendment is acceptable to the ranking member and to the chairman of the Finance Committee.

Mr. LONG. Mr. President, I know of no objection to the amendment.

Several Senators addressed the Chair.

Mr. RUSSELL. Mr. President, I have no objection to the amendment. However, I think the Senate as a whole might like to have some idea of what the amendment is about.

Mr. SCOTT. Mr. President, my amendment to section 101(1)(2) is intended to correct an unintended inequity resulting from certain technical changes in the bill as reported by the Finance Committee. A major objective of the committee and of the House bill has been to reduce needless involvement by a foundation in the ownership of a business, so that charitable purposes may predominate in the decisions of foundation management, as they should.

The attempt has been to encourage diversification of investments by selective sanctions without needlessly impairing the effectiveness of the foundations or imposing unreasonable burdens on the businesses involved or their stockholders or employees. In the years before the bill was introduced, some foundations on their own initiative had commenced responsible diversification programs involving orderly sales and other dispositions of stock in a corporation. Since public offerings of substantial holdings of stock in a corporation can have a depressing effect on its market price, to the disadvantage of the foundation, such a diversification program may involve sales to the corporation involved or a trustee under an employee trust.

Initially, the tax reform bill would have permitted this kind of reasonable divestiture program, including sales to a corporation which is a disqualified person, to the extent the foundation was required to divest itself of the holdings in order to avoid sanctions under the stock ownership limitations. Under the House bill, these sanctions would have applied if a foundation had retained nonvoting stock holdings in excess of a 2-percent de minimis allowance, so long as the foundation and all disqualified persons, in combination, retained more than 20 percent of the voting stock, even if the foundation itself held no voting stock.

The Finance Committee, however, voted to increase the allowable retention of voting stock by a foundation and disqualified persons in this situation to a maximum of 50 percent. Where this liberalizing rule has application, one result will be to permit nonvoting stock holdings to be retained by a foundation without sanctions, and this effect was intended. An unintended effect, however, was to impose sanctions under the self-dealing provisions of the bill on a foundation wishing to continue on a voluntary basis a responsible diversification program involving sales to a corporation which is a disqualified person.

Mr. President, the amendment being proposed would change this rule and permit continuation of such voluntary arrangements under appropriate safeguards. The amendment would have no adverse revenue effect and, as indicated, would advance the general objective of encouraging foundations to diversify their investments. With the safeguards provided, we believe the amendment merits the approval of the Senate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment was agreed to.

AMENDMENT NO. 382

Mr. MATHIAS. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

On page 401, line 16, strike the numeral "5" and insert the numeral "10".

Mr. MATHIAS. Mr. President, this is a technical amendment.

Subchapter S of the Internal Revenue Code allows small corporations, those with 10 or fewer shareholders, to elect not to pay the regular corporate income tax and instead to have the income or loss of the corporation taxed directly to the shareholders. In a general way, this results in a pattern of taxation similar to that of partnerships. Subchapter S is now being used by more than 200,000 corporations and the number is constantly increasing. However, because of the hybrid nature of the subchapter S corporation—not quite a corporation and not quite a partnership—the governing rules have been quite complex. Under both the Johnson and the Nixon administrations, with the aid of the Committee on Partnerships of the American Bar Association, legislative proposals have been developed to alleviate problems associated with subchapter S corporations. The proposals have been designed to tax such corporations as much like partnerships as possible without conferring unwarranted advantages on them.

H.R. 13270 as passed by the House and reported by the Senate Finance Committee would apply the H.R. 10 ceiling—10 percent of earned income or $2,500, whichever is less—to deferred compensation of "shareholder employees" of subchapter S corporations. This amendment would change the section 531 definition of "shareholder employee" from an officer or employee who owns more than 5 percent of the corporation's stock to an officer or employee who owns more than 10 percent—by making the appro-

priate change at page 401, line 16, of H.R. 13270.

This amendment would conform to the Surrey proposals under the Johnson administration, the Cohen proposals under the Nixon administration, and present section 401(c)(3)(B) of the code.

Mr. President, I hope the Senate will support the amendment.

Mr. JAVITS. Mr. President, I understand there is some question with reference to an amendment that was to be offered by another Senator. That amendment would seek to take out the provision from the bill altogether.

Is the Senator aware of anything like that, and how does it tie in with his amendment?

Mr. MATHIAS. I am not aware of any such intention on the part of any other Member.

It is my understanding that when the Secretary of the Treasury came before the committee—the distinguished chairman of the committee can confirm this—he testified that the Treasury would like further time to study the whole question of subsection S matters in this general area of the economy. However, since the committee has elected to act, this amendment is intended to mitigate to the extent possible the action of the committee. It will not result in any loss of revenue to the Treasury. It will conform to present business practices, and I think it will have the effect of making the changes more circumspect and less far reaching than under the committee draft.

Mr. JAVITS. Will the Senator yield further?

Mr. MATHIAS. I yield.

Mr. JAVITS. How is this going to deal with the professional service corporations—that is, in States where they are permissible?

Mr. MATHIAS. Only if they come within subsection S categories, but they are in a different category from the usual subsection S situation.

Mr. JAVITS. In other words, an amendment relating to professional service corporations will not find itself in conflict with or contradicted by the amendment of the Senator from Maryland?

Mr. MATHIAS. I do not believe that they will have any impact on such an amendment, and I am advised that the distinguished Senator from Arizona (Mr. FANNIN) has such an amendment in preparation.

Mr. JAVITS. I thank my colleague. I just wanted to be sure that the field would be open.

Mr. CURTIS. Mr. President, will the Senator yield for a question?

Mr. MATHIAS. I yield.

Mr. CURTIS. I have not been able to hear. Just what does the Senator's amendment do?

Mr. MATHIAS. In the case of subsection S corporations, it merely permits one to have 10 partners, instead of 20 for the purpose of treating his income on a partnership basis. It is 10 percent instead of 5 percent, which is the limitation in the bill.

Mr. CURTIS. The number of partners?

Mr. MATHIAS. The effect. Of course, they may not have an equal share. It permits the treatment which is accorded subsection S corporations to be available if you have 10- rather than 5-percent interest as provided in the bill.

Mr. CURTIS. But it relates to subsection S corporations generally and not in reference to retirement programs specifically. Is that correct?

Mr. MATHIAS. Just subsection S.

Mr. CURTIS. I mean, the Senator's amendment.

Mr. MATHIAS. Yes.

Mr. CURTIS. The Senator's amendment does not deal with the retirement but, rather, deals with subsection S generally?

Mr. MATHIAS. That is correct.

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. MATHIAS. I yield.

Mr. FANNIN. Would the Senator object to my obtaining a parliamentary ruling that this will not affect the amendment I am going to offer?

Mr. MILLER. Mr. President, will the Senator yield?

Mr. MATHIAS. I have yielded to the Senator from Arizona.

Mr. FANNIN. Mr. President, I have a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. FANNIN. I should like to have a ruling as to whether or not this would affect the amendment I will call up later. I already have submitted the amendment.

The PRESIDING OFFICER. Will the Senator specify the amendment he is talking about?

Mr. FANNIN. Amendment No. 296.

The PRESIDING OFFICER. It will have no effect.

Mr. FANNIN. I thank the Chair.

Mr. MILLER. Mr. President, will the Senator yield?

Mr. MATHIAS. I yield.

Mr. MILLER. I should like to ask the Senator from Maryland whether, by merely changing 5 to 10, representing the amount of outstanding stock a shareholder-employee must have, this does not restrict the privilege of one of these subsection (s) corporation pension plans rather than expand it. It seems to me that with only 5 percent required, this would indeed permit 20. But, as I understood the Senator's response to the Senator from Nebraska's question, he indicated that this would permit 10 instead of 20.

It seems to me that the Senator's amendment does not just permit 10 instead of 20, but it requires that there would be 10 instead of 20, because of the way the bill would read with his 10 percent added in lieu of the 5 percent.

If his intention is to expand the coverage, it seems to me that the 5 percent expands the coverage. If his intention is to restrict the coverage, then the 10 percent does restrict it. But I am not quite clear what he intends to do, because I had originally thought he was intending to expand the coverage.

Mr. MATHIAS. I am happy to respond to the distinguished Senator from Iowa.

He will note that on page 401, line 16, it says "more than 5 percent." This would be more than 10 percent; therefore, it provides an extra degree of flexibility.

Mr. MILLER. May I respond to the Senator from Maryland by reading the entire paragraph as it would now read if his amendment were adopted:

> For purposes of this section, the term "shareholder-employee" means an employee or officer of an electing small business corporation who owns . . . on any day during the taxable year of such corporation, more than 10 percent of the outstanding stock of the coropration.

That means that if one is a shareholder-employee and is to come under this subsection S pension plan, he must own more than 10 percent.

Mr. STEVENS. Less than.

Mr. MILLER. The Senator from Alaska suggests "less than," but that is not the language. The language is "more than."

If the Senator from Maryland is trying to expand the coverage—I would suppose that he is, and I think that is a good objective—perhaps it ought to read "not more than 10 percent," rather than just "more than 10 percent."

If that accords with his intent, I would suggest that he might wish to modify his amendment accordingly, and I would support it on that basis.

I am afraid that, as it now stands, the amendment is going to restrict the number who could be covered under these plans, and I think that our objective ought to be to expand the number

Mr. MATHIAS. Let me say to the distinguished Senator that the bill imposes a new limitation which has not existed heretofore. What I am trying to do is to bring that new limitation and the new rules which are being applied here into line with other appropriate statutes.

The Senator is not wholly wrong in his interpretation. The purpose is to apply only as is consistent with other aspects and with other features of the code. For that reason, we felt that the 10 percent would be a more desirable figure in line with the other provisions of the law, although it would be more restrictive in that respect, as the Senator has indicated.

It is my understanding that the distinguished chairman of the committee and the distinguished ranking Republican member of the committee are willing to accept this amendment.

Mr. MILLER. Mr. President, will the Senator yield further?

Mr. MATHIAS. I yield.

Mr. MILLER. Mr. President, I can visualize a situation in which we have, under present law, 20 members of a firm, each having 5 percent. They are all covered under present law. I can understand another situation in which 10 members have, let us say, 8 percent each, which would account for 80 percent of the ownership, and the balance, let us say, of five members have 4 percent each; and under the present law, only the five members with 4 percent each would be eligible.

Now, if we want to expand the eligibility we can do that by providing that a shareholder-employee have not more than 10 percent and that means that those who have 8 percent, since they did not have more than 10 percent, are eligible, and, therefore, coverage would be expanded and it seems to me would be desirable to do that.

But I think that this matter should be checked with staff further. Therefore, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside in order to consider an amendment to be offered by the Senator from Florida (Mr. HOLLAND).

Mr. HOLLAND. Mr. President, I thank the Senator for yielding.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. HOLLAND. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. HOLLAND. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with, and that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

At the proper place insert the following:

"SEC. —. PORTION OF SALARY, WAGES, OR OTHER INCOME EXEMPT FROM LEVY.

"(a) IN GENERAL.—Section 6334(a) (relating to enumeration of property exempt from levy) is amended by adding at the end thereof the following new paragraph:

"'(8) Salary, wages, or other income.—If the taxpayer is required by judgment of a court of competent jurisdiction, entered prior to the date of the levy, to contribute to the support of his minor children, so much of his salary, wages, or other income as is necessary to comply with such judgment.'

"(b) EFFECTIVE DATE.—The amendment made by this section shall take effect 30 days after the date of the enactment of this Act."

Mr. HOLLAND. Mr. President, I can explain the amendment briefly.

A distinguished circuit judge of Florida has protested that when such judges have issued decrees for the payment of support money for minor children by the father, they find that the levies of Internal Revenue Service on the individuals concerned, the fathers, tie up the entire revenue, the entire wages. All they are asking is that the levy not be effective to prevent payment of the awards for the support of the minor children made before the levy. The matters to which I refer are divorce cases.

Mr. President, this request seems completely equitable. I have taken it up with the distinguished Senator from Louisiana and the distinguished Senator from Delaware. I believe they have no objection.

Mr. President, the explanation above is all that the amendment would do if it is agreed to. It would not apply unless the decree allowing the award for the support of the minor had already been made and was in effect, prior to a levy being placed upon his earnings. It would exempt from the levy enough of the earnings of the father to permit the payment of the support award.

Mr. LONG. Mr. President, we have looked at the amendment and we find it does have merit. I know of no objection to the amendment. The Senator from Delaware has looked at it and the staff has looked at it. We find no objection to the amendment and we would be happy to agree to it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Florida.

The amendment was agreed to.

Mr. HOLLAND. I thank the Senator and I also thank the distinguished Senator from Maryland.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Maryland.

Mr. LONG. Mr. President, I ask unanimous consent that the amendment of the Senator from Maryland be temporarily laid aside in order that the Senate may consider an amendment to be offered by the Senator from North Carolina, which I understand will take only a few minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 401

Mr. ERVIN. Mr. President, I call up my amendment No. 401 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. ERVIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with, and that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment ordered to be printed in the RECORD is as follows:

Page 546, after line 12, insert the following new section:

"SEC. 915. CASUALTY LOSSES TO TIMBER.

"(a) AMOUNT OF DEDUCTIBLE LOSS.—Section 165(b) (relating to amount of deduction for losses) is amended by adding at the end thereof the following new sentence: "In the case of a loss sustained with respect to timber arising from fire, storm, or other casualty, the amount of the deduction for such loss shall not be less than the amount by which the fair market value of the timber immediately before the casualty exceeds the fair market value of the timber immediately after the casualty.'"

Mr. ERVIN. Mr. President, the desirability of an amendment of this kind has been called to my attention by one of North Carolina's outstanding lawyers, Kennedy Ward of Craven County.

It appears that an individual in North Carolina bought a lot of cut over land and that after this cut over land had been devoted to the growing of timber for many years there was a fire which destroyed many parts of the timber.

The Internal Revenue Service ruled that the owner of the land was not entitled to a deduction for the loss by fire because there was no costs basis for the timber as distinguished from the land, the timber having been grown after the land was acquired. Litigation is pending in both Federal and State courts on this matter now.

The amendment would provide:

In the case of a loss sustained with respect to timber arising from fire, storm, or other casualty, the amount of the deduction for such loss shall not be less than the amount by which the fair market value of the timber immediately before the casualty exceeds the fair market value of the timber immediately after casualty.

Mr. President, I think the amendment is just and that it should be a part of the Internal Revenue Code. In view of the fact that the matter was not called to the attention of the Ways and Means Committee of the other body or the attention of the Committee on Finance, and that it was not called to any attention until after this bill reached *the floor* of the Senate. I am not optimistic enough to believe I can persuade the Senate at this time to adopt the amendment or to persuade the conferees to retain the amendment in the case it were adopted. It is a just amendment, however, because it would allow a deduction for the actual loss sustained by burning of timber cut after the land on which the timber stood had been acquired. Also it is a highly desirable amendment because it would encourage owners of land to grow timber on that land.

I offer the amendment merely for the purpose of calling it to the attention of the Senate Finance Committee, the House Ways and Means Committee, and the Joint Committee on Internal Revenue Taxation, in the hope that the committees, at some convenient time in the immediate future, will study the question and reach a conclusion as to what is fair and just for them to do in connection with losses of this kind.

Mr. LONG. Mr. President, the Senator from North Carolina has made a good legislative record with regard to this problem. I assure the Senator that when we have the opportunity to get around to it, after we have disposed of these other things which are now pressing upon us, we will take a look at it and see if we can make some recommendations.

Mr. ERVIN. I thank my good friend from Louisiana, chairman of the Committee. On the basis of that assurance, and on the basis of my promise to him that I will also call this matter to the attention of the House Ways and Means Committee and the chairman of the Joint Committee on Internal Revenue Taxation, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

AMENDMENT NO. 382

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Maryland (Mr. MATHIAS).

Mr. LONG. Mr. President, I ask unanimous consent for a time limitation on debate on the pending amendment, that it be limited to 20 minutes, the time to be equally divided between the sponsor

of the amendment and the Senator in charge of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, during the interval, I have had the opportunity to discuss this language with the distinguished Senator from Iowa, and we have agreed upon a modification which is agreeable to the distinguished chairman of the committee and to the senior Republican Member of the committee.

Therefore, I ask unanimous consent to modify my amendment so that it will read:

On page 401, line 16, strike the words "more than 5 percent" and insert the words "10 percent or more".

I believe that this will satisfy the objection which was raised by the Senator from Iowa, and will further conform to the bill and to other pertinent parts of the statute.

Mr. LONG. Mr. President, I understand this matter as well as I would like to understand it, but the Treasury studied it and they agree with the amendment. They think it is desirable.

The staff committee members also have studied it and think it is a good amendment. Therefore, in that spirit, I think it would be appropriate to agree to the amendment and take it to conference.

Mr. President, I yield back the remainder of my time.

Mr. MATHIAS. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Maryland (Mr. MATHIAS).

The amendment was agreed to.

AMENDMENT NO. 403

Mr. BELLMON. Mr. President, I call up my amendment No. 403 and ask that it be stated.

The legislative clerk proceeded to read the amendment.

Mr. BELLMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the RECORD at this point.

The text of the amendment is as follows:

At the proper place insert the following new section:

"SEC. —. RECOVERY OF REASONABLE ATTORNEY'S FEES AND EXPERT WITNESS COSTS AS A PART OF COURT COSTS IN CIVIL CASES INVOLVING THE INTERNAL REVENUE LAWS

"(a) IN GENERAL.—Part II of subchapter C of chapter 76 (relating to Tax Court procedure) is amended by adding at the end thereof the following new section:

" 'SEC. 7465. RECOVERY OF COSTS.

" 'IN GENERAL.—In any proceeding before the Tax Court for the redetermination of a deficiency, the prevailing party may be awarded a judgment of costs to the same extent as is provided in section 2412 of title 28, United States Code, for civil actions brought against the United States. For purposes of the preceding sentence, if in the opinion of the Tax Court the deficiency was assessed without good cause, or for purposes of harassment, the judgment of costs may include reasonable attorney fees and costs of expert witnesses.'

"(b) CLERICAL AND CONFORMING AMENDMENTS.—

"(1) The table of sections for such part II is amended by adding at the end thereof the following new item:

" 'Sec. 7465. Recovery of costs.'

"(2) Section 2412 of title 28, United States Code, is amended—

"(A) by inserting '(a)' before "Except", and

"(B) by adding at the end thereof the following new subsection:

" '(b) In any civil action which is brought by or against the United States for the collection or recovery of any internal revenue tax, or of any penalty or other sum under the internal revenue laws, and in which the United States is not the prevailing party, if the action was brought by the United States, and in the opinion of the court, was brought without good cause or for purposes of harassment, a judgment for costs may include reasonable attorney's fees and costs of expert witnesses.'

"(c) EFFECTIVE DATE.—The amendments made by this section shall apply only with respect to civil actions and proceedings commenced after the date of the enactment of this Act."

Mr. LONG. Mr. President, I ask unanimous consent that the debate on this amendment be limited to 40 minutes, with the time to be equally divided between the sponsor of the amendment and the Senator in charge of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, the amendment is offered and supersedes my previous amendment No. 352, which was discussed in this body on Saturday. For the benefit of those Members not familiar with my amendment, I should like to take a few minutes to explain exactly what the amendment does and the reasons I have for offering it as an amendment to the tax reform bill.

As I stated on last Saturday, I believe that this amendment corrects an injustice which occurs throughout the country. The complex nature of our Internal Revenue laws makes it necessary for individuals who have problems with their income tax to retain professional help in the form of accountants or attorneys. Many times, when a deficiency is assessed, the taxpayer finds it less expensive to go ahead and pay taxes and penalties that are not owed, than to contest unfair Internal Revenue assertions in the courts.

By offering this amendment I do not intend to allow citizens to escape the payment of taxes that they rightfully owe. But I do feel that the taxpayer does have a right to be protected from undue harassment by the Internal Revenue Service.

Now, the way the amendment works is this: When a taxpayer goes to court, either to the tax court for the redetermination of a deficiency or to the Federal district court to defend against the collection of a deficiency or to recover a deficiency already paid, he may recover certain costs if in fact he proves his case, that is, that a deficiency did not, in fact, exist. Then, if in the opinion of the court hearing the case, there was no good cause for the assertion by the Internal Revenue Service or the deficiency was assessed for purposes of harrassment, the judge can award reasonable attorney's fees and costs of expert witnesses to the taxpayer.

I might point out here that in the tax court the taxpayer can be represented by persons other than an attorney. For instance an accountant who qualifies can represent the taxpayer in a proceeding before that body. I feel that in a case of this kind the judge in an award of costs could include the fee of this type representation.

At the present time the taxpayer cannot recover attorney's fees or fees for expert witnesses in tax cases. My amendment would allow for recovery of these fees only when the taxpayer has won his case and the court in its opinion feels that the Government was not justified in bringing or pressing for the payment of the tax assessed.

Mr. President, some concern was expressed on Saturday that the term "prevailing party" was too broad, and that if the taxpayer recovered some of the deficiency that he could be awarded cost because he had in fact won his case. I feel that this has been corrected now because the language of the amendment leaves to the court the determination of when such fees should be awarded. Also it gives the court a guideline to follow in that the court may award such fees when only no good cause is found for the assessment or the assessment was considered to be made for purposes of harrassment.

The cost of this amendment is a question which I cannot answer. However, I feel the cost will be minimal. This amendment will be a safeguard for the taxpayer, in that he knows that he does have an opportunity to defend what he thinks is an assessment without good cause. Also I feel that this amendment will put the Internal Revenue Service on notice that there must be a sound basis for an assessment of a deficiency and that they must have a sound case to back up such an assessment.

Mr. LONG. Mr. President, when the Senator offered his amendment last Saturday, I would have felt it necessary to oppose it, but having had occasion to discuss it with the Senator since, and now that he has it in its present form, I am willing to take it to conference.

What the amendment would provide is that where a taxpayer must sue, and where the court finds that the Government's position was lacking in merit and there was really no good reason why the Government took the taxpayer to court in the first instance, it could be considered, as in Louisiana, to be a nuisance case, and the court could award reasonable attorney's fees to the defendant because he had been the victim of baseless litigation. It would also be a warning to the Government lawyers that before filing a lawsuit against a taxpayer they should be certain it has merit and is not in the nature of harassment or the judge may award attorneys fees to the taxpayer.

I think it would be a good warning to Government agents, especially when they

proceed against a taxpayer, that their case should have a modicum of merit.

Upon that basis, Mr. President, I am willing to take the amendment to conference. I believe that this amendment has also been discussed with other Senators, including the Senator from Delaware (Mr. WILLIAMS).

Mr. President, I yield back the remainder of my time.

Mr. BELLMON. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has now been yielded back on the amendment.

The question is on agreeing to the amendment No. 403 of the Senator from Oklahoma (Mr. BELLMON).

The amendment was agreed to.

STATISTICS BASED ON ZIP CODE AREAS

Mr. WILLIAMS of Delaware. Mr. President, I send an amendment to the desk and ask that it be stated.

The legislative clerk proceeded to read the amendment.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the RECORD at this point.

The text of the amendment is as follows:

At the proper place insert the following new section:

SEC. —. STATISTICS BASED ON ZIP CODE AREAS.

(a) STATISTICS OF INCOME.—Section 6108 is amended by inserting the following at the end thereof: "In publishing such statistics taxpayers shall not be classified, in whole or in part, on the basis of a coding system for the delivery of mail. The preceding sentence shall not apply to statistics made available on an official basis to an agency or instrumentality of the United States or a State or any political subdivision thereof. Such agencies may not publish or otherwise disclose such information. The prohibitions of this section shall be deemed to be within the meaning of 5 U.S.C. Sec. 552(b)(2), the Freedom of Information Act."

(b) SPECIAL STUDIES.—Section 7515 is amended by inserting the following at the end thereof: "Such transcripts may not contain data based, in whole or in part, on the classification of taxpayers under a coding system for the delivery of mail. The preceding sentence shall not apply to statistics made available on an official basis to an agency or instrumentality of the United States or a State or any political subdivision thereof. Such agencies may not publish or otherwise disclose such information. The prohibitions of this section shall be deemed to be within the meaning of 5 U.S.C. Sec. 552(b)(2), the Freedom of Information Act."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect upon enactment.

Mr. WILLIAMS of Delaware. Mr. President, recently, considerable concern has been created by press announcements that the Treasury Department would be compiling tax statistics which would be available to so-called junk mail dealers, on the basis of ZIP code numbers. Allegedly this information would be furnished from the Internal Revenue Service and from this information they could determine the salary scale of people that lived in a certain area based on information gathered from the tax returns. Junk mail dealers could then zero in on certain areas.

For example, they could find out the difference between incomes in Northeast Washington, and in Northwest Washington, and so forth.

These statistics are now made up on a statewide basis, but under the new program this would be broken down by ZIP code areas. Considerable interest has resulted in taxpayers being fearful that this new plan may ultimately end up with an avalanche of junk mail descending upon them. Why should the Treasury Department make it easier for the junk mail artists to zero in on certain areas?

The pending amendment would prohibit the sale of this information and continue the existing law as it has been heretofore interpreted. It would stop this new plan.

It would, however, permit the Government to compile this information which it wanted for its own use and exchange it with other agencies of the Government as well as State agencies but they could not make it available for general distribution to the general public or to junk mail dealers.

I hope that the amendment will be agreed to. I do not think there is any objection to it.

Mr. LONG. Mr. President, I personally think the answer to the junk mail dealer is to charge him 6 cents on his letter, but in view of the fact that that does not seem to be possible and the Finance Committee, of course, has no jurisdiction over that kind of proposal, the Senator from Delaware (Mr. WILLIAMS) is doing what he can—with respect to what is within the jurisdiction of the Finance Committee—to try to prevent the Government from providing names of taxpayers to junk mail dealers so that they can fill our mailboxes with their junk mail.

I am happy to take it to conference.

Mr. WILLIAMS of Delaware. Mr. President, in fairness, I should point out that while the amendment has been prepared with the cooperation of the Treasury Department, they would rather not have it adopted. Nevertheless, it is a very important amendment and I hope that it will be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Delaware (Mr. WILLIAMS).

The amendment was agreed to.

AMENDMENT NO. 296

Mr. FANNIN. Mr. President, I call up my amendment, No. 296, pertaining to professional service organizations, which I offer on behalf of myself, the Senator from Illinois (Mr. PERCY), and the Senator from Texas (Mr. TOWER).

Before I do so, I ask unanimous consent that the names of Senators ALLOTT, BIBLE, CRANSTON, DOLE, GURNEY, HRUSKA, JAVITS, MURPHY, and SCHWEIKER be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FANNIN. Mr. President, I call up my amendment, No. 296, to H.R. 13270.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read the amendment, as follows:

On page 509, beginning with line 5, strike out all through line 18, page 512 (section 901 of the committee amendment), and renumber the succeeding sections.

The part of the bill proposed to be stricken, is as follows:

SEC. 901. QUALIFIED PENSION, ETC., PLANS OF PROFESSIONAL SERVICE ORGANIZATIONS.

(a) SPECIAL RULES FOR SHAREHOLDER-EMPLOYEES.—Section 72 (relating to annuities) is amended by redesignating subsection (p) as (q) and by inserting after subsection (o) the following new subsection:

"(p) SPECIAL RULES FOR SHAREHOLDER-EMPLOYEES OF PROFESSIONAL SERVICE ORGANIZATIONS.—

"(1) INCLUSION OF CERTAIN AMOUNTS IN GROSS INCOME.—Notwithstanding the provisions of section 402 (relating to taxability of beneficiary of employees' trust), section 403 (relating to taxation of employee annuities), or section 405(d) (relating to taxability of beneficiaries under qualified bond purchase plans), a shareholder-employee of a professional service organization shall include in gross income for his taxable year the sum of—

"(A) the excess of the amount of contributions paid on his behalf which is deductible under section 404(a) (1), (2), or (3) by such organization for its taxable year ending in or with his taxable year, over the lesser of (i) 10 percent of the compensation received or accrued by him from such organization during its taxable year, or (ii) $2,500, and

"(B) the amount of any forfeitures allocated to his account under a stock bonus or profit-sharing plan established by such organization during the taxable year of a trust forming part of such plan ending in or with his taxable year.

In the case of an individual on whose behalf contributions are paid under more than one plan to which subparagraph (A) applies or under a plan contributions to which on his behalf are subject to the limitations provided in section 404(e), the provisions of subparagraph (A) shall, under regulations prescribed by the Secretary or his delegate, apply with respect to the aggregate of the contributions paid on his behalf under all such plans.

"(2) TREATMENT OF AMOUNTS INCLUDED IN GROSS INCOME.—Any amount included in the gross income of a shareholder-employee under paragraph (1) shall be treated as consideration for the contract contributed by the shareholder-employee for purposes of this section.

"(3) DEDUCTION FOR AMOUNTS NOT RECEIVED AS BENEFITS.—If—

"(A) amounts are included in the gross income of an individual under paragraph (1), and

"(B) the rights of such individual (or his beneficiaries) under the plan terminate before payments under the plan which are excluded from gross income equal the amounts included in gross income under paragraph (1),

then there shall be allowed as a deduction, for the taxable year in which such rights terminate, an amount equal to the excess of the amounts included in gross income under paragraph (1) over such payments.

"(4) PROFESSIONAL SERVICE ORGANIZATION DEFINED.—For purposes of this subsection, the term 'professional service organization' means any corporation, beneficial ownership in which, or control of which, is limited under State or local law, applicable regulations, or rules of professional ethics to—

"(A) individuals who are required to be licensed or otherwise authorized under State or local law to perform the professional services necessary to carry on the trade or business in which such corporation is engaged, or

"(B) the executor or administrator of an individual described in subparagraph (A).

"(5) SHAREHOLDER-EMPLOYEE.—For purposes of this subsection, the term 'shareholder-employee' means any employee of a professional service organization who owns any beneficial interest in such organization."

(b) CONFORMING AMENDMENT.—Section 62 (relating to adjusted gross income) is amended by inserting after paragraph (9) (as added by section 531 of this Act) the following new paragraph:

"(10) PENSION, ETC., PLANS OF PROFESSIONAL SERVICE ORGANIZATIONS.—The deduction allowed by section 72(p)(3)."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1969.

Mr. FANNIN. Mr. President, I call up an amendment, which is printed as amendment 296 to H.R. 13270, and which restores to professional service corporation employees the same pension plan benefits which are available to employees of other corporations.

Now, Mr. President, the Tax Reform Act is a long and complicated measure. We all know that. And since we all know that a great number of proposed amendments are being considered, I will keep my remarks brief and to the point.

In executive session, and without the benefit of hearings, department reports, or other opportunity for comments from interested person, the Finance Committee added to the tax reform bill, section 901.

This section unfairly discriminates against employees of professional corporations by placing limitations on the amount of their earnings which they may contribute towards their retirement. No similar limitation is imposed on persons who are not required to adhere to professional standards of ethics and who organize under general corporation statutes.

Persons affected by this unfair change include lawyers, medical and osteopathic physicians and surgeons, dentists, architects, stockbrokers and accountants, as well as the many nonprofessional employees of professional service corporations.

The amount of revenue that can be gained by this section of the tax reform bill is small. The amount of ill will it generates is great—and justified.

The U.S. Treasury Department has gone on record as opposing the committee change at this time. The Department has said:

> As a general matter, the Treasury Department is opposed to the imposition of limitations or requirements on retirement plans solely because of the type of business engaged in or the form in which business is conducted.

My amendment restores to employees of professional service corporations the same rights and benefits which employees of other corporations enjoy. It eliminates an unfair discrimination, restores equality, and favors no one unjustly.

UNANIMOUS-CONSENT AGREEMENT

Mr. LONG. Mr. President, will the Senator yield?

Mr. FANNIN. I yield.

Mr. LONG. Mr. President, would the Senator be willing to limit the time on the amendment?

Mr. FANNIN. Yes.

Mr. LONG. Mr. President, I ask unanimous consent that the time for debate on this amendment be limited to 1 hour, to be equally divided between the sponsor of the amendment and the manager of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. TOWER. Mr. President, reserving the right to object, I did not hear the request.

Mr. LONG. I asked unanimous consent that there be a limitation of 1 hour on the amendment, one-half to each side.

Mr. TOWER. One hour to each side?

Mr. LONG. Half an hour to each side.

Mr. FANNIN. Mr. President, I have requests from other Senators to make it an hour on each side.

Mr. LONG. Mr. President, I ask unanimous consent that there be a limitation of debate on the amendment of 2 hours, 1 hour to each side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. FANNIN. Mr. President, I have been requested to add the name of the Senator from Vermont (Mr. PROUTY) as a cosponsor of the amendment, and I ask unanimous consent to do so.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FANNIN. Mr. President, I yield to the Senator from Texas such time as he may need.

Mr. TOWER. Mr. President, one of the greatest injustices apparent in the proposed bill approved by the Finance Committee is the discrimination that will be applied to the employees of professional service associations, such as doctors' and lawyers' offices and paramedical personnel. The primary purpose for the enactment of State laws to allow the creation of professional service corporations was to enable the building and processing of pension plans and funds for the benefit of all the employees of these associations.

For each individual who is a "professional" in such an organization, there are from four to six staff employees—secretaries, nurses, technical specialists, receptionists, bookkeepers, janitors, clerks—who must back up the entire operation. As a profession becomes more complex, still more such backup personnel will be needed, or the quality of professional service will decline. With the adoption of the committee's recommendations, the organizations will be unable to compete with other businesses and industry for the needed personnel. Professional employers will be discriminated against by being denied the tax treatment accorded other employers who create pension and retirement benefits. Likewise, their employees will be discriminated against by being denied the right to participate in such programs.

At a time when we are stressing equity of treatment for the taxpayer, it makes no sense to discriminate against the professional taxpayer and his employees. In the November 3 issue of the U.S. News & World Report there is an interview with Dr. John A. D. Cooper, president of the Association of American Medical Colleges. In this article, Dr. Cooper points out the need for more attractive jobs in the industry so that more people will consider them for careers. Retirement and other fringe benefits are an important part not only for securing career-type personnel, but also for retaining trained personnel once they have entered a given field. If the professional organizations are not put on an equal plane for competing for these people, the service they render will suffer and our quality of living will be diminished.

Recently, the Deputy Assistant Secretary of the Treasury, John S. Nolan, realized how inequitable the committee's position would be and had these comments on the matter:

> The Treasury Department is opposed to the imposition of limitations or requirements on retirement plans solely because of the type business engaged in or the form in which business is conducted. We believe that the distinction in present law between qualified retirement plans of self-employed persons and corporate plans generally is unwise and should be eliminated.

Then Mr. Nolan went on to say that the Department is currently drafting legislation on this problem which will deal effectively with allowing the professional corporations to compete and said:

> It is our position that it would be preferable to defer action on retirement plans of both professional service corporations and subchapter S corporations until next year when we expect to present comprehensive legislation recommendations concerning all employee benefit plans.

Mr. President, not only is the discrimination against professional service organizations opposed by logic and the Treasury Department, but such discrimination is also in contravention to the overwhelming weight of judicial authority on the subject. In the last 6 months, at least three separate circuit courts of appeal have upheld the equity of allowing professional service organizations, duly organized under State law, to be considered as corporations for income tax purposes.

In *O'Neill* v. *United States*, 410 F. 2d 888 (6th Cir. 1969), the court held that the definition of what is a corporation is well established in this country, dating to Chief Justice Marshall's declarations on the subject in the Dartmouth College case of the early 1800's. This definition, which would be changed if the committee's language is accepted, was held to be as good now as it was at the time it was announced. This definition allows professional service organizations to be considered as corporations for income tax purposes.

In a recent fifth circuit case, *Kurzner* v. *U.S.*, 413 F2d 97 (1969), the court was even stronger in the denunciation of attempts to deny corporate standing for tax purposes to the organizations. This court called such attempts "wholly arbitrary and discriminatory," and further concluded that they were "* * * bold attempts not to conform but to avoid judicial decision." "The only apparent expediency served by such attempts has been the collection of more taxes; in this regard, we need only observe that the courts have not yet become so cynical as to subscribe to the tax-dollar school of statutory construction." This rationale was even further buttressed in a tenth circuit case, *U.S.* v. *Empey*, 406 F2d 157 (1969), where the court under-

scored the right of professional service organizations to be considered corporations, where permitted by State law, and classified attempts to prevent such action as "unreasonable" and "invalid." As the courts have refused to give in to such openly "wholly arbitrary and discriminatory" characterizations of professional service organizations, which deny to them the rights granted to other, similar organizations, we in the Senate should do likewise.

Thus, Mr. President, I propose that we strike those provisions which would discriminate against the professional service associations and other similar organizations as being not in the best interest of the policy of the Nation. The Treasury Department has endorsed this proposal as best serving its policy of considering this entire field, which it is currently doing. The circuit courts of appeal of four of the circuits in the United States have held that to do any less is a discrimination against the rights of the associations and should not be allowed.

In the interest of elemental fairness, I urge that the amendment of the Senator from Arizona (Mr. FANNIN), which I am delighted to join with him in cosponsoring, deleting this discrimination, be adopted.

Mr. President, I commend the distinguished Senator from Arizona for bringing this issue to the floor and giving us an opportunity to redress what I consider to be an imbalance and an inequity.

Mr. PERCY. Mr. President, will the distinguished Senator from Arizona yield me 4 minutes?

Mr. FANNIN. I yield 4 minutes to the Senator from Illinois.

Mr. PERCY. Mr. President, I am seated in the Senate to the right of the Senator from Texas, though not very frequently do I find myself to the right of him ideologically. I find myself today foursquare behind him, and certainly behind the distinguished Senator from Arizona, in the amendment they are now offering.

This is an amendment that looks to equity, it looks to organization of our health resources, and it looks to how we are going to provide health care to the people of this country.

I rise in strong support of the pending amendment. It is vitally important to continued improvement of health care in this country.

In this richest most affluent nation in the world, we are deficient in many respects in the health care assistance we offer to Americans, especially those living on lower incomes. We are able to develop effective heart transplant procedures and advances in immunology are dramatic. Yet, when it comes to caring for health needs of the average citizen, our material advances and scientific achievements frequently seems to have deserted us.

Today the Nation's practicing doctors for the most part largely function as 300,000 independent and uncoordinated medical systems. We need to take measures to encourage and assist the medical profession to make more efficient and economical use of their strong and independent operations. It would seem logical to encourage wider multispeciality group practice to allow greater availability and utilization of expertise, ancillary personnel, and costly facilities. Closely related to group practice is the team approach to medical care. This technique has demonstrated an effective means of supplying sound health care where it has been tried.

The pending amendment would encourage the expansion of group practice by deleting restrictive provisions written in by the Senate Finance Committee. These provisions would limit members of professional corporations to the same pension and profit-sharing plan basis as self-employed individuals. This removes an important incentive for group practice.

If the committee provision prevails, members of professional corporations would be allowed to contribute only 10 percent of their income to pension plans up to a maximum of $2,500 per year. This is unrealistically low.

The Treasury Department is currently conducting a study of the whole area of deferred compensation. The study will be completed in the spring. At that time Treasury expects to recommend sweeping changes in the whole area affecting all taxpayers. In the meantime Treasury supports this amendment deleting section 901 of the tax bill. I feel that the current law should not be changed until such time as the Treasury report is ready. Edwin S. Cohen, Assistant Secretary of the Treasury for Tax Policy, has stated that—

> It would be preferable to defer action on retirement plans of . . . professional service corporations . . . until next year when we expect to present comprehensive legislation recommendations concerning all employee benefit plans.

Some other points I feel that are of importance:

The committee provision was written into the bill without hearings and without affording an opportunity to present counterarguments.

The benefits realized by existing law are not just for the employer, but must be given proportionately based on salary to all employees.

The courts consistently have ruled that professional corporations should be taxed no differently from other corporations and IRS has been rebuffed by the courts in every instance of trying to change this tax treatment.

This amendment would not allow professional corporation employees to deduct unlimited amounts of income. Any pension plan of a professional corporation must be an IRS qualified plan with benefits the same for all employees in the corporation—in the case of doctors that would mean for doctors, nurses, technical personnel.

Contributions to the plan must meet IRS standards of reasonableness and IRS will disallow excessive contributions. In any event contributions to profit-sharing plans are limited to 15 percent of salary.

For all the above reasons I strongly urge adoption of the amendment.

The PRESIDING OFFICER. Who yields time?

Mr. LONG. Mr. President, I yield myself such time as I require.

I ask unanimous consent to have printed in the RECORD an article entitled "Physicians Profit From Tax Device," written by Sandra Blakeslee, and published recently in the New York Times.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PHYSICIANS PROFIT FROM TAX DEVICE

(By Sandra Blakeslee)

Thousands of physicans across the country have begun to take advantage of a lucrative tax device that is saving many of them more than $15,000 a year in taxes.

Some doctors are finding they can use the same device to retire on 10 times as much money as they once planned—without earning a penny more during their careers.

The growing popularity of this tax mechanism—the professional corporation—was reflected in interviews with medical society officials, legal counselors, management consultants and physicians from around the country.

"It's the hottest thing to happen to us doctors since penicillin," remarked a heart specialist from California.

The tax device is also available to other professional men, such as lawyers and architects, but they do not appear to be utilizing it as widely as doctors because of *problems* peculiar to their professions. However, authorities said the concept might find wider popularity as the practice among doctors became better known.

The Treasury Department, which is alert to this trend and concerned about it, is studying the matter as part of a broad examination of deferred compensation plans. The agency intends to present legislation in 1970 that would seek to outlaw this practice and to deal with what it considers to be other inequities in the tax treatment of retirement plans for employes and the self-employed.

One reason for the doctors' enthusiasm for the professional corporation is illustrated in the case of a New Jersey physician who for years expected his retirement income to be $10,000 a year. He now expects to get $100,000 a year after age 65, without a change in his current standard of living.

The professional corporation, which has been repeatedly ruled legal by the courts despite frequent attacks by the Internal Revenue Service, is the same as any other corporation except that it is made up of several professional men, or even an individual professional man, rather than businessmen. Like most corporations, the professional corporation is a tax-sheltered entity that is in a special, often enviable position come tax time in April.

I.R.S. SHIFTS VIEW

Before 1950, the I.R.S. said that professional men could group together to form associations, or corporations, and that they would be taxed as corporations, which generally pay higher taxes than individuals.

After 1950, however, the I.R.S. changed its mind in view of amendments to its code that had been made in 1942. These changes allowed corporations considerable savings on taxes through corporate pension plans.

Under the tax agency's 1950 decision, professional men could not legally incorporate because, the I.R.S. argued, a professional corporation is inherently different from a business corporation.

In the eyes of the tax agency, the professional corporation had become no more than a lucrative tax dodge, and the agency sought to prove its point in court.

By 1960, the tax agency had not won its case, but it was making the establishment of corporations increasingly difficult for professional men. It did this by conducting special audits, by filing lawsuits and by doing what it could to discourage the trend.

In the last two years, the agency has fought and lost battles in nine district courts and three Federal appeals courts.

The thrust of the rulings was that I.R.S. opposition to professional corporations was "discriminatory" and "patently arbitrary."

On August 8, the door was thrown wide open. The I.R.S., giving up its legal fight, promulgated a new policy that "organizations of doctors, lawyers and other professional people organized under state professional association acts will, generally, be treated as corporations for tax purposes."

Physicians have been attracted to the concept of professional corporations for several reasons, according to doctors, lawyers and medical officials interviewed. One is that many doctors, in the higher income tax brackets, want to save money.

Another is that many more physicians in recent years have been tempted by the advantages of group practice—better hours, better business arrangements and better equipment—and find that incorporation of a group practice offers them the best financial arrangements as well.

Engineers, lawyers and other professional men who might qualify for corporate status have been slower to take advantage of the tax device, several observers said.

"Many lawyers just don't want to fool around with it yet," said a lawyer from Indiana. "They often practice alone and don't want to go into groups, since groups offer the best excuse to needing a corporation."

STATE ESTIMATES

Many engineers in New York State, for example, oppose professional corporations, a legislative adviser from Albany said. "Many people don't feel it's kosher," he said.

Estimates of how many doctors are turning to corporate practice are difficult to make, according to the American Medical Association.

The legal department of the A.M.A. receives dozens of requests each day from physicians asking for advice on incorporation procedures. The association mails them a brochure describing the situation in detail.

Some state medical societies will hazard estimates.

In California, for example, 30,000 doctors were said by officials to be lining up at lawyers' offices after a professional incorporation enabling law was passed in April.

The Indiana attorney general said that there were 121 new professional medical corporations in the state as of a month ago and that 5,000 to 6,000 doctors in the state practiced through corporations. The average size of a corporation is three physicians, and 14 corporations consist of only one physician.

Each state is empowered to pass its own laws regulating corporations and setting minimum standards for their organization. Professional corporations, often called associations, are flourishing in 48 states. New York, Wyoming and the District of Columbia do not allow them.

BILLS FAIL IN ALBANY

The battle to legalize professional corporations in New York is being carried on largely by the state medical society, which will try again next year to get the legislature to pass an enabling law.

In the last year in Albany, two enabling bills were defeated as legislators argued that professional corporations would serve no purpose other than to permit doctors to enrich themselves at the expense of the state and Federal Governments.

In other states, however, lawyers and business management consultants have been doing a thriving business with physicians.

One such consultant is Gene Balliet of Teaneck, N.J., who advises doctors in several surrounding states.

Recently, Mr. Balliet drew up a financial plan for a well-to-do client, a specialist in internal medicine with a subspecialty in ailments of the gastro-intestinal tract. If he incorporates, this physician is advised, he will save $17,280 a year in taxes and will be able to retire 23 years from now on an income of $99,900 a year.

The physician, Mr. Balliet said, is not atypical of many successful doctors found in all parts of the nation.

According to Mr. Balliet's analysis, this doctor would fare better financially next year by incorporating, while still maintaining the private, solo nature of his practice.

After incorporating, the doctor would probably pay more in overhead costs, due to added costs in bookkeeping and accounting. However, he would be able to deduct about 20 per cent of his gross income—free from all taxes—to put toward his retirement.

Over a 23-year period, before the doctor reaches age 65, he could thus amass $1,665,200 in investments, which he could draw upon as retirement income.

If he does not incorporate, the doctor is allowed to invest, tax free, only $2,500 a year of his gross income toward retirement. The $2,500 limit, called the Keogh Plan, is set by Federal law for all self-employed professional men except those establishing themselves as corporations.

TAKE-HOME PAY

The doctor's take-home pay, or the dollars in his pocket after taxes at the end of the year, is less after incorporation than before.

However, taking into account the money he has invested toward his future which is part of his income, he can increase his income from $60,800 before incorporation to $72,850 after incorporation—a gain of more than $12,000.

The A.M.A. Newsletter, in recognizing the advantages of incorporation, said recently:

"A major plus is that corporate practice offers physicians a greater potential economic benefit than any other single element in the financial environment."

The drawbacks of professional corporations, the A.M.A. said, are that the I.R.S. may still oppose professional corporations where it can, that it costs money in legal fees to set up the corporation and that patients may object to being treated by a corporation.

However, some physicians, who have been practicing as corporations for some time, said in interviews that there was no problem in the doctor-patient relationship resulting from the business move.

"My patients don't even know I'm a corporation," said one physician from Skokie, Ill., "and if they did I'm sure they wouldn't care."

There are probably some advantages in professional corporations for patients as well as doctors, according to Mr. Balliet.

Any doctor who has half a million or a million dollars in investments waiting for him at retirement is less likely to raise his fees, Mr. Balliet said. Professional corporations, he added, may serve to hold down medical costs for the welfare of all—doctors and patients alike.

A WEALTHY PHYSICIAN'S INCOME PLAN

[Following is a financial analysis prepared by Gene Balliet of Teaneck, N.J., for a well-to-do medical specialist]

| | Continuing in solo practice | As a corporation |
|---|---|---|
| Gross practice income for 1 year | $176,700 | $176,700 |
| Overhead costs | −$53,000 | −$55,650 |
| Amount deducted for tax-sheltered investment plan | −$2,500 | −$23,950 |
| All forms of insurance deductible | (1) | −$1,297 |
| Net practice income | $121,200 | $95,800 |
| Tax bracket (percent) | 64 | 66 |
| Federal tax paid | $64,180 | $46,900 |
| Personal take-home pay | $57,020 | $48,900 |
| Deductible investments added back to indicate total personal income | +$2,500 | +$23,950 |
| Personal insurance | −$1,297 | (2) |
| Net personal income (total assets) | $60,800 | $72,850 |

Footnotes at end of table.

A WEALTHY PHYSICIAN'S INCOME PLAN—Continued

| | Continuing in solo practice | As a corporation |
|---|---|---|
| Investment projection: Keogh plan to age 65 (23 years); corporate plan (to age 65) | $173,800 | $1,665,200 |
| Retirement income on a 6 percent withdrawal plan (per year) | $10,400 | $99,900 |

[1] Not allowed.
[2] Already paid and deducted.

Mr. LONG. Mr. President, this New York Times article by Sandra Blakeslee discusses the provision involved in the pending amendment as one of the growing bonanzas in terms of tax loopholes.

Some years ago, we had before us the proposal to allow self-employed people to deduct $2,500 or 10 percent, whichever was the lesser, of their annual incomes, to be set aside for retirement. Many of us thought that was a very generous provision. The doctors wanted it, and the lawyers wanted it, and certain other professional people wanted it; and while some of us thought it was altogether too generous, eventually it became the law.

Subsequently someone persuaded the doctors and certain other professional groups that they could have an even greater tax benefit by obtaining the passage of State laws allowing them to set up corporations for the practice of medicine, law, and the other professions.

Corporations, when they set up a retirement plan, are required to have nondiscriminatory plans. They cannot discriminate in favor of highly paid employees. Most corporations have a great many employees covered under their plans, so that the amount of each employee's pension is kept within reasonable bounds by virtue of the fact that benefits must be funded for a large number of employees.

But in the cases where doctors get together and form the kind of corporation that is authorized by these laws, in many instances the physicians are in the overwhelming majority. They are the stockholders of the company, and also account for perhaps 80 or 90 percent of the earnings of all the people working in the corporation. And they have one thing in common: the desire to shelter as much of their income from taxes as possible. Where, under H.R. 10, they can only put aside $2,500 or 10 percent of their earnings, whichever is lesser, under the State laws to which I refer they could put aside a much higher percentage of their earnings before taxes, so long as perhaps the one secretary they might have, or the two or three nurses that they might have, were also included in the plan on a nondiscriminatory basis.

Just to quote one paragraph of the article to which I have referred—and my staff advises me this is sound—

One reason for the doctors' enthusiasm for the professional corporation is illustrated in the case of a New Jersey physician who for years expected his retirement income to be $10,000 a year. He now expects to get $100,000 a year after age 65, without a change in his current standard of living.

Imagine that; he can step up his retirement income from $10,000 to $100,000

a year without any sacrifice in his current standard of living. Uncle Sam is paying for it. As Senators can well imagine, here is a fast-growing tax loophole in the making right now—a vast tax loophole, created by State laws to grant a loophole in a Federal law.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LONG. I yield to the Senator from Tennessee.

Mr. GORE. And then he may draw this amount down so that it is not taxed as ordinary income, it is capital gains income.

Mr. LONG. If he takes a lump-sum distribution, that is true. But even if he draws it down in installments as ordinary income he has a great advantage. When he puts the money aside for retirement, that is deductible, he pays no tax on it. Then, let us say, it sits in a trust for 20 years earning income, so that the principal, perhaps, by that time, has doubled or tripled by the time he wants to draw it down. There is no tax when the income is earned by the trust—he is taxed only when he takes them down. At that time he may be enjoying the benefit of a much lower tax rate available for retired persons. And if a person is over 65——

Mr. RIBICOFF. Mr. President, the Senator makes a most significant point. Most of the officers of corporations have only themselves as an officer of the corporation.

An example is given in the New York Times of doctors setting up these corporations. A plan is drawn up for a practitioner in solo practice in a State, an internist, who makes $176,000 a year.

Under the Keogh plan adopted in 1962, he would retire with an income of $10,400 a year. Under the present plan, as a corporation, we find the same doctor saving $17,280 a year in taxes. However, in addition, with the use of the same plan, in 23 years he has a nest egg of $1,665,000 and he draws a $99,900 a year retirement payment.

Mr. President, I was very much interested when the distinguished Senator from Illinois talked about our needing doctors to take care of the health of our Nation. I assure the Senator that this doctor who is making $176,000 a year is not concerned with the slums or the poor or the people who really need decent health care.

The Keogh plan, adopted in 1962 at their request, to take care of doctors and lawyers was a modest plan. We agreed to it in Congress. It had rules and regulations making it possible for a self-employed person to put away $2,500 a year, or 10 percent of his income, whichever was lower. Now we suddenly find a new gimmick with corporations being formed.

This is not the situation of a clinic that has been established for a long time. This is a doctor who is practicing by himself and forms a corporation. When the patient goes to the doctor, he does not think he is going to a corporation. He is still going to see Dr. Jones.

Dr. Jones has a loophole and one of the best tax shelters ever devised. His income has been set aside. He will be drawing $99,900 a year retirement instead of $10,000. The taxpayers are paying for it.

It is the worst kind of subterfuge and tax dodge. We should not be encouraging this kind of tax avoidance.

The Treasury is studying the problem, but, we should wait for the Treasury report and allow this loophole to remain untouched.

Mr. President, I commend the Finance Committee for closing the loophole.

This is a tax gimmick that is going on all over the country for the benefit of a small group of doctors and lawyers.

Mr. LONG. Mr. President, the Senator is correct. If we are going to close a tax loophole, we ought to do it when there is some momentum in favor of closing tax loopholes.

I am in favor of tax reform. This is a case of laws being passed by State legislatures with no other purpose in mind than the avoidance of Federal tax laws. A State legislator can vote for such a law with a clear conscience. It will not cost the State government one dime. It will cost the Federal Government. He can vote for it for his doctor friends for the purpose of enabling them to avoid Federal taxes.

These corporations are formed for no other purpose than tax avoidance. There is no effective limit on how much money they can shelter from taxation.

Mr. COOK. Mr. President, if what the Senator is saying is true, where did the committee get the figure of $2,500?

Mr. LONG. I am talking about H.R. 10. That is the existing law. That is the limitation for self-employed people. That is how the doctors wanted it, until someone came up with this scheme.

Mr. COOK. Where did the committee get the figure in the bill of $2,500?

Mr. LONG. That is what they wanted and what is the law for a self-employed person. They were self-employed people. They came up here for it. They lobbied for it.

Now they can set aside a lot more than that under this scheme which we are trying to eliminate in the bill.

Mr. COOK. But the distinguished Senator from Connecticut said a moment ago that they could do all of these things.

We in the Senate have a pension plan. And the funds for that pension program come out of our check. It is a little over $230 a month. That means that we pay $2,500 and more into the pension program in a year. We have to invest in it for at least 6 years. I do not know how much the Government puts into it at the moment. It would be less than 3 percent a year. And we are trying to figure how on $2,500 a year this physician that everyone goes to can build for himself a decent pension plan. He cannot build on it at all.

Mr. LONG. We do not get a tax deduction on ours. We pay taxes on the money we put up. That is more than you can say for our doctor and lawyer friends. They have a tax deduction, and from a practical point of view they can put as much more into the plan as they want when they pay taxes on that extra money.

That is not what I am complaining about. I am complaining about putting this money aside without paying one penny in taxes. We pay taxes on the money we put in.

Mr. COOK. Mr. President, the reason I asked the question is that I am trying to figure how with a $2,500 limit on the pension plan they can build up much of a pension.

Mr. RIBICOFF. Mr. President, for many years a leader in the fight was Representative Keogh of New York. At the request of the doctors and lawyers, he fought for a special provision in the tax laws to allow a self-employed person to set aside 10 percent or $2,500 a year, whichever is lesser, from his income, which he could take as a tax deduction in order to build up a pension plan.

This took many years to go through. In 1962, Congress adopted H.R. 10, the Keogh plan, which for the first time allowed doctors and lawyers to have a pension plan of their own.

The pension system enabled a doctor to start building up an estate. If the Senator will follow with me this example that was cited in the New York Times of a plan, that was drawn up for a physician in New Jersey, we will see what happens under H.R. 10.

We have a physician with a gross practice of $176,700. He has overhead cost of $53,000. He has a little more overhead cost if he is a corporation.

He then deducts tax free, his investment plan under the Keogh plan of $2,500 a year. But, when he is a corporation, he can now deduct $23,950 a year. This is a new tax shelter.

Mr. COOK. He can do that.

Mr. RIBICOFF. Under the Fannin proposal, which is now advocated by the Senator from Arizona we would have this tax gimmick prevail. It is not illegal. The Treasury Department has ruled it is proper.

Mr. GORE. Mr. President, the Treasury has lost case after case in the courts until they say they cannot contest it further.

Mr. FANNIN. The Senator is saying that I advocate this. That is not so. The Senator is stretching the facts.

Mr. RIBICOFF. I say the Senator is trying to permit it to remain as it is at the present time.

Mr. FANNIN. Until we have hearings and treat everyone alike.

I am just asking for the same treatment for a professional corporation that is given everyone else, other corporations. I am not asking for any special privileges.

Mr. RIBICOFF. Not special privileges, but I am talking about the thrust of the Senator's proposal as against the thrust of the committee proposal, and I am comparing them.

Mr. FANNIN. The committee proposal is discriminating against one group.

Mr. RIBICOFF. No, I do not think the committee proposal is discriminating against anybody. The committee proposal wants to plug a loophole before it spreads like wildfire, all through America.

There is a paragraph here that, in California, officers said 30,000 doctors were lining up at lawyers' offices after the Professional Corporation Enabling Act was passed in April.

Mr. FANNIN. How many corporations do we have in the United States?

Mr. RIBICOFF. I do not know. Hundreds of thousands.

Mr. FANNIN. That is correct.

Mr. RIBICOFF. But I do not think we should be in a position, frankly, of giving doctors and lawyers this tremendous loophole.

Mr. FANNIN. Does the Senator favor passing measures without having hearings, without having departmental reports? Does he think it is fair and equitable to pass measures on that basis?

Mr. RIBICOFF. I think there is collective wisdom in the Senate of the United States, and I think that the collective wisdom of the Senate in many instances is superior to that of a bureaucracy or a department. I do not hesitate to have the Senate initiate the legislative process. What has been wrong with the legislative process over the last 30 years is that the Senate has failed to take the initiative and has waited, hat in hand, for a decision to be made at the other end of Pennsylvania Avenue.

Mr. FANNIN. Does the Senator think that we are prepared to pass judgment on matters with which we are not familiar, with which we can become more familiar by getting the departmental reports, by getting information, and by giving the people involved an opportunity to testify?

Mr. RIBICOFF. Yes, I do. I think that the Senator from Arizona, the Senator from Louisiana, the Senator from Tennessee, and I have sufficient knowledge and experience that we do not have to apologize to someone who is in the Treasury Department for making a decision. Members of the Treasury Department and even the Secretary of the Treasury, have only been there 5 or 6 months. I think that our collective experience and wisdom is equal to theirs. I do not hesitate to take the initiative in the legislative process, and I hope the day never comes when the Senate fails to take the initiative.

Mr. GORE. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. GORE. The distinguished Senator from Arizona indicates that the committee is trying to discriminate against professional corporations. As a matter of fact, the committee has a provision in this bill to put the same limits on subchapter S corporations, small business corporations.

Mr. FANNIN. Partnerships.

Mr. GORE. Similar to what it recommends for professional corporations. So, instead of the committee discriminating, the Senator from Arizona would discriminate against small business corporations by providing for so-called professional corporations a kind of tax benefit for retirement which is denied to the small business corporations.

Mr. FANNIN. They have the privilege of electing how they are going to be taxed. They have the privilege of making a determination. We are not giving the same privilege.

I am not talking about what should be done. I am talking about fairness and equity in permitting the people involved to come before us and testify and then getting departmental reports, so that we can evaluate.

Mr. GORE. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. GORE. I rose to make this comment because it was the distinguished Senator from Arizona, himself, who raised the question of discrimination. Discrimination is not involved in the provision in the committee amendment as between professional corporations and subchapters corporations. The discrimination would be worked if the amendment of the distinguished Senator from Arizona should be adopted.

Mr. COOK. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. COOK. First, let me say that I do not mean to disagree with the Senator from Tennessee. One has an election as to whether he wants to go under section 401 of the Internal Revenue Code or under chapter S, and I think it would be found that the same small corporation would elect to go under 401.

I should like to make one thing clear. When we talk about the fact that, somehow or other, it is like Senator PASTORE's poor widow who has to work in a grocery store or a department store, this just does not apply to a doctor. If he elects to have one of these programs under section 401, is it not true that he makes an election and that he has to file a qualified pension plan with the Department, and that it not only applies to the doctor but also to everybody else who works in his office? It applies to the nurses and to the secretaries. It applies to engineering firms and their employees. It applies to law firms and their secretaries. It does not apply to the individual alone.

Mr. RIBICOFF. That is correct. But there is a great difference in how this operates, because there is a sense of balance under the Keogh plan. I will cite the difference, with the same doctor.

Under the Keogh plan, which was passed in 1962, the investment projection in 23 years for the same doctor with a lucrative practice of $173,800, would give him a retirement income, on a 6 percent withdrawal plan, of $10,400 a year. But under the present corporate plan, the same doctor, with the same income, would have an investment projection of $1,165,200, with a retirement income of $99,900 a year. This is a great variable. The nurse who works there is not going to receive $99,900. The nurse who works there will probably retire at an income of $4,000, $5,000 or $6,000, depending on how many years she has worked for him.

What we have here is a situation that is going like wildfire, and we are trying to prevent a loophole from becoming larger and larger until we find out the Treasury's program to treat all retirement plans, which they do not have.

What we have here is a discriminating feature, because not every State has the same type of incorporation laws. Not every doctor is incorporated, not every lawyer is incorporated, when they are incorporated it is not a true corporation; because, basically, doctors still have to have ethical concepts; they are still personally liable. They do not have corporate liability.

Something completely false has been engrafted on our corporate system—not a true corporation but just a shadow corporation, taking advantage of a tax loophole gimmick.

Mr. President, our system of progressive taxation on higher incomes has been generally accepted for several generations.

But this system crumbles when a high income bracket taxpayer is permitted to take 20, 30, or 40 percent of his income which he earns in one year and defer it in such a way as not to pay any taxes until a much later date when he is in a considerably lower tax bracket.

The whole concept of deferring large chunks of income is contrary to the theory of our tax laws. Deferrals can only be used by people with high incomes. The vast majority of taxpayers must use all of their current income to meet current expense.

In 1962 Congress gave careful consideration to the area of allowable income deferrals for self-employed people. At that time the Congress set clear guidelines for future policy. These guidelines are known as the H.R. 10, or Keogh, plan.

Since that time a great many professional people have simply circumvented these guidelines by establishing professional corporations. There is no doubt that the major if not only motivation for these corporations was the tax angle to escape from H.R. 10 guidelines. No other basic change is made. These people are still self-employed. Often their clients do not know they are dealing with a corporation.

As a result, doctors, lawyers, engineers, who remain basically self-employed are not subject to the law for the rest of the self-employed. These people have been able to deduct tremendous percentages of their current income tax free.

The tax savings have been enormous. For instance, the professional with a net income of $100,000 who previously could deduct only $2,500 under the Keogh plan can, by simply incorporating, be able to deduct say $25,000. This permits him to decrease his taxes by over $15,000.

In only 10 years' time this man will be able to set aside a question of a million dollars—60 percent of which is tax money when he escaped from paying.

Mr. President, the Finance Committee studied this matter very carefully. It has recognized that the provisions of the bill may create a disparity among professionals and the corporate executive. But it has also recognized that the Treasury Department is at this moment carefully studying this area and will propose legislation to deal with these problems in the very near future.

But this Treasury study is no reason to delay closing off this loophole used by professional persons who are still essentially self-employed people.

Mr. LONG. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. LONG. Let us assume two doctors get together and form themselves into one of these professional corporations, set up a retirement plan, and put 25 percent

of the money they make into this tax shelter retirement plan. They can include in the plans, let us say, a 10-year vesting provision. Then, having set aside 25 percent of each nurse's salary for the retirement plan, if a nurse quits before the end of 10 years, they can use the amount they put in to fund her pension, to fund the other pensions including their own.

Mr. RIBICOFF. I quote from the AMA newsletter:

A major plus is the corporate plan which offers physicians a greater potential economic benefit than any other single element in the financial environment.

Mr. GORE. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. GORE. The irony of this debate is illustrated by the fact that last evening the distinguished President of the United States indicated a possible veto of this bill, for one reason, that it provides a 15-percent increase in the social security benefits——

Mr. COOK. The President did not say that last night.

Mr. GORE. I listened.

Mr. COOK. They asked him if he would veto the bill under the circumstances, and he said, "Yes." He did not expand. He did not say what the reasons were.

Mr. GORE. He did not say "yes."

Mr. COOK. He said, "No," that he could not support it.

Mr. GORE. As I understood the question—and it is in the newspapers today—the reporter rose and asked the President if he could sign the tax bill if it contained a 15-percent increase in social security benefits and an $800 personal exemption. He gave a one-word answer—"No."

Mr. COOK. The Senator does not have any illusions about the other things done in this bill, has he?

Mr. GORE. The irony of this is illustrated by the fact that the President is talking about vetoing this bill because it provides a meager personal exemption of $800 and a 15-percent increase in social security benefits. Social security benefits presently average only in the neighborhood of $150 a month and the 15 percent increase would raise this by less than $25 per month. Here we are talking about tax deductions for retirement systems running into hundreds of thousands of dollars a year, and then, an amendment is offered to strike it out. I suppose the President would sign the bill if we did that.

Mr. LONG. The Treasury opposes our doing anything about this fantastic loophole until we spend a year studying it.

Mr. FANNIN. Mr. President, that is not true. They said they will take it up all together.

Mr. RIBICOFF. Mr. President, I am amazed at where this discussion is going. Since when does the Senate depend for its decision on what any secretary has to say? What has hurt Congress is that we have forgotten there are two ends to Pennsylvania Avenue, one end where the President is, and the other end where we are. We should look at legislation and not wait for what the Treasury, the Department of Interior, or the Department of Commerce sends here. That is why we have debates. There is not a man here who did not come here with a great deal of background and experience in life and in Government. I do not defer to anyone in the agencies in my judgment as to what we should do. We can study the problems and we are qualified to act.

Mr. LONG. Mr. President, we have in this bill what is known as section 311. That was not the subject of the hearings. An article appeared in Forbes magazine that pointed out a device that insurance companies and others were relying on. I believe the Senator from Delaware dug it out and said "Look at this. It is awful." We asked the Treasury Department what they thought about it. They said corporations other than insurance companies also use that device.

The Treasury Department fought this device, but the courts were deciding the lawsuits in favor of these corporations. Finally the Treasury Department gave up.

We looked at the situation and decided to act. The Treasury Department did not speak, but they know something has to be done about it.

If they are not going to make doctors and other professionals pay taxes, how are they going to make others? The committee thought the doctors should pay taxes.

Mr. RIBICOFF. And the lawyers.

Mr. COOK. Mr. President, there is one point I would like to make to the Senator from Louisiana. I do not think he is just talking about doctors. I am not a doctor, and I could not get to be one, anyway, I expect. You could have the same situation if plumbers got together, and I suspect some of them have 401 plans. It could be a tile man or anybody else, if they are not a corporation. They could qualify under this if they got approval. This is not just professional groups of doctors and lawyers. I think it should be pointed out that is true under 401 pension plans, if you file with the Internal Revenue Service and get approval.

I recall talking to the Senator from Connecticut yesterday. We were talking about social security provisions. I gave an example. In the Senator's mind it was an example of extremes. I would say the example of the doctor with a pension plan under 401 who gets $99,900 a year—I am sure the Senator would admit it—is an extreme.

Mr. RIBICOFF. I would say that basically the medical profession is the highest paid profession in the country at the present time. The plumber does not earn $100,000 a year or $150,000 a year.

Mr. GORE. Mr. President, before the Senator leaves the Chamber I would like to clarify one matter. May I have the attention of the Senator from Kentucky?

Mr. COOK. I gave the Senator the article. I read it.

Mr. GORE. Mr. President, the Senator from Kentucky states "if they obtain approval." That is what the law suits have been about. The Internal Revenue Service has lost all the cases. Therefore, it is no longer attempting to enforce the regulations.

Now I wish to read to the Senator the question and answer to which reference was made earlier. The question asked the President at the news conference last night was:

Q. Sir, if the final version of the tax reform bill now pending in Congress includes the Senate-adopted $800 exemption provision and the 15 percent Social Security increase, can you sign it?

A. No.

Mr. COOK. I would hope the Senator would state for the RECORD that I gave him the article.

Mr. GORE. I appreciate it very much. However, it illustrates this point:

We have been debating for an hour and a half a reasonable provision in the tax bill to put some reasonable limit on tax deductions for personal corporation retirement systems when the President is threatening to veto the bill because we gave a 15-percent increase for the old people trying to live on social security.

Mr. FANNIN. Mr. President, I ask unanimous consent that the names of the Senator from Kentucky (Mr. COOK), the Senator from Colorado (Mr. ALLOTT), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oklahoma (Mr. BELLMON), be added as cosponsors of the amendment.

The PRESIDING OFFICER (Mr. ALLEN in the chair). Without objection, it is so ordered.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. FANNIN. I yield 2 minutes to the Senator from Texas.

Mr. TOWER. Mr. President, I was impressed with the talk about Congress acting independently of the executive departments. I seem to recall that a few days ago when the President complained that the legislative program was not moving rapidly enough through Congress that the response of congressional leadership was that there were many bills on which they had received no reports from executive departments and agencies. I think that is a rather moot point here.

I am concerned about what was brought out in the testimony. I would like to ask the Senator from Arizona the extent to which abuses under H.R. 10 were brought out in testimony before the committee. Were these abuses catalogued or inventoried? How many appeared before the committee?

Mr. FANNIN. We did not have testimony before the committee.

Mr. TOWER. No testimony on this?

Mr. FANNIN. No testimony and no departmental report.

Mr. TOWER. I find that shocking, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. HRUSKA. Mr. President, will the Senator yield to me for 3 minutes?

Mr. FANNIN. I yield 3 minutes to the Senator from Nebraska.

Mr. HRUSKA. Mr. President, I would not take a position on any subject brought before the Senate simply because a Secretary or anybody else said they had reached a particular conclusion. I do not think that is enough. I would like to know his reasons for that conclusion.

Mr. President, I rise to support the Fannin amendment for two reasons. First, there were no hearings, and sec-

ond, the Treasury is opposed for good and substantial reasons.

LIMITATIONS ON CONTRIBUTIONS TO PENSION AND PROFIT-SHARING PLANS

Mr. President, the Treasury is in opposition to sections 531 and 901 of the Tax Reform Act, which would impose limitations on contributions on behalf of shareholder-employees to qualified pension and profit-sharing plans of subchapter S corporations and professional service corporations. Its opposition results from the belief that an overall review of the entire deferred compensation area is necessary but that piecemeal amendments are not an effective way of dealing with the problems in this area.

During the past several months, I am informed, the Treasury has been studying intensively this area, with a view to submitting comprehensive recommendations to the Congress early next spring. One conclusion of this study is that the distinction in present law between corporations and unincorporated businesses is an unwise one. Not only is it questionable from the standpoint of tax policy, but it also has important nontax implications. This distinction is undoubtedly responsible for the enactment of special legislation in 47 States permitting professional persons to practice their professions in corporate form. While most of this legislation contains safeguards intended to maintain the traditional relationship between the professional and his client, it is not certain that this result will obtain, and this relationship may be altered.

One of the questions the Treasury is studying is the desirability of limits on contributions to or benefits under pension and profit-sharing plans, the form in which these limits should be cast, the effect of contributions or benefits in excess of these limits. Thus, the matter with which sections 531 and 901 deal will be specifically covered in the recommendations to be made next year.

With respect to section 531, it should be noted that this provision was recommended as part of a comprehensive revision of subchapter S of the Internal Revenue Code. This revision would have simplified subchapter S substantially and made the tax treatment of corporations electing its benefits more similar to that of unincorporated businesses. In this context, it was not unreasonable to extend certain of the limits on retirement plans of unincorporated businesses to retirement plans of subchapter S corporations. Whatever the merits of this argument, it clearly does not now apply since the comprehensive revision of subchapter S recommended by the Treasury was not adopted.

The Treasury Department supports the deletion of sections 531 and 901 from the Tax Reform Act. At a minimum, the Treasury believes that the effective dates of these provisions should be delayed for 1 year to permit consideration of the Treasury's recommendations in the deferred compensation area.

Mr. President, this Senator addressed a letter to the Treasury Department concerning these two sections, and under date of November 21, Assistant Secretary Edwin S. Cohen, directed a reply to me, and I ask unanimous consent that at the conclusion of my remarks the text of that letter be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HRUSKA. Mr. President, among other things, here is what the letter says:

We believe that the distinction in present law between qualified retirement plans of self-employed persons and corporate plans generally is unwise and should be eliminated.

The elimination of this distinction is one of the objectives of the review which we have undertaken of the entire deferred compensation area. The accomplishment of this objective may involve the imposition of some form of limitation on contributions or benefits for high-paid corporate employees, at least for shareholder-employees, and the adoption of uniformly applicable requirements for vesting, eligibility, and other matters.

Mr. President, it seems to me that the reasons for the Secretary's conclusions are what are important. He is asking that this matter be deferred until a time that will be more suitable and in keeping with the rules or logic and of determination of sound, public policy.

Thus, I would urge that the amendment be agreed to achieve this objective.

Failing its adoption, Mr. President, I intend to offer an amendment which would make the subchapter S and the professional corporation sections applicable for tax years beginning after December 31, 1970. In the interim, the Treasury Department can submit to the committee and to the Senate the results of its study; we can then have hearings and proceed in a logical and deliberate fashion, which will be much more in keeping with the determination of policy in such an important area.

EXHIBIT 1

THE DEPARTMENT OF THE TREASURY,
*Washington, D.C., November 21, 1969.*

Hon. ROMAN L. HRUSKA,
*U.S. Senate, Washington, D.C.*

DEAR SENATOR HRUSKA: You have requested a statement of our position on the Senate Finance Committee action extending the limitations on contributions now applicable to retirement plans of self-employment persons to retirement plans of professional service corporations.

As a general matter, the Treasury Department is opposed to the imposition of limitations or requirements on retirement plans solely because of the type of business engaged in or the form in which business is conducted. We believe that the distinction in present law between qualified retirement plans of self-employed persons and corporate plans generally is unwise and should be eliminated.

The elimination of this distinction is one of the objectives of the review which we have undertaken of the entire deferred compensation area. The accomplishment of this objective may involve the imposition of some form of limitation on contributions or benefits for high-paid corporate employees, at least for shareholder-employees, and the adoption of uniformly applicable requirements for vesting, eligibility, and other matters. Action in these areas is consistent with our basic objective in this area, the formulation of a statutory framework which will encourage the development of a strong private retirement system, enabling us to decrease our reliance on the public system.

With regard to the particular matter under consideration, we believe that it would be preferable to defer action on retirement plans of both professional service corporations and so-called subchapter S small business corporations (also affected by the Tax Reform Bill) until next year when we expect to present comprehensive legislative recommendations concerning all employee benefit plans. At the very least, any provisions in the Tax Reform Act extending the limitations of present law applicable to self-employed retirement plans to retirement plans of subchapter S corporations or professional service corporations should be effective only for taxable years beginning after December 31, 1970. This postponement would provide sufficient time for us to complete our study and develop our recommendations and for the Congress to act upon them. Congress could act with the benefit of the views of the groups interested in corporate plans and the views of self-employed persons concerning our recommendations. This limited postponement would at the same time serve to make clear the intention of the Congress to act quickly in providing the much needed reforms in this area.

I hope that this expression of our views will be helpful to you in your consideration of this matter.

Sincerely yours,

EDWIN S. COHEN,
*Assistant Secretary.*

Mr. LONG. Mr. President, do I understand correctly that the Senator is suggesting we should make the effective date of the provision in the committee bill December 31, 1970?

Mr. HRUSKA. Yes. If the Fannin amendment is not agreed to, I intend to offer an amendment which would achieve that purpose.

Mr. LONG. In the spirit of compromise, I would be willing to agree that we would make the date in this proposal—and I should like to ask that the Senator from Arizona (Mr. FANNIN) be alerted about this matter—I would be willing to agree that we make the date of the provision we are discussing December 31, 1970. It will be a lot easier to close this loophole after we conduct the hearings and proceed with regard to this matter. All lawyers know that that will have to be passed on to close the loophole—something like getting the genie back inside the bottle, after Congress has reasonably agreed to it, to permit this claim to continue. This would be a better way to handle it when, next year, we finally agree on what would be in order to take effect, rather than acting without seeing what the situation would be.

Mr. FANNIN. I appreciate what the Senator is talking about.

Mr. LONG. We would continue existing law until December 31, 1970, and at that point the amendment would go into effect unless we have agreed to some other alternative between now and then. I think the Senator would agree that something must be done about this. The Treasury would be the first to agree that something must be done. It seems to me that if we are going to have to vote, in the long run, to plug a loophole of this kind, something must be done between now and the end of next year, because if nothing is done about the matter, the committee amendment would go into effect.

Mr. TOWER. Mr. President, I would urge the Senator from Arizona not to

accept that, because I think many of us feel that we should hold hearings before we positively enact legislation on this subject. Within 1 year's time, that can be done. Therefore, I would not like to see this locked into the law, on the basis of what we think may or may not be right.

Mr. FANNIN. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Arizona has 36 minutes remaining and the Senator from Louisiana (Mr. LONG) has 26 minutes remaining.

Mr. FANNIN. Mr. President, I yield such time to the Senator from Texas as he may desire.

The PRESIDING OFFICER. The Senator from Texas is recognized further.

Mr. TOWER. Mr. President, therefore I urge the Senator from Arizona not to accept the proposal offered because I think we have adequate time to hold hearings, and to consider and enact constructive legislation based on the accumulation of the appropriate facts in the matter.

Mr. FANNIN. Mr. President, I thank the distinguished Senator from Texas. Let me say to the distinguished chairman of the committee that I appreciate very much his thoughts, but there are a number of cosponsors that I cannot contact immediately and therefore would like to defer the Senator's proposal at this time.

Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. LONG. Mr. President, from time to time, we have seen articles or cartoons to the effect that the Senate Finance Committee was whittling away at the bill. However, for those who have doubts about the ability of the majority of members of the committee to plug up loopholes when we find them and do what should be done in a certain area, I believe we have a good example of it right here.

The vote was 12 to 4 in the committee. One can say that we did not have hearings, but on the other hand, we did not have the opportunity of doctors and other professional groups bringing pressure on members of the committee who voted on this matter, before they voted on it.

The balance on the committee is about the same as in the Senate, and when we looked into the matter, we decided, by a vote of 12 to 4, that the loophole should be closed.

If legislation is desired in the future, we can have it. The Treasury can bring in its recommendations. But the Treasury's recommendations should come in against a loophole that has been closed, not against a newly created loophole that has gone into effect, because when we have people enjoying a tax advantage never intended, it is very difficult indeed to take it away. I submit it is better to close the loophole in the beginning rather than to allow people to create at all these plans authorized by State legislatures, and then say they are being discriminated against when Congress does what it should do.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. GORE. I think it would be interesting to see how many Senators who voted against increasing the exemption for a dependent child from $600 to $800 will now vote to give tax deductions for retirement plans that are without limit. The Senator from Connecticut read into the RECORD the example of a deduction of $23,950 to provide a retirement plan of $99,900 a year.

The pending amendment by the Senator from Arizona is to continue the legality of these kinds of retirement plans and deductions for those kinds of plans. So it will be interesting to see how many Senators who opposed raising the personal exemption for a dependent child from $600 to $800 will now vote to continue tax deductions for such retirement plans as these.

Mr. LONG. May I say it would be even more embarrassing, if we are going to look at the record, to see how many could not vote for a social security increase but who will now vote that a doctor can take a $100,000 deduction to achieve that result. So, just comparing rollcall votes to see how it would be embarrassing, that might be equally worthy for comparison purposes.

Mr. GORE. But they say "fiscal responsibility."

Mr. COOK. Mr. President, I think if we are going to go into the record to see who voted for something and who voted against something, I think we should show for the record that the personal exemption was $500 in 1948 and it went to $600 in a Republican Congress. The President was President Truman. I think the record should likewise show that the now Senator from Tennessee was a Member of the Congress who voted against it, and when the President vetoed the bill, he voted to sustain the veto. So I think if Senators are going to show how one voted yesterday and today, we ought to have the full record.

Mr. LONG. Mr. President, I point out that under this tax avoidance device one can get a tax shelter and not pay a tax on part of his earnings until he retires and then pay the tax only as he draws down the money for his personal use. He will be in the more favorable situation which exists when he retires at age 65. He could even draw it down in a lump sum settlement, at capital gains rates.

Mr. FANNIN. Mr. President, this amendment does not change present law. All we are asking is to have hearings and to have departmental reports, and take it up in proper order.

Mr. LONG. All I am saying is that one does not need to look at this situation very long to see that those affected have a big tax avoidance device. Every defense against that argument has been a procedural defense rather than a defense on the merits. This is one of the big tax loopholes we discovered while we were considering this bill. This and section 311 were two big tax loopholes I was not apprised of until we commenced the executive sessions. I am happy to say for the Finance Committee that, having seen them, the committee then closed them.

Mr. FANNIN. The Senator understands the difficulty of arguments from the standpoint of news stories and news programs. The Senator made reference to a news article. There are other reports in the press we could use, but the Senator knows we are not going to get bogged down that way.

Mr. LONG. The difference is that no one in the Treasury says this is not a big loophole, nor would anyone on the staff or on the committee argue that this is not a very big loophole and should not be closed. Even the Treasury says it should be closed sometime.

Mr. FANNIN. But it should be done in an equitable, orderly manner. Fine, we go along with that.

I do not think it is necessary to argue further about it. We could talk all day. Is the Senator ready to yield back the remainder of his time?

Mr. CANNON. Mr. President, will the Senator yield briefly to me?

Mr. FANNIN. I yield.

Mr. CANNON. Mr. President, in almost all of the States today, doctors, lawyers, engineers, accountants, and other professional individuals have created corporate entities for the benefit of themselves and their shareholder-employees.

The right to establish professional corporations was won in a series of court actions contested by the Commissioner of Internal Revenue.

The Keogh bill (H.R. 10) gave self-employed individuals the right to establish pension plans not to exceed 10 percent of earned income or $2,500, whichever is less.

That measure helped the self-employed to lay away a nest-egg toward the retirement years.

Yet, the allowances under Keogh are less than those permitted to corporations.

Now, these self-employed professionals have the privilege of setting up new corporations and should also be able to enjoy the privilege of contributing more generous amounts to pension plans.

Corporations should be treated alike without discrimination against any one kind of corporate entity.

I support this amendment.

Mr. LONG. Mr. President, if there is no further request for time, I am glad to yield back my time.

Mr. FANNIN. Mr. President, I yield back my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Arizona. The yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. TYDINGS (after having voted in the negative). Mr. President, on this vote I have a pair with the distinguished Senator from Arizona (Mr. GOLDWATER). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withdraw my vote.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Indiana (Mr. HARTKE), the Senator from Mon-

tana (Mr. METCALF), the Senator from Georgia (Mr. RUSSELL), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

I further announce that, if present and voting, the Senator from Arkansas (Mr. FULBRIGHT) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The pair of the Senator from Arizona (Mr. GOLDWATER) has been previously announced by the Senator from Maryland (Mr. TYDINGS).

The result was announced—yeas 65, nays 25, as follows:

[No. 198 Leg.]

YEAS—65

| | | |
|---|---|---|
| Allen | Eastland | McClellan |
| Allott | Ellender | Miller |
| Baker | Ervin | Moss |
| Bellmon | Fannin | Murphy |
| Bennett | Fong | Packwood |

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Tydings, against.

NOT VOTING—9

| | | |
|---|---|---|
| Anderson | Goldwater | Mundt |
| Bayh | Hartke | Russell |
| Fulbright | Metcalf | Symington |

So Mr. FANNIN'S amendment was agreed to.

Mr. FANNIN. I move to reconsider the vote by which the amendment was agreed to.

Mr. HRUSKA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REHABILITATION EXPENDITURES ON LOW-INCOME HOUSING

Mr. GORE. Mr. President, I send an amendment to the desk and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. GORE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

Page 389, line 15, after the period insert "An election may be made under this paragraph with respect to any rehabilitation expenditures only by the owner of the low-income rental housing with respect to such expenditures are incurred."

Page 432, line 12, strike out "Every" and insert "Except as otherwise provided in this subsection, every".

Page 433, line 6, after the period insert: "An election may be made under this subsection with respect to any certified pollution control facility only by the owner or lessee of the plant in connection with which such facility is used."

Page 441, lines 5 and 6, strike out "Every person, at his election" and insert "A taxpayer which is a domestic common carrier engaged in the furnishing or sale of transportation by railroad and subject to the jurisdiction of the Interstate Commerce Commission, at its election".

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. GORE. I yield.

## PROGRAM

Mr. GRIFFIN. Mr. President, while most of the Senators are in the Chambers, I should like to inquire of the distinguished majority leader if he can tell us where we go from here.

Mr. MANSFIELD. I will endeavor to answer the query raised by the distinguished acting Republican leader.

It seems to me that the overwhelming majority of the Senate is prepared to remain until a reasonably late hour this evening—not everyone, but the majority. I have discussed this matter with the chairman of the committee, the distinguished Senator from Louisiana, and the ranking Republican Member, the distinguished Senator from Delaware; and it seems to be the feeling that, if at all possible, we ought to remain and get to third reading. If we can, then we will vote on the bill itself tomorrow. There would very likely be a motion to recommit. There would also be an hour referred to by a distinguished colleague of mine in this body as the "alibi hour." [Laughter.] I am sure that the "alibi hour" would be applicable to both sides.

To get down to the answer to the question raised, and keeping in mind the President's promise to call us back the day after Christmas if we do not complete the work which he has laid out for us—rather late, I must say—I would point out that when we get through with the pending business, we have a District of Columbia appropriation bill and a Department of Transportation appropriation bill, a foreign aid authorization, a foreign aid appropriation bill, a Department of Defense appropriation bill, a Labor-HEW appropriation bill, a number of conference reports, and some other proposed legislation to consider which is of vital importance to the people of this country.

So what it adds up to is that the Senate is really under the gun so far as proposed legislation is concerned, and I would hope that the same spirit and the same understanding and the same degree of coordination which showed itself last week and so far this week would continue the rest of this week and the week or so after that. But if we are going to do that, I first will have to ask one question: How many Members have amendments which they intend to offer to the present bill?

I count 10.

Mr. GORE. Do not count any further.

Mr. COTTON. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. COTTON. I should like to say to the majority leader that for several days I have had an amendment at the desk, which has been printed. I was willing to agree to 10 or 15 minutes on a side. However, I have sought recognition again and again. I have been unable to get recognized, while the same Members put in amendment after amendment after amendment. Enough time has elapsed now so that the Secretary of Commerce has found out about my amendment and has sent a letter to the distinguished chairman of the committee and to me, demanding that my amendment be defeated. So I am not prepared to deal with it in 10 minutes, because it will take me 15 minutes to pay my respects to the distinguished Secretary of Commerce. [Laughter.]

So I hope I will have a chance, and I intend to have this very brief and limited debate on an amendment about which many of us feel deeply. My distinguished colleague from New Hampshire is a cosponsor of the amendment with me, as are both Senators from South Carolina. It has to do with jobs in this country, a subject that has not been of apparent concern downtown, and I want an opportunity to make a good Democratic speech, and I am sure the majority leader will give me that opportunity.

Mr. GORE. I will yield to the Senator from New Hampshire right now.

Mr. MANSFIELD. The Senator has been most patient for more than a week; that I know of. May I say that what he has just said reinforces the speculative reports which have appeared in the newspapers concerning the excellent liaison between the administration downtown and the Members here. [Laughter.]

Evidently, we cannot get to third reading now, but I think we had better continue as long as we can. It is my understanding that with respect to his amendment, the distinguished Senator from Tennessee has discussed with the manager of the bill the possibility of a 5- or 10-minute limitation on each side; that the distinguished Senators from Texas and Alabama are going to offer an amendment following, and that they are not averse to a reasonable limitation of time.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. TOWER. I have not had a chance to discuss this matter with Senator SPARKMAN. We were prepared tonight, and we were under the impression that our amendment would be the last substantive amendment to come up, and I see that there are some others. This amendment deals with some real estate items in the bill. It is a rather extensive

amendment, dealing with appreciation. A number of Senators have expressed an interest in it, and perhaps we can bring it up tonight; but it seems doubtful that we would get to vote on it. It might be better to vote on it tomorrow.

Mr. MANSFIELD. A pattern has developed in the Senate: the longer you take, the more amendments develop at the desk.

Mr. TOWER. I was ready to proceed.

Mr. MANSFIELD. I do not blame the Senator.

Mr. LONG. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. LONG. May I say to the distinguished Senator from Montana that the longer he keeps Senators up at night, and the sooner he brings them in in the morning, the less time they have to think up more amendments. [Laughter.]

Mr. MANSFIELD. The Senator knows better than that.

## ORDER FOR RECESS TO 9 A.M. TOMORROW

Mr. MANSFIELD. Since the Senator has raised the matter, Mr. President, I ask unanimous consent that when the Senate completes its business tonight, it stand in recess until 9 o'clock tomorrow morning.

There will be no morning hour, no morning business. Evidently, the real-estate amendment will be pending.

I would hope that other Members would be cooperative and would get their amendments to the desk this evening, so that we can clear away as many as possible.

Remember, it is your Christmas, as well as mine. [Laughter.]

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. GORE. Mr. President, in the spirit of cooperation with the majority leader, if the Senate will hear me for 5 minutes, I will not ask for a rollcall vote and will not ask for any further time.

Mr. President, may we have order?

The PRESIDING OFFICER (Mr. McGOVERN in the chair). The Senate will be in order.

Mr. LONG. Mr. President, I ask unanimous consent that the debate on the amendment be limited to 10 minutes, 5 minutes to the Senator from Tennessee and 5 minutes to the manager of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORE. May we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. LONG. Is there objection? Twenty minutes, for that matter.

Mr. GORE. I will take 5 minutes, and the Senator from Louisiana can take 5 minutes, and we can yield back the remainder of our time.

Mr. President, I shall not ask for a rollcall vote, but I cannot in good conscience let the loophole toward which this amendment is directed——

Mr. MILLER. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. GORE. Mr. President, I offered the amendment out of a sense of duty. I am not going to ask for a rollcall vote. The Senate can work its will. The provisions of the pending bill provide a loophole for investor syndicates.

Earlier today, the Senator from Delaware and the Senator from Tennessee offered an amendment to deny the unjustified tax benefits in the bill to railroads, rehabilitation costs of certain housing, pollution control machinery, and to investment syndicates.

This amendment leaves all the benefits of rapid amortization to the owners of the railroads, the houses, and the factories; but it denies the benefits to investor syndicates.

I wish to briefly say how this would operate for the investment syndicates. Let us suppose that a railroad wished to buy or acquire rolling stock costing $1 million. It is not in a profitable position but it has credit at the bank. Therefore, the rapid amortization provision of the pending bill would be of no value to that railroad, but the financier might have a few friends in the 70-percent bracket. They form a combine and establish an investment syndicate to handle the deal. In one 5-year period the investor syndicate could realize a tax profit of $490,000 on $1 million of rolling stock.

The bill makes that possible. It establishes such tax preferential treatment. The same would be true of rehabilitation of housing; the same would be true on pollution control equipment.

I wonder if the Senate really wants to do that. I shall not take up more time. I urge that these provisions be stricken purely for investor syndicates. In my view it is not right.

Mr. LONG. Mr. President, the Senator directs his amendment to all of the 5-year amortization provisions, but as a practical matter, the only real impact would have to do with railroad rolling stock because that is an item on which someone could make money. No one makes money out of pollution abatement devices or on the rehabilitation of low-income housing units. But the bill wisely provides—and the Treasury recommended this to us; it was not the committee's idea—that the 5-year amortization provision should be drawn so that those railroads which are not making money, but losing money, could acquire rolling stock as well as those railroads which are in a profitable position.

The only way that railroads which are losing money could benefit from the tax advantage would be to permit them to make a contract with someone who would acquire the equipment, be it rolling stock or locomotives, and then lease that to the railroads.

The favorable tax treatment provided for the railroad is helpful and advantageous to the person who buys the equipment and that will reflect itself in a lower lease price when that equipment is leased to the railroad. If we do not do it in this way, there is no way that a railroad that is losing money could benefit from the provision.

Mr. President, more than one-half of the railroads in this country today are losing money, so if we do not vote to permit railroads to reach an agreement with someone who, in turn, enjoys the amortization provision and can pass the benefit on to the railroads under his lease, then the one-half of the railroads that need it most cannot take advantage of the amortization provision with regard to railroad rolling stock.

Senators have two choices. They can either vote with the committee, as the Senate did vote overwhelmingly with regard to the amortization provision, or they can support the Senator and deny this help to one-half the railroads in this country which need the benefit most.

Mr. GORE. Mr. President, the Senator just stated correctly that no benefit of the tax deduction could flow to a railroad that does not owe any tax. Therefore, what is the result here? By the provision in the committee bill we would be creating new tax preferential treatment of high-bracket-income taxpayers who form a syndicate, and it will be they who reap the benefit which we are proposing to provide for railroads.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point an example bearing on this matter.

There being no objection, the example was ordered to be printed in the RECORD, as follows:

EXAMPLE

A railroad wants $1 million worth of rolling stock. It cannot use the rapid amortization deductions because it is not making money.

The railroad's bank puts together a syndicate of 70% bracket taxpayers. The bank loans the syndicate $1 million on the basis of the railroad's ability to make "rental" payments sufficient to pay interest and principal on the loan. Payments are made by the railroad directly to the bank and do not even go through the syndicate.

What is the net result of this transaction? The syndicate members do not realize any cash flow benefit since the rent and the loan payments equal each other.

In the first year of the transaction the interest deduction and the rapid amortization deduction would more than offset the rental income for the syndicate members.

Their profit comes solely from the excessive deduction generated by the new loophole.

They would get a $200,000 deduction in year 1 for the rapid amortization to use against their other income. This compares to a proper deduction under the straight-line method of depreciation of only about $71,000. Thus, the potential first-year "profit" for the syndicate from the rapid-amortization provision is 70% of $140,000 or $98,000. This "profit" is not an economic profit from the transaction; it is solely the result of tax profiteering.

Thus, over a five year period, the syndicate will realize a profit of almost $500,000 from tax reductions. Yet they have not put up one dime of their own money!

Mr. LONG. Mr. President, if a railroad were to permit someone to lease the rolling stock without being well aware of the fact that there is a very advantageous tax situation to the person who acquires the rolling stock and leases it to the railroad, they would be very unwise, indeed.

Mr. President, the railroads will be wise enough to see to it that whoever they do business with, whoever buys the rolling stock and leases to them, does it under favorable lease conditions. I think

they would insist on an option in the contract giving them the right to acquire the railroad rolling stock at very low prices after it had been amortized.

The PRESIDING OFFICER. The Senator's time has expired.

Without objection, the amendment will be considered en bloc.

The question is on agreeing to the amendments of the Senator from Tennessee. [Putting the question.]

The amendments were rejected.

AMENDMENT NO. 342

Mr. COTTON. Mr. President, I call up my amendment No. 342 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. COTTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with, and that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment, ordered to be printed in the RECORD, is as follows:

At the end of the bill insert the following:

"SUBTITLE E—PROTECTION OF AMERICAN INDUSTRY AND LABOR

"SEC. 971. AUTHORIZATION FOR IMPOSITION OF QUOTAS AND NONTARIFF BARRIERS.

"(a) IMPOSITION OF RESTRICTIONS.—Whenever the President finds that—

"(1) the importation of any commodity from a foreign country is at such levels so as to disrupt the domestic market or is causing injury to industries, firms, or workers in the United States, and

"(2) the foreign country producing such commodity is imposing restrictions (by means of quotas, import licenses, tariffs, taxes, or otherwise) against the importation into such foreign country of articles produced in the United States,

he is authorized, by proclamation, to impose such quantitative limitations and such other restrictions as he determines necessary on the importation into the United States of articles produced in such foreign country.

"(b) TERMINATION OF RESTRICTIONS.—In any case in which the President has imposed restrictions under subsection (a) on the importation of articles produced in any foreign country, whenever the President determines that the restrictions imposed by such foreign country on the importation into such country of articles produced in the United States no longer exist, he shall, by proclamation, terminate the restrictions imposed under subsection (a) on the importation of articles produced in such foreign country."

Mr. COTTON. Mr. President, I will explain the amendment as quickly as I can. The amendment has been offered by me and it is cosponsored by my distinguished colleague, the Senator from New Hampshire (Mr. MCINTYRE), the distinguished Senator from South Carolina (Mr. HOLLINGS), and the distinguished Senator from South Carolina (Mr. THURMOND).

Mr. LONG. Mr. President, would the Senator be willing to agree to a limitation of time on his amendment?

Mr. COTTON. Not yet. I shall shortly, but not yet.

Mr. LONG. I thank the Senator.

Mr. COTTON. Mr. President, the amendment provides a new subtitle E. The amendment states:

Protection of American Industry and Labor

SEC. 971. AUTHORIZATION FOR IMPOSITION OF QUOTAS AND NONTARIFF BARRIERS.

(a) IMPOSITION OF RESTRICTIONS.—Whenever the President finds that—

(1) the importation of any commodity from a foreign country is at such levels so as to disrupt the domestic market or is causing injury to industries, firms, or workers in the United States, and

(2) the foreign country producing such commodity is imposing restrictions (by means of quotas, import licenses, tariffs, taxes, or otherwise) against the importation into such foreign country of articles produced in the United States,

he is authorized, by proclamation, to impose such quantitative limitations and such other restrictions as he determines necessary on the importation into the United States of articles produced in such foreign country.

(b) TERMINATION OF RESTRICTIONS. In any case in which the President has imposed restrictions under subsection (a) on the importation of articles produced in any foreign country, whenever the President determines that the restrictions imposed by such foreign country on the importation into such country of articles produced in the United States no longer exist, he shall, by proclamation, terminate the restrictions imposed under subsection (a) on the importation of articles produced in such foreign country.

In other words, the amendment would simply authorize the President—it does not direct him; it does not say "he shall"—it authorizes him, if he finds that importation into this country of articles manufactured in a foreign country—any of them—has reached such a level that it is destroying American industry and American jobs, he may impose by proclamation restrictions against the importation of articles from that country if—and only if—that country has restrictions against our exports to them. No other country can be affected.

When he finds that such foreign country has removed the restrictions, such as tariffs or import licenses, or the other various means resorted to, he shall—it does not say "may"—he shall, by proclamation, remove the restrictions of importations from that country into the United States.

Mr. President, I think that every one of us—I am sure that includes most of us—is as dedicated to the promotion of free trade among the nations of the world as is the President, the State Department, the Commerce Department, or anyone else.

The only trouble today is that we do not have free trade. Free trade is a two-way street. We have no restrictions against imports manufactured by cheap labor in foreign countries, sometimes manufactured by labor that is employed by Americans who have constructed factories and mills in a foreign country, which are putting our workers out of jobs and so many of our industries out of business.

Mr. President, let me read a paragraph from a letter received from the general counsel of the Department of Commerce, written to the chairman of the Committee Finance, the Senator from Louisiana (Mr. LONG), in response to the chairman's request. The general counsel is giving the views of the Department. He says that the Department of Commerce is against my amendment. One reason he gives is a real jewel, the purest ray serene. This is how he tells what he believes is wrong with the amendment I am offering.

Amendment No. 342 defines what are to be considered restrictions of other countries in such a broad manner as to apply to practically all countries of the world since quantitative restrictions, tariffs and taxes are referred to without any qualification such as "unfair" or "unjustified".

We have this in writing over the signature of a representative of the Commerce Department. We also have in the letter from the Department a statement which we all know to be true; namely, that America is the dumping ground for cheap shoes, cheap textiles, for electronic and electrical component parts and all kinds of goods. The United States is the dumping ground of the world.

On the authority of this letter sent to the distinguished chairman of the committee, from the great Department of Commerce, representing the attitude of Mr. Stans, we are told, in plain black and white language, that my amendment is too broad because it would include practically every country in the world.

Mr. President, if you want proof that we have submissively and meekly submitted to letting them run our workers out of their jobs from every place, East, West, North, and South, you have it in this letter from the Department of Commerce.

Mr. President, I am the senior Republican on the Commerce Committee, and in that capacity I have had some dealings with the present Secretary of Commerce and with the Department of Commerce.

Mr. Stans is a very fine man. Far be it from me to attack my own administration. But if we wait until the Department of Commerce negotiates and stops the deluge of cheap commodities coming into this country, we will lose every single job in any industrial establishment all over the United States of America.

What is Mr. Stans doing? Well let us look at the record. He is negotiating on textiles. As far as New England is concerned, doing something about textiles, as we want it done, is a good deal like having an autopsy on a corpse, because the textile industry—certainly cotton textiles—is completely gone. Woolen textiles are nearly gone. Manmade fibers are fast disappearing.

I said to the Secretary, when we had a conference in the committee room of the Committee on Commerce, "While you negotiate, negotiate, and negotiate about textiles, week after week after week, and month after month after month, and while the shoe industry in my State and all over New England and throughout the rest of the country is falling by the wayside, nothing is being done. The manufacturers of component parts for electronics products are hard-hit. We know we have lost radio manufacturing, because almost every radio is now made in Japan. The American workers who used to work on American radios moved

to black and white television. But now black and white television is made in Japan, and the workers who moved to television now find that television sets and parts are being made in Japan, and shipped into this country."

Mr. President, no industry has been damaged so rapidly in the last few months as the electronics industry of New England.

The letter from the Department of Commerce refers to the Trade Expansion Act of 1962. Under that Act, before anything could be done, the Tariff Commission had to hold hearings and find that a business or an industry was in jeopardy. Then the President could act, and that is a much better way to handle the situation.

Mr. President, nothing has been done since 1962. The years have passed. Every President of the United States, of both political parties—and I say this with the deepest respect—has appeared—and most sincerely appeared—to fail to yield to the entreaties of the State Department and has put our foreign relations in such a high place, and justifiably so, that he has turned deaf ears to the outcries of our perishing industries. That has been going on ever since the enactment of the Trade Expansion Act of 1962.

Mr. President, Congress passed an act in 1969—this year—which contains certain provisions. But I ask, what is wrong with Congress simply saying to the President, "If you find, first, that imports from foreign countries are reaching such levels as to imperil the workers in our industries and to destroy American jobs; and if you find, second, that the country from which these commodities are being sent into the American market does not give us an equal opportunity to export our goods to that country, but raises restrictions of all kinds—which is true; if you find those restrictions do exist, we authorize you—we do not direct you, but we authorize you—to impose, by proclamation, quantitatively, or otherwise, such restrictions as you deem necessary to protect our workers, our jobs, and our industrial plants?"

Mr. President, I have something else I want to say, and I will say it very quickly, about the distinguished people in the Commerce Department. A little bird flew in the window of my office a few weeks ago and suggested that, as a Senator very much interested in protecting our industry and as the senior Republican on the Commerce Committee, I should circulate a letter addressed to the President to be signed by Members of the Senate, and hopefully get many Members of the Senate to sign. This letter referred just to textiles. That is all he thinks about. He is like the fellow who went after the pullet and left the hen house open, so he lost all the hens while he was trying to get that one pullet. It was whispered by someone who, I think, comes from down the avenue somewhere near the Commerce Department, that it would be appreciated, and he would take it to the President—and I honor him for it—and he would have it in his pocket when he had meetings with the Premier of Japan. At the psychological point, the President of the United States would pull out that letter signed by so many Senators, and that might convince the Premier of Japan that the Congress of the United States—or at least the Senate of the United States—was getting a little impatient and that the Congress might do something to see to it that trade between other nations with our country becomes a two-way street.

So I rushed around with the letter to the President. I ran all over the Senate. I pestered Senators. I asked my friends to get signatures. With a great amount of effort and about 3 days time and being rebuffed in several instances by impatient Senators, what did we get? Fifty-five Senators. More than half the Senate.

We sent the letter down. I do not expect ever to hear about it again, but I will tell you one thing, Mr. President: It will be a long cold day in August before a Cabinet member ever gets me to pester Senators again to stick a letter under their noses, asking them to sign it.

What happened after that? Well, I introduced this amendment, which is a free trade amendment, and cannot possibly do any harm. It does not force the President to take any action. The only thing that requires him to take action is that if the restrictions are removed against our country's sending goods into another country, the President shall immediately remove the restrictions, so that we may have free trade and commerce with nations, in which we truly believe.

I remember for years when we talked about Japanese shoes and Japanese textiles. I remember talks we had with people from the State Department—not in this administration, but former administrations—and people in the Commerce Department. They said, "But the balance of trade is in our favor. Look at all the automobiles we send to Japan." And now the Japanese will not let us send one single American car to Japan.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. COTTON. I yield.

Mr. PASTORE. As a matter of fact, we had one of the deputies of the Commerce Department come before our committee on a confirmation proceeding—a very fine gentleman, an economist, who had been affiliated and associated with Kodak Co. As he sat there, I said, "I am very glad you are connected with Kodak Co. Now you tell me this. Can we import Japanese cameras into this country without any restrictions?" He said, "Yes, of course we can." I asked, "Can Kodak Co. send any cameras from the United States to Japan?" He said, "No, they cannot."

That is the incongruity of this whole situation. This is what the Senator from New Hampshire is talking about. We are not saying to countries that have free trade with us, "Let us get on with our business." All we are saying is this—and I think this is the intent of the amendment—that where any country has any restriction against American exports, we in turn give discretionary power to the President, when those exports disrupt the American market, to relieve the situation. What is unfair about that—unless we are going to be Santa Claus forever?

Mr. COTTON. I thank the Senator for his observation.

I simply want to say that I took my amendment to the distinguished chairman of the Finance Committee. He was most courteous and kindly about it. He told me—and I do not blame him—that the Finance Committee did not want to get involved in trade matters.

On that, I merely want to say that it does not involve anybody in trade matters. It only authorizes the President to involve himself in trade matters without waiting for the Tariff Commission to go through a long line of hearings, and only against countries having restrictions against us. It provides that he shall—not may, but he shall—remove our restrictions against countries which had erected barriers against us but had then removed those barriers.

So anyone dedicated to free trade can vote for this amendment. It will not involve the committee in any entanglements. Unlike amendments that we have been considering day after day on this floor, this one will not cost the Treasury one single cent. It will not lose us any taxes. It will gain us revenue, and to that extent I believe that the distinguished members of the Committee on Finance ought to be interested in it.

Mr. PASTORE. Mr. President, will the Senator yield again?

Mr. COTTON. Yes, I am happy to yield.

Mr. PASTORE. The question is not whether it is going to save taxes or not. It is going to save American jobs. That is all we have been doing in this country, exporting American jobs, whether it be in textiles, whether it be in shoes, or whether it be in rubber goods. We have been exporting American jobs, and the time has come for us to tell countries that have restrictions against American exports that we will not tolerate the situation, and that we will reciprocate in like manner.

That is what this proposal amounts to.

Mr. COTTON. That is true, and I thank the Senator for his ringing statement. But I am addressing myself to the very natural objection which I understand has been made by the distinguished chairman of the committee. I think he had the feeling that this was an amendment which was hardly germane to the bill. But I say it is germane to the bill, because if we lose our industries, and if our people are out of work, and if our manufacturers continue to build factories in Taiwan, in Hong Kong, and other countries of the Orient, we are going to suffer a loss of revenue, because an industry that leaves our country or is forced out of business is not going to be of much help from the tax-paying angle.

Mr. President, I ask the distinguished Senator from Louisiana whether he would object if I ask unanimous consent to have printed in the RECORD this letter which was addressed to him by the General Counsel of the Department of Commerce, dated today, but a copy was sent to me. They were kind enough to send me a copy. If I could have inveigled the distinguished chairman into permitting me to offer my amendment the other day, when I wanted to, they would not

have had time to petition him; but they had time, and got a letter up here.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GENERAL COUNSEL OF THE
DEPARTMENT OF COMMERCE,
*Washington, D.C., December 9, 1969.*

Hon. RUSSELL B. LONG,
*Chairman, Committee on Finance,*
*U.S. Senate,*
*Washington, D.C.*

DEAR MR. CHAIRMAN: This is in response to your request for the views of this Department on Amendment No. 342 re "Protection of American Industry and Labor" intended to be proposed to the tax Reform Bill (H.R. 13270).

The proposed amendment would authorize the President to impose, by proclamation, quotas or other restrictions on imports of any article whenever he finds that these imports are causing market disruption or injury to American industries, firms, or workers and that the foreign country producing the article is imposing restrictions against imports from the United States. The President would be authorized to terminate these restrictions whenever he determines that the restrictions imposed by the foreign country no longer exist.

On behalf of the Administration, the Department of Commerce is opposed to enactment of the proposed amendment.

Section 301 of the Trade Expansion Act of 1962 provides for the Tariff Commission to make a finding before the President may give relief to industries, firms or workers. Under Section 301 the Tariff Commission must conduct a fair investigation of the facts under procedures and criteria designed to assure accurate and objective findings. In contrast, Amendment No. 342 makes no provision for a thorough fact-finding investigation, including the presentation of views of all interested parties, prior to action by the President.

Moreover, in his Message to the Congress of November 18, 1969, to accompany the proposed "Trade Act of 1969", President Nixon proposed an amendment to Section 301 which would liberalize the criteria under which the Tariff Commission makes its findings "to provide for industries adversely affected by import competition, a test that will be simple and clear: relief should be available whenever increased imports are the primary cause of actual or potential serious injury." Similar liberalization is proposed in the terms under which firms and workers would be eligible for adjustment assistance. Under Section 252 of the Trade Expansion Act of 1962, the President currently has authority to impose duties or quantitative restrictions on imports of any foreign country imposing or maintaining unfair import restrictions on United States agricultural products. The proposed Trade Act of 1969 would amend Section 252 of the Trade Expansion Act of 1962 to enable the President to impose duties or import restrictions on foreign products in retaliation for foreign restrictions on U.S. nonagricultural products as well as agricultural products.

Amendment No. 342 defines what are to be considered restrictions of other countries in such a broad manner as to apply to practically all countries of the world since quantitative restrictions, tariffs and taxes are referred to without any qualification such as "unfair" or "unjustified".

We believe that the problems with which Amendment No. 342 is concerned are more properly covered in the Trade Act of 1969. Moreover, Amendment No. 342 is deficient in two respects in that it fails to define what types of restrictions, tariffs or taxes are referred to and it fails to provide any procedure for a fair and objective finding.

The problems to which Amendment No. 342 is addressed will be considered in depth by the Senate in the early part of the next session in connection with the proposed "Trade Act of 1969". These problems are difficult and important and should be dealt with in a comprehensive fashion with an opportunity for all interested parties to express their position.

We believe that the question of relief for American industries, firms and workers should be treatd separately from retaliation against unfair foreign import restrictions. There are many other foreign trade issues for which the Administration proposal in the "Trade Act of 1969" seeks solutions in a comprehensive legislative framework which retains those procedures in the Trade Expansion Act of 1962 which have proved effective over the years while creating new authority, where needed, to deal with the outstanding issues of the present. This approach rather than the fragmented approach of Amendment No. 342 should provide the President with the necessary flexibility while assuring thorough consideration of our over-all national interests.

Sincerely,

BURT W. ROPER,
(For General Counsel).

Mr. COTTON. All they hope is that I will not have a rollcall vote on this. Mr. President, I ask for the yeas and nays on this amendment.

The yeas and nays were ordered.

Mr. THURMOND. Mr. President, will the distinguished Senator yield?

Mr. COTTON. I yield.

Mr. THURMOND. I commend the able and distinguished Senator from New Hampshire for sponsoring this amendment. I was pleased to join him as a cosponsor, and I think it is a most important measure.

This amendment is calculated to help preserve the jobs of American citizens. I ask the distinguished Senator this: Does not the amendment merely place the American worker on a basis of equal job security with workers of another nation, in that it provides that if a commodity from a foreign country is imported to such an extent that it disrupts the market here, and that country has import restrictions on American goods, then the President has the authority to discontinue that discrimination?

Mr. COTTON. That is exactly true. It will not put the American worker, really, on an equal basis with the foreign worker, because our wages are higher. But we are never going to pay starvation wages in this country, and we will meet the competition.

Mr. McINTYRE. Mr. President, will the Senator yield?

Mr. COTTON. I yield to my distinguished colleague.

Mr. McINTYRE. Mr. President, I commend from the bottom of my heart my distinguished colleague from New Hampshire. I am a cosponsor of this amendment because it is needed to protect American industry and labor.

Under this amendment, the President is authorized to impose such quota limitations and other restrictions as he feels are necessary on foreign articles being imported into the United States in such quantities as to cause injury to American industries and workers engaged in like activities.

I am particularly concerned by the importance of this amendment to small shoe manufacturers and shoe workers. As chairman of the Small Business Subcommittee, of the Senate Banking and Currency Committee, I recently held extensive hearings here in Washington and in Boston and Manchester in New England to inquire into the plight of the shoe industry.

These hearings showed that in my own State of New Hampshire, a startlingly large number of small shoe manufacturing plants have shut down in recent months. They showed too that almost as many others are on the verge of following suit. Other New England States and communities across the country are also being hit.

As my hearings proved, the single most important cause of these closings has been the accelerating growth of shoe imports in recent years.

Since 1955, the number of foreign-made shoes imported annually into the United States has increased from 8 million to nearly 200 million pairs. In the first 6 months of 1969 shoe imports of all kinds have constituted nearly 40 percent of domestic shoe production. Despite those increased imports, the shoe industry until recently has been able to hold its own. But it is now beginning to reel. Domestic shoe production declined 12 percent in the first 6 months of 1969 and industry employment, at least in New England, was down nearly 10 percent over the same period.

This amendment would give the President authority to act in aid of the industry. It would make it clear to the President that Congress wants such action at this time. It is essential to the future of our Nation's shoe industry that this congressional intent be made known. I urge the adoption of my senior colleague's amendment.

I ask unanimous consent that the remarks I made at the beginning of the hearings in Massachusetts and New Hampshire be printed in the RECORD at this point.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

OPENING STATEMENT BY U.S. SENATOR THOMAS J. MCINTYRE

This is the second in a series of hearings into the problems faced by our small domestic shoe manufacturers.

As I said at the outset of our earlier hearings in Washington, the shoe industry is one of this country's most venerable industries. It was in 1629 that Thomas Beard the first shoemaker in America, landed in Salem with a supply of upper and sole leathers and a guarantee of 10 pounds a year for his efforts.

The shoe industry has been, ever since, one of our most important industries, especially here in the New England states. It is today the largest nondurable industry employer in New England, providing jobs for some 72,000 people engaged in shoe production and for perhaps 20,000 more in dependent industries—such as lasts, heels, dressings, supplies, findings, leather, and machinery.

This venerable and important industry is now in trouble. In the past year and one-half some 31 New England shoe plants, employing several thousands of workers, have been forced to close their doors. Here in New Hampshire a large number of plants have shut down recently and almost as many others seem to be on the verge of following

suit. Other sections of the country also have been hit.

Most of the plants affected have been small businesses, vitally important to the small communities in which they operated. I therefore decided, as Chairman of the Senate Small Business Subcommittee, that hearings should be called to investigate in depth the causes of these recent closings.

On the 16th and 17th of September, my Subcommittee held such hearings in Washington. Appearing as witnesses were national representatives of shoe industry management and labor and of other concerned groups, including shoe importers. As might be expected, the witnesses at these hearings differed somewhat in their testimony.

My Subcommittee heard, for example, that shoe imports have increased in number from only 8 million pairs annually in 1955 to the over 200 million pairs projected for 1969.

We learned also that the type of shoes imported most heavily in recent years has been women's shoes, primarily from Italy, Spain, and Japan. In 1968, for example, over 73% of the shoes imported into the United States were women's shoes and imports in this category totalled a full 80% of domestic production. It was not surprising, under the circumstances, to be told also that the domestic manufacturers most affected in recent years have been manufacturers mainly of women's shoes.

But while these and other facts submitted to us indicated that imports are responsible for the industry's present problems, the testimony of some witnesses blamed a variety of other factors. The primary purpose of our hearings today in Manchester, as well as our hearings in Boston, tomorrow, is to clear up certain areas of controversy left unresolved by the Washington hearings.

During the next two days we will be hearing directly from some of the people most intimately affected by the recent plant closings. Our witnesses will include public officials from the states and communities in which these plants have been located, as well as local manufacturers and union leaders. We will hear from them first-hand about the closing of generations-old businesses, about the loss of long-held jobs, and about the inevitable repercussions on communities as a whole.

With these hearings concluded, the way should at last be clear for meaningful Federal action in aid of the shoe industry. Free traders, of course, will abhor such action. They are opposed to protectionism of any kind. I would like to conclude my remarks this morning by saying just a few words about the implications of the shoe industry's problems for our national trade policy.

In principle, I agree that free trade is a fine idea. What it requires, however, is cooperation between countries and not unilateral action on the part of one country alone. At present the tariffs of those countries whose shoes have been flooding our markets are considerably higher than the tariffs here at home. Yet these countries have shown no willingness either to lower their tariffs and expose their own industries to competition or to ration in some way the flow of their exports to the United States. I think it is high time that we made clear to our trading partners that this situation cannot continue.

I wonder also whether completely free trade can ever be justified in labor-intensive industries such as the shoe industry. Rapidly rising imports in the context of such an industry mean a wholesale loss of jobs, with widespread suffering for those abruptly laid off work. The prevention of such suffering, it seems to me, is a legitimate governmental objective.

And it is an objective which I think can be realized without abandoning the benefits of freer trade. This, in fact, is the purpose of the Orderly Marketing Legislation which Senator Muskie introduced earlier this year and of which I am pleased to be a co-sponsor. That legislation would not choke off entirely the flow of shoe imports to the United States. On the contrary, it would allow such imports to continue. It would ensure, however, that the growth of imports would be limited in a manner consistent with the health of the domestic economy. It would protect American workingmen and women from the disruptive effects they have been experiencing in recent days.

I am not opposed, then, to an expansion of international trade. I merely insist that freer trade must be the product of international cooperation and that it must proceed at a pace consistent with the realization of other social objectives. I do not think this is too much to ask. I just think it is time we realized that the United States cannot be the world's consumer any more than we can go on being the world's policeman.

Mr. COTTON. I thank the Senator for his remarks. I yield to my distinguished cosponsor, the Senator from South Carolina (Mr. HOLLINGS).

Mr. HOLLINGS. Mr. President, the distinguished Senator from New Hampshire, together with his distinguished colleague, the Senator from Rhode Island (Mr. PASTORE), have been working for some 12 or 13 years on this problem. I was glad, as a newcomer to Congress, to join in those efforts.

Year before last we passed by an overwhelming margin a bill commonly known facetiously as the Chinese Gooseberry amendment, because we had to attach it, for introduction purposes, to a House-passed measure.

The President's commitment on textiles was clear—he stated it in an exchange of telegrams used during the campaign—to give comprehensive treatment to the textile problem, not just the long term cotton arrangement among 34 countries, but rather an extension of this trade agreement to manmade fibers and woolens as well.

Since January, I have had the very positive feeling that we were PR-ing, jawboning, headlining, and politicing textiles, but we were not acting. I know that I have been in the minority school on this particular point, and some of my distinguished and more senior colleagues have counseled, "Wait, do not be so impatient, Fritz. Do not twist the tail of the tiger while your friends are riding on his back. Do not irritate the President."

I am glad now that I find myself, in the presence and company and under the distinguished leadership of the Senator from New Hampshire, twisting the tail of that tiger tonight. And I hope we do irritate him. I hope we do annoy him into action. I hope he proves us wrong. I hope he takes action and gets some results. Because no law is necessary.

He keeps running over here, asking us to threaten on the legislative end on this particular problem. "Sato is coming to town, so, Mr. Senator from South Carolina, you and the Senator from New Hampshire run around and get up a petition." I joined with the Senator from New Hampshire, and we had everybody signing up. Oh, we were going to scare Sato.

Other Senators made categorical statements that the textile problem should be tied to the resolution on Okinawa. I differed with them on that score. I think that is an all-encompassing problem, a matter far more important than any trade matter, involving the matter of world peace and our international commitments and national defense. So I would not join in that effort.

But more recently, to keynote another effort, there was a letter sent by my own congressional delegation. It started off:

DEAR MR. PRESIDENT: We, the undersigned members of the South Carolina Congressional Delegation, are pleased by the efforts you have made . . .

I disagreed with that. I think the President should have acted through the National Security provisions, as President John F. Kennedy did which brought about this so-called heinous protective measure, which 34 nations have voluntarily agreed to on cottons, the long term arrangement. President Kennedy did it without an additional Act of Congress, under the leadership of the Senator from Rhode Island (Mr. PASTORE) and the Senator from New Hampshire (Mr. COTTON). President Nixon could have acted under article 28 by the first of October this year on GATT.

The distinguished acting majority leader, the ranking member of the Finance Committee, the Senator from Georgia (Mr. TALMADGE), has acted in this particular capacity and knows of the provisions because he has been our representative from the U.S. Senate to Geneva on these problems.

However, President Nixon says we will get these results, all the time asking us to act and to hold off on acting, all at the same time. We keep threatening but it has no effect. The Japanese are not children. They are the best trade negotiators that I know. When they get a clear message such as our late senior colleague, Senator Dirksen of Illinois gave in the first of the year when he said with regard to steel, "I am going to get a bill."

As a result, Japan took action and we got voluntary steel quotas this year.

As Paul said to the Corinthians, "If the sound of trumpet is unclear, then who shall prepare himself for the battle?"

The Japanese received the clear signal when they appointed Gilbert, who was heading import organizations for the last 20 years and was interested in port authorities and not interested in jobs. They got a clear message, and what was the real intent.

The Senator from New Hampshire and the Senator from South Carolina worked on that.

What does the letter say that the Senator put into the RECORD?

First let me emphasize the legislation is merely permissive. It does not mention particular articles. It fixes the authority for foreign trade injury clearly with the President in a sense this amendment is the reverse of the Senate commitments resolution. By the commitments resolution, we wanted to make it absolutely clear to the Executive that the U.S. Senate had a role in treaty making powers of the country.

The Senate, through the Cotton amendment, wants to make it crystal clear that the Executive has the authority to handle free trade—that we prefer

not to legislate as in the past on milk and meat and electronics and all the other things that constitute what is called a Christmas-tree bill.

We cannot write into the bill everything on the basis of need that should be acted upon by the Executive.

The Executive has not acted. Instead, what position does the administration take?

It says to the chairman of the Finance Committee:

> This is in response to your request for the views of this Department on Amendment No. 342 re "protection of American industry and labor" intended to be proposed to the tax reform bill (H.R. 13270).
>
> The proposed amendment would authorize the President to impose, by proclamation, quotas or other restrictions on imports of any article whenever he finds that these imports are causing market disruption or injury to American industries, firms, or workers and—

This is conjunctive—

> and that the foreign country producing the article is imposing restrictions against imports from the United States. The President would be authorized to terminate these restrictions whenever he determines that the restrictions imposed by the foreign country no longer exist.

First, it applies only to countries that have restrictions against U.S. imports. Therefore, Presidential action against imports would reciprocate for similar restrictions against us.

It is the reciprocal free trade that Cordell Hull spoke of.

This provides for reciprocity.

I read again from the letter from the General Counsel of the Department of Commerce:

> On behalf of the administration, the Department of Commerce is opposed to enactment of the proposed amendment.

As his No. 1 objection he states:

> Section 301 of the Trade Expansion Act of 1962 provides for the Tariff Commission to make a finding before the President may give relief to industries, firms or workers. Under Section 301 the Tariff Commission must conduct a thorough investigation of the facts under procedures and criteria designed to assure accurate and objective findings. In contrast, amendment No. 342 makes no provision for a fair fact finding investigation, including the presentation of views of all interested parties, prior to action by the President.

Mr. President, I do not believe that a provision for an investigation is necessary. I know that we would conduct an investigation.

Under the present law, when President Kennedy appointed his five-member Cabinet committee, they in turn appointed a five-member sub-Cabinet committee. The Under Secretary of Commerce, Hickman Price, and I over a 3-week period of time in the Commerce Department brought in witnesses, examined them, and gave the findings to the sub-Cabinet committee which in turn gave them to the Cabinet committee which in turn gave them to the President. And the President acted under the present law. The present law allows investigations and hearings by the Executive.

However, somehow this says that we do not have any provision for it.

Would the distinguished Senator from New Hampshire by unanimous consent, beginning at the very beginning of his amendment, where it says, "Whenever the President finds that" change it to read, "Whenever the President finds, after such investigation and hearings as he may deem appropriate, that." That would let him go ahead and have the hearings. I do not wish to beg that question.

Mr. COTTON. Mr. President, I ask unanimous consent to so modify my amendment.

Mr. JAVITS. Mr. President, reserving the right to object, and I shall object, I think we ought to talk about this a little bit to find out what it is about and find out how important it is.

Only those in favor of the proposal have been heard. Before we rush into this, with all due respect to my colleagues—and I do not think I need to assure them of that—I feel constrained to object.

The PRESIDING OFFICER. Objection is heard.

Mr. COTTON. Mr. President, I promised the majority leader that I would not hold the floor.

Mr. TALMADGE. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. HOLLINGS. Mr. President, I will limit my remarks. I am sorry that I was not present when the amendment came up. I wanted to cover the duplicity that is evident in the letter. I can point to where it states in the beginning that we do not have any guidelines and in the last paragraph they say the necessary flexibility is assured. They talk about the Trade Expansion Act and what it would do. Our amendment would do the same thing.

At the beginning of that last paragraph they say, "We believe that the question of relief for American industries, firms and workers should be treated separately from retaliation against unfair import restrictions."

But here is their bill, introduced by Mr. MILLS the day after the message was sent on November 18. In this bill they do not treat it separately, but conjunctively.

The administration has gone in both directions at the same time. It is time that the U.S. Senate dispassionately and impartially make it absolutely crystal clear what we expect of the Executive so that there will not be any misunderstanding downtown about the intent of Congress to protect American jobs.

Mr. COTTON. Mr. President, I thank the Senator. While I had no particular objection to the amendment offered by my friend, the Senator from South Carolina, I am perfectly satisfied to let the amendment stand or fall as it is. I am getting a little sick of investigations. I am getting a little sick of the findings of this and that commission.

The amendment, if it is adopted, is not unfriendly to the President. It would help the President.

The amendment provides a fair shake for the United States. After all this business of free trade should be a two-way street. This is something he can pull out of his pocket, if it should be adopted by the Senate. This is something he can show the Premier of Japan. It is something he can use in his negotiations. It is not just a roundrobin letter. It is an action by the Senate, and carries with it a broad hint, the implication that the time is coming that we are prepared to represent our constituents, and to protect the jobs of our people.

Mr. DOMINICK. Mr. President, will the Senator yield?

Mr. COTTON. I yield.

Mr. DOMINICK. I thank the Senator from New Hampshire for yielding.

I ask the Senator if the would add me as a cosponsor of his amendment.

Mr. COTTON. It will be a pleasure.

Mr. President, I ask unanimous consent that the name of the Senator from Colorado be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. DOMINICK. Mr. President, we have been talking largely about people in the manufacturing business, but they do not get their leather unless they have cattle, and they do not get their wool unless they have sheep, and they do not get many other things unless we who grow these things and produce them are able to continue doing it.

I have been in Congress for 9 years—in the House and in the Senate—and in one meeting after another, as the Senator from South Carolina has said, have talked with the Senator from North Carolina about wool problems, the Senator from Maine about shoe problems, with our own people about problems on meat products.

I ask the Senator whether or not the word "commodity" is supposed to cover anything this country is producing which has a substantial impact on our economy.

Mr. COTTON. It certainly does. It is not confined in any sense to manufactured articles. It is what we produce on the farm or anywhere else that we have to sell and want to export, and we want to have the same privilege in exporting that other countries have with their exports to us.

Mr. DOMINICK. I sincerely appreciate that explanation and the colloquy, which I think will clear up the point I am trying to make.

I remember campaigning in 1962 outside the steel mills. No smoke was coming out of the steel mills, and there were no jobs. The company was almost totally shut down—steel wire, barbed wire, and the rest of it. I think that now it is one of the two nail companies left in the country. I do not think anybody else makes nails except one other company.

We have problems with all kinds of things of this nature, and I congratulate the Senator for pressing his point, and I hope he will stick with it.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. COTTON. I yield.

Mr. RANDOLPH. Mr. President, I commend my colleague, the Senator from New Hampshire. He speaks with vigor and validity. It is a privilege to support him. I will not take the time of the Senate tonight to affirm and reaffirm in my

own language the many points he has succinctly made.

I ask unanimous consent that my distinguised colleague from West Virginia (Mr. BYRD) and I be permitted to be cosponsors of the amendment of the Senator from New Hampshire.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. Mr. President, I have, with my able colleague, Senator BYRD, introduced S. 3022, legislation to regulate the rate of foreign imports of flat glass, glassware, steel, footwear, manmade fibers, and electronic products. The industries named in our bill, I emphasize, employ approximately 30,000 West Virginians. This represents nearly one out of every four manufacturing jobs in our State. Trade statistics prove that these import-sensitive industries not only are generally losing normal employment expansion, but are experiencing employment layoffs and loss of jobs as a result of imports.

West Virginia vitally needs the industrial expansion and new jobs which have been precluded by the rising tide of imports. We cannot afford to lose jobs by ill-advised neglect on the part of our Government to insist on reasonable ground rules to curb damaging imports. There is a pressing need for an equitable solution to this problem.

The bill introduced by Senator BYRD and me would establish mandatory import quotas based on the average imports of the products during the period 1966 to 1968 and would contain annual adjustments to increase quotas in proportion to the growth in domestic utilization. The statutory quotas would not apply to countries electing to negotiate with the President of the United States mutually acceptable trade agreements.

The less restrictive approach of the Senator from New Hampshire (Mr. COTTON)—which I shall support—differs from a mandatory system of import quotas. However, it does provide the President with strong negotiating power and effective authority to insure the security of American industry and labor. More importantly, this amendment will serve notice on our trading partners that we owe as much to our own people as we do theirs, and that we are not going to sacrifice our markets and our workers to foreign goods and foreign jobs.

Mr. COTTON. I thank the Senator.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. COTTON. I yield.

Mr. HANSEN. Mr. President, I rise in support of the amendment offered by the distinguished Senator from New Hampshire.

I believe there is at long last a growing awareness in Congress that we have traded off in recent years what little protection in the way of tariffs that we had left. We have done this in the interest of promoting free trade with other nations but it has not quite worked that way.

In opposing import quota bills, our free trade advocates have said because of the agreements we made under the auspices of GATT, the General Agreement on Tariffs and Trade, any nonnegotiated duty increase would be contradictory to the present U.S. liberal trade policy.

GATT is not a permanent world trade organization, but rather an ad hoc or advisory body. The so-called Kennedy round in negotiations produced few concessions for U.S. agricultural products. Rather, there has been an increase in agricultural protectionism in other countries while protective tariffs and trade controls have been used less and less by the United States. We have been assured by the advocates of free trade that increasing exports coming from freer trade would compensate for any injury inflicted by competitive imports. But even this argument has been punctured by a continually worsening balance of payments as imports have increased at far higher rates than exports. Even the International Wheat Agreement has failed to open markets for huge U.S. wheat crops as other nations with surpluses made special deals to get what they could for theirs. So I believe it is high time to take some effective action against the free traders who have sold the American farmer down the river and protect domestic agriculture and industry from its own Government.

Reciprocal trade is—or would be—a great thing but reciprocity means two-way considerations and unless we want to lower our living standards and wage scales down to the levels of those producing most of these imports, we had better act and act now.

It seems entirely inconsistent to me that we should have minimum wage laws on one hand and imports produced by cheap foreign labor displacing our more highly paid workers on the other.

It does not make sense to spend Federal funds for unemployment when such unemployment in many cases could be prevented by a more realistic approach to the whole import problem.

Mr. COTTON. I thank the Senator.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. COTTON. I yield.

Mr. TALMADGE. Mr. President, I commend the distinguished senior Senator from New Hampshire for the amendment he has offered.

I know something of the problems that American industries and employers have suffered as a result of imports from countries that have vastly lower wages for their employees than our country has.

I saw a report in the Wall Street Journal last week. Bibb Manufacturing Co., which is one of the oldest textile producers in the United States, has eight or more mills in the State of Georgia. They have thousands of employees there. They had sales of well in excess of $100 million in the last fiscal year, and their loss was in excess of $2 million. That has been caused by imports of foreign textiles from countries where the wage level is vastly lower than in the United States.

As the Senator from New Hampshire knows, he and I and other colleagues in the Senate have been calling on various Presidents of the United States, various Secretaries of State, and various Secretaries of Commerce for years, to try to get something accomplished in this field, without result.

I hope that the Senator's amendment will be agreed to, and I hope that the President of the United States will recognize that it is the voice of the country speaking. I hope that the President will take affirmative and positive action.

I compliment the Senator on his amendment.

Mr. COTTON. I thank the Senator.

I yield the floor.

Mr. JAVITS. Mr. President, it feels a little lonely to take the floor at this hour and under these conditions, especially when one has the affection for the Senator from New Hampshire that I have, and with much reason. I have been through many legislative struggles, in which he has been a prince. The manager of the tax bill on the floor, for the majority, says nice things about the amendment and would take it if we let him—

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. TALMADGE. The yeas and nays have been ordered.

Mr. JAVITS. I understand.

And when the other Senators who have been handling the bill and vigorously arguing about amendments that are one one-hundredth as important as this one was before the Senate, they sort of smiled and said, "Well, fellows have plants that closed in their districts, and we have to give them a chance to blow off some steam"—everybody knowing in his heart that this will probably never get anywhere, even if it is adopted by the Senate—and it is very likely to, on the rollcall vote.

This is a strange anomaly about our country. We all know that some "Big Daddy" somewhere will protect the interests of the Nation; and, by the skin of teeth, I suppose that "Big Daddy" has always appeared. But we are not going to do it—not on this one.

I have no pretensions to heroism in this matter, but I am sustained by one thing, and it is a little sentimental. There was a Senator in this body who occupied precisely the role that I do. His name was Paul Douglas, of Illinois, one of the proudest names this Nation has ever know. He is still with us, thank the Lord. I take great courage and great inspiration from the fact that I saw him on this floor not once or twice or three times, as perhaps I would, but time and time again, with the greatest virtuousity, with deep knowledge and insight, with great patience and understanding, address himself to precisely the very hardy perennial we are discussing today. That is the essential tariff policy of the United States.

The essence of this amendment is really this: Shall we tack onto a tax reform bill, already staggering under a load of many improvidences, a superimprovidence, which is not only an improvidence but also is not relevant to the bill at all? Shall we, in a few hours of debate in the night, deal with the foreign policy of the United States and the trade policy of the United States which has had weeks and weeks and years and months of consideration, and about which the President of the United States has just, in a very considered way, sent us a trade message—to which the Senator from South Carolina referred—of November 18? And shall we in this way short-circuit Congress? That is exactly

what it would mean. We can give the President the authority, but that is all the authority we have. This is a very sweeping amendment. An amendment could be offered, and a two-thirds vote could be obtained, to amend the Constitution and eliminate the first 10 amendments, and the Senate can do that not only at 7:10, but if the Senate is in session, it could do it at 11 p.m. or at 12 midnight; and it might be passed if Senators are tired enough or do not know what they are doing.

That is the way a democracy can hang—by the skin of its teeth. Fortunately, that does not happen. Whether I win or lose, we will know what it is about and what it does and how it affects the interests of the United States.

We are asked to deprive Congress of all tariff writing and tariff changing authority and turn it over to the President. That is the whole essence of the amendment; and not only that but on definitions which radically—and I use that word advisedly and I shall explain it further later—differ from the definitions we have in a most considered way passed in Congress. We are asked to do it—and I do not complain about it; that is our business and we all do what we feel has to be done—on the very threshold of what may be the breakup of world trade through a tremendous trade war which is very incipient in this situation. The President or anyone else who is deeply immersed in the field will tell you that the entire world trade situation right now is in great jeopardy.

I am the last one to try to please the Japanese or the European Common Market. I spoke on the floor of the Senate the other day about the fact that they themselves are guilty of the gravest kind of protectionism and barriers to trade; that they were mindless of the best interests of the world, in a trading sense. I made recommendations as to what we could do about it, and the President has addressed himself to the matter.

But to throw this kind of measure, as the considered judgment of the Senate, into the balance will do only one thing. I must tell you that honestly and sincerely as a Senate man. It will discredit the Senate. It is not going to change the situation or anything that happens but it will discredit the Senate because you are going to do improvidently and precipitately, without regard to an understanding of what is at stake, what the law is on the books already, and how to change it, what should be done in a most deliberate and considered way.

Maybe we will come to these considerations as a result of the new trade act that must be written, because the old one has expired. Maybe the world will make the United States go protectionist. The world may be so obtuse and bullheaded that it will make us go protectionist. It would be a tremendous source of grief to me, but it is possible, and the very instruments we thought would free and liberalize trade may be turned against freedom of trade; but we are not going to invoke that thoughtlessly, and if we are going to do it, we are going to do it with dignity, deliberation, and the workmanship that is worthy of the Senate.

Mr. COTTON. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. COTTON. Mr. President, I am a little surprised. I want to make sure I understand the Senator. In the first place, I admire the Senator. He is a great lawyer, and he was the distinguished attorney general of one of the great States of the Union. But his statement that in this amendment the Senate is abdicating and surrendering its jurisdiction, or that it prevents Congress from enacting some kind of legislation with regard to foreign trade, is surprising to me. This would not preclude it; it simply invites the President to do something he desires. I have confidence in the President. The indication is to the contrary, with regard to disturbing our trade relations or antagonizing the world.

Mr. JAVITS. Mr. President, I wish to point out to the Senator why I say what I do. I hope the Senator is not inviting the Senate to march up the hill and pass it, knowing in advance he is going to repeal it, or knowing in advance the President will not use it. Why are we going through these charades if it is a document emblazened before all the world that the United States is going to pursue a protectionist course?

I am a lawyer. I think I am a pretty good lawyer. There are other good lawyers in this Chamber. I ask my lawyer friends to look at this amendment. What does the word "disrupt" mean? The amendment uses the phrase "disrupt the domestic market." What does that mean? We have had many volumes written about what is serious injury to domestic enterprise. This is a new word, the word, "disrupt." I beg any lawyer in the Chamber to define it.

The amendment states, "disrupt the domestic market or is causing injury to industries, firms, or workers in the United States." Does it mean any injury by place or places, or products, or lines of commodities?

Then, we go to the next page and we see the language:

> The foreign country producing such commodity is imposing restrictions—

What kind of restrictions? Are they sanitary laws? I ask the Senate the meaning of the word "restrictions." What are its perimeters, up and down? Does anybody know?

Then, the amendment states "by means of quotas, import licenses, tariffs, taxes, or otherwise."

I wish to ask Senators who are lawyers if they are going to pass this measure. It states:

> The foreign country producing such commodity is imposing restrictions (by means of quotas, import licenses, tariffs, taxes, or otherwise).

Now, going on from there one Senator said awhile ago they are going to run workers out of their jobs. As I understand the foreign trade of the United States, fortunately for us it is about on balance. We have $30 billion in exports and about $30 billion in imports. What about those fellows who deal in exports? Are they bums? Are they not entitled to be considered? What about all the consumers in this country who are buying these shoes? If they are cheaper and better, that is their right. Is this a one-way street?

We are no longer the paramount economic power on earth. The European Common Market does a much bigger import and export business than we and they are only six countries. The most viable country in the world is the United States, but that is my judgment. Many people disagree with me. They think Japan and Germany are at least if not better able economically to stand the strain of modern competition.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. PASTORE. Can the Senator name one country in the European Common Market that does not have restrictions?

Mr. JAVITS. I cannot.

Mr. PASTORE. That is the point.

Mr. JAVITS. No, I am sorry. It proves the other point because the Senator's definition includes every country in the world. The Senator's letter from the Department of Commerce just said so.

As I said when I began my remarks—and I am not sure the Senator from Rhode Island was in the Chamber at that time—every country in the world can be excluded from the American market by the power of the President. This turns over the total authority over tariffs of the United States to the President. That is all the Senate would be doing by passing this measure. I do not think the Senate would be well advised to do it and I doubt very much that the Senate wants to do it.

Mr. PASTORE. Mr. President, will the Senator yield further?

Mr. JAVITS. I yield.

Mr. PASTORE. Have we not done that with the Trade Expansion Act?

Mr. JAVITS. No.

Mr. PASTORE. We turned it over to the administration.

Mr. JAVITS. I do not agree. We limited the right to raise taxes up 50 percent and that is circumscribed by conditions under which hearings must be held and findings of fact must be made by the Tariff Commission.

This measure has no such provision. The Tariff Commission Act—which I would like to read because I think it is important—gives the President the very broad authority, but it is authority which has been defined and considered to the extent that Congress felt in all good conscience and judgment it should be limited.

I should like to read to the Senate the provision of the law on this particular subject. First, we look at the authority of section 301 which provides under B:

> On request, the President, upon resolution of either the Committee on Finance of the Senate or the Committee on Ways and Means of the House of Representatives, upon its own motion, or upon filing a petition under subsection (a), the Tariff Commission shall promptly make an investigation to determine whether as a result in major part of concessions granted under trade agreement an article is being imported into the United States in such increased quantity as to cause or threaten to cause serious injury—

I beg the Senate to note those words "serious injury"—

to the domestic industry producing an article which is like or directly competitive with the imported article.

Now then, there is the very comprehensive procedure by which the commission is required to inquire into this matter and to make a finding of fact, if one can be made appropriately, and then the power of the President becomes the following—I beg the Senate to note that this is not mandatory, either. This is also permissive authority.

The power of the President—I now read from section 351——

Mr. MANSFIELD. Mr. President, will the Senator from New York yield?

Mr. JAVITS. I yield.

Mr. MANSFIELD. Does the Senator from New York intend to allow his colleagues to vote on this measure tonight?

Mr. JAVITS. That is putting me in an awkward position.

Mr. MANSFIELD. No. I have to think of others besides.

Mr. JAVITS. I will be as frank with the Senator, if he will allow me. I do not believe that an amendment which has the implications of this amendment should be voted on in the middle of the night. I have only so much breath and so much strength. I may not last the course.

Mr. MANSFIELD. Will the Senator from New York yield further?

Mr. JAVITS. May I finish first?

Mr. MANSFIELD. I just wanted to say that the Senator has answered my question indirectly.

Mr. JAVITS. I have yielded, and if the Senator will allow me, I should like to finish. I do not want to stand in the way of Senators voting on this. I am not filibustering. There is no question that this amendment should be discussed further, and that there should be a pretty good attendance on the vote. My humble suggestion to the majority leader, who has tremendous problems, certainly, as I have said, perhaps I shall not last the course, but I would be willing to stay. There are many other Senators concerned. I would be willing to agree to some reasonable time limitation and have the vote first thing in the morning. But I say, with all humility, because I am not trying to dictate to anyone, that I will stay or do whatever the Senator wishes.

Mr. MANSFIELD. If I had my way, we would stay all night and bring this amendment to a vote because I think it is most unusual; but in view of the situation, and in deference to my colleagues and the Senator who has the floor, I would, with his agreement, propose a vote at a time certain tomorrow, on whatever conditions the Senator may wish to advance, because I do not think that we should keep our colleagues here. Many of them are very tired because they have put in a long, hard day, and they are entitled to some consideration.

I would withhold my personal feelings and agree to something for tomorrow——

Mr. JAVITS. If the Senator will yield, I would suggest this: I think the Senator knows that he is a little bit annoyed with me now, but he knows that I have the highest regard and the deepest affection for him. I would like to have 1 hour tomorrow in which to discuss and give others the opportunity to discuss it, if they are so moved.

Perhaps an hour on each side and then we can vote. I shall be here at 9 o'clock tomorrow morning, ready to go forward.

UNANIMOUS-CONSENT AGREEMENT

Mr. MANSFIELD. Mr. President, I would suggest and ask unanimous consent that beginning at 9:30 o'clock tomorrow morning—there will be other business at 9 o'clock—there be 2 hours set aside for consideration of the pending proposal of the distinguished Senator from New Hampshire (Mr. COTTON), and that the time be equally divided between the Senator from New Hampshire and the distinguished Senator from New York (Mr. JAVITS).

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

The unanimous-consent agreement later reduced to writing, is as follows:

*Ordered*, That, on Wednesday, December 10, 1969, commencing at 9:30 a.m., further debate on the Cotton amendment (No. 342) to H.R. 13270, the tax reform bill, shall be limited to 2 hours, to be equally divided and controlled by the Senator from New Hampshire (Mr. COTTON) and the Senator from New York (Mr. JAVITS).

Mr. MANSFIELD. Mr. President, now, on the basis of the progress we have not been making, and that we will very likely not be able to finsh the bill tomorrow, with at least eight more amendments in the offing, and perhaps more, I would suggest to the Senate that it had better be prepared to stay in session through December 24, and if the President desires to call us back on December 26, I shall join him wholeheartedly in that request.

Mr. President, I would emphasize that we have an awful lot of legislation; that there is going to be debate at some length on the defense appropriation bill; that there is going to be debate at some length on the Labor and HEW bill; that there is going to be debate at some length on the foreign aid bill; that we have the District of Columbia appropriation bill and the Department of Defense appropriation bill, and a supplemental appropriation bill, and a newspaper bill, and other bills, all of which will have to be considered some time this year, or the next; and that this will not be done unless the Senate cooperates in the conduct of the business which will come before it.

I believe that I would be less than fair if I did not lay out the facts on the table.

Mr. PASTORE. Mr. President, I realize, I appreciate, and I sympathize with the Senator from Montana in his frustration and weariness at this moment.

Mr. MANSFIELD. Not on my part, I am fresh.

Mr. PASTORE. I know that the Senator is, but I believe that he is also a little bit disgusted with what has been going on. I should like to suggest at this time that we work out some kind of agreement to limit the time on all pending amendments.

Mr. MANSFIELD. I should like to do that, but I feel constrained not to do so because there are Senators who have to be considered who are not in the Chamber at the moment and I feel, in all fairness, that we will not do that at this time. Maybe tomorrow it might be possible.

Mr. COTTON. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. COTTON. I feel very much embarrassed. I did not know that I would touch off such a filibuster with this perfectly plain and simple amendment. I am not going to withdraw it. I am going to have a vote on it, but if the Senator from New York wants 45 minutes or 1 hour right now, he can have it. All I would take would be 1 minute. He can have the debate all by himself and he can plaster this simple amendment with all kinds of obfuscation and legal terms he wants to. We can have a time to vote on it and not hold up the Senate.

Mr. JAVITS. Mr. President, will the Senator from Montana yield to me?

Mr. MANSFIELD. I yield.

Mr. JAVITS. I did not bring up this amendment. I did not bring it up at 6 o'clock at night. When it was brought up, I had to meet it.

Mr. COTTON. I brought it up at the first opportunity I had. I have been waiting for 3 days to do so.

Mr. JAVITS. I am not finding any fault with the Senator from New Hampshire. Considering the size of the engagement, and that I am undertaking to meet the arrangements made, I think it is reasonable rather than unreasonable. I will leave to the judgment of the Senate what is reasonable and fair in this matter.

Mr. MANSFIELD. Mr. President, I had intended to ask permission of the Senator from Alabama (Mr. SPARKMAN) and the Senator from Texas (Mr. TOWER) to lay their amendment No. 407 before the Senate tonight, on a time limitation, but I am precluded from so doing. There will be no further votes tonight.

Mr. COTTON. Mr. President, if the Senator will yield, would the Senator from Montana consider giving the Senator from New York, tomorrow morning, 1 hour, and giving me 10 minutes?

Mr. MANSFIELD. The Senator already has 1 hour, as does the Senator from New York. If the Senator does not use all his time, he can simply yield it back.

When I said that there would be no more votes tonight, I meant no more rollcall votes. If there are any amendments to be disposed of by a voice vote tonight, I feel that we can do so, but there will be no more rollcall votes tonight.

AUTHORIZATION FOR SMALL BUSINESS SUBCOMMITTEE OF THE BANKING AND CURRENCY COMMITTEE TO MEET TOMORROW AT 10 O'CLOCK A.M.

Mr. McINTYRE. Mr. President, I ask unanimous consent that the Small Business Subcommittee of the Committee on Banking and Currency be authorized to conduct hearings, beginning at 10 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the pending amendment be laid aside temporari-

ly for the purpose of presenting another amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 254

Mr. MOSS. Mr. President, I call up my amendment, No. 254, and ask that it be reported.

The PRESIDING OFFICER. The amendment of the Senator from Utah will be stated.

Mr. MOSS. Mr. President, I ask unanimous consent to dispense with the reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the proper place insert the following new section:

"SEC.—WITHHOLDING OF INCOME TAX IN THE CASE OF STUDENTS.

"(a) WITHHOLDING BASED ON EXPECTED WAGES FOR TAXABLE YEAR.—Section 3402 (relating to collection of income tax at source) is amended by adding at the end thereof the following new subsection:

"'(n) SPECIAL RULE FOR STUDENTS.—

"'(1) WITHHOLDING BASED ON EXPECTED TOTAL ANNUAL WAGES.—In the case of an employee who—

"'(A) files with his employer a certificate that he will qualify as a student (as defined in section 151(e)(4)) for his taxable year, and

"'(B) sets forth in such certificate the total amount of wages which he expects to receive from all employers during his taxable year,

the amount of tax required to be deducted and withheld under this section upon the wages paid by such employer to such employee for each payroll period during such taxable year shall be the amount which would be required to be deducted and withheld if the amount of wages paid by such employer for such payroll period were the payroll-period equivalent to the total amount of expected wages set forth in such certificate.

"'(2) CERTIFICATE.—A certificate filed under paragraph (1) shall be in such form and contain such information, and shall be filed subject to such terms and conditions, as the Secretary or his delegate may prescribe by regulation.'

"(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to wages paid on or after the first day of the month which begins more than thirty days after the date of the enactment of this Act."

UNANIMOUS-CONSENT AGREEMENT

Mr. LONG. Mr. President, I ask unanimous consent that further debate on the amendment be limited to 20 minutes, to be equally divided between the Senator from Utah and the manager of the bill.

Mr. MOSS. Mr. President, I have no objection.

Mr. GRIFFIN. Mr. President, may I know the number of the amendment?

Mr. MOSS. 254.

The PRESIDING OFFICER. Is there objection to the unanimous consent request of the Senator from Louisiana? Without objection, it is so ordered.

Mr. MOSS. Mr. President, this amendment is relatively simple. It does not affect the tax income or outgo. It is simply an amendment to provide that students who work in the summer be given an opportunity to file a certificate of the amount of money they expect to earn during that summer period, and that the withholding that is then applied to their wages be prorated as though the summer's earnings were the annual income. Therefore, the students would not have withheld the larger amount, which they need at the end of the summer, ordinarily to go into college, pay their room dues, and all the rest of it.

At the present time, the withholding is made at whatever the salary rate is, as though it were going to continue the whole year.

The explanation of the bill as reported by the committee stated that section 803 (f) took care of this matter, but that is not so. It simply applies to a person who expects to have no income and who had no income the year before. He is forgiven the withholding.

This amendment applies to the special situation of students who work for a limited period of time, in the summer, say 3 months.

I have talked with the distinguished chairman of the committee about the amendment. I have also mentioned it to the distinguished Senator from Delaware. I think it is perfectly acceptable, and certainly would accomplish a useful purpose for students who work in the summertime and then go back to school.

Mr. President, on October 27, 1969, I introduced for myself and 25 other Senators an amendment to H.R. 13270 which would correct the unfairness of the tax withholding provisions toward students.

In the Finance Committee's summary of printed amendments, it is stated that the substance of my amendment was agreed to by the committee—see section 803(f). Unfortunately, however, I must disagree with the committee as to what the substance of my amendment is.

My amendment would permit students to have their withholding rates set on the basis of their total expected income rather than the present formula which assumes that they will be employed full time the year-round.

To qualify under this amendment, a student would have to file a certificate with his employer certifying that he is a student. The certificate would also contain a statement of the student's expected total wages for the taxable year. The Secreary of the Treasury would have the authority to prescribe regulations concerning this certificate.

Section 803(f) of the Finance Committee bill only partially accomplishes the objective of my amendment. Under this section an individual will not have any tax withheld if he can certify that he, first, incurred no tax liability during the preceding taxable year, and second, anticipates no tax liability for the current taxable year.

While this provision is a worthy improvement, many students will still not be helped by it. Most students who worked this last summer earned over $900, and therefore incurred at least some tax liability.

From now on, of course, under the low income allowance provision, $1,700 will have to be earned before any tax liability is incurred. But some students who only in the summer make more than $1,700 and those that continue to work part time during the school year almost certainly do.

Higher education is very expensive and many students pay for all or part of the tuition and other fees. These students expect to pay their fair share of the tax burden. But as with the draft, they have a legitimate complaint when the inflexible withholding system takes more from them than they will eventually owe in taxes.

This is a simple reform. It does not ask much. It does not give students any special tax break. It simply tells the Treasury to withhold only as much as the student will eventually owe in taxes and no more. The money will have to be returned to the student anyway.

Why should students simply because they are employed full time only in the summer be forced, in effect, to "lend" their money to the Government interest free? It is not fair. And it can be easily corrected by adopting this amendment.

Mr. LONG. Mr. President, we have looked at the amendment. Its purpose is very meritorious. If it can be worked out in conference, we would like to provide a more expeditious manner of taking care of this situation. I applaud the Senator for his effort. If it can be worked out technically, I would like to see the purpose the Senator seeks to reach with his amendment carried out.

I think the amendment was also discussed with the Senator from Delaware, and I believe he would agree to taking this amendment to conference.

Mr. GRIFFIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GRIFFIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOSS. Mr. President, I yield back my time.

Mr. LONG. Mr. President, I yield back my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back. The question is on agreeing to the amendment of the Senator from Utah.

The amendment was agreed to.

AMENDMENT NO. 383

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside and that the Senate proceed to consider amendment No. 383, and ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 383) is as follows:

On page 136, after line 10, insert the following:

"For purposes of subparagraph (A), substantially all the use of a property shall be considered to be substantially related to the exercise or performance by an organization of its charitable, educational, or other purpose or function constituting the basis for its exemption under section 501 if such property is real property subject to a lease entered into primarily for purposes which are substantially related (aside from the need of such organization for income or funds or the use it makes of the rents derived) to the exercise or performance by such organization of its charitable, educational, or other purpose

or function constituting the basis for its exemption under section 501."

Mr. YARBOROUGH. Mr. President, this is a technical amendment which is designed to clarify an ambiguity in the proposed tax on debt-financed income of exempt organizations. This provision of the bill replaces the present tax on unrelated business lease income of exempt organizations. I understand that there is no intention to apply the new provision to rental income of exempt organizations that is exempt under present law because the leases are related to exempt purposes or functions of the lessor organizations. The amendment I am offering to section 121 of H.R. 13270 adds a sentence to section 534(b)(1) that provides this explicitly, resolving any possible ambiguity on the point in the present language of the bill.

I urge the distinguished chairman of the Committee on Finance to accept this amendment as a clarification of the committee's bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that the amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, the amendment is temporarily laid aside.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. COOPER. Mr. President, I want to submit to the distinguished manager of the bill a problem which has arisen in connection with a foundation in Louisville, Ky. I shall designate it. It is the James Graham Brown Foundation of Louisville, Ky. The foundation was created earlier, but Mr. Brown died testate on March 30, 1969, leaving to the foundation all of the stock of three companies that are operating companies with no ready market for their stock.

The question which I wish to direct to the chairman of the committee is the following:

I note that under the income payout requirement imposed on private foundations by the bill, long-term capital gains realized by a foundation are not required to be currently distributed. I would like to ask the Senator from Louisiana whether my understanding of the application of this rule to the following situation which has been called to my attention is correct.

The private foundation of which I have spoken owns all of the stock of a number of companies—to be exact, three. These companies were owned by the creator of the foundation, who died earlier this year and who left the stock to the foundation. There is not a ready market for the stock of these companies and, therefore, in order to comply with the stock ownership requirements of the bill, it is contemplated that a 5-year plan of complete liquidation of these companies will be adopted. I understand that under present law amounts received by a shareholder on a partial or a complete liquidation of a corporation are treated as in payment for the shareholder's stock rather than as a dividend.

Thus, any income involved is a long-term capital gain if the shareholder has held its stock for more than 6 months. In the case of the foundation I have mentioned, is my understanding correct that any amounts, including property, it receives as distributions in liquidation pursuant to the 5-year plan of liquidation from the corporations which it wholly owns will be treated as in payment for its stock rather than as a dividend, and thus any gain will be capital gain income, which will not have to be included in the income amounts which it is required under the bill to distribute currently, assuming the stock has been held by it for more than 6 months?

Mr. LONG. Mr. President, the Senator has stated the intent of this provision correctly. That is the way it would work.

The PRESIDING OFFICER. What is the will of the Senate?

AMENDMENT NO. 346

Mr. PACKWOOD. Mr. President, I call up my amendment No. 346.

Mr. MANSFIELD. Wait a minute. Mr. President, we have two or three amendments set aside already, and if we keep on multiplying them, I am afraid this joint is going to get out of joint. [Laughter.]

Mr. PACKWOOD. It will take only 5 or 6 minutes.

Mr. MANSFIELD. Will the Senator request a rollcall?

Mr. PACKWOOD. Oh, no.

Mr. MANSFIELD. Mr. President, I ask unanimous consent, even under these most unusual circumstances, that the two amendments now temporarily laid aside be continued to be laid aside temporarily, for the purpose of taking up an amendment to be offered by the distinguished Senator from Oregon.

The PRESIDING OFFICER. The amendment will be stated.

The BILL CLERK. The Senator from Oregon (Mr. PACKWOOD) proposes an amendment (No. 346), as follows:

On page 131, strike out the quotation marks in line 7, and after line 7 insert the following:

"'(19) Corporations, other than cooperative housing corporations (as defined in section 216(b)(1)), not organized for profit but operated exclusively for the preservation, maintenance, and repair of houses, apartments, or other dwellings owned by the members of such a corporation, and for the preservation, maintenance, landscaping, and operation of the common area owned by such members or such corporation situated contiguous to such houses, apartments, or other dwellings and used for noncommercial purposes, but only if—

"'(A) no part of the net earnings of such corporation inures (other than through the performance of related services for the members of such corporation) to the benefit of any member of such corporation or other person, and

"'(B) 95 percent or more of the gross receipts of such corporation consists of amounts received from such members for the sole purposes of providing such services.'

"On page 118, line 24, strike out 'or (9)' and insert ', (9), or (19)'.

On page 119, line 1, strike out 'or (9)' and insert ', (9), or (19)'.

"On page 119, line 18, strike out 'Such term' and insert 'In the case of an organization described in section 501(c)(19), such term does not include income received from any member of such organization with respect to the sale or lease to him by such organization of any house, apartment, or other dwelling or any interest in any common area situated contiguous to any house, apartment, or other dwelling. In the case of an organization described in section 501(c)(7) or (9), such term'.

"On page 130, line 1, strike out 'pension trusts' and insert: 'pension trusts and housing management corporations'.

"On page 130, line 5, strike out 'paragraph' and insert 'paragraphs'."

Mr. PACKWOOD. Mr. President, this is an amendment dealing with condominiums and their methods of ownership and taxation. Most Senators are familiar with the legal methods of condominium ownership. The persons who live in the apartments physically and legally own the condominium; the corporation that manages it normally owns the land.

In this situation, the Treasury Department has taken the position that when the owner of the condominium apartment contributes $15, $20, or $25 a month to the corporation for the maintenance of the building and for the landscaping of the common land, that is taxable income, and the corporation must pay a tax on it in the year received, whereas, if it were operated under a mutually beneficial trust, as many condominiums are, if it were operated under a partnership, as some small condominiums are—though that involves some problems of buying in and selling out—the money that was set aside—and that is exactly what it is, a fund set aside to take care of repairs which come up, or of necessary landscaping—is not taxable.

I asked the Treasury Department to draft an amendment for me that would permit corporations, if they are nonprofit and if they are organized solely for the purpose of repairs, maintenance, and taking care of the condominium common property, the landscaping, the roof, the painting, and other matters detailed in the amendment, and if 95 percent of the corporation's income—again, it is a nonprofit corporation—comes from receipts from the condominium owners, to make the receipts of that corporation nontaxable in the year received.

The Treasury Department drew the amendment and sent me a letter saying that they have no opposition or support, that they would neither propose nor oppose it.

I asked them what the revenue loss would be, and they said none or negligible, because, unfortunately, most people who build condominiums now are aware of the tax consequences if they organize corporations, so they find various other ways to avoid incorporating, which is inconvenient but necessary to find another way of avoiding taxability on the income.

That is the sum and substance of the amendment.

Mr. WILLIAMS of Delaware. Mr. President, I have discussed the amendment with the Senator. I wish we could accept it, but I do not think we can.

I would like to point out some of the problems that would arise. It is true that

the income represents an advance payment which will be offset by expenditures later; but if the amendment is accepted, we will have established a precedent for exemption, for example, of automobile manufacturers. They put a lifetime guarantee on a car, the cost of which is built into the price of the car. They will be coming in next, asking for a similar exception. The same is true of all the termite companies: You pay an annual fee, but may go for years before the company has to treat your house. It works out, in the long run.

I hope the Senator will not press the amendment, because, after consultation with the staff, I think it would open a dangerous precedent for the Internal Revenue Code, which I would not want to see done.

Mr. PACKWOOD. Let me say to the Senator in rebuttal that we are not talking about a profitmaking corporation; we are talking about a nonprofit corporation. We are not talking about the condominium owners escaping anything that they cannot escape otherwise, if they want to use some other form of organizational structure. So it is not a question of evading taxes, it is a question of allowing nonprofit corporations to operate condominium properties and repair them, and permit the money to be set aside under corporate form rather than some other form of operation.

Mr. WILLIAMS of Delaware. That is true, but the basic problem is the same whether it is a profitmaking or a nonprofit operation. It is merely a matter of the mechanics of how they operate.

I would be willing to say that the committee could give it study, but I would be reluctant to accept it as an amendment on the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment (No. 346) of the Senator from Oregon.

The amendment was rejected.

Mr. HANSEN. Mr. President, I should like to ask the distinguished senior Senator from Delaware his view as to the application of the unrelated business income tax in the case of fraternal beneficiary societies—such as the Shriners, which is well known for their support of crippled children's hospitals—where they sponsor football games or present a Shrine circus. In this case will they be exempt from unrelated business income treatment on income from activities of this type?

Mr. WILLIAMS of Delaware. The answer is "Yes." The unrelated business income tax does not apply to income from activities which are not carried on by such an organization on a regular basis—that is, incidental or sporadic activities, such as the Senator has mentioned, the Shrine circus or annual football game, and similar activities would not constitute regularly engaging in a business.

Mr. HANSEN. The fact that the Shrine may carry on, for a week or so each summer, a Shrine circus, even though this may be something that is done year after year, would still not cause the income from the circus to be subject to the unrelated business income tax?

Mr. WILLIAMS of Delaware. The answer is "Yes." Our committee considered that very problem. We are confident that these activities are not taxed under the bill.

Mr. LONG. Mr. President, I affirm what the Senator from Delaware said. That was the intent of the committee.

Mr. WILLIAMS of Delaware. I do not think there is any question about it.

Mr. HANSEN. Mr. President, I thank the distinguished chairman of the committee and the distinguished ranking minority member.

Mr. CURTIS. Mr. President, as a matter of fact, there was a direct vote in the Finance Committee on this matter, and the committee voted not to tax such activities as circuses and other such activities.

AMENDMENT NO. 383

Mr. YARBOROUGH. Mr. President, I ask that my amendment 383 be called up at this time.

The PRESIDING OFFICER. The question recurs on the amendment offered by the Senator from Texas.

The question is on agreeing to the amendment.

Mr. YARBOROUGH. Mr. Prasident, I call the attention of the distinguished Senator from Louisiana to the fact that I call up my amendment and ask for action on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 383) was agreed to.

## SOUTHERN UTE TRIBE

Mr. MANSFIELD. Mr. President, I have one further piece of business, an item on the calendar that has been cleared all the way around after a hold had been put on it. There will be no more business tonight.

I ask unanimous consent to temporarily lay aside the pending business and that the Senate proceed to the consideration of Calendar No. 563, H.R. 12785.

The PRESIDING OFFICER. The bill will be stated by title.

The BILL CLERK. A bill (H.R. 12785) to declare that the United States holds in trust for the Southern Ute Tribe approximately 214.37 acres of land.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–568), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the bill is to transfer the title to 214.37 acres of land located in La Plata County, Colo., from the United States to the United States in trust for the Southern Ute Indian Tribe. The land has been determined to be excess to the needs of the Federal Government since 1940 and has been under permit to the Southern Ute Tribe. All of the land, except the 8-acre tract near Bayfield, Colo., is immediately adjacent to other tribal holdings. All of the land is within the exterior boundaries of the Southern Ute Reservation. It was acquired from allottees of the Southern Ute Tribe, or their heirs, and none of the land has ever been on the county tax rolls.

Although the conveyance is witout consideration, the Indian Claims Commission will consider the extent to which the value of the land will be set off against any claim against the United States that is determined by the Commission. A tribal claim against the United States is pending.

The land is now excess to the needs of the Department of the Interior, except for the temporary use of 1 acre.

The land is located within the boundaries of the Southern Ute Reservation and has been in the possession of the tribe since 1940 pursuant to a permit from the Bureau of Indian Affairs. It consists of some irregated cropland, some irrigated pastureland, and some dry grazing land. It is surrounded by other Indian trust land, and is within the areas which the tribe is attempting to consolidate in Indian ownership. The land is in the Pine River Valley, where most of the tribal members reside, and where the tribe plans to develop light industry, a commercial park, recreation facilities, tourism, and residential sites. Transfer of the land to the tribe will permit the tribe to pursue its reservation development plans more effectively, and will enhance employment opportunities for many Indians.

Leonard C. Burch, chairman of the Tribal Council of the Southern Ute Indian Tribe, in his statement to the committee on S. 1873, briefly explained the program for development of the reservation under the tribe's master plan. With respect to the overall objective, Mr. Burch ably expressed it as follows:

"As you may know, the Ignacio area is an E.D.A. designated, 'Economical Depressed Area,' and as you can see, we are making real progress toward eventually removing this designation. We have great hopes and dreams that we will, in time, be self-sufficient in all areas of our economic life.

"We feel that this legislation will be of real assistance to us in reaching that goal.

"We are confident that if we are fortunate enough to have these lands transferred to the tribe that it will result in the economic betterment of our tribe and the surrounding areas in which we live."

SETOFF PROVISION

The land was acquired by the United States by purchase in five different tracts from Indian allottees or their heirs. The five tracts were purchased for a total consideration of $9,630. They have a present estimated value of $39,250, exclusive of possible mineral value, which is purely speculative and unknown.

The House adopted an amendment, recommended by the Department, which provides for the Indian Claims Commission to consider this conveyance as a possible setoff against any claims of the Southern Utes pending before it. The Southern Ute Tribe has a claim pending before the Indian Claims Commission, docket No. 328, in which they are seeking fair payment for land on the Southern Ute Reservation in Colorado which was disposed of by the United States without the consent of the tribe. The setoff provision is permissive, that is, the Indian Claims Commission is not required to make a setoff, and may or may not make a setoff depending upon the equities of the overall situation. However, if a setoff is deemed to be appropriate, the following colloquy between Senator Allott and Assistant Secretary Loesch concerning the amount of the setoff is pertinent:

"Senator ALLOTT. * * * If the amendment which you have suggested is adopted by the committee with respect to claims before the Indian Claims Commission, would a proper figure for the setoff be the cost to the Federal Government?

"Mr. LOESCH. Yes, Senator Allott, it would, and that has been the practice, I am told. The claim of the tribe against the Govern-

ment will, of course, as usual, be based on the value of the lands at the time in particular and in all equity the value of this land should be determined as it was at the time the Government obtained it.

"Senator ALLOTT. So the approximately $9,630 in your opinion would be a fair setoff under your amendment?

"Mr. LOESCH. Yes, and of course this is what I would recommend. I have no control, naturally, over the Indian Claims Commission, but I certainly would anticipate this is the way it would go."

COST

Enactment of the bill will require no Federal expenditure of money.

COMMITTEE RECOMMENDATION

The Committee on Interior and Insular Affairs recommends that the bill be enacted.

## STATEMENT ON NOMINATION OF HENRY TASCA TO BE AMBASSADOR TO GREECE

Mr. PELL. Mr. President, as a matter of setting the record straight, I wish to state publicly that the dispatch in the New York Times of today which said that Henry Tasca's nomination as Ambassador to Greece had been delayed primarily by my efforts is simply not true.

Actually, I sought to bring up his nomination three times in the Foreign Relations Committee and supported it when it was reported out yesterday.

I have always believed that we should have ambassadors at the seats of those governments of which we most disapprove and that of the Greek junta certainly fills the bill in that regard.

I do accept with pride responsibility for authorship of my amendment cutting off additional military assistance to Greece for the time being. This, I believe, is the correct way of showing our country's disapproval of the present Greek Government and as the best way to encourage it on the road toward general elections and ending the torture of political prisoners there.

Not to have an ambassador in a sensitive post abroad is, I have always believed, an excellent example of the cutting off of our nose to spite our face. It simply reduces the level of government at which we can make our views known abroad. The correct way to express disapproval is to cut what hurts the regime of which we disapprove and not what hurts ourselves.

And, this is what the cutting of military assistance aid means. In addition, a pleasant fallout effect could be a substantial saving for the American taxpayers.

## TAX REFORM ACT OF 1969

The Senate resumed the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. MOSS. Mr. President, I call up my amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The BILL CLERK. The Senator from Utah (Mr. Moss) proposes an amendment, as follows:

On page 342, line 10, insert the following: "Delete the date 'October 9, 1969' and insert in lieu thereof the following 'December 31, 1969'."

Mr. MOSS. Mr. President, under the tax reform bill as reported out by the Finance Committee, all new provisions pertaining to mineral production become effective for calendar year taxpayers after December 31, 1969, except the change in the tax treatment of mineral production payments. For some reason this latter provision becomes effective October 9, 1969, except for such payments created before January 1, 1971, pursuant to binding contracts entered into before October 9, 1969.

I think the effective dates of these provisions should be uniform. Fixing the effective date at December 31, 1969, would also be consistent with the general practice of making changes in tax laws prospective to future taxable years. A uniform date would also be equitable in that it would treat taxpayers who had such payments under negotiation on October 9, 1969, in the same manner as taxpayers who had reduced their transactions to a binding contract on that date.

Mr. LONG. Mr. President, I regret that I cannot support the amendment. We felt that we had advanced the date to the date that committee commenced action in executive session and that we could not consider advancing the date on any prospective basis.

We discussed the amendment. And we think this is one of the areas where we expect to make a considerable amount of money in the reform features of the bill. In the event the date were advanced, we would lose a considerable amount. The amount of loss would be unpredictable. However, I feel constrained to oppose the amendment. I have discussed the matter with the distinguished ranking minority member.

Mr. WILLIAMS of Delaware. Mr. President, I have discussed the matter with the distinguished chairman of the committee. And I am afraid that we cannot accept the amendment.

The question is on agreeing to the amendment.

The amendment was rejected.

SENATOR BROOKE OPPOSES INFLATIONARY TAX PROVISIONS

Mr. BROOKE. Mr. President, the bill upon which we will soon be voting is described as a Tax Reform Act. As is true of all such shorthand terms, this title is less than adequate. It might as appropriately be called the Tax Reduction Act, or the Social Security Reform Act, or the Tax Adjustment Act, or even the Inflation Escalation Act of 1969.

No one in this Chamber, possibly no one in this Nation, would agree with all of the provisions of the bill as it passed the House, as it was reported from the Senate Finance Committee, or as it awaits our consideration here in the Senate.

All of us commend the diligent efforts of the members of the committee and their staffs. All of us feel strongly about certain provisions we would like to see included in the bill, or deleted from it. None of us will ever be completely satisfied with the legislation which is finally passed. But Mr. President, this country faces a grave fiscal crisis, and the choice is still ours whether to pass legislation which will deepen, or help to control, the unstable and gravely perilous economic position in which we find ourselves today.

The merits of this bill are many. In particular I believe the Senate has acted wisely in indicating its support for substantial increases in social security and in reducing the burden of medical expenses on our elderly. The fact that the House Ways and Means Committee has also accepted a 15-percent increase in social security benefits leaves little doubt that, whether in the tax bill or in separate legislation, the Congress will be moving on this essential front. Furthermore the minimum tax on persons with large incomes that were formerly exempt is a most significant step, as are the removal of several million low-income people from the tax rolls, the reduction of the oil depletion allowance and other measures closing loopholes. These forward-looking provisions can and should become law.

Unfortunately, certain amendments accepted by the Senate would have disastrous consequences for the entire Nation. They go far beyond the $9 billion in general tax relief recommended by the committee, but do not significantly increase the $6 to $7 billion to be gained by tax reforms. Therefore, in spite of my strong endorsement of many positive features in the bill, I cannot approve the legislation as it stands.

In particular the changes in the proposed repeal of the investment tax credit would drain over $1 billion a year from the Treasury. And this at a time when projected investment rates are already setting records. So strong has the investment surge been that it is questionable whether even the highest interest rates in a century will have the desired effect of dampening this counterproductive spiral. Who can claim that it needs further stimulus?

Most damaging of all, however, has been the addition of the blatantly inflationary increase in personal exemptions. By the most modest estimate this increase will cost approximately $6.1 billion in the next 2 years alone, precisely the period when we must cool the superheated economy on which all Americans depend. Under no test of economic responsibility could such an action be justified at this time.

The American people should really be dismayed when they consider that the increase in tax exemptions may soon be worthless as tax relief. The original $600 exemption has declined to a fraction of its original value as inflation has eroded the dollar. The $200 increase offered by the amendment fuels an even more intense inflation which will destroy its value also. The only meaningful tax relief, the only relief likely to survive inflation, is adjustment of the tax rates themselves.

Furthermore, the implication that the increase in exemption is of special benefit to lower and middle income groups is highly misleading. In truth the provision does not provide $200 in tax relief to the man with lower income and $200 in tax relief to the man with higher income; that would be regressive in itself. The situation is even worse, since the change really means that a taxpayer at

the bottom of the schedule would be paying $28 less in taxes for each exemption claimed, while taxpayers at the high rates would be paying $140 less for each exemption. Thus the real result of the allegedly progressive amendment on exemptions is to give actual relief of perhaps $112 to a low-income family of four while providing $560 to an affluent family of the same size. And because of the varying number of exemptions, the amendment certainly shifts more of the tax burden to smaller families and single persons, while affording disproportionate relief to larger families.

One of the more damaging aspects of this proposal, which I do not believe has been adequately examined, is the sizable reduction of the tax base it accomplishes. The committee bill had already trimmed the national tax base by $22 billion to a total of $350 billion. The ill-considered change in personal exemptions would remove another $23 billion from the base, reducing it to only $327 billion. If, as may well be necessary, future tax increases are approved, relatively higher levies must be placed on this smaller base. Those still in the tax-paying pool will have to pay still greater sums to compensate for this drastic curtailment in the country's taxable income.

These are not easy points to grasp and some people may be deceived into believing that their interest is being served by this superficially attractive measure.

But the fact is that its benefits are illusory and its potential harm to our common well-being, catastrophic.

Mr. President, the distressing thing to me about many of the amendments offered is that they were without question, worthwhile. I would have liked to vote for them. And under ordinary circumstances I would have been among the first to support measures which would lower taxes for individuals, and provide tax credits for investments which seek to correct our intolerable economic imbalances.

But these are not ordinary times. Our consumer price index is up nearly 6 points over last year. Housewives are paying nearly 12 percent more for meat; prospective buyers find the price of homes has risen 10.5 percent over the last year; medical costs are nearly 9 percent higher than they were just 1 year ago. At this rate, how much will the individual be helped by a $200 increase in the personal exemption? How much will the small company benefit from a retention of the 7-percent investment tax credit, if the cost of materials and labor goes up 10 percent or 15 percent? These meager benefits can easily be consumed before they ever go into effect by the rising cost of living.

An increase in the personal exemption may look like a boon to the taxpayer. In reality, however, it will put more paper money into the pockets of the consumers while at the same time driving up the costs of the goods they seek to buy.

During the last few days I have found myself asking hard questions, questions which I am sure every Member of this body has been considering: Are the tax reform provisions sufficiently constructive to merit passage of the bill in its present form even in view of its predictable inflationary effects? Is it fair of us to rely on the conferees to delete provisions which we find objectionable, to "save us from ourselves," in effect, and to report back a reasonably clean bill? Are we prepared to reject a conference report which has too many dangerous and inflationary aspects? Are we, in the final analysis, prepared to put aside parochial interests and to perform as responsible national legislators, acting in good faith in the best interests of the country as a whole? Or will we, for the sake of short-term political advantage, enact a measure which can, in the words of the President, "reduce taxes for some while raising prices for all?"

This is not a partisan issue, though partisanship has been clearly in evidence more often than not in this debate. This is not a regional or sectional issue, nor is it an issue even between conflicting private and public interests. We are dealing with an issue which clearly and deeply affects us all. The question before us is nothing less than the purchasing power of the dollar in domestic and international trade. It is a matter which affects the single taxpayer, the workingman, the welfare mother, the retired pensioner, the small businessman, and the giant corporation all at once.

Inflation may hurt some more than others, but none of us remains untouched.

As much as I favor the tax reform provisions of this bill and as urgent as I consider its social security provisions and related features, I cannot support the bill in its present form. The price is simply too high.

It is my profound hope that the conference committee will preserve the progressive elements of this legislation and produce a measure which Senators can support wholeheartedly. But if the conferees cannot remedy the central defects of this legislation, I will be compelled to vote "no" on the report.

### RECESS TO 9 A.M. TOMORROW

Mr. KENNEDY. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 9 a.m. tomorrow morning.

The motion was agreed to; and (at 7 o'clock and 56 minutes p.m.) the Senate took a recess until tomorrow, Wednesday, December 10, 1969, at 9 a.m.

# HOUSE OF REPRESENTATIVES—*Tuesday, December 9, 1969*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

*May the Lord make you increase and abound in love to one another and to all men.*—I Thessalonians 3: 12.

Almighty and eternal God, conscious of our obligation to the historic past, aware of the opportunities of the present, and with faith in the beckoning future, we humbly join our fathers in the affirmation—"glory be to Thee, O Lord most high."

Thou hast been wonderfully good to us and we are grateful. Thy spirit has led us. Thy hand has supported us, and Thy love has filled our hearts with good will. Make us one with Thee, we pray, as we face the duties of this day.

Standing as Americans together may we lift high the banner of freedom, strengthen the arm of justice, build bridges between races, classes, and nations, and keep ourselves ever mindful of Thy presence and ready to do Thy will.

In the spirit of Christ we pray. Amen.

### THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

### MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 13767. An act to authorize the appropriation of funds for Fort Donelson National Battlefield in the State of Tennessee, and for other purposes.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 210. An act to eliminate requirements for disclosure of construction details on passenger vessels meeting prescribed safety standards, and for other purposes; and

H.R. 9163. An act to authorize the disposal of certain real property in the Chickamauga and Chattanooga National Military Park, Ga., under the Federal Property and Administrative Services Act of 1949.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 1232. An act to declare and determine the policy of the Congress with respect to the primary authority of the several States to control, regulate, and manage fish and wildlife within their territorial boundaries; to confirm to the several States such primary authority and responsibility with respect to the management, regulation, and control of fish and wildlife on lands owned by the United States; and to specify the exceptions applicable thereto; and to provide procedure under which Federal agencies may otherwise regulate the taking of fish and game on such lands;

S. 2619. An act to amend section 5723(b) of title 5, United States Code, relating to length of service required by teachers in Bureau of Indian Affairs schools when travel and transportation expenses are paid to first post of duty; and

S. 2940. An act to amend the act of June 28, 1948, as amended, relating to the acquisition of property for the Independence National Historical National Park.

The message also announced that Senator GOLDWATER was excused as a conferee on the bill (H.R. 14751), an act making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes.

## MASSACRE IN VIETNAM DEPRESSING TO EVERY AMERICAN

(Mr. LONG of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LONG of Maryland. Mr. Speaker, the alleged massacre of civilians by U.S. troops in Songmy, Vietnam, is deeply depressing to every American.

Reactions to the incident point up the deficiency in the training of our combat troops on the proper treatment of civilians. One soldier walking through Songmy afterward asked:

If you can shoot artillery and bombs in there every night, how can the people . . . be worth so much?

A member of Charley Company said:

It just seemed like . . . the natural thing to do . . . My buddies had been getting killed or wounded . . . it was just mostly revenge.

Still another soldier apparently shot himself to keep from participating in the massacre.

Our soldiers have a tough job made tougher by inadequate training.

I have urged Secretary of Defense Laird to upgrade combat preparation by instructing every American soldier on: First, U.S. policy on the treatment of Vietnamese civilians in combat situations; second, how to respond to a command which violates the policy toward civilians; third, how to report an illegal command or action without fearing reprisal; and, fourth, how to insure that unlawful acts will not be tolerated or "hushed up."

Finally, I have urged the Secretary to establish procedures for reporting and fully investigating charges of gross misconduct.

## PERMISSION TO FILE CONFERENCE REPORT ON H.R. 13763, LEGISLATIVE BRANCH APPROPRIATIONS, 1970

Mr. ANDREWS of Alabama. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill H.R. 13763, making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

CONFERENCE REPORT (H. REPT. No. 91–727)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13763) "making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 36, 38, 42, 43, 44, and 45, and agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$468,165"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 37, 39, 40, and 41.

*Managers on the Part of the House,*

JOSEPH M. MONTOYA,
WILLIAM PROXMIRE
(except on No. 37),
RALPH W. YARBOROUGH,
JAMES B. PEARSON,
NORRIS COTTON,
*Managers on the Part of the Senate.*

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13763) making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

SENATE AND HOUSE OF REPRESENTATIVES

Amendments Nos. 1 through 34, under the "Senate" heading, and Nos. 39, 40, and 41 under the "Architect of the Capitol" heading, relate solely to expenses of Senate operations and activities.

Amendments Nos. 36 and 38, under the "Architect of the Capitol" heading, deal with Senate matters.

Amendment No. 37 relates to the West Front of the Capitol.

Amendments Nos. 1 through 34, and Nos. 39, 40, and 41, relating to Senate operations, are reported in technical disagreement. But in accord with the long practice, under which each body determines its own housekeeping requirements and the other concurs therein without intervention, the managers on the part of the House will offer motions to recede and concur in these amendments.

Amendments Nos. 36 and 38, under the "Architect of the Capitol" heading, relate to appropriations that are joint in nature, but the amounts in conference relate to Senate operations and thus fall in the same category as the above bloc of amendments. The House recedes and concurs in Amendments Nos. 36 and 38.

JOINT ITEMS

*Joint Economic Committee*

Amendment No. 35 adds $27,000 to the amount in the House bill, instead of $35,000 proposed by the Senate.

ARCHITECT OF THE CAPITOL

*West central front of the Capitol*

Amendment No. 37, relating to the west central front of the United States Capitol Building, is reported in technical disagreement. The managers on the part of the House will offer a motion incorporating a conference agreement in the nature of a substitute for the House provision and the Senate provision.

The House bill provided $2,000,000 for preparation of detailed plans and specifications for extending the west central front in accord with extension Plan 2 approved by the Commission for Extension of the United States Capitol. The Senate bill, by floor amendment, struck this provision and substituted an appropriation of $250,000 to be transferred to the National Park Service of the Department of the Interior for use in conducting studies to determine the feasibility and cost of restoring the west central front.

*The case for extension* rather than restoration was stated in some considerable detail in House committee hearings held September 8; in House Report 91–487, of September 11, at pages 19–26; and in House floor debate of September 19. *The case for restoration* rather than extension was stated variously in Senate committee hearings on the 1970 appropriation bill, in the Senate committee report on the bill, but especially in Senate floor debate of October 21 when the $2 million extension funds were stricken and the $250 thousand inserted for a restoration study.

*The conference agreement*

The conference agreement to be put in the motion of the House managers will, as stated, be a substitute for both the House and Senate provisions. It will provide:

A. An appropriation of $2,275,000.

B. That the appropriation is to be expended under the direction of the Commission for Extension of the United States Capitol (now composed of the Speaker as chairman, the Vice President, the Majority and Minority floor leaders of the two Houses, and the Architect).

C. That such portion of the appropriation as may be necessary shall be used for emergency shoring and repairs and related work on the west central front. (The Conferees were, very recently, apprised of the results of a periodic but continuing engineering check on the condition of the west front which discloses the need for some emergency protective and maintenance measures.)

D. That not to exceed $250,000 shall be used for the employment of independent nongovernmental engineering and other services for studying and reporting (within 6 months after date of the employment contract) on the feasibility and cost of restoring the west central front, under such terms and conditions as the Commission may determine.

E. That pending completion and consideration of the restoration study and report, however, no further work toward extension of the west central front shall be carried on.

F. That after consideration by the Commission of the restoration study and report, the Commission is to direct the preparation of final plans for extending the west central front in accord with extension Plan 2 already approved by the Commission, *unless such restoration study report establishes to the satisfaction of the Commission:*

(1) That through restoration, such west central front can, without undue hazard to safety of the structure and persons be made safe, sound, durable, and beautiful for the foreseeable future;

(2) That restoration can be accomplished with no more vacation of west central front space in the building proper (excluding the terrace structure) than would be required by the proposed extension Plan 2;

(3) That the method or methods of accomplishing restoration can be so described or specified as to form the basis for performance of the restoration work by competitive,

lumpsum, fixed price construction bid or bids;

(4) That the cost of restoration would not exceed $15,000,000; and

(5) That the time schedule for accomplishing the restoration work will not exceed that heretofore projected for accomplishing the Plan 2 extension work.

G. In other words, if the restoration study report does *not* establish to the satisfaction of the Commission that restoration (rather than extension) treatment meets all five of the conditions noted above, then the extension work is to proceed.

H. If, on the other hand, the Commission, after consideration, concludes that the restoration study report meets all five of the conditions noted above, the Commission is then to make recommendations to the Congress on whether to extend or restore the west central front.

In recommending the language to be offered in the motion, the conferees of both Houses are agreed that the nongovernmental engineering and other necessary services engaged by direction of the Commission to study and report on the feasibility and cost of restoration should be, in the Commission's opinion, completely independent, with no previous connection with proposals to either extend or to restore the west central front, including any expressed predisposition for or against the extension or the restoration of the west central front. The conferees are especially anxious that the selection be made from among highly reputable firms or individuals generally noted or regarded for their excellence of ability, to the end that all Members may have confidence that whatever report is submitted is qualitative and impartial in character and content.

LIBRARY OF CONGRESS

Amendments Nos. 42, 43, and 44, make reductions, as proposed by the Senate, in Library appropriations proposed in the House bill, as follows:

| | |
|---|---|
| Library, salaries and expenses (No. 42) | —$23,500 |
| Copyright Office, salaries and expenses (No. 43) | —4,000 |
| Books for the blind and physically handicapped, salaries and expenses (No. 44) | —3,000 |

OFFICE OF SUPERINTENDENT OF DOCUMENTS

Amendment No. 45 reduces by $100,000, as proposed by the Senate, the appropriation proposed in the House bill for the Office of Superintendent of Documents.

GEORGE ANDREWS,

## PERMISSION FOR SUBCOMMITTEE ON COMMERCE AND FINANCE, COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE, TO SIT DURING GENERAL DEBATE TODAY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the Subcommittee on Commerce and Finance of the Committee on Interstate and Foreign Commerce may be permitted to sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

## CONFERENCE REPORT ON H.R. 12964, STATE AND JUSTICE DEPARTMENT APPROPRIATIONS, 1970

Mr. ROONEY of New York. Mr. Speaker, I call up the conference report on the bill (H.R. 12964) making appropriations for the Departments of State, Justice, and Commerce, the judiciary, and related agencies for the fiscal year ending June 30, 1970, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the statement.

(For conference report and statement see proceedings of the House of December 8, 1969.)

Mr. ROONEY of New York (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement of the managers on the part of the House be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER. The gentleman from New York (Mr. ROONEY) is recognized.

(Mr. ROONEY of New York asked and was given permission to revise and extend his remarks and include extraneous matter.)

Mr. ROONEY of New York. Mr. Speaker, this bill making appropriations for the Departments of State, Justice, and Commerce, the judiciary, and related agencies for the fiscal year ending June 30, 1970, and for other purposes contains a total of $2,354,432,700 in new obligational authority. It also contains an additional $195,815,000 for liquidation of contract authorizations.

This bill is $121,271,900 below the total amount of the budget estimates.

It is $27,922,000 below the bill as it passed the Senate.

It is $18,798,500 above the bill as originally passed by the House.

However, I must point out that this bill is $299,759,800 above the appropriations made for these purposes for fiscal year 1969. Practically all of this increase, $262,587,000 in fact, is for the Department of Justice. The total appropriations for the Department of Justice for fiscal year 1969 was $545,582,000. The amount provided in this bill for the Department of Justice as agreed to in conference is $808,169,000.

Mr. Speaker, I insert at this point in the RECORD a table showing the actions of the House-Senate conferees with regard to the various departments and agencies contained in the bill:

DEPARTMENTS OF STATE, JUSTICE, AND COMMERCE, THE JUDICIARY, AND RELATED AGENCIES, 1970

| Department or agency | New budget (obligational) authority, fiscal year 1969 | Budget estimates of new (obligational) authority, fiscal year 1970 | New budget (obligational) authority recommended in House bill | New budget (obligational) authority recommended in Senate bill | New budget (obligational) authority recommended by conference action | Conference action compared with— New budget (obligational) authority, fiscal year 1969 | Budget estimates of new (obligational) authority, fiscal year 1970 | New budget (obligational) authority recommended in House bill | New budget (obligational) authority recommended in Senate bill |
|---|---|---|---|---|---|---|---|---|---|
| (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) | (9) | (10) |
| Department of State | $398,091,600 | $408,381,000 | $404,122,600 | $407,174,100 | $404,132,100 | +$6,040,500 | —$4,248,900 | +$9,500 | —$3,042,000 |
| Department of Justice | 545,582,000 | 845,976,000 | 790,048,000 | 815,909,000 | 808,169,000 | +262,587,000 | —37,807,000 | +18,121,000 | —7,740,000 |
| Department of Commerce | 767,563,000 | 812,486,000 | 756,450,000 | 784,629,000 | 778,018,000 | +10,455,000 | —34,468,000 | +21,568,000 | —6,611,000 |
| The judiciary | 109,944,900 | 125,024,600 | 121,026,200 | 121,026,200 | 121,026,200 | +11,081,300 | —3,998,400 | | |
| American Battle Monuments Commission | 2,362,000 | 2,639,000 | 2,639,000 | 2,639,000 | 2,639,000 | +277,000 | | | |
| Arms Control and Disarmament Agency | 9,000,000 | 9,500,000 | 9,500,000 | 9,500,000 | 9,500,000 | +500,000 | | | |

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

AMENDMENT IN DISAGREEMENT

The SPEAKER. The Clerk will report the amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 21: On page 43 strike out section 404, as follows:

"None of the funds contained in this title shall be available for the salaries and or expenses of any deputy clerk in any District court clerk's office that does not accept applications for passports except in cities where the State Department presently operates passport offices."

MOTION OFFERED BY MR. ROONEY OF NEW YORK

Mr. ROONEY of New York. Mr. Speaker, I offer a motion. The Clerk read as follows:

Mr. ROONEY of New York moves that the House recede from its disagreement to the amendment of the Senate numbered 21 and concur therein with an amendment, as follows: Restore the matter stricken, amended to read as follows:

"SEC. 404. None of the funds contained in this title shall be available for the salaries or expenses of deputy clerks in any office that has discontinued the taking of applications for passports subsequent to October 31, 1968 and has not resumed such service on a permanent basis."

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the motion was laid on the table.

Mr. ANDERSON of California. Mr. Speaker, today the House adopted the Senate-House conference report granting appropriations for ship construction under the Maritime Administration. The conference report appropriates the amount of $15,918,000 as proposed by the Senate.

The authorization bill, H.R. 4152, approved by the President on October 10, 1969, authorizes $145 million for the purpose of ship construction. I believe that the authorization was an indication of our concern for the merchant marine and the deterioration of the merchant marine fleet.

The House Committee on Appropriations recognized that funds would have to be made available in order to keep an active merchant marine when they reported H.R. 12964, appropriating $200 million for the purpose of ship construction. Unfortunately, the $200 million was deleted from the bill due to a point of order.

Congress is aware of the sad plight of our merchant marine and is prepared to do something about it. The conferees said that they would be "receptive to a realistic substantial request in a supplemental budget for additional funds for ship construction."

The Federal Maritime Administrator has recognized the problem. He estimated "a loss of approximately two-thirds of our entire merchant fleet in the next 4 years—a loss of some 500 to 600 ships." The President has said that "a strong and profitable merchant fleet is vital to America's economic welfare and defense capability."

I concur with the Federal Maritime Administrator's estimate. I agree with the President in his remarks.

Now, I implore the President to take the action necessary to help this floundering, but essential, industry. The funds have been authorized. The President, if he intends to reverse the deteriorating situation and to avert the impending disaster of our merchant marine, should request additional funds for ship construction. The Congress has authorized the money—all he has to do is ask for it.

## PROVIDING FOR CONSIDERATION OF H.R. 15149, FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1970

Mr. O'NEILL of Massachusetts. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 742 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 742

*Resolved*, That upon the adoption of this resolution, notwithstanding any rule of the House to the contrary, it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 15149) making appropriations for Foreign Assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes, and all points of order against said bill are hereby waived.

## CALL OF THE HOUSE

Mr. SAYLOR. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 307]

| | | |
|---|---|---|
| Abbitt | Gallagher | Myers |
| Anderson, Ill. | Gettys | Nichols |
| Blatnik | Gubser | Pepper |
| Bolling | Hanna | Pike |
| Cahill | Hays | Powell |
| Clay | Hébert | Reid, N.Y. |
| Cowger | Heckler, Mass. | Reifel |
| Cramer | Hosmer | Riegle |
| Cunningham | Kirwan | Ruppe |
| Dawson | Landrum | Scheuer |
| Diggs | Lipscomb | Sisk |
| Downing | McEwen | Taft |
| Dwyer | McKneally | Teague, Tex. |
| Edmondson | Macdonald, Mass. | Tunney |
| Eilberg | Mailliard | Utt |
| Esch | Miller, Calif. | Vander Jagt |
| Fascell | Morse | Whalley |
| Flowers | Morton | Wydler |
| Fulton, Tenn. | | Young |

The SPEAKER. On this rollcall 377 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

## AMENDMENTS TO THE ECONOMIC OPPORTUNITY ACT

(Mr. GUDE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUDE. Mr. Speaker, I oppose the proposed amendments which would transfer the responsibilities of OEO to the States. I think we should look at the question in proper perspective. OEO is only a part of the Nation's program for ending poverty. By far the largest program of assistance to the poor—the welfare system—is already administered by

the States. Recognizing this, the President has proposed changes in the welfare system to aid the States in carrying the heavy financial burden of welfare. In addition, his proposed family assistance plan, including aid to the working poor, job training, and work incentives, will greatly expand the role of the States in combating poverty.

In addition, OEO as it is being redirected is not a "line" agency, but an agency designed to innovate, coordinate, and evaluate a limited range of experimental programs. When programs have been tried and tested, they may be spun off to other Federal departments or to the States. The Job Corps, Headstart, and Upward Bound have already graduated from the trial stage and are being administered by other Federal departments.

This accent on innovation and evaluation is the role the President and the Director conceive for the agency and I think it should be given a chance. If OEO under its new leadership fails to involve the States as Congress has already directed, there will be time to make the sweeping change proposed in the amendment.

I fear, too, that the administrative task of creating a new level of bureaucracy would bring the process of testing new programs to a standstill. The flexibility needed in administering small pilot programs would be sacrificed. A large portion of OEO funds would be diverted away from the program and into administration. From the standpoint of efficiency and economy, we cannot afford a huge antipoverty establishment.

Finally, I think that the administration of the program by the States would retard innovation by making every OEO project a political football. Many of us oppose the Murphy amendment because we realize that there will be strong pressures on our Governors to veto legal services projects which may cost the State money. The proposed amendment would have substantially the same effect on the legal services program as the Murphy amendment, and risks injecting lethal doses of local politics into every phase of this needed experimental program.

In short, I think it is too soon to delegate OEO's responsibilities to the States. We simply cannot expect continued development of an effective poverty program if we hand it over wholesale to State agencies which do not even exist and will have to weather severe political storms like this one as soon as they are formed.

## PERMISSION FOR SUBCOMMITTEE ON PUBLIC HEALTH AND WELFARE, COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE, TO SIT DURING GENERAL DEBATE TODAY

Mr. JARMAN. Mr. Speaker, I ask unanimous consent that the Subcommittee on Public Health and Welfare of the Committee on Interstate and Foreign Commerce may be permitted to sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

## FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1970

The SPEAKER. The gentleman from Massachusetts (Mr. O'NEILL) is recognized for 1 hour.

Mr. O'NEILL of Massachusetts. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 742 provides that during the consideration of H.R. 15149, Foreign Assistance Act appropriations for fiscal year 1970, all points of order against the bill are waived.

Due to the fact that some of the authorizations covered by H.R. 15149, though they have passed the House, have not been enacted into law, the waiver of points of order was granted in order to expedite consideration of the bill.

Mr. Speaker, I urge the adoption of House Resolution 742 in order that H.R. 15149 may be considered.

Mr. LATTA. Mr. Speaker, I should like to point out to the House that the passage of this resolution is an absolute necessity. As all Members know, the authorization bill has not yet passed the other body and been signed into law. This makes it absolutely necessary to waive all points of order on this legislation.

I should also like to point out to the House that the committee could have reduced the administration's bill just a little more.

In title I, the committee did an extremely good job, in my humble opinion, by reducing the $2,710,000,000 requested in the budget to $1,599,000,000, which is a reduction of $1,110,000,000. There has been no reduction in title II; a slight reduction in title III of $10,904,000; no reduction at all in title IV; for a total reduction of $1,121,544,000, making the total amount recommended in this bill $2,558,020,000 as opposed to the administration's request of $3,679,564,000.

I feel this is the year this legislation could have been completely omitted.

Mr. Speaker, if the Members will turn to page 5 of the report they will find that there is now in the "pipeline" a total of $18,708,016,000.

It seems to me that with this amount of money remaining in the pipeline and unexpended from prior years appropriations that this new appropriation is really not needed at this time. However, the passage of the resolution waiving points of order reported by the Committee on Rules is necessary in order to consider the bill and, therefore, I urge its adoption.

Mr. Speaker, I have no further requests for time and reserve the balance of my time.

Mr. O'NEILL of Massachusetts. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I take this time not to criticize the Committee on Rules. However, I do want to point out to the House that H.R. 15149, an appropriation bill of some 22 pages, one-half of it is authorizing legislation in an appropriation bill.

Mr. Speaker, I think it is high time that this body operate under the rules of the House. I submit authorizing legislation should remain within the jurisdiction of authorizing committees. The Committee on Appropriations, and certainly the authorizing committees should stay within their jurisdiction. If the House Foreign Affairs Committee dared put an appropriation in an authorizing bill the Committee on Rules would have to grant the Committee on Foreign Affairs a rule waiving points of order. The Foreign Affairs Committee has refrained from doing so.

Therefore, I think it is high time that the Appropriations Committee report a bill dealing only with appropriations. For years we have been trying to correct this situation.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Mr. Speaker, I too would like to express my regret that it should be necessary to waive all points of order, especially since there is legislation of a substantial character contained in this bill. While I am on the subject of this bill, it also seems to me most unfortunate—and I cannot consider it necessary—that we should have to consider this bill on the very same day that the report and the bill itself become available to the Members.

There really is no way we can evaluate the very substantial reductions in a variety of programs that have been proposed to this bill, and there is no opportunity to develop amendments to restore some of these funds. What we are doing is just what we did last year. We are debating the bill without the opportunity to consider it adequately.

Mr. ZABLOCKI. Mr. Speaker, after perusing the bill and the report, I find that there are provisions in certain cases adding additional money. Further there are proposals that the Committee on Foreign Affairs did not have an opportunity to study for which funding is included in the appropriation bill. When the House considered the foreign aid bill 2 weeks ago these proposals could have been brought to our attention through amendments offered on the floor so we could have discussed them.

So, there is in this appropriation bill legislation, Mr. Speaker, if you please, that should have been considered by the Committee on Foreign Affairs.

Mr. COLMER. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Mississippi.

Mr. COLMER. I thank my genial friend from Wisconsin for yielding to me.

I would like to say also that I am appreciative of the position that the gentleman takes. I appreciate further the fact

that he said he did not intend to chastise the Rules Committee or words to that effect.

Mr. ZABLOCKI. Nor criticize.

Mr. COLMER. But the fact remains that that is exactly what is happening. I want to point out to my friend—both of my friends who have spoken on this matter—that I do not like this type of legislating any more than they do. But where is the fault? Whose fault is it? Certainly it is not the fault of the Committee on Rules and I am not sure that it is the fault of the Committee on Appropriations.

The fact remains that the gentleman's committee only recently, after some ten and a half months, or some such matter, has reported its authorizational bill out. The House of Representatives and the Congress are being criticized all over the country, even by the President of the United States, because these appropriation bills are not being enacted. I do not like it. I do not want any part of it. I do not like to waive points of order, but if we are going to get these bills enacted into law then we are going to have to take some drastic action. I just hope that those who are affected adversely by this—and I know there are, and my sense of propriety is outraged by doing these things—but let us take a cue from this and in the next year try to get these bills in a little earlier.

I thank my friend for yielding.

The SPEAKER. The time of the gentleman has expired.

Mr. O'NEILL of Massachusetts. Mr. Speaker, I yield 2 additional minutes to the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I thank the gentleman for yielding me this additional time.

Might I say that I stated to the chairman of the Committee on Rules, when appearing before that august committee, that the reason the Foreign Affairs Committee was reporting the bill at such a late date was because the Committee on Foreign Affairs did not receive the foreign aid message from the executive branch until the latter part of May. Hearings began immediately after the Memorial Day holiday. A very controversial point in the bill—the overseas private investment corporation proposal—necessitated lengthy hearings. It was necessary that we study that proposal in depth. The authorizing Committee on Foreign Affairs had intended and did give every member of the committee an opportunity to present amendments. The Foreign Affairs Committee extended every opportunity to interested Members and private individuals to be heard on amendments and principles contained in the bill.

If there were Members of this Congress who had amendments to the foreign affairs bill we welcomed their proposals. The Foreign Affairs Committee requested a rule as soon as we possibly could. For the purpose of emphasis I shall insert the committee action as listed in the report accompanying the aid bill, H.R. 14580:

COMMITTEE ACTION

On May 28, 1969, the President sent to the Congress a message transmitting proposals to redirect our efforts in foreign aid (H. Doc. 91–122), which was referred to the Committee on Foreign Affairs.

On June 2, 1969, the Congress received a letter from the Acting Secretary of State, transmitting a draft of proposed legislation "to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic, economic, social, and political institutions" (Executive Communication 818, which was referred to the Committee on Foreign Affairs).

On that same date, the Honorable Thomas E. Morgan, chairman, Committee on Foreign Affairs, introduced the bill H.R. 11792, which was referred to the committee.

Hearings on H.R. 11792 began on June 9, 1969, and continued through August 1, 1969.

The committee met in executive session during August, September, and October to mark up the bill, and on October 30, 1969, a clean bill, H.R. 14580, was ordered favorably reported by a vote of 28 ayes, 8 noes and 2 answering present.

The gentleman from Wisconsin is not blaming the Committee on Rules at all, but I do not believe that the Committee on Appropriations should be permitted under a rule waiving points of order to include legislation in an appropriation bill. This practice must stop. Concerned Members of the House were told it would stop in the last Congress, and in Congresses before. Unless the Committee on Rules denies rules waiving points of order, the Appropriations Committees will continue in their past habits.

Mr. COLMER. Mr. Speaker, I again will say, if the gentleman will yield further to me, that I have great sympathy for his position. I know of but one thing we can do under the circumstances, and that is what I propose to do. I am going to vote against the bill.

Mr. ZABLOCKI. I am tempted to do likewise.

Mr. O'NEILL of Massachusetts. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, with regard to the rule, there are two things that it does: When an appropriation committee reports a bill that is supposed to lay over 3 days, and we have waived points of order on that. The second thing is that we are waiving points of order because the bill has not passed the Senate.

In all fairness to the Committee on Rules, we are only trying to expedite matters around here. The gentleman from Wisconsin, or any other member of his committee, had the right to come before the Committee on Rules yesterday when this rule was presented to us, and make his presentation and his objections at that time.

If criticism is going to be leveled around here then their committee ought to take a great part of the criticism.

Why did they take so long to submit a bill to the floor? Why is it almost the eve of Christmas when we are taking action on this matter, when we should have acted on it a long time ago? It is because the committee members themselves were lagging. Do not put all the criticism on the Committee on Rules.

Further, in that regard, if there are cuts in this budget in which they are not satisfied, there is going to be a time when the bill is authorized by the Senate, and there will be a conference committee. They can work out and agree on the differences. There will be the opportunity at a later date to go before the gentleman from Louisiana (Mr. PASSMAN) and ask for a supplemental budget.

But I do not think because this committee took so long that the Committee on Rules should take the brunt of this, or that this House should be in session this long without the committees acting.

For that reason, Mr. Speaker, I hope that the rule is adopted.

Mr. ZABLOCKI. Mr. Speaker, will the gentleman from Massachusetts yield to me since he mentioned my name?

Mr. O'NEILL of Massachusetts. Yes, I will be happy to yield to the gentleman.

Mr. ZABLOCKI. Mr. Speaker, I wish to point out to the gentleman from Massachusetts that the bill, H.R. 15149, was introduced yesterday, December 8, 1969. The report accompanying it was issued on the same date. The rule was granted on the same date.

How could the members of the Committee on Foreign Affairs or the distinguished chairman of that committee, the Honorable THOMAS MORGAN, appear before the Committee on Rules in protest of some of the provisions in the appropriation bill? If the gentleman will yield further, I am not solely concerned about the cuts in funding amounts. I am primarily referring to the nine or 11 pages of legislation contained in the bill. Members of the Foreign Affairs Committee did not appear because we were not aware of the legislative provisions in the bill.

Mr. O'NEILL of Massachusetts. Mr. Speaker, in reply, all I can say is when I left the Congress last Friday to return to my home in Boston, I knew at that time that the Committee on Rules was going to meet on Monday morning and I knew that this bill was going to be before the committee.

It seems to me that the Committee on Foreign Affairs should have taken cognizance of the fact that the Committee on Rules was going to have a hearing and, therefore, they should have had a Member or a member of the staff there present to see what happened and what was transpiring.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. PASSMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 15149) making appropriations for Foreign Assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate on the bill be limited to not to exceed 3 hours, the time to be equally divided and controlled by the gentleman from Kansas (Mr. SHRIVER) and myself.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from Louisiana.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 15149, with Mr. PRICE of Illinois in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous consent agreement, the gentleman from Louisiana (Mr. PASSMAN) will be recognized for 1½ hours and the gentleman from Kansas (Mr. SHRIVER) will be recognized for 1½ hours.

The Chair recognizes the gentleman from Louisiana (Mr. PASSMAN).

Mr. PASSMAN. Mr. Chairman, I yield myself whatever time I may use.

Mr. Chairman, at the outset I think we should set the record straight.

There is no legislation in this bill other than legislative provisions that we have carried in the bill in previous years. We have added several new limitations this year which we will discuss later. There are only two exceptions. One is the foreign military credit sales program, which has not been authorized yet, and the committee added $650,000 for a hospital and home for the aged in Israel, which was not in the House-passed authorization bill.

I do not want to have the Committee on Appropriations assume the blame for consideration of this bill by the House at this late date. We are only 16 days away from Christmas. I know the Members want to go home. I have been cooling my heels around here for some months waiting for an authorization bill. I spent 300 hours on my subcommittee hearings and I concluded them so long ago that I had to go back just recently and read the hearings to realize that this bill is for the fiscal year in which we are operating now.

I do not know why the Foreign Affairs Committee is so sensitive. We are operating under a completely legal rule. These are the procedures we follow when the business of the House gets bogged down. I do not think that that committee is holier than thou; neither do I think the Committee on Appropriations is holier than thou. It is a question of doing the right thing at the right time so that the Members can finish their work and go home for Christmas.

I am going to have to assume that most of the dissatisfaction about this bill is brought about by the very substantial reductions made by our committee. I want to, if I may, read an article from the local press. It is not very complimentary:

Acting with characteristic blind irresponsibility, however, OTTO PASSMAN'S aid appropriations subcommittee slashed the figure to $1.6 billion (against $1.75 billion finally appropriated last year); the Passman massacre is likely to be confirmed on the floor.

I certainly hope it will be, and if that is being irresponsible, I wish we had more irresponsible committees, because we are spending money we do not have for things which we do not need trying to be everything to everybody all over the world.

I want to say that it has been my privilege to walk into the well of this House for the 15th year to handle the foreign aid appropriations bill. I am going to give you some information on the first 14 years it was my privilege to handle the bill. The budget asked for $54,963,341,250. During that same period Congress—and I give the Foreign Affairs Committee credit for making some reduction, but most of the reductions were actually made in the Committee on Appropriations—actually reduced the budget request by $11,185,185,500, or an average cut of almost $800 million per year below what the budget had requested, and each and every year, without exception, we left the foreign aid bill overfunded.

There is not a Member on the floor of the House that can refute the accuracy of that statement.

We left the program overfunded and each and every one of those years the program had unobligated funds at the end of the year. And that is also true this year. With all the crying that took place last year about this Committee's recommendation to reduce foreign aid, the program still wound up with a substantial amount of unobligated funds.

Mr. Chairman, this program has been greatly fragmentized. The most astute Members of Congress has difficulty in keeping up with the actual amount of money in the foreign aid program. So for the benefit of the membership I am going to go directly to the record and read these figures:

Item 1 this year, mutual security, as we refer to it, or foreign assistance, the budget request was $2,710,020,000. That is spigot 1.

Item 2. Receipts and recoveries from previous programs, from previous years, $274,785,000.

Item 3. Military assistance—in Defense budget—$2,230,900,000, previously carried in this bill.

Item 4. Economic assistance—in Defense budget—$76,600,000, previously carried in this bill.

Item 5. Foreign military credit sales fund, $275,000,000.

Item 6. MAAG's, missions, and milgroups, $168,800,000.

Item 7. Export-Import Bank, long-term credits, $1,872,200,000.

Item 8. Export-Import Bank, regular operations, $570,423,000.

Item 9. Export-Import Bank, export expansion program, $100,000,000.

Item 10. Public Law 480—agricultural commodities—$986,600,000.

Item 11. Inter-American Development Bank (FSO), $300,000,000.

Item 12. International Development Association, request 1, $160 million.

Item 13. International Development Association, request 2, $160 million.

Item 14. Asian Development Bank—regular contribution—$20 million.

Item 15. Asian Development Bank—special funds—$25 million.

Item 16. Peace Corps, $101,100,000.

Item 17. Permanent military construction, foreign nations, $255,300,000.

Item 18. Contributions to international organizations, $130,187,000.

Item 19. Educational—foreign and other students—$43,614,000.

Item 20. Ryukyu Islands, $20,651,000.

Item 21. Migrants and refugees, $5,511,000.

Item 22. Trust Territories of the Pacific Islands, $41,612,000.

That makes a total of $10,528,303,000, that has been requested for authorization and appropriation for selected programs of foreign assistance.

In addition to that staggering total of over $10.5 billion, the President has sent a request to the Senate asking for an additional $890 million for the Export-Import Bank, which would bring the total aid program up to $11,400,000,000. This listing includes grant aid, sales, credits, and other programs. That is the grand total.

Now let us go over some of the items in this bill alone, which is indeed frightening. I want the Members to listen carefully, because this is a statement of fact. Last year the requests came in for approximately $10.5 billion for the 22 spigots of foreign aid.

We had in this country what we referred to as the Revenue and Expenditure Control Act. While we were cutting back expenditures in America by closing down projects all over America, and causing some small contractors to go into bankruptcy—some of them had contracts for projects which were 75 percent completed and the funds were impounded and the contractors could not proceed under these contracts—do the Members realize that not one single project of the 4,408 projects and subprojects in the AID program, in 99 nations and five territories of the world, was cut back as much as one dime?

This year, while we are again considering making available the aggregate sum of $11.4 billion, we have a freeze on 75 percent of all new Federal construction in America. I am not fighting that, but I want Members to understand that we are discriminating against our own people in favor of many of the recipient nations of this foreign aid program.

What are we confronted with? We have permitted something to grow up in our Government over which we have lost control. We have 51,936 individuals drawing monthly stipends from the AID Agency—U.S. personnel, foreign nationals, and participants.

This means there are 51,936 ambassadors for more foreign aid who are scattered in 99 nations of the world, with the support of all the ambassadors in those nations.

It is almost impossible for a small committee, spending part time, to stay on top of this mammoth program. I was in hopes that the Foreign Affairs Committee this year would come in and congratulate the Foreign Operations Subcommittee on Appropriations for going into this program and ascertaining the actual need, and not appropriating just what some bureau or bureaucrats downtown wanted. Evidently we are not going to get that commendation.

Let us go into the details of this wild and woolly foreign aid program. Let us take worldwide technical assistance. This year there is an authorization of $200 million. Our committee recommended

$150 million. Why did we recommend this reduction? One of the factors was because upon examination we found one consultant was getting $260 a day, in addition to all his expenses. There is only one other individual in Government drawing a larger salary, and that is the President of the United States.

We found another one drawing $250 a day with all his expenses paid. We found three drawing $200 per day. A listing of these consultants can be found on pages 311 and 312 of part 2 of the printed hearings.

Then the Agency comes along and says they want to allocate this money under a different system. They want us to permit them to go to the universities and the colleges and enter into a contract and give them a certain amount of money to do a job. In my opinion that would deprive our committee of the right of examination to determine how many they have under a contractual basis, how many they have on another basis, and what they are paying them.

While we do not think too well of this new proposal, we are going to let the Agency have a pilot program on that proposal.

There is an awful lot of feeling about another program which the administration says we have underfunded. But we are guilty of overfunding the supporting assistance program last year. Last year the budget request for supporting assistance was $595 million.

After a long and difficult time, we were able to reduce the request by $230 million, allowing $365,000,000, and of course, the Agency screamed bloody murder that this cut would destroy the program, that this money goes to Vietnam, Thailand, Laos, and Korea.

What are the facts? They came in this year, and upon examination this is what we found out: they actually needed only $241,394,000 last year. We gave them $365 million. We found on June 30 they had $55,680,000 on hand unobligated that lapsed because they had no use for it. In addition to that, we found that they had obligated $57,926,700 for projects on which they had not submitted one iota of supporting assistance program justification material.

In addition, we found that they ran a ghost project in South Vietnam. They discovered they would have to use legal bribery and pledge in advance to the Saigon legislature, "If you will pass a land-reform bill, we will give you $40 million." So, lo and behold, on June 27, 3 days before the funds would lapse, they had so much unneeded money, they allocated $10 million to a purely nonexistent ghost project.

I asked the Secretary of State, when he came before our committee, "Is the legislature in Saigon in session?" He said, "Yes." I asked, "Do you know whether or not they have passed this legislation?" He said, "I do not think so." I can assure the Members that he said, "I do not know whether they ever will pass legislation."

Yet these people allocated $10 million to a ghost project so as to obligate a lot of this supporting assistance money.

My friends, there has been much feeling about the supporting assistance program. What did the committee do this year? I want the Members to pay particular attention to this, so they will know we may have again overfunded this program. The committee recommended $300 million in new funds, and also recommended the reappropriation of the $55,680,000 in unobligated funds.

Also, they have another little trick known as obligating funds and then at some subsequent date, when we are home trying to seek reelection, they deobligate those funds and start new projects. This year, if you please, they are going to have $35,910,000 of deobligated funds.

So I say that we are going to allow in this bill funds in the amount of $391,590,000.

Listen to the record. The so-called deobligated $35,910,000, in all probability, will go to $100 million when we go home for a brief Christmas leave, because in supporting assistance in fiscal 1968 they came up meekly and said, "Yes, we are going to deobligate $18,850,000." What did they finally deobligate? $90,669,000.

In fiscal 1969 the estimate of deobligated funds originally was $29,400,000. What did they subsequently deobligate? $61,022,000.

I could go on for hours on this bill, pointing out its weaknesses, and I do regret that my good and able friends on the Foreign Affairs Committee do not have the time to go into the details as we do and establish for the record the actual need and not agree with the wish of some bureaucrat or some bunch of bureaucrats downtown.

The only apology I have is the fact that without exception during my 14 years serving as chairman of this subcommittee we have overfunded the entire program.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I will not yield to the gentleman at this time. I am stating facts and I ask the gentleman to challenge them. I shall not yield until I finish my statement.

Now, Mr. Chairman, let us look at another bogeyman.

Mr. ZABLOCKI. Mr. Chairman, since the gentleman referred to me, will the gentleman yield?

Mr. PASSMAN. I have not used your name. You are only one member of the Committee on Foreign Affairs, are you not?

Now, Mr. Chairman, some of us must assume the responsibility of facing up to the serious situation that we have in America, a public debt of $1,650 billion. when you include the borrowed money and the statutory obligations which say we are going to give you in subsequent years for some services you have previously rendered, and we have created no reserves for these statutory obligations.

Mr. Chairman, every man, woman, and child in this country is in debt to the extent of $8,250 because we do not have the time during which to go into these bills in great depth as is needed to be done rather than taking the recommendations from the bureaucrats downtown.

Mr. Chairman, I want to discuss one item which is the $75 million request which the committee did not approve for the new Overseas Private Investment Corporation, OPIC. What are the facts?

This is a reserve to guarantee credits to people who make investments abroad if their property is expropriated or if the currency is devalued. In other words, it is a guaranteed investment. This idea is 20 years old. About 8 years ago they came in and said, "We need $180 million for the Guaranty Fund and we must have it. It is important. We need to impress the American businessman to make investments abroad." I asked the question, "Is it not true that the full faith and cerdit of the United States backs up these loans?" They say, "Yes, that is correct, but it would be more attractive if we had the money appropriated."

As I said, they asked for $180 million. We gave them $30 million. We cut the request $150 million. Now, this year for some reason or other, they got the Foreign Affairs Committee to authorize $75 million for this account. I decided to do an examination on this particular account. We found we had appropriated $57,422,000 and they had collected as of December 31, 1968, $62,950,000 and as of October 31 they had collected an additional $9.6 million. So, they have $129,972,863 in that kitty.

What is the loss record? During the 20 years of its existence, they have paid out $11,820,000 in claims. So, they have sufficient funds on hand at this time to fund this program for 258 years and 4 months—I repeat, 258 years and 4 months. Despite that loss ratio they said, "We want the $75 million. We are not going to spend it. But if we put it in the fund then it will make it more attractive to businessmen who want to go abroad and make their investments."

If the $130 million were to revert to the Treasury, the investment guaranty program would still have the full faith and credit backing of the United States of America.

Let us go to another item in this bill. You have 39 different agencies and bureaus, not counting all the commercial banks, where American businessmen can borrow money to invest. They can go to three windows of the Export-Import Bank. The Alliance for Progress loan fund is available for up to 50 percent for that type of loan. The same thing is true of the development loans.

More importantly, of course, would be the fact that the American businessmen have the necessary capital and do not need to borrow from the Federal Government. But for some reason or other—and we hope to find out why some day—AID has come up with a proposal now that they will transfer $20 million per year for 5 years out of the repayments to the two Development Loan Funds, to set up a new lending program in OPIC.

This is just another little lending agency being created in the so-called Overseas Private Investment Corporation. There is absolutely no justification for it in my opinion, although there are some Members who feel there is.

Let us go a little bit further—and if you think you can keep up with all these people are doing, you had better have another think about it. There has been complaint about the multilateral organization technical assistance program.

This year we have recommended $88.8

million for this purpose, the same amount that was made available last year for this purpose. As mentioned in the committee report, the committee felt the request for the UNDP—an increase of $29 million—was excessive, so we reduced the total amount requested for this purpose.

For the Indus Basin they have asked for $7,530,000. We have set that out in a separate paragraph of the bill. So they are getting what they asked for.

American schools and hospitals abroad, the committee felt that it should recommend the entire amount.

We get down to the contingency fund. Last year the Congress appropriated $5 million, this year your committee recommends $10 million. This is double what we appropriated last year.

Alliance for Progress loans—at this stage last year we recommended $200 million; that is the identical amount we are recommending in this bill at this time for fiscal 1970.

For worldwide development loans, last year at this stage we recommended $265 million, and you voted for what we recommended. We are recommending this year the same amount, $265 million.

If you look at the actual record you will find that in all probability this program is going to be overfunded, because as of the first 5 months of the fiscal year they have committed themselves to only $217 million. And if you look at the two accounts it adds up, at this stage, to $465 million.

Again, we are not criticizing the great Committee on Foreign Affairs. But some individuals always worry about whether there is a budget request for a certain item.

We do not feel that way—because we are not holier than thou.

In the appropriation for American schools and hospitals abroad, there is a variety of projects numbering about seven. There are no budget estimates for those projects. The great Committee on Foreign Affairs put them in its authorization bill. They put them in without budget justification. We say they are good and we support them.

There are four or five schools in Israel and, of course, the prototype desalting plant where we recommended $20 million to provide enough funds to initiate planning, design, and prepare specifications. The committee will take a good look at this project next year to see how it is progressing.

Mr. Chairman, I have had the honor to chair this committee for 15 years. I am not smart, but I do follow the facts as they are. I would not want to do otherwise anyway.

There are a lot of things in this bill that in my candid opinion, if I were to go into them, we may not get a bill through the House. But I think I should state to the committee that the budget request for spigot No. 1 only, title I of this bill, the so-called foreign aid program, is $2,710,020,000. The bill before you, including the reductions the Committee on Foreign Affairs recommended, recommends a total reduction of $1,110,640,000 less than the budget estimate.

This is just about the same percentage cut we have made in prior years and without exception left the program overfunded.

We are recommending a reduction of $674,140,000 below what was authorized by the House when it passed the authorization bill on November 20.

You know, and I know, and the Committee on Foreign Affairs knows, that this bill has many more stations to pass before it finally comes back to this floor. It would please me very much to be able to say we will bring it back just as we are passing it. But I think it is only proper to call the attention of the committee to the fact that notwithstanding the fact that there is $10,528,000,000 in total foreign aid requests, there is a supplemental estimate for the Export-Import Bank for $890,338,000 over and above that $10.5 billion figure.

I would point out that there is a pipeline of unexpended funds from prior years programs of about $18,708,016,000.

If you want to get a general idea as to how much you have in the pipeline for some of the recipient nations, I respectfully refer you to page 5 of the committee report. Some of these nations have almost a half billion dollars in the pipeline to their credit.

I would respectfully refer you now to page 6 of the report and then you will get a general idea of what overspending in the foreign field has done to this country.

As I stand here talking to you, I can assure you that the deficit in the U.S. international balance-of-payments account in the past 19 years amounts to $36,896,000,000. We only had a surplus in 2 of the 19 years.

In 1956 we had a surplus of $500,000,000. Last year we had a surplus of $93,000,000. But we did not create a surplus by increasing our exports. Last year we had the black satchel man looking into the treasuries of the nations throughout the world, and every time we found a nation, whether it was one of the old aid recipients or one of the new ones, because this country borrowed money to pay for the commodities we gave them, we permitted them to build up a substantial foreign exchange surplus.

So the black satchel man arrived in those countries and said, "We want to borrow some of that money."

Our man arrived in Bangkok, Thailand, and said: "We have given you a billion dollars, but during that same period you have built up a surplus foreign exchange amount of over a billion dollars. Now we want to borrow back from you $250,000,000."

This is the way that works. We are going out and borrowing American tax dollars to ship the commodities to them and letting the U.S. Treasury pay the bill. That saves the foreign exchange they earn and permits them to build up their foreign exchange account.

We told Thailand we want to borrow $250,000,000. They said "No," but after a lot of pleading they agreed to let us borrow $100,000,000."

What are the terms? We will pay it back to them in 4½ years at 6-percent interest.

I am not going to go into all of that. I want to counsel with you. Our Nation gives them a billion dollars in aid which permits them to build up a billion dollar surplus foreign exchange. Then we go out and borrow it from them, but we have to pay it back in 4½ years plus 6-percent interest.

This is the way that program operates. If I were to go any further into it, you may defeat the bill. There is a lot of information in this committee report, and if you read it, this committee may have your commendations and not your criticism.

My friends, I am the biggest hawk on the Hill. When my country is at war, I support it. We are in trouble, and you know that we are in trouble, in many spots around the world.

Several years ago I made up my mind that I would be a hawk. I remember we lost 30,000 young men in Korea, and we have lost 40,000 in Vietnam. We have a few allies around the world. I think we are committed in Korea, where it cost us $2.5 billion to win the war. The figures are classified, but we have thousands of American soldiers there today.

In my candid opinion, if the doves, the hawks, or even the hummingbirds would read the secret reports I am going to make available, they would be here seeking to help correct this deficiency. It is tremendous.

If we consider Nationalist China, I can assure you that they are today spending tens of millions of dollars to purchase military hardware from us. This year they are going to spend some $50 million cash in the United States. You and I know that I cannot reveal top secret information. But I want the hawks, the doves, and any Member to come and read these secret letters. If they do, I do not believe they could possibly support an amendment to take the $54.5 million out, unless it is done on a personal basis, and I trust it shall not be. I want to debate the question on its merits. I do not want to hear the statement that there was no budget request. The policy in the Far East has been fixed, and it has been fixed for many years. The only thing we must do now is to decide at what level we shall replace obsolete equipment. The budget is nothing more than a guide. There is nothing sacred about that budget. I should like to ask those who argue that there is no budget request, about the other bills, covering some $2,985,000,000, that they increased without any budget request whatsoever.

And I want to discuss another project if you are going to get into the subject of budget requests. It will touch on a sacred agency, and we will have some warm debate. I ask you to take into consideration the direction in which we are traveling and how hard your committee has worked for many years and has now saved in excess of $12 billion.

Mr. Chairman, since the creation of this foreign aid program it has gone into 121 nations and seven territories of the world at an aggregate cost of $182,583 million. That figure itself should be convincing that we have gone too far afield with the foreign aid program. We have brought all the nations of the world in but 14, and some of the nations that we were once fighting, are getting money out of this program.

Mr. Chairman, I refer the members of the committee to the printed report of the committee.

Mrs. HANSEN of Washington. Mr. Chairman, will the distinguished gentleman yield?

Mr. PASSMAN. I am pleased to yield to the gentlewoman from Washington.

Mrs. HANSEN of Washington. I would like you to clarify the explanation of the $12 million for the United Nations Children's Fund, found on page 13 of the committee report. Is it not true that this amount is a "floor" and not a "ceiling" for the Children's Fund?

Mr. PASSMAN. The gentlewoman is absolutely correct. In previous years we had funded the U.N. Children's Fund at $12 million.

Last year we increased it by an additional $1 million because it was an anniversary, so they got $13 million. This year we thought we would return to the original figure, that no less than $12 million would be available, but there is no limitation. If the Department should decide they need $15 million, of course, then the legislation is broad enough to take care of it.

Mr. Chairman, I commend the gentlewoman for the great contribution she has made for funds for the Children's Fund. She has interrogated on this item every year and has made very sure that this item was adequately funded. I am very pleased the gentlewoman did ask this question so we could make this legislative history.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Chairman, I thank the gentleman for yielding. I do not rise at this time to take issue with the gentleman's figures.

Mr. PASSMAN. I commend the gentleman for modifying his feeling, and he will wind up supporting my bill, I hope. Does the gentleman have a question?

Mr. ZABLOCKI. I know figures can be juggled.

Mr. PASSMAN. If the gentleman is making a statement that I juggled the figures, I can assure him I did not.

Mr. ZABLOCKI. I did not as yet accuse the gentleman of juggling anything.

Mr. PASSMAN. I hope the gentleman makes sure he defines what is being juggled. What is the gentleman's question?

Mr. ZABLOCKI. The gentleman referred to the 22 foreign aid facets, listed on page 4 of the committee's report.

Mr. PASSMAN. Yes.

Mr. ZABLOCKI. I know the gentleman is very influential. Would the gentleman advocate the authorization of the funds for the 22 items listed on page 4 should be placed within the jurisdiction of the Foreign Affairs Committee? The gentleman from Wisconsin would like to point out that some included in the list should not be included as foreign aid. Specifically the Migrants and Refugees, Ryukyu Islands, Trust Territories of the Pacific Islands, and the Export-Import Bank, are not foreign aid programs. On the other hand since the gentleman has mentioned other programs such as Public Law 480, Inter-American Development Bank (FSO), International Development Bank, for example, would the gentleman use his influence to see that the authorization for these programs be placed in the Foreign Affairs Committee? The Foreign Affairs Committee could then take a look at all of these programs as the proper legislating and authorizing committee.

Mr. PASSMAN. I am so pleased the gentleman brought up that question. If I go any further into this bill, we may wind up without a bill. The people downtown are specialists in fragmentizing and hiding foreign aid. Does the gentleman realize that they proposed that only a small part is to be handled by the Foreign Affairs Committee?

Here is something I just want to whisk over, because we do not want to go into too much detail. This has grown up in the past few years. We have in this bill, not even included in the $2,710,000,000 estimate, an amount of $665 million for three banks. Let us take the International Development Association. This year there are two requests for $160 million each, totaling $320 million. What are the terms for IDA loans? Here are the terms: Fifty years, no interest, with a 10-year grace period, then 1 percent per year repayment of principal for 10 years, then 3 percent a year for the next 30 years. There is only three-fourths of 1 percent service charge for handling the loan.

IDA was created, I assume, because they detected other types of aid would go down, so they started creating these banks. If the gentleman will look at the total bill, he will find items totaling $665 million for these three banks which are also foreign aid and assistance but which are not included in title I of the bill, the so-called foreign aid program. So the gentleman is correct. This is only a small part. But the recapitulation is correct.

Mr. ZABLOCKI. I am not questioning the recapitulation. I am questioning whether some of the programs and agencies mentioned should be considered as foreign aid.

Mr. PASSMAN. I believe I can give the gentleman a better explanation. May I explain it so we can all understand it?

I have a friend in Monroe, La., who was an alcoholic. I went down and asked about him, and they said that old John had given up whisky. He had been on that stuff so long I did not think he would ever reform. Then, 3 months later, I went down and asked about old John. They said he was in the hospital. I asked, "What is the trouble?" They said, "Alcohol." I said, "I thought he gave up whisky." They said, "Yes, he did. But he is now on vodka."

That is the way this program is. They switched to a different brand, but it is still foreign aid.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield.

Mr. ZABLOCKI. Not being a drinking man, I would not know the difference.

Mr. PASSMAN. I do not drink, either.

Mr. ZABLOCKI. The gentleman's story reminds me of an earlier reference of the gentleman from Louisiana. In his opening statement the gentleman insisted that this bill does not contain any legislation except in two little instances. That is like being just a little bit pregnant.

Mr. PASSMAN. Let me repeat what I said. This bill does not contain any legislation. It includes only limitations we have been carrying in this bill for years and years. The only two exceptions would be the foreign military credit sales program and a small project in Israel, plus, of course, some new limitations the committee felt was necessary.

The other provisions we have carried in this bill year in and year out. Technically, I could say perhaps everything in the bill, if you want to get technical, the Foreign Affairs Committee should have looked at.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield further?

Mr. PASSMAN. I yield.

Mr. ZABLOCKI. I want to compliment the gentleman——

Mr. PASSMAN. I thank you for the compliment.

Mr. ZABLOCKI. For striking out the $75 million for OPIC.

Mr. PASSMAN. I knew the gentleman wanted it out, and that is why we took it out. I had reason to believe that, and we were glad to take it out for him.

Mr. ZABLOCKI. May I ask one final question?

Mr. PASSMAN. Yes.

Mr. ZABLOCKI. As the gentleman from Louisiana knows, the gentleman from Wisconsin is deeply interested in the military assistance program.

Mr. PASSMAN. Yes.

Mr. ZABLOCKI. The authorizing committee did include $50 million for Korea.

Mr. PASSMAN. Yes.

Mr. ZABLOCKI. And on the floor of the House during the consideration of the foreign aid bill $54.5 million was added for Taiwan. I noticed the Appropriations Committee has stricken the $50 million for Korea but has retained the $54.5 million for Taiwan. Would the gentleman enlighten the House, the members of the committee the justification and the logic for the committee's action? What was the reasoning? Did the Appropriations Committee hold hearings on these items?

Mr. PASSMAN. If you start using logic you are really going to embarrass me, because I am afraid we do not use too much logic in considering both the authorization and appropriation bills for foreign aid.

Mr. ZABLOCKI. Undoubtedly the gentleman would agree, however, we ought to return to logic?

Mr. PASSMAN. I am just as strong for the $50 million for Korea as I am for the $54.5 million for Taiwan. I pleaded with the members of my subcommittee not to take out of the $50 million for Korea. I supported it in my subcommittee.

We move on to the full committee. Again I supported an amendment for $50 million for Korea. I turned to my distinguished chairman yesterday, when it was defeated, and I said, "I must reserve on this, and if the rules will permit, if there is an amendment offered to put $50 million back for Korea, not only am I going to support it but also I am going to speak for it, because I know you know this is a very small percentage of the amount needed over there if we are going to protect our boys."

I support you. I have supported you. I have supported you at every station. I am going to support you if an amendment is offered to put it back.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Iowa.

Mr. GROSS. I note that when the Secretary of State appeared before the Foreign Relations Committee of the other body a few days ago, he said "we appear to be cutting back on our share of the job." In other words, we are not carrying out our share of the foreign handout load. Would the gentleman care to comment on this statement?

Mr. PASSMAN. The Secretary is a very personable type of fellow. This is standard. He picked it up. It was put in the direction books some 15 years ago. I am very fond of him.

This is the same type of statements they have made in previous years. I have reported this bill in my committee, and I have seen the white envelopes slipped under the door to my chairman, not to my present chairman but to a previous chairman, and to the ranking minority Member, saying, "Do not cut it. There are grave consequences."

So this does not cause me any alarm. That is the stock answer, the stock justification.

Mr. GROSS. And, I note that the Director of the foreign give-away outfit, Mr. Hannah takes the same view.

Mr. PASSMAN. That is the stock line.

Mr. GROSS. I wonder if the gentleman has ever inquired into the amount of money that has been allocated to Michigan State University and to the University of Michigan through the years? This so-called foreign aid program has been a bonanza for those two institutions. I tried to get together some figures for this occasion and it seems to me that it now runs to about $40 million, and there are open contracts in existence dealing with those two institutions. Dr. Hannah as the former president of one of those institutions had an interest in these lush contracts.

Mr. PASSMAN. May I say to the distinguished gentleman I think Dr. Hannah is one of the most dedicated Christian men I have ever met. I think his integrity is absolutely unimpeachable. I do not believe Dr. Hannah would under any circumstance recommend a contract for Michigan State University that could not be justified as a contract for any other college or university. I feel that way about the gentleman. I do not know that he knows anything about foreign aid. He knows what he is doing in supporting foreign aid and he knows only what we are going to give him.

Mr. GROSS. Anyway, those Michigan institutions have been and still are doing very well on contracts with the AID organization.

Would the gentleman address himself to the proposition of the obligations and commitments of money as of June 30, the last day of the fiscal year?

Mr. PASSMAN. Well, I might say this, that these people get very busy beginning about June 25 and the amount of work they do between June 25 and June 30 would justify three times the amount of salary they are receiving based upon how much money they can obligate in the last few days of the fiscal year. Does that answer the gentleman's question?

Mr. GROSS. They seem to have done an extraordinarily good job in shoveling out the money at the last minute.

Mr. PASSMAN. That is the period of time from which most of your deobligations eventually occur. As I say, I want to be complimentary about this bill because I want to see it passed but if I keep on talking, I might defeat it.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. Yes, I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. The gentleman from Louisiana has said that his committee has taken a look at the actual need of the various programs prior to making recommendations. I have three questions.

Mr. PASSMAN. Yes, sir.

Mr. FRELINGHUYSEN. The first question is this: What is the justification for the very substantial cut in the development loan program for Latin America?

Mr. PASSMAN. Let me answer them one at a time.

Mr. FRELINGHUYSEN. The other question is, What is the purpose for these cuts in the development loans, generally?

Mr. PASSMAN. We are recommending the same amount for Latin America now that we recommended last year and that is $200 million. We have been into this fiscal year for a total of over 5 months and the gentleman will find that there is a considerable amount of money in that fund. I refer the gentleman repectfully to this report. Last year we recommended $200 million and this year we are recommending $200 million in this bill. In addition to that, you may find all kinds of spigots of foreign aid for Latin America. There is a pipeline of unexpended funds of about $1,162 million.

Mr. FRELINGHUYSEN. Mr. Chairman, if the gentleman will yield further, the gentleman is looking solely at the past, and not at this year's request.

Mr. PASSMAN. I am looking at the unexpended funds. After all is said and done, are we ever going to be able to say that now we can start going back the other way? Does this mean that for the remainder of our lives we must dissipate everything we see, hear, and taste? Is there a law that says that we must burn up the entire resources of America? I think they are doing very good to get the same recommendation this time as they did last year, $200 million. They do not need the $200 million, but we recommended the $200 million.

Now, the next question, please.

Mr. FRELINGHUYSEN. I assume the answer to the next question will be the same.

Mr. PASSMAN. I am giving you the best answers I have.

Mr. FRELINGHUYSEN. But if your same line of reasoning is applied to my question, I think I know the answer.

Mr. PASSMAN. What is the answer? Go to the next one, if you know the answer. I do not want to argue, but I am trying to save time.

Mr. FRELINGHUYSEN. If the gentleman would let me ask the question, why was so substantial a cut made in the Development loans, worldwide, not Alliance loans, but other loans? You recommend only 40 percent of what was requested.

Mr. PASSMAN. I can only say this to the gentleman. Development loans, worldwide, again last year we had some $265 million at this point. This year we are again recommending $265 million, the same amount we recommended last year.

Mr. FRELINGHUYSEN. This is simply looking backward.

Mr. PASSMAN. I do not know whether you call it looking backward or looking forward, I think it is looking forward because we are borrowing this money to give away and some day we might have to be called upon to pay it back.

Mr. FRELINGHUYSEN. I do not know what figures the gentleman is using. The report on page 22 says that $300 million was appropriated last year, but your recommendation this year is $265 million.

Mr. PASSMAN. I have to clarify my answer to the gentleman's question. I said at this time. We came to this floor last year recommending $265 million. We are on the floor today recommending $265 million. If it goes over to the Senate, they may increase it, and in all probability there will have to be a compromise.

Mr. FRELINGHUYSEN. If I could ask the gentleman one final question regarding the cutback in the multilateral programs: Is this attributable to a feeling that too much is being requested for the United Nations development program?

Mr. PASSMAN. Yes.

Mr. FRELINGHUYSEN. If that is the reason, why does the committee feel that way?

Mr. PASSMAN. Let me say to the gentleman—and I am very fond of the gentleman, I like to kid the gentleman because the gentleman is a good kidder.

Mr. FREYLINGHUYSEN. I thank the gentleman for the compliment—if it is one.

Mr. PASSMAN. It is a compliment. I am a lover always, not a hater; I am not a great foreign aid enthusiast.

I believe that if you go to page 13 of the hearings you will find the answer where, if you look at the multilaterial organizations, we are recommending $88.8 million. Is that true, or is that what you find? $88.8 million?

Mr. FRELINGHUYSEN. That is what the gentleman is saying. However, that is a substantial limitation from the request.

Mr. PASSMAN. I am going to explain to the gentleman what has happened—and I do not believe there are 20 experts in America who can match wits with the 51,000 people, directly and indirectly, who are spending their full time finding ways to give away our money.

First, they have changed its name. The name of it now is Multilateral Organizations, whereas previously it was International Organizations and Programs. The $88.8 million is recommended in new funds under the new name Multilateral Organizations. There is $19.6 million carried now under Supporting Assistance, which was previously carried under International Organizations.

In addition to that, last year they requested $17.6 million for the Indus Basin. They carried that under International Organizations and Programs. This year they deleted that likewise from the new appropriation, and they are

funding that as a separate item, $17,530,000, as you will find in the report, and we are recommending the full amount.

Mr. FRELINGHUYSEN. I might say that the gentleman has not answered my question at all, although he may have made a basis for an answer which he may still provide.

I understand from page 12 of your report that $122 million is requested, but something like $88 million is going to be recommended.

That means that something is going to have to be cut very substantially. The fact that certain programs are no longer included among those listed on page 12 is completely irrelevant to my question.

Mr. PASSMAN. I am going to make it abundantly clear that we are funding this program in accordance with the new name, and if you return to the new name the two programs that they transferred out of the old name, then you are going to come up with full funding.

I make that for a statement of fact. Subsequently, if the gentleman will take the time and give me a couple of minutes, I will convince you I am right.

Mr. FRELINGHUYSEN. I hate to impose on the gentleman's time.

Mr. PASSMAN. The gentleman is mixing up the budget request with the authorization of last year's appropriation and what we are doing at this point.

Mr. FRELINGHUYSEN. This gentleman is not doing any such thing. I am referring to the figure on page 12 which states $122,620,000 is needed. I am saying, if you only provide something like $89,000,000 for these same programs—and not some other programs—I am not talking about any other program—how will there be enough to finance these programs?

Mr. PASSMAN. I want to give you the grand total, so that the gentleman will understand—we are not reducing this from $126,000,000 to $88,800,000; am I correct there?

Mr. FRELINGHUYSEN. I think the gentleman is wrong, as I understand him.

Mr. PASSMAN. I can assure you I am not. I will be glad to reconcile this difference later for the gentleman.

Mr. FRELINGHUYSEN. This discussion proves the difficulty of legislating on the floor. I do not think there is any possibility of reconciling this.

Mr. PASSMAN. I will bring this paper directly to you so that you will get the correct record later and say that I was correct.

Mr. Chairman, I think this is as well balanced a bill as you can expect your committee to bring out. I want the committee to understand that the amount of the reductions made this year, percentagewise, is about the amount of reductions that we have made in prior years—make no mistake about that. Past experience has taught me—and the record is on my side, that we are again overfunding some of the programs.

But there has been so much noise and so much pleading until we were actually afraid to go any lower.

Mr. Chairman, I am going to support this bill and I certainly am going to support the amendment to provide the $50,000,000 for Korea.

I wish, if you would, recognize that this is my job. I spend some 400 to 600 hours every year on this bill. I think I understand it as well as any Member could possibly understand it.

I hope the Committee of the Whole House on the State of the Union will give this Committee a vote of confidence so that we may in subsequent years, as we have in prior years, continue to work for you and bring information to your attention by mail and on this floor which would justify your full confidence and your enthusiastic support.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Louisiana (Mr. PASSMAN) has consumed 1 hour.

Mr. SHRIVER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the subcommittee held many weeks of hearings on this bill under the leadership of the distinguished chairman of the committee, the gentleman from Louisiana (Mr. PASSMAN).

I certainly want to give credit to the members of this subcommittee who have worked along with the chairman and who have heard many, many hours of testimony—reams of testimony. The members of the Foreign Operations Subcommittee differ at times and we do not always agree on priorities as to where reductions could be made or increases made in the program. It certainly has been a pleasure for me to sit with the members of this subcommittee and to discuss this program since early in the year—and we concluded our hearings in late July.

Mr. Chairman, your Appropriations Committee has reported to the House the lowest foreign aid recommendation in the history of these programs. While the amounts recommended for the various categories will be strongly debated here today, I would like to take just a few minutes to discuss the long-range significance of our actions on this bill.

Some will say that the primary reason for the $1.1 billion cutback from the administration's foreign aid request is the lack of a constituency for these programs in an America beset by wartime and domestic priorities. There is some truth to that.

Some will say that the 40-percent cut in economic and military assistance stems from the disillusionment of former supporters of our aid efforts, due to deep involvement in the internal affairs of the recipient nations which accompany such efforts. There is also truth in that.

Others will point out the growing frustration of a generous and charitable people who have seen over $120 billion of their taxes spent for economic and social development overseas, then have waited with amazing patience for improvements which seldom came. We have all observed this frustration in our correspondence and in our opinion polls.

These practical, political observations will work their will on this bill when the votes are taken. My votes in the Foreign Operations Subcommittee, in the full Appropriations Committee, and here on the floor of the House are based this year on an overriding consideration—the future strength and success of our activities in and relationships with the developing world dictate a "bare bones" cutback in our existing foreign aid program now.

Last February, when I was on a foreign aid inspection trip for the committee, one of our top AID administrators in Turkey made an unusually candid observation to me. He said:

Aid too long continued at too high a level becomes counter-productive.

For years our committee has been told by a steady progression of foreign aid administrators, all dedicated men, that salvation for the developing world depended on ever-increasing appropriations levels for the existing assistance programs. Relatively small amounts of these appropriations were to be spent for evaluations of current efforts, but the resulting reports were generally printed and filed, never to be heard from again.

I am disappointed this year to say that the language of the fiscal 1970 budget request has not changed to any marked degree. However, there does seem to be more willingness on the part of the top administrators and the President to initiate increased discussion of the fundamental rationale of our role in the development process. In his foreign aid message to Congress last May, President Nixon called for "a fresh approach" to the problem.

Late in October, the President called for substantial and promising changes in our relationships with the Latin American nations. He proposed greater reliance on multilateral administration of economic assistance activities, less overbearing "leadership" by the United States, and for more emphasis on the developing potential of trade rather than continued dependence on the artificial foundation of aid. In short, the President advocated a badly needed restructuring of our participation in the Alliance for Progress.

There have been indications that some of these basic changes are being considered in relation to our aid programs in the rest of the world. In addition, this truly could be called the year of the foreign aid studies. The Peterson Task Force, appointed by the President as directed by Congress in the Foreign Assistance Act of 1968, is to submit its report on U.S. foreign assistance efforts by next March 31. On September 15 of this year, the Pearson Commission on International Development submitted its 400-page report to the World Bank. The private National Planning Association released an extensive report with recommendations on foreign aid policy last March. Several other private and congressional studies are currently in progress, or have recently reported their findings.

I would direct particular attention to committee print issued on March 24 of this year by the House Committee on Foreign Affairs entitled "Staff Memorandum on What To Do About Foreign Aid." I mention this specific report to point out that some of the questions and recommendations which are now being considered constitute a radical departure from some of our currently held theories about foreign aid.

It is not my purpose to discuss in detail all of the recommendations which are evolving from these studies. In rela-

tion to the bill before the House now which funds our ongoing foreign aid programs for the next 6½ months, it is important only that we acknowledge the existence of these serious efforts to redesign the aid vehicle. Let us remember that if the current foreign aid approach had been successful, these studies would not have been initiated. It makes no sense to continue funding at a high level the ongoing programs which have not worked, and thus add more superfluous projects to a gerry-built aid structure which has proved that it cannot work.

The present administration has determined that continued foreign aid is in our national interest. The appropriation recommended by the committee, with a few exceptions, will provide adequate funding for a low-level program pending the major redirection in our aid programs and a redefinition of the aid process itself which must come early next year.

An exception I have taken to the committee's recommendations concerns the reduction of over one-fourth of the House-authorized amount for the supporting assistance category. In the report accompanying this bill it is stated:

> The committee expects that in allocating the funds provided by this appropriation action will be taken to the maximum extent possible to assist in the Vietnamization of our programs in that country.

With the amount recommended, this cannot be done.

The President has pledged to the American people his intention as Commander in Chief to Vietnamize the war and to bring our troops home as soon as this process has succeeded. The original request for the supporting assistance funds deemed necessary for Vietnam in fiscal 1970 was $440 million. The House, in the authorizing legislation, cut the amount for all supporting assistance by $100 million, or to a total which is over $25 million below the amount needed for Vietnam alone.

Other supporting assistance program requests, such as those for South Korea, Thailand, Laos, Nigerian relief and U.N. peacekeeping activities in the Middle East, total more than $137 million. Even with a carryover of $55 million in the supporting assistance account, the total amount available for fiscal 1970 would be only $355 million, or $85 million short of what is estimated to be necessary for Vietnam.

There is no other item in our economic assistance programs which deals more directly with our own national interests and security than the supporting assistance category. Especially at a time when, by continuing and increasing our financial support for the Government of Vietnam, we can hasten the day when American combat troops will no longer be needed in that tragic war, we must not practice false economy here.

For the most part this is a good bill and I intend to support it.

The CHAIRMAN. The gentleman from Kansas consumed 10 minutes.

Mr. SHRIVER. Mr. Chairman, I yield 10 minutes to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Chairman, I have been a member of the distinguished Subcommittee on Foreign Operations for 11 years now. During that time, I have consistently raised my voice in support of effectively planned and efficiently administered foreign assistance programs. I do so again today, and ask my colleagues to take a very careful look at what has happened to these programs.

To cut out foreign economic assistance would be to turn off the lights of the less developed world. That, however, is precisely what this body will be doing if it accepts all of the committee's recommendations.

The House authorized a bare bones budget of $1.8 billion for economic assistance under title I, and the committee cut those bones up into a thousand pieces. Our recommendation—$1.2 billion.

This is not surprising to me, but it is still a tragedy. Every time I have called for continued economic aid, that budget has been sliced and the military aid budget has been stuffed in its place.

As my colleagues will note, I filed supplemental views to the committee report. I was joined in them by my distinguished colleague, the gentleman from California (Mr. COHELAN). I strongly recommend that you read them because they raise questions that each of you will have to resolve in your own minds before voting on this bill.

Opposition to foreign aid stems from a variety of factors. One is the failure to distinguish military assistance from economic assistance. The result of this failure is all too clear—the widespread bitterness toward military programs that have tied us down all over the world has carried over to our economic programs.

This is unfortunate because it is through small and calculated economic investments—not large and misguided military adventures—that the best interests of the United States are served.

CONTE AMENDMENT

I have long felt that the United States should not become the weapons arsenal for the so-called free world.

It is bad enough when the recipient can afford our new and shiny weapons. It is even worse when the recipient cannot, and that is precisely why I amended our bill back in 1967 to prohibit the transfer of sophisticated weapons to underdeveloped countries.

In view of current efforts to water down my amendment, I would like to explain what the committee did with it.

You will note that in the second proviso under military assistance, we have retained a general prohibition on the use of aid funds to furnish sophisticated weapons to underdeveloped countries. There are five exceptions—Greece, Turkey, China, the Philippines, and Korea.

We have also retained section 119, the penalty clause. The President must withhold in economic assistance the amount a less-developed country, except the five just mentioned, spends on sophisticated weapons. This is mandatory, unless the President himself determines such purchase is important to our national security and reports such determination to us in 30 days.

The addition of new section 120 does not change what I have said.

In other words, the intent of the committee is to retain the Conte amendment as it was. I certainly support this action because, as I have said many times in the past, these countries do not have the money to waste on elaborate weapons systems.

JETS TO CHINA

By the same token, I do not believe we should give away sophisticated weapons to any nation just because it is excluded from the provisions of my amendment—especially when they are neither requested nor wanted by the President, the State Department, the Agency for International Development, or the Defense Department.

This, however, is precisely what happened in the case of the jets for the Republic of China. Over the strong objection of 169 of its Members, this body authorized $54.5 million for this outright gift. And the committee, I regret to say, went right along with it.

I strongly oppose this appropriation because there has been no justification whatsoever for it.

To begin with, I am deeply disturbed over the fact that no request was ever made for the planes, and over the circumstances surrounding its unexpected inclusion in the authorization bill. I think by colleagues should be equally disturbed.

Moreover, even during the very limited floor debate on this surprise move, serious doubts were raised about whether Taiwan had any real military need for the jets. One such doubt is that Communist China may very well not have the capability to invade the island republic.

It was also pointed out that Israel, which in contrast to China is faced with daily military threats, paid in full for the jets we sent her. The appropriation we are considering, however, is nothing more than a big fat $54.5 million handout at the expense of the American taxpayer.

This handout is as unnecessary from an economic point of view as it is from a military point of view. The economy of Nationalist China is booming—triggered in large part by some $5 billion in U.S. assistance over the last 20 years.

Now I ask my colleagues very pointedly—how do we know whether China needs these jets? Floor debate consisted of some five pages in the RECORD. No supporting material was sent up to Congress. In fact, barely anyone knew anything about these jets until that fateful day in November—the 20th to be exact—when an amendment was offered calling for the expenditure of $54.5 million of the taxpayers' money.

We are already half-way through fiscal 1970 and at the end of calendar 1969. Why, then, not wait on these jets and consider them at a later date in the new budget, or even now in a supplemental request? I might note that the Appropriations Committee is currently holding hearings on several supplemental budget requests.

Either way, the delay would give us a chance to question the right people, including Secretary of Defense Melvin Laird, about the need for them. I urge my colleagues as strongly as I can to adopt a wait and see attitude, and take a very, very hard look at this item.

My guess is that, if we do this, we will knock the money out. This action not only would save the taxpayers something, but also would improve the overall aid program.

For this reason Mr. Chairman, I plan to introduce an amendment at the appropriate time to delete these funds. I urge my colleagues to join me in supporting that amendment.

MILITARY ASSISTANCE PROGRAM

The problem of these jets is tied in with the entire question of what the relationship between economic and military assistance should be. As you can see from the budget, this relationship is just plain lopsided.

The committee recommended nearly $1.2 billion for economic assistance and $350 million for military assistance, not including the $54.5 million for jets to China, under title I of the bill.

Now for one who believes that economic assistance should take priority over military assistance, this all seems reasonable enough. It is not, because this is not the end of the story.

The military appropriation under title I is only a drop in the bucket compared to what we really give out. The fact is that an additional $2.2 billion comes out of the Defense Department budget to finance free world military assistance forces in Vietnam, Laos, and Thailand.

And this is not the end of the story either. When you add in military credit sales under title II, international military headquarters and agencies, NATO, MAAG's missions and milgroups, the grand total for fiscal 1970 reaches $3.2 billion—or nearly three times the economic assistance provided under title I.

It is also interesting to note that more than two-thirds of that $3.2 billion—specifically $2.5 billion—is funded by Department of Defense appropriations under a separate bill.

Our military interests permeate the far reaches of the earth. We give this money out right and left, often without regard to its need, and sometimes even in spite of the recipient. In the latter regard, I would cite the reported $40 million we paid the Philippines and the $1 billion we are paying Thailand to stand by us in Vietnam. It looks like we have to beg these countries to let us "save" them.

In spite of all this, we did not cut one penny from the regular military assistance authorization of $350 million, or the military credit sales proposed authorization of $275 million.

ECONOMIC ASSISTANCE PROGRAM

I am sorry the same cannot be said for the economic assistance authorization. However, as I noted at the outset, the committee cut some $600 million from the title I authorization of $1.8 billion.

I would like my colleagues to join me now in taking a look at these cuts, and I am only talking about cuts from the authorization—not cuts from the original request.

The committee cut $108.8 million from the authorization for technical assistance, and recommended only $313.8 million; or to put it another way, the lights in the less-developed world have been dimmed by that amount.

Technical assistance is the heart of our foreign aid program. It applies American technical and professional expertise to the problems of the developing countries.

It is what you read about when we go into the farmlands of a needy nation and help them produce a new grain of rice or a greater quantity of wheat per acre.

It is the bread and butter of our efforts to improve the basic quality of life in these countries. And it is what the committee has once again cut into a thousand pieces.

The committee cut $114.6 million from supporting assistance. It just happens that the bulk of this money goes to Vietnam where it is directed to the peace effort, not the war effort. It covers pacification, Vietnamization, land reform, and the like.

Thus, it represents the direction in which we should be moving. Nonetheless, the committee saw fit to cut it by more than 25 percent.

The committee cut $137.5 million from Alliance for Progress development loans, and recommended only $200 million. It did this in spite of the Rockefeller report and the crisis we are facing in our relations with Latin America.

The committee cut $160.5 million from worldwide development loans, and recommended only $265 million. Thus, it even denied the developing nations the right to borrow—yes, to borrow—enough money for their needs. Incidentally, the administration requested $675,500,000 for development loans.

The highly acclaimed Pearson Commission report was released in October. This comprehensive study of foreign aid comes at an important time—a time when, the report notes, enthusiasm for foreign aid is dwindling just as the drive for economic development is beginning.

The Pearson report also gives a good answer to the question of "Why Aid?" when it appeals not only to morality but also to enlightened and constructive self-interest.

I want to make it clear that I do not approve of these cuts in the economic assistance program. I am not proud of what the committee has done to the hopes and aspirations of the developing nations, and I do not think my colleagues should be either.

The committee seems to have cut this authorization up with an ax rather than with a scalpel. And like the surgeon who cuts freely with his instruments, we too will be called upon to explain our actions—except we will have to do it before the peoples of the developing world.

OVERSEAS PRIVATE INVESTMENT CORPORATION

The committee cuts did not stop here. It went on to knock out the $75 million requested for the Overseas Private Investment Corporation—even though there was overwhelming evidence to the effect that private investment has a real role to play in the aid program.

This is bad economics. In fact, it is among the worst I have seen on the committee. According to testimony I received from the administrator of AID, Dr. John Hannah, this $75 million would have generated some $900 million in new investment.

Or to put it another way, you would get $12 for each $1 invested. I think a ratio of 12 to 1 is pretty good, but apparently it was not good enough for the distinguished committee.

I know many of my colleagues share my interest in encouraging private aid programs. OPIC would have done this, and in an extremely businesslike manner. It would have administered two programs—an insurance program and a guarantee program. It also would have made direct loans using repayments from other loans covered by this bill.

But that is all over now, before it even started. The committee saw to it that OPIC would not get the money it needed to carry on these programs.

There is an $80 million reserve for the $7 billion insurance program, and a 25 percent reserve requirement for the guarantee program. Some $85 million is currently available to satisfy these reserves. However, by the end of fiscal 1971, a total of $165 million will be needed. Without approval of the OPIC request, this requirement cannot be met. In effect, the committee has killed these programs.

The committee has also made sure that the money from other loan repayments would not be available for use by OPIC for direct loans.

The overall impact of these two measures should be clear—no OPIC. Or to put it another way, the committee did not even give the corporation a chance—a chance to save the taxpayers some money and to bring a highly promising innovation to the aid program.

I strongly disagree with the committee on this.

CONCLUSION

The point in all that I have said is that our overall aid program has become self-defeating. Our noble efforts to lift the development burdens of the less-developed nations have been offset by a misguided and unfortunate preoccupation with military adventures—a preoccupation at odds not only with the goals of our economic aid program, but also with the resources necessary to accomplish those goals.

I urge my colleagues to take a very close look at the military assistance program. After you have done that, I urge you to ask yourself whether you think the committee is doing justice to the economic assistance program and the hopes of the developing world.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I am glad to yield to the gentleman from Illinois.

Mr. YATES. Was not the gentleman also joined in his views by the gentleman from Massachusetts (Mr. BOLAND) and the gentleman from Illinois (Mr. YATES)?

Mr. CONTE. I thank the gentleman from Illinois. I meant the subcommittee views.

The gentleman is absolutely correct. Coming out of the full committee I was joined by these two distinguished gentlemen.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I am glad to yield to the gentleman from California.

Mr. COHELAN. I thank the gentleman for yielding. I compliment the gentleman for the excellent statement he is making.

I should like to associate myself with his remarks.

Now, I voted against the authorization bill because of that and I can tell this subcommittee that there are many people who shared my view in the House and, therefore, that issue before us prejudices the legitimate objectives of the bill.

Mr. CONTE. I thank the gentleman from California. Certainly, I am not going to threaten this House as to how I am going to vote, but I must say that after giving this a great deal of thought and consideration and after standing in this well for 11 years in supporting the foreign assistance program, much to the dismay of my colleagues on my side of the aisle—supporting it under former President Eisenhower, former President Kennedy, former President Johnson, and now President Nixon—I have made myself about as welcome as a skunk at a lawn party and I am going to vote against the bill if that provision remains in the bill.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CONTE. Yes, I yield to the gentleman from Illinois.

Mr. YATES. Did the gentleman's subcommittee have extensive hearings on military assistance?

Mr. CONTE. Yes, we had hearings.

Mr. YATES. In the course of those hearings was there any testimony offered in support of the provision for $54 million for planes for Nationalist China?

Mr. CONTE. Not a scintilla of evidence, not a scintilla of testimony. This came as a big surprise on the floor of the House during the consideration of the authorization bill.

Mr. YATES. Mr. Chairman, if the gentleman will yield further, was there any testimony taken in connection with the supplemental bill justifying this appropriation?

Mr. CONTE. No supplemental at all.

Mr. YATES. I thank the gentleman.

Mr. ROONEY of New York. The distinguished gentleman from Massachusetts is not exactly correct.

Mr. CONTE. I do not yield to the gentleman from New York. I was going to yield to the gentleman——

Mr. ROONEY of New York. Oh, please do.

Mr. CONTE. If the gentleman wants to discuss some of these other programs in the bill I shall be glad to have a little colloquy with him later.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. SHRIVER. Mr. Chairman, I yield the gentleman 10 additional minutes.

Mr. ROONEY of New York. Mr. Chairman, will the distinguished gentleman yield?

Mr. CONTE. I do not care to yield to the gentleman from New York.

The CHAIRMAN. The gentleman declines to yield?

Mr. CONTE. I hate to continue to be bothered by the gentleman.

Mr. ROONEY of New York. Mr. Chairman, if the distinguished gentleman will yield, I am just trying to bring out the facts.

Mr. CONTE. Regular order, Mr. Chairman.

The CHAIRMAN. The gentleman declines to yield.

Mr. CONTE. The gentleman from Brooklyn got treated pretty well in the subcommittee.

Mr. Chairman, we are already halfway through fiscal year 1970 and are nearing the end of calendar year 1969. The gentleman from New York is holding up the secret document. The secret document says that should be brought in under a supplemental budget.

But that is the avenue which should be taken. That is what the secret document says—which I am sure is not secret.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. CONTE) has expired.

Mr. PASSMAN. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from New York (Mr. ROONEY).

Mr. ROONEY of New York. Mr. Chairman, I do not like to have to call to the attention of the Committee of the Whole the fact that the distinguished gentleman from Massachusetts (Mr. CONTE) has uttered remarks which might mislead the Committee.

The gentleman stated that the Committee on Appropriations, of which he is a member, had no information—not a scintilla of evidence—about these airplanes, these jet fighter airplanes, for the Republic of China Government.

Mr. Chairman, the fact is that information is contained in this top secret document dated December 5, 1969, which I hold in my hand and which the gentleman from Massachusetts himself has read, if only within the past hour. He has had the opportunity to read it previously. Any Member of the Committee of the Whole, as you were invited by the chairman of the subcommittee, the distinguished gentleman from Louisiana (Mr. PASSMAN) may come over here to the committee table and read this document and see how important these airplanes are—and to whose interest—to the interest of the Government of the Republic of China or to the interest of the Government of the United States? They are in the interest of the Government of the United States.

Mr. FRASER. Mr. Chairman, will the gentleman yield at that point?

Mr. ROONEY of New York. I yield to the gentleman from Minnesota.

Mr. FRASER. I understood the gentleman from Massachusetts to ask whether there had been any testimony on the question of airplanes, and I did not understand the gentleman from New York to indicate——

Mr. ROONEY of New York. The gentleman from Louisiana (Mr. PASSMAN) has already stated there was no testimony on this subject.

Mr. YATES. I asked that question.

Mr. FRASER. May I pursue another point on the same subject? We had before us Admiral McCain, who has the responsibility for the Pacific Command. He made the statement in his overall posture statement to the Committee on Foreign Affairs:

> Moving south, another area of Communist pressure is the Taiwan Strait. The Free Chinese defensive forces and the Seventh Fleet would render Chicon attack on Taiwan a foolhardy venture.

Mr. ROONEY of New York. The date, please? Will the gentleman tell us the date of this testimony.

Mr. FRASER. The date of Admiral McCain's testimony is June 26, 1969.

Mr. ROONEY of New York. This document in my hand is dated December 5, 1969. I should like to point out that it was utterly impossible for the Committee on Appropriations to hold any hearings, because it was only approximately a week ago that the authorization for the $54.5 million was inserted by the House in the authorization bill.

Mr. FRASER. If the gentleman will yield further, it was striking that when this subject came to the floor the other day in the Foreign Assistance Act there was no one who was willing or able to get up and indicate why these airplanes were needed, and I have yet to hear a responsible person say that there is evidence that the Chinese Communists have the seaborne capability of sending enough divisions across the strait to pose a major threat to Taiwan. I might say to the gentleman that I, too, have checked some of the classified information, and I find nothing there that justifies any different conclusion.

Mr. ROONEY of New York. I thought the distinguished gentleman from Minnesota was a member of the House Committee on Foreign Affairs. All he needs do is read the item appearing on page 51 of the report of the House Committee on Foreign Affairs on the authorization bill, dated November 6, 1969, which practically invites everyone to offer an amendment to supply these airplanes to the Republic of China.

Mr. FRASER. I am familiar with that.

Mr. ROONEY of New York. I do not know whether the gentleman voted for or against this language in his committee, but the fact is that this is in the report of the majority of his committee. I should like to read briefly a part of this language:

> The Committee on Foreign Affairs has in past years expressed its concern over the military capability of Nationalist China compared to the ever-present threat from the mainland of China. There is danger that the number and quality of aircraft in the Nationalist China inventory may not be adequate to cope with the new and sophisticated aircraft now appearing, in increasing numbers, in the armed forces of Communist China. However, the austere funding of military assistance programs in recent years has limited Nationalist China's ability to improve her air defense capability.
>
> The committee has been heartened——

I take it that that is the majority of the committee and does not include the distinguished gentleman from Minnesota——

> by the effort being made by the Department of Defense to contribute to the solution of this problem by developing and procuring aircraft adapted to the requirements of Nationalist China as well as other countries. Until such aircraft can be made available, Nationalist China should be aided in obtaining our most modern fighter aircraft.

Now, this is the gentleman's own committee.

Mr. FRASER. Mr. Chairman, will the gentleman yield?

Mr. ROONEY of New York. Surely, I yield.

Mr. FRASER. Let me tell you just two things about that statement of the committee report. No. 1, there is no testimony in the record to support that.

Second, that insertion was made at the request of the chairman of the Armed Services Committee, who went to our committee chairman and asked that it be inserted.

Mr. ROONEY of New York. Evidently the gentleman has fault to find with both his own committee and the Committee on Appropriations.

Mr. FRASER. I just wanted to make clear that this was not a genuine product of our committee's deliberations. It was inserted at the request of a member of the Armed Services Committee, and it ought not to be given any more weight than that fact deserves.

Mr. PASSMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, Members recognize that the China situation is fully covered with a top-secret document. I am not privileged to discuss the contents of this top-secret document but I can assure this committee that the $54.5 million recommended for appropriation for China is an extremely small percentage of the total program we may have to make available to Nationalist China in the immediate future. I am telling Members that what we must make available in the not-too-distant future is going to be in the neighborhood of $400 million. If we are not going to recognize the benefit of this appropriation to our own security and to that of our own Armed Forces in that part of the world, then I think we might as well pull out of that part of the world and come home.

Furthermore, as Members well know, Okinawa is now going to revert back to Japan in 1972. What will happen then, we do not know. If Members will have a look at this letter, I do not see how any person—hawk, dove, or hummingbird—could vote to take this money for China out of this bill.

Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Virginia (Mr. DANIEL).

Mr. DANIEL of Virginia. Mr. Chairman, I thank the gentleman from Louisiana for permitting me to speak at this time.

First of all, I want to say I support the committee in its attempt to provide fighter planes for Nationalist China. It is time, in my judgment, that we should make better use of the ready forces on Taiwan, because I believe it to be in our security interest.

Mr. Chairman, I rise in opposition to the Foreign Assistance Act. For 23 years now we have been attempting to buy friends over the bargain counter as we would ordinary merchandise, and we have fewer friends around the world today than we have had in my lifetime. I believe it was Bismarck who said:

> The word "gratitude" is not to be found in the international language.

Mr. Chairman, this program started out as the Marshall plan in 1946 and had for its purpose a very noble objective, which was to rehabilitate the war torn countries of Western Europe. The American people were told when this plan was inaugurated that it would last for 4 years and cost the American taxpayer $17 billion. It has lasted until now, and as far as we can see into the future, and it has cost us untold billions.

Each President since that time, be he Democrat or Republican, has requested an average of about $3 billion to carry on this program. In each instance they have predicted dire consequences for the country if all of the amount was not forthcoming.

Mr. Chairman, if we are really as bad off as all this would seem to indicate, then I suggest that our beneficiaries are about ready to collect on our insurance. What they are saying is that we are safe only as long as we are able to pay protection money. The fact of the matter is that many of our leaders have become so self-conscious of our self-wealth that they have developed a pathological passion for giving it away.

This is not to say that a case cannot be made for foreign aid, because it can. This has been true in the case of Greece, Turkey, Korea, and Formosa.

If projects can be brought forth which will serve our national interest, such projects can be funded out of pipeline money which has been alluded to here today.

Mr. Chairman, what I am saying is that this country cannot shoulder the financial burdens of the world, and if in our attempt to do so we allow our level of living to be dragged down to match that what we are attempting to raise then we will have served no man well.

The great tragedy, it seems to me, is that the vast majority of the countries into which we have poured our largess are victims of their own economic systems. What we are doing, in effect, is propping up economies which are rooted in shifting sand.

Mr. Chairman, I grew up on the farm and learned a long time ago that if any living thing is going to forage it must eventually be weaned. It may seem cruel, for example, to take a baby calf away from a mother cow, but it is not, really, because one of these days that cow is going to go dry and the calf, not knowing where else to find food, is going to starve to death.

I suggest to this Committee, Mr. Chairman, that we are not getting a fair return on our investment in foreign aid. The expenditure of these funds are contributing to deficit financing, fanning the fires of inflation, and aggravating our balance-of-payments problem.

This program ought to be phased out and a military assistance program brought to the floor for consideration on its merits.

Mr. SHRIVER. Mr. Chairman, I yield 10 minutes to the distinguished gentleman from New Jersey (Mr. FRELINGHUYSEN).

Mr. YATES. Mr. Chairman, will the gentleman yield for a question?

Mr. FRELINGHUYSEN. I am glad to yield to the gentleman from Illinois.

Mr. YATES. The gentleman from Louisiana indicated that in the not too distant future the sum of $400 million military assistance will have to be made available to the Taiwan Government. Has any indication of this been given to the gentleman's Committee on Foreign Affairs?

Mr. FRELINGHUYSEN. I might say to the gentleman, I am certainly not going to reply to that question directly. I believe we have probably said far too much already about subjects which may or may not be classified.

I should like to say also, on the basis of what has been said about the money proposed to be made available for planes for Taiwan, that I am glad, as a member of the Foreign Affairs Committee, that I voted against that proposal when it was considered under the authorization bill. In my opinion, this is no way to handle a serious problem.

If more money needs to be made available for updating the military equipment of any of our allies, it seems to me we have no reasonable alternative but to use the regular procedure and consider a supplemental appropriation, if necessary. That may well be necessary.

If I had any doubts about the wisdom of the item in this bill, those doubts have been resolved by what has been said already

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. FRELINGHUYSEN. I yield to the gentleman from California.

Mr. COHELAN. I want to say that I agree with the gentleman wholeheartedly.

I wonder, considering the gentleman's long experience on the Foreign Affairs Committee, if he could explain to us why this is being done, when we have so many other sections dealing with strictly military questions?

Mr. FRELINGHUYSEN. I might say to the gentleman that many aspects of the Appropriations Committee actions are incomprehensible to me. I assume the gentleman himself might have a better answer than I as to that.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. FRELINGHUYSEN. I yield to the gentleman from Massachusetts.

Mr. CONTE. I want to compliment the gentleman from New Jersey for the observation he made with respect to the planes for Taiwan.

I agree that perhaps too much has been said already here with regard to top secret items.

I urge all of my colleagues here—I believe what I said on the floor has been misinterpreted, and I urge every one of my colleagues here to go to the table and read this so-called top secret document. I want them to note the first line, which I am sure is not top secret, and that is that the gentleman from Louisiana (Mr. PASSMAN) called them down there and discussed this with them after the authorization bill passed the House, putting the planes in; and the second thing which is very important, and I am sure not top secret, that the author of the letter says this should come up under the supplemental route.

Mr. FRELINGHUYSEN. I thank the gentleman for his comments. Let me say also that I compliment him on his initial statement.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. FRELINGHUYSEN. I yield to the gentleman from Illinois.

Mr. YATES. Has the gentleman's Committee on Foreign Affairs been given

secret information before in connection with various programs, including the military assistance program, and has not testimony been given to the gentleman's committee in support of such secret programs? Has not the gentleman's committee brought its bill to the floor without revealing such secret information?

Mr. FRELINGHUYSEN. That is a fact. I might say also that Admiral McCain, commander in chief of the Pacific Fleet, appeared before the committee some months ago and discussed this area.

Mr. Chairman, apparently we are going through the same spectacle this year as we did last year. It had been my hope that we would not do this another year.

During the course of the debate on the foreign aid appropriations bill in September 1968, I commented on the disorderly manner in which we were proceeding. This year also it does seem to me, as it did last year, that an orderly consideration of this legislation should be possible even though we are nearing adjournment. I know as well as does the gentleman from Louisiana that it is close to Christmas. As a member of the Foreign Affairs Committee I know also that he is going to remind me that the authorization bill only came up for a vote a few weeks ago. However, that still is no excuse for us not to be given a reasonable opportunity to see what the committee's recommendations are. We need to get an understanding and appreciation of the reasons for the cuts, and to have an adequate consideration of a bill of this substance. We need also an opportunity fully to discuss it and to offer amendments.

The rules of the House were disregarded last year, and we are disregarding the rules of the House again this year. Granted the Foreign Affairs Committee has been late in bringing out an authorization bill and I think it is regrettable. Next year perhaps we can be more expeditious in bringing the authorization bill out so we will not share the blame for playing fast and loose with the legislative process.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. FRELINGHUYSEN. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Let me say to the gentleman, if I may, that we are operating under a proper procedure of the House in handling this bill.

Mr. FRELINGHUYSEN. I do not happen to think it is proper, I might say to the gentleman from Louisiana, even if it is legal, I think it is wrong to use this approach.

As I said last year, and I repeat now, just because we are in a hurry there is no excuse for us to play fast and loose with this kind of a bill. I do not think we should be called upon to accept or reject today the recommendations contained in this bill. We have read in the newspapers what the committee was going to recommend, but I might say to the gentleman from Louisiana that he has provided no enlightenment at all as to the reasons for the substantial cuts in the program. He has apparently been confused by his own eloquence in discussing the bill. I understood him to say, regarding the cuts that have been made in the multilateral programs, that not one dime has been cut from them.

Mr. PASSMAN. Mr. Chairman, if the gentleman will yield further, I think I justified completely and fully my position and the commitee's position in defending the cuts made by the committee. The gentleman knows very well that we have justified each and every one of these cuts.

I would like to correct a part of the record and I will answer the gentleman by referring to page 13 of the report relating to technical assistance wherein it says:

> A large volume of technical assistance and preinvestment activity is handled by the UNDP and the specialized agencies, and they have played pioneering roles in many of the improvements of the past two decades. The world owes them great praise and appreciation for these vital contributions. Their operating capacity now, however, seems strained to the limit.

Mr. FRELINGHUYSEN. I thank the gentleman but I refuse to yield any further.

Mr. PASSMAN. The gentleman apparently does not want to listen to the facts.

Mr. FRELINGHUYSEN. I might say to the gentleman that all he is doing is reading from the committee report. He is not dealing in facts. The report says that in the opinion of the Pearson Commission the resources of the UNDP are strained to the limit. Yet the solution of the gentleman from Louisiana as to this strain is to cut back substantially on the funds requested.

This is a nonsensical way of treating the President's suggestion for making an improvement of a major multilateral program for development assistance. If we are cutting back on bilateral assistance in line with the recommendations of the Committee on Appropriations, and if we are also cutting back on multilateral assistance, is it because we are trying to get out of the picture altogether? If we are, why are we not frank enough simply to say we do not believe in any kind of assistance? My point is that if we believe in multilateral assistance, we should surely support the strongest element of that program, the United Nations Development Program. That would not mean a reduction of $29 million in the funds requested.

I see no other indication as to why there has been this reduction except that some commission says that the UNDP is strained to the limit.

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. FRELINGHUYSEN. I yield to the gentleman from New York.

Mr. BINGHAM. Mr. Chairman, I thank the gentleman for yielding.

Would the gentleman agree with me that the program under the leadership of Mr. Paul Hoffman at the United Nations is taking steps to expand their resources for operations through the use of agencies not limited to the agencies that they have been using to date?

Mr. FRELINGHUYSEN. The gentleman is correct. The leadership of Mr. Hoffman has been of great significance, both to our country for providing a man of that caliber, and to the United Nations program which has done so much in so short a time. Quite obviously there have been problems in experience that the UNDP has experienced. They are providing about four times as much resources now as they were 10 years ago. This speaks well for the value of what the UNDP is doing.

No one is arguing that a look should not be taken at the way in which they are operating, but if we believe in a multilateral approach to aid we certainly should provide money to carry on that program and not cut it back.

That is the only point I was making. The chairman earlier seemed to think that the committee had not advocated a substantial cut in that program. I am glad at least he now recognizes there is a substantial cut recommended in that program.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. FRELINGHUYSEN. I yield to the gentleman from California.

Mr. COHELAN. Mr. Chairman, I wish to commend the gentleman again for his contribution, because I think we are clarifying a very important point. At the appropriate time I expect to offer an amendment to restore the funds that were requested. So I thank the gentleman for raising the point he did in connection with the item that was referred to by the Pearson Commission.

In discussing it with the people and the agencies involved, it is very clear they have allowed for an orderly progression because they have been limited by available personnel.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SHRIVER. Mr. Chairman, I yield 5 additional minutes to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Mr. Chairman, I thank the gentleman for the additional time.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. FRELINGHUYSEN. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Chairman, I want to join in commending the gentleman from New Jersey for bringing out this excellent point of his. I wonder if we could ask the chairman of the subcommittee what justification there was, whether there were any hearings, when the Committee on Appropriations decided to put the proviso in the bill as reported on page 13 of the report:

> *Provided further*, That none of the funds contained in this paragraph shall be available for transfers authorized by section 202 of the Foreign Assistance Act of 1969.

This to me appears as legislation in an appropriation bill. I wonder if the gentleman from New Jersey would care to comment on this proviso?

Mr. FRELINGHUYSEN. I would certainly agree with the gentleman from Wisconsin (Mr. ZABLOCKI) that this is legislation in an appropriation bill. It is the kind of thing I do not believe should be permitted. I would hope that the Committee on Appropriations could discipline itself not to include language of this kind, especially if the bill is considered on a basis where we are not able to raise points of order against it.

Mr. ZABLOCKI. Mr. Chairman, would the gentleman yield further?

Mr. FRELINGHUYSEN. I am reluctant to yield any further, because I have some things to say myself.

Mr. ZABLOCKI. Mr. Chairman, I wonder if the distinguished chairman would tell us whether he had hearings on that?

Mr. FRELINGHUYSEN. I will yield to the gentleman from Louisiana (Mr. PASSMAN) for that purpose.

Mr. PASSMAN. I have been in Congress for 23 years, and I must say to my distinguished friend that is the most ridiculous question I have ever been asked—the idea of having hearings as to whether we should place a limitation in the bill. Certainly, we did not have any hearings on placing the limitation in the bill and incidentally it is not legislation, it is a limitation.

Mr. FRELINGHUYSEN. The gentleman sometime ago revealed a reason why a cut was made in technical assistance. The reason seems to me very flimsy. The gentleman pointed out that there were some high paid consultants and this is the only reason he gave for cutting back on technical assistance.

If that is the sole reason, I would say we ought to take a second look at all these requests for cutbacks in these funds. If we believe in foreign aid at all, we would recognize that the knowhow that this country has can be usefully transferred to countries that need it—that is what technical assistance provides.

I would have hoped that we would approve the President's request for funds in this area and not be bemused by the allegation that there may be some high paid consultants.

If there are certain abuses of that kind, then why not check the abuses but not curtail the program?

I asked earlier about the development loan programs, both for the Alliance for Progress and worldwide development loans. There is a very substantial cut in both of these programs, far below the very substantial cuts made in the authorization bill.

It has been said that if we appropriate as much as the committee is recommending this year, we will be as generous as we were last year. My point is that this is not much of a basis to go on. You certainly do not need much intelligence to use as a blind reference point what we actually made available last year. Is it not more intelligent to look, as our Foreign Affairs Committee tried to, at what the money is to be used for this year?

Almost 40 percent of this development loan money is to be used to help people, both in Latin America and elsewhere, to develop their resources or for food so that they can feed themselves. Why should be try to slow down that process of letting these people feed themselves?

As the committee report points out on page 22, at the bottom, the basic purpose is "to finance loans to the less developed countries to provide capital resources needed for growth. The loans finance the commodities and technical services necessary for construction of factories, dams, education and health facilities, and the import from the United States of raw materials and capital goods needed."

Why—if that is what development loans are for—and we agree that these objectives are good—are we cutting back so drastically?

I would like to ask the gentleman from Louisiana or anyone else whether there is any reason for the drastic cutbacks other than the fact that only a certain amount was made available last year?

As an example, I point out that we should go along with this level of funding—India alone could use in development loans $200,000,000 for food programs. If only $265,000,000 is to be used worldwide for development loans, then obviously India is going to get a lot less from us. Also, if we cut back, it is obvious that other countries that are contributing assistance to India will cut back. Thus assistance to these developing countries will be cut back at a time when the needs are great.

Mr. PASSMAN. Mr. Chairman, I yield to the gentlewoman from Washington (Mrs. HANSEN).

Mrs. HANSEN of Washington. Mr. Chairman, we have heard a great deal of discussion about cutbacks. I think any of you who heard the President last night say to the underprivileged of America and to those who are on social security, "No, we cannot afford 15 percent for these people who are getting $50 a month," and "No, we cannot afford an $800 personal income tax exemption," can understand why there is a problem on cutbacks.

Mr. Chairman, I serve on the Interior Committee day after day, and day after day there are items before us relative to cutbacks and these are programs as widespread as schools for Indians—food and welfare for Indians and programs that mean development in the economy and of land which belongs to the Federal domain in the United States—some 752,000,000 acres.

I do think it only fair to point out that this House provided $150,000,000 last year—identical with this year. In the Alliance for Progress funds the House last year appropriated $70,000,000; this year there is $75,000,000. In the contingency fund the 1969 appropriation was $5,000,000; in the 1970 budget it is $10,000,000. Alliance loans in 1969 were $200,000,000; 1970 funds are $200,000,000. Development funds in the House 1969 were $265,000,000; it is identical this year. Administrative expenses have been cut $1,000,000 and with justification.

There are problems of inflation and budgetary restraints before each committee. This is no exception.

Now I would also like to point out that I personally have always supported, and will continue to support, technical assistance and economic assistance, and would support increased funds in this area. I think this is the most valuable part of this program, and I think it is something the United States can take credit for.

It is that program which the United States is extending to the less developed countries of the world. We try in this bill to make some contribution to the urgent and sometimes painful cries of help from men, women, and children in dire need of assistance and compassion. People of the less developed world look to Americans for leadership in the fields of health, nutrition, and education, and in the words of John Fitzgerald Kennedy:

> If a free society cannot help the many who are poor, it cannot save the few who are rich.

Each of us should remember our foreign aid technical assistance program is designed to help people—not governments, not economies, not balances of power—but, people. I have no enthusiasm for our foreign military aid enterprises nor will they in the long look build the genuine security that technical and economic assistance will.

As recently as 1880, only 14 percent of all Americans survived the years of working usefulness to reach 65. Every decade previous to 1880 revealed a darker situation. People died because of malnutrition, poor sanitation, and inadequate or unwise medical care. Babies were born weak and sick because of inadequate prenatal attention, and they succumbed to disease because they were too weak to fight it off. Primarily people died because they were expected to die—attitudes toward survival which were only realistic at that time are horrifying to us in 1969. Men married early and took the youngest wives they could find because young girls were stronger and more likely to last. People had six and eight children because they only expected to raise three or four. Epidemics struck communities time after time because no one knew how to stop them; children ate the wrong foods because no one knew what the right foods were, and too often there was no money to buy enough of even the wrong kind. Infant and child mortality was a prime causative factor in the low rate of survival, mortality due in turn to deprivation and lack of care, knowledge, and facilities—all the debilitating effects of economic disadvantage through lack of development. May I add, also, that in the United States, poverty, nutrition, and health require billions to make this Nation completely whole.

HEALTH

However there has been progress. The infant mortality rate in the developed countries of the world is 2.5 percent, and life expectancy is 70 years. Malaria has lost its terrifying aspects, as have pneumonia, influenza, and tuberculosis. Typhoid and small pox are virtually unknown in this country.

The reason for this dramatically improved situation is rooted in our economic and scientific advancement. We know more about the causes and prevention of illness and premature death; but more importantly, we have the means to sustain a healthy, sturdy, and highly productive population if all resources are utilized. We have found specific cures for many diseases traditionally assumed to be incurable, but far fewer people are contracting these diseases, because the population is healthier. And good health is the result of economic development, just as the economic development of a society is dependent upon the good health of its human resources.

The picture is different in underdeveloped areas in which two thirds of the world's population live. There, the infant mortality rate is 11 percent, while life expectancy is an average 48 years. Diseases which we in America long ago erad-

icated still rage in epidemic proportions—not only the traditional killers, but also simple childhood diseases are fatal or crippling. Measles, for example, kills one afflicted West African child in five, while it leaves many survivors blind or deaf. One out of every four Africans stricken dies of smallpox.

The age structure of an unhealthy population may yield twice the number of mouths to feed as it does hands to work, because of the smaller proportion that survive to enter the productive age. A large percentage of children are fed and housed and educated only to die before reaching an age at which they can contribute to the economy that supported them. This situation is further aggravated by the fact that the productivity of the survivors is reduced by the same diseases or deficiencies that kill their dependents who have never produced.

Therefore, the major contributions of health programs to economic development are to carry the population through the productive years and, at the same time, to increase productivity by the significant reduction of illness and the building of stronger bodies. If the object of our foreign aid is to help weak nations become strong, viable economies, one of our main efforts must be directed toward the support of their irreplaceable human resources. This is why AID has increased its programs of assistance dramatically in the area of health, working for the greater productivity and better life which good health makes possible.

Apart from the major work being done in the field of family planning and population growth, AID's health programs fall into three main categories: First, helping to reduce and ultimately to solve the problem of malnutrition, above all in mothers and children; second, assisting in the control and eradication of communicable disease; and third, helping the poor nations to find and train their own health workers.

NUTRITION

During the past year the world has been horrified by the deaths of 1 million people—mostly children—in the Nigeria-Biafra conflict. These deaths were not the result of bullets or bombs. They were caused by starvation and malnutrition.

And in the United States we have been especially appalled and ashamed by the disclosure that 14 million Americans are malnourished. For this to occur in the world's most affluent nation is incongruous and outrageous.

But malnutrition anywhere is unnecessary—in the 20th century. It need not and should not exist. It will not exist, if we provide the proper support for measures being taken to end malnutrition. We have the means to end it.

It is estimated that throughout the world 10,000 deaths per day are caused directly or indirectly by malnutrition. But the foreign assistance programs aimed at wiping out this statistic are not solely humanitarian—although that would be justification enough. These programs are also a means to an end—economic development.

For malnutrition affects learning capacity; it reduces productivity; it increases the frequency and duration of illness. It saps the strength of a people, and this retards the pace of economic and social progress.

Nutrition thus extends beyond the province of the dietitian and specialist. It becomes the concern of the economist, the educator, the agriculturist, the doctor, the lawmaker.

The Agency for International Development has recognized this. AID carries on a number of important programs aimed at ending malnutrition. One of these, of course, is the direct feeding of more than 50 million children in 105 countries. These children are not only getting the calories they need through the food-for-peace feeding programs, but through additives such as CSM—corn-soya-milk—they are getting the vital proteins required for health. Other high-protein food blends are being introduced, as, for example, WSM—wheat-soya-milk. And AID has taken the lead in developing FPC—fish protein concentrate—which is even higher in protein content than vegetable products.

AID works with and helps finance voluntary agencies in the school lunch and material feeding programs. AID also is encouraging private investment in the nutrition field, helping American firms develop foods and beverages that use indigenous products in the developing countries.

AID financed research projects are seeking new ways of fortifying foods with amino acids. And, most significantly, AID is helping researchers find ways of breeding strains of wheat, corn, and rice that carry their own high-protein content.

These are exciting programs and projects. They will be of immense benefit to the entire world. They should be encouraged and strengthened—so that malnutrition no longer will be the reason for a child's death, here or in Africa, or anywhere in the world.

DISEASE ERADICATION

Another major objective is the control and eradication of disease. In this area, AID plans to continue working with other government and international health organizations such as WHO and UNICEF, to combat the ravages of smallpox, cholera, measles, sleeping sickness, and other diseases on a worldwide scale. In the hot, often damp climates where most of the people of the poor nations live, disease travels like wildfire, crossing national boundaries and spreading contagion rapidly among hundreds of thousands of people who live in unsanitary, primitive conditions. Hence innoculation on a mass scale must be combined with specific research and technical projects, to identify sources of contagion and then to isolate and eliminate these sources, rather than simply containing them. At the same time, a basic education and information program must be conducted, to instruct real and potential victims in self-protection against future attacks of the same or similar diseases.

Typical of the projects in which AID has been cooperating is the West African vaccination program. The goals of this program include the immunization of 110 million people against smallpox and the eradiction of rinderpest among cattle in the region.

These are only a few of the better known epidemic diseases which AID is fighting. Many people have never heard of the others, but among them are some which have far more severe economic effects on the less-developed countries than diseases like measles. Onchocerciasis, or river blindness, alone infects 20 million people and prevents the settlement of some of the most fertile river valleys in Africa.

At the same time, enteric diseases are a major cause of death in developing countries, resulting from contaminated water and poor sanitation. Supplies of drinkable water and adequate sewage disposal are the only effective and economical solutions to this problem. AID has been working with the World Health Organization, the Pan American Health Organization, and international lending agencies and banks, to install or expand community water supply systems in a number of countries, and to train professional waterworks operators to maintain them.

MANPOWER FOR HEALTH

In regard to AID's third major health goal, it is clear that if health is a key to sound and rapid development, well-trained manpower is the key to effective public health systems. In the past 10 years, AID's efforts in the health manpower field have concentrated in higher education, facilities for producing a greater number of doctors and nurses in developing nations, and hospital construction.

But the more critical immediate obstacle to rapid and significant improvement in health conditions is the shortage of auxiliary workers or paramedical personnel, of trained technicians below the professional level, who are sufficiently skilled to be effective, particularly in rural areas remote from cities and doctors. AID has redesigned the emphasis of its assistance to help remove this obstacle, chiefly a problem in organizing and training on a scale commensurate with need. In Laos, for example, where there are almost 26,000 people per doctor, health workers are receiving short-term training as medical aides and in practical skills, enabling them to man health stations in remote rural areas. Mobile teams are an additional feature of similar programs in neighboring Thailand. In addition to providing basic health services, these workers also assist in better nutrition, family planning, and disease control through elementary sanitation.

Which brings us to the problem of education.

Americans are frequently being warned these days, "You cannot get tomorrow's jobs with today's skills."

That slogan is quite true of course. But there is another and meaningful message in it that applies not only in our own Nation but to conditions beyond our own shores. We have under training in less-developed nations of the world, many people who do not even have yesterday's skills, the basic skills needed to lift them

above the level of a life of mere subsistence. Many can neither read nor write.

No matter how many dollars we spend helping less-developed countries build up industry and agriculture, without education for their people they can gain no real self-sufficiency, no political stability, no democracy, and no future.

That is why our foreign aid program stresses a continuing spread of knowledge.

During fiscal 1969, AID committed about $115 million for education and manpower training in developing countries. The Agency is helping to strengthen educational planning and increase and upgrade the supply of teachers and teaching materials. AID is continuing to support development of educational facilities to serve regional and multicountry needs. Strong efforts in this direction are being made in both East Asia and Africa.

Some 430,000 students attended college level AID-assisted schools in fiscal 1969. Over 60,000 teachers complete their courses during the year. Just over 19,000 teachers received inservice training with AID help. Some 22 million students below the college level were enrolled in AID-assisted schools. About 10,000 classrooms were constructed with financial support from AID and over 17 million textbooks and other technical publications were either produced or distributed with AID assistance.

In India and Pakistan, AID continued to encourage science education with special summer science institutes. Over 20,000 Indian teachers at the college and polytechnic levels have received training since fiscal 1964. Six thousand were trained in fiscal 1969. An arrangement with the National Science Foundation is providing information on low-cost laboratory equipment which can be produced within the developing countries.

In support of innovations in education the Agency has provided additional funding for an educational TV project in El Salvador. This pilot project should bring about the most comprehensive reform of education yet begun in a developing country.

AID, in cooperation with the Organization of American States, is developing a series of regional training centers in educational broadcasting. Planning for a similar regional center in Southeast Asia is well advanced. The Agency has also made arrangements for a major feasibility study to explore the use of programed instruction in India and Pakistan.

In promoting self-help, a plan is now in effect for the Association of African Universities to take over the administration of the African higher education program through which the Agency supports study by African students in selected fields at African universities.

We are not only helping to build both educational structures within the developing countries—AID is bringing promising students to the United States to learn. This year there are about 10,000 foreign students studying in the United States—potential leaders in the fields of agriculture, education, public administration, health and family planning, public safety, and industry and transportation. Their average age is between 30 and 35. About half come from Asia, one-fifth from Africa, and a third from Latin America, and their average training period in the United States is 9 to 12 months. About half who come here are on academic programs, 25 percent on shorter specialized programs, 15 percent are on-the-job training, and 10 percent on observation training programs.

This is a kind of world university—whose faculty are the training and education facilities of American universities and colleges, American industry, American labor, American cooperatives, American foundations, American farmer associations, American government; an international university—whose students come from about 70 developing countries; and whose administration is handled by AID in cooperation with about 35 other Federal agencies and hundreds of private institutions across the United States.

There remains much to do in expanding, and giving greater priority to cooperative Government-private sector endeavors in "closing the worldwide learning gap."

This program combines low cost to the U.S. taxpayer and a potential for highest benefit to every country involved.

It is a program which can over the years do much to increase political and economic stability and well-being in the emerging nations of the world.

The argument that foreign aid technical assistance is a giveaway which hurts the U.S. economy is not true. The foreign assistance program pumps money into our economy and buys American goods and services which are sent abroad while the money stays home.

Except for assistance to Latin America, AID regulations require that almost all commodities financed by AID development loans and supporting assistance loans or grants must be purchased from U.S. sources. As a result, about 98 percent of the commodities financed by AID in fiscal 1969 were purchased from U.S. manufacturers. The total amount of money which these manufacturers received was well over $887 million.

These funds purchased such varied products as fertilizer, industrial machinery, steel, paper, tractors, oil, and textiles. American shipping lines earned millions of dollars from carrying these products to their destinations. One result of all this is the creation of permanent markets for future cash exports.

AID's technical service contracts give a further boost to our economy. As of December 31, 1968, AID had in effect over a thousand technical service contracts with private American institutions, companies, and individuals. The value of these contracts was $508 million.

Dollars return to the United States in interest payments and capital repayments on loans made in the past. In the current fiscal year, it is estimated that this net inflow of dollars under the AID program will total $197 million. The inflow will increase as receipts from interest and repayments continue to rise.

The U.S. economy benefits in another way from the AID program. Poor countries are poor markets for American exports. International development greatly expands the base of foreign trade. U.S. exports to Iran, Israel, and Taiwan—countries on the AID roles just a few years ago—doubled between 1963 and 1968.

In conclusion, the foreign economic and technical assistance is part of our national concept of decency and Christianity, we help the sick, the malnourished, the poor, and oppressed. In this Christmas season it seems fitting to remember Christ's words:

As ye have done unto the least of these, ye have done it unto Me.

Mr. SHRIVER. Mr. Chairman, I yield 5 minutes to the gentleman from Indiana (Mr. ADAIR).

Mr. ADAIR. Mr. Chairman, I have asked for this time to put some questions to the gentleman from Louisiana, the chairman of the subcommittee, concerning the Overseas Private Investment Corporation.

From what I read and understand, I take it that it is the will of the subcommittee that the Overseas Private Investment Corporation be not established. Would the gentleman comment upon that?

Mr. PASSMAN. If the gentleman will yield, the subcommittee and the full committee have provided for the Agency to be established, but we did not provide the $75 million requested for the Guaranty Fund. I can tell you why, and I am sure this was never brought to the attention of the gentleman from Indiana.

The agency has been attempting to promote this particular account for many, many years. A few years ago they came before the committee and stated they needed $180 million. They actually made a very poor case for the $180 million, so we cut them $150 million and gave them $30 million.

Since the creation of the Overseas Private Investment Corporation the amount of appropriated funds and fees collected gives the agency an amount on hand at this time of $129,972,000. They have paid out in claims during that entire 20-year period only $11,820,000. So on the basis of the record, they are presently funded for a period of 258 years and 4 months. They said to us that they would not spend the money but if we would appropriate it, it would look more attractive to American business people who wanted to invest abroad, even though all the accounts would already be guaranteed by the faith and credit of the Federal Government. That is in the hearings.

Furthermore, the second part of it, they wanted to transfer $20 million per year for 5 years out of repayments to the development loan funds so as to create a $100 million lending agency. We felt that inasmuch as we had 39 other agencies attempting to make loans for overseas investment and recognizing that under the Alliance for Progress and also on the development loan program 50 percent of the total funds can be used for this purpose alone, that there was no need for the additional $75 million.

For that matter, if we run the gambit we will find out there are 39 different sources of revenue for people who may

want to invest in businesses overseas. Experience certainly teaches, and the record backed us up in prior years, that most businesses have their own capital. We found that some of the applications were from businesses who were semi-insolvent, and in all probability should not go overseas anyway. So for many reasons the committee did not recommend these funds. But in a subsequent year, if there could be established the types of businesses and the type of credit and the type of security and the type of need, if I am still on the committee, whether I am chairman or not, I would be very happy to consider anything the gentleman recommends.

Mr. ADAIR. Let me put the question to the gentleman in a different way. Is it not true that the action of the committee has made impossible the establishment of the Overseas Private Investment Corporation?

Mr. PASSMAN. Absolutely not.

Mr. ADAIR. That is, as provided in the authorizing legislation?

Mr. PASSMAN. No. If the gentleman will turn to page 4 of the bill, beginning on line 8, he will see that the agency has been authorized. It is in the bill itself, not in the report.

Mr. ADAIR. Then is it true that all funds have been denied to that agency?

Mr. PASSMAN. At this time. That is, the guaranty fund of $75 million.

Mr. ADAIR. So at best what we would have would be an agency without any funds with which to operate.

Mr. PASSMAN. They have $130 million, and under this legislation there are certain ways to use it, and inasmuch as they have 258 years' supply of money, we just did not feel like loading the account with any further funds.

Mr. ADAIR. Mr. Chairman, I would like to ask the gentleman from Louisiana his interpretation of the effect of section 122 of the bill, on page 15.

Mr. PASSMAN. Under this section, it was intended to establish $100 million as a revolving fund, to be funded out repayments to the development loan fund, and to transfer $20 million per year over to this new revolving fund.

Mr. ADAIR. We provided 2 years.

Mr. PASSMAN. Is that not true?

Mr. ADAIR. The proposal was for five, and we provided two.

Mr. PASSMAN. We did not feel the witnesses made any reasonable justification for the fund. Therefore, the committee, by a very one-sided vote, denied it, and the full committee also denied it.

Inasmuch as we have so many lending agencies, and inasmuch as the President is impounding 75 percent of all funds for new starts, it would appear to me this new lending agency could be postponed until we do have better conditions in this country, and not create a brandnew agency overnight to do what other agencies are already doing. If we had any justification as to what types of loans and what businesses and in what amounts, we could have given some consideration to it, but these people did not know anything about it whatsoever.

Mr. SHRIVER. Mr. Chairman, I have no further requests for time.

Mr. HANNA. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 308]

| | | |
|---|---|---|
| Abbitt | Fuqua | Nichols |
| Addabbo | Gettys | O'Hara |
| Brademas | Gray | Ottinger |
| Broyhill, N.C. | Gude | Powell |

| Flowers | Nelsen | |
| Fulton, Tenn. | | |

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PRICE of Illinois, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 15149, and finding itself without a quorum, he had directed the roll to be called, when 376 Members responded to their names, a quorum, and he submitted the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

Mr. PASSMAN. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from California (Mr. COHELAN).

Mr. COHELAN. I thank the chairman for yielding to me.

Mr. Chairman, I take this time not to add to your store of knowledge but to explain that the remarks which have been made by our distinguished colleagues from Massachusetts and New Jersey, I share them completely.

In relation to the report, I would hope that the members of the committee will take the time to read the additional views of our colleague the gentleman from Michigan (Mr. RIEGLE), a member of the committee, who speaks to the general problem of foreign aid and where we are going.

I will say to the Committee that I have learned a great deal while serving on this committee under the distinguished chairmanship of the gentleman from Louisiana. Much which the gentleman has said about this bill is unfortunately quite true. It has become a bag of worms.

I am very happy that the Rudy Peterson Commission headed by the distinguished chairman of the Bank of America is currently studying the foreign aid program. I feel confident, on the basis of the conversations which I have had with some of the people involved in that study, that we will come out one of these days, hopefully, with a development loan program and an assistance program that will be directed solely to the problems of developing nations. In addition it is my hope that military assistance will be transferred to the Department of Defense where it belongs. If this is done we would not be involved in the kind of hassle we are having here today over proper legislative methods.

It seems obvious to me that there should be a supplemental appropriation where at the end of the year we could have hearings. Or better still, it could be put over until next session. There is absolutely no reason why we cannot do this in an orderly legislative manner. Then there would be no doubt about whether or not this is a required military program.

Mr. FRASER. Mr. Chairman, will the gentleman yield?

Mr. COHELAN. I yield to the gentleman from Minnesota.

Mr. FRASER. I want to say to the gentleman that not too long ago and during the discussion this afternoon there was reference to the secret report on China and it was alleged that this report gave support to the idea that we needed this $55 million for Taiwan.

I want to advise the gentleman that I for one have read the report and find that the report does not support the $55 million for Taiwan for jets. If one reads it one will find that other items are given a higher priority than the jets authorized or contemplated in the bill now pending before us.

I do not know if the gentleman from California has had the time during which to read the report, but I would recommend it to him.

Mr. COHELAN. I have heard of the report in the committee and I have had the opportunity to listen to the distinguished gentleman, but I am much less impressed by supporting arguments—I only wish I had heard a little from Mr. LAIRD and Mr. ROGERS on it. This whole thing has been so informal that it is shocking.

May I say to the committee that I am not against military assistance if we can justify it. Certainly there may be a case for it.

With reference to the Korean situation there has been some discussion with men whom I greatly admire about the Korean item. I have been to Korea enough times to know that there has been an argument going on for some years about whether or not we ought to keep 60,000 troops in Korea. As the distinguished gentleman from Michigan (Mr. RIEGLE) points out in his separate views, we had better commence "Koreanizing" there as we are "Vietnamizing" in Vietnam. Instead we have this amendment dropped in our lap. The question of deleting $50 million by subcommittee action, in striking it out, was more than justified. I am merely arguing on a procedural basis that the money for Korea and Taiwan was not adequately justified because I do not have enough time to develop the foreign policy questions thoroughly.

Might I say in one final pleading comment, this bill is measured far too much on the basis of our feelings about an ad hoc Taiwan amendment and I would hope that we can defeat the amendment at the appropriate time and go ahead and pass the other important provisions contained in the bill.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. PASSMAN. Mr. Chairman, I yield the gentleman 1 additional minute.

Mr. COHELAN. I would like to ask the

members of the committee to give me your attention for just 1 minute. I intend to propose at the appropriate time a restoration of the funds which have been cut from the UNDP program. The committee report refers to the Pearson Commission and it points out the fact and says that this program is being operated at too tight a pace.

At the appropriate time I will give you the explanation for this. I have discussed it with the authorities, and they told me what is going to happen if we cut this International Organization's item by $34 million. We will, of course, seriously cripple one of the most important programs in the foreign aid bill if we sustain the cut.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SHRIVER. Mr. Chairman, I yield 3 additional minutes to the gentleman from California (Mr. COHELAN).

Mr. COHELAN. Mr. Chairman, I thank the gentleman for the additional time.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. COHELAN. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I just want to point out in regard to the claims again, and again I urge everyone in the House to read this so-called secret document. There you will see that the author of the letter, at the request of the chairman of our subcommittee, who called him by phone, stated that that should come through the supplemental process, and he makes no mention of this.

Also I might point out that there is an article in the Washington Post of November 25 by Warren Unna, wherein he says that Rogers and Hannah "reserved judgment on an added $54.5 million, which Representative ROBERT L. F. SIKES, a major general in the reserve, had succeeded in tacking onto the House foreign aid bill to authorize granting a squadron of F-4D fighter jets for Chiang Kai-shek's government on Taiwan."

Also, I think it is no secret, it is just unfortunate, this document has been floating around the Hosue all day long, but there is nothing in there about F-4D's, is there?

Mr. COHELAN. Not to my knowledge.

Mr. Chairman, I just want to add to what the gentleman said. I think, if I may say this, that it will be a grave error for us to get involved in this at this time. I plead with the Members to go through the regular process. It seems to me it is vital to get supporting testimony on this. We have not heard from the State Department officially. A number of us have heard from them unofficially.

It should be no secret about what is happening in the new administration in its formulation of its foreign policy for the Far East. We are taking another look at our posture. There are a number of changes that are pending, and they are long overdue. The whole question of Okinawa, the recent Sato agreements, are very important developments, and it probably is the first step in what is eventually going to be the low posture that many of us have been talking about.

So that, when we take precipitous action on the spur of the moment on the floor because some people genuinely feel there is a need for jets for Taiwan, I think we make a terrible mistake; I think it is bad legislation.

Mr. Chairman, I want to spend the rest of my time on this item of the United Nations development program. I am going to ask for your support. I have talked to the parties involved, and they explained to me that there were two major studies; they are over 3 years old, but they find an enormous need for these programs. And what Mr. Hoffman has done is to keep manning his programs at an even pace and he is not going too fast. However, if we are going to cut this program, it will seriously cripple one of the best programs in the whole foreign-aid bill.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. PASSMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it is my understanding that the executive branch of the Government establishes its foreign policy, and military assistance is a part of it. When that policy has been established then the level at which we shall fund the military assistance is a prerogative of the Congress. I make that as a statement of fact.

We have heard remarks about no justification for this small amount of money but this is only a very small percentage of the amount needed to update the military forces in China.

Some of the speakers gave a lot of support to amendments of as much as a billion dollars in one bill without any justification whatsoever. The total amount put in the President's budget without any justifications in other programs amounts to in excess of $2 billion.

Now I would never recommend for this Committee's consideration anything that was not supported with facts. This top secret document has material in it that I cannot use—and Members know that. But I am going to say again, upon my own honor, and I shall not give the source, that the need for China is almost $400 million—immediately—and not $54,500,000.

Mr. Chairman, I cannot go any further into detail because this top-secret document was sent to me. If we had hearings, it could not have been put in the record.

If we are going to fuss about not any hearings on something that is badly needed. I am wondering why that criteria did not apply to all of these other items when they were loading up this bill.

There are about seven projects in this bill that were put in by the Committee on Foreign Affairs. We had not one word of testimony before our committee for these programs. But we put them in because the Committee on Foreign Affairs felt those projects were needed.

So I ask you to follow the recommendations of the committee. The subcommittee put it in—the full committee put it in—and the House put it in a few days ago simply because we had proof then that it was needed and we have more proof now that it is very badly needed.

Mr. Chairman, I certainly hope the Members will back the committee up in its recommendations.

Mr. PASSMAN. How much time do we have remaining?

The CHAIRMAN. The gentleman from Louisiana has 4 minutes remaining.

Mr. PASSMAN. Mr. Chairman, I yield to the distinguished gentleman from California (Mr. SISK) 3 minutes.

Mr. SISK. Mr. Chairman, I ask unanimous consent to speak out of the regular order.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

### RADIO AND TELEVISION COVERAGE OF PROCEEDINGS OF THE HOUSE

Mr. SISK. Mr. Chairman, in a few weeks, if our present plans materialize, the special subcommittee of the Committee on Rules expects to come to the floor with a bill which would provide among other things for opening the House to radio and television coverage.

I expect to be arguing at that time in defense of the electronic media, but in fairness to the House I feel it is incumbent on me to call to the attention of the House those instances in which I feel the broadcasters for one reason or another have strayed off the reservation.

Last week it was my privilege—and I use the word advisedly—to have some fun with the Rowan and Martin "Laugh-In" show.

This week I call to your attention what I believe to be a unwarranted insult to the entire membership of the House of Representatives which occurred on the "Huntley-Brinkley Report" last Saturday. During a segment of less than a minute duration, Mr. Brinkley reported on the action of the other body in amending the tax reform and commented on the possibility that the President would veto the bill in the shape it was in at the time. He pointed out the bill would have to go to conference with the House and then stated that since "the House seems more determined to bleed the taxpayers than the Senate does" some of the Senate benefits would no doubt be removed from the bill.

We requested a copy of the script for the show to make sure we heard it correctly, and on examination of this script, I am unable to find anything in it which would justify a comment that the House of Representatives, or the other body either for that matter is inclined to "bleed the taxpayers."

Let me make it clear that I defend Mr. Brinkley's right to accuse the Congress of bleeding the taxpayers. He can take the whole half-hour show to do it, or he can do it in a 2-hour special in prime time if he chooses. But it seems to me that if he is going to do so, he should give his viewers some examples of House actions which lead him to that conclusion or in some fashion indicate why he believes the House is guilty of bleeding the people of this country. That way the viewers would be at least partially equipped to evaluate the validity of the conclusion reached.

This statement appears to be entirely gratuitous. It is unrelated to anything that preceded or followed it in the Saturday night newscast. It cannot by any stretch of the imagination be called an analysis of the news because no action of the House relating to tax matters is

reported or analyzed or examined in depth or in any fashion at all.

I consider this statement an insult to the House and to the distinguished chairman of the Committee on Ways and Means, the gentleman from Arkansas (Mr. MILLS).

All of us, of course, recognize that the tax reform bill which passed the House is not perfect, but it represents a substantial improvement over the present tax laws and in some respects goes further to help the "little guy" than the Senate bill does.

I never really realized the impact of national network television until I had an encounter with the "Laugh-In" show. As a result of that brief encounter I have received more mail than I received following President Nixon's October speech on Vietnam. Most of it is critical, and some of it is highly abusive. In my judgment, Mr. Brinkley's unjustified attack on the integrity of the House does a great disservice to all of us and I for one resent it.

Mr. Chairman, I insert in the RECORD at this point the script of the portion of the Huntley-Brinkley Show to which I refer:

EXCERPT FROM REPORT

The Senate spent all day Saturday voting amendments to the so-called tax reform bill . . . including some the Treasury says will cost the government too much money.

In fact, it says the benefits put in by the Senate this week will cost the government 12 billion dollars.

And so there was some talk President Nixon might veto it . . . on grounds it wouldn't give the government enough money to spend.

Senator Williams of Delaware even said they ought to change the name of the bill and call it The Christmas Tree Act of 1969.

But . . . before any of this becomes law it all has to go to a conference with the House . . . and the House seems more determined to bleed the taxpayers than the Senate does . . . and a lot of the benefits now in the bill may then be removed.

And so there is some doubt in the Senate that when it's all finished, the President will veto it.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. SISK. I yield to my colleague from California.

Mr. COHELAN. The gentleman is not alluding to the fickle finger of fate, is he?

Mr. SISK. The gentleman can make up his own mind.

FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATION BILL, 1970

Mr. BROWN of California. Mr. Chairman, the term "foreign aid" for this legislation is a huge fraud, and any resemblance between the objectives of this bill and the overall long-range needs of developing nations must be the result of some mistake.

With this bill as a guide, America's commitment to helping developing countries becomes a mockery—both in its degree and in its direction.

For example, in a report published in September by the prestigious Committee for Economic Development—which was distributed to all Members of this body by my friend from New Jersey (Mr. FRELINGHUYSEN)—the following analysis was made dealing with capacities of developed nations to supply assistance to developing economies:

The capacity to provide assistance is generally related to some measure of the capital-supplying countries' total income. The United Nations Conference on Trade and Development (UNCTAD) in 1964 recommended that the combined public and private flows from advanced countries should equal at least one per cent of their national income. Then in 1968 it increased the target to one per cent of gross national products, or by more than one-fifth.

Although both formulas are completely arbitrary, they are easily understood visible targets and are the only ones on which the agreement of the capital-supplying countries could be reached. The formulas would moreover, produce the $15 billion to $20 billion of requirements estimated for the early 1970's. The first figure corresponds roughly to one per cent of the anticipated national income of the non-Communist industrial countries in the early 1970's and the second to one per cent of their GNP.

By comparison, the total net flow (public and private) in 1968 was 0.97 per cent of combined national income and 0.77 per cent of GNP for the 16 member countries of OECD's Development Assistance Committee. The United States ranked thirteenth among the DAC countries in 1968 in terms of the percentage of national income flowing to developing countries in the form of net official (governmental) flows and private investment. Our outlays for space exploration are substantially greater than official expenditures for economic assistance, and our outlays for national defense are over 20 times those for such foreign assistance.

We believe that a good basis for planning the future annual flow of official and private assistance of the advanced countries including that of the United States would be one per cent of national income initially, and ultimately one per cent of GNP. By 1970, an increase from the 1968 level of 0.79 per cent of national income to one per cent should be feasible for the total flow from the United States. Beyond 1970 the flow of resources to developing countries should increase at a rate that would permit the target of one per cent of GNP to be met by 1975.

A one per cent target would not imply a tax burden on the United States equivalent to the full amount of resource transfers. For one thing, more than a third of current resource transfers from the United States are in the form of private investment. For another, the bulk of the official flows is in the form of loans that will ultimately be repaid and some of which are financed not through taxation but through borrowing on the private capital market.

Mr. Chairman, if we take the Committee for Economic Development recommendation as the minimal level of U.S. development assistance, this bill should be asking for appropriation of at least $9 billion—instead of the measly $1 billion of this legislation which might be primarily for economic development purposes.

Such neglect by this country is shameful. Virtually every other developed nation in the world devotes more of its resources on a proportional basis for development than we do. And, of course, the situation becomes even more ludicrous when we realize that our foreign aid development commitment continues to decline year after year.

I stress development because it is obvious that this "foreign aid" bill has so little to do with development—at least in economic terms. Instead—and once again—the establishment tacks the "aid" label onto its schemes of military support and adventurism throughout the world.

It does not surprise me when this body slashes away at development aid at the same time it adds on new weapon giveaways for some of our entrenched totalitarian "friends." I am not surprised, but I am depressed.

America's commitment to the third world is in urgent need of major revision. My vote today against this appropriation is aimed at the structuring of our aid program—not because I am opposed to assisting development, but because I strongly believe our present attempts are patronizing and ill conceived.

As long as the practice continues of including military aid in with economic assistance, I shall not support any foreign aid legislation. Congress must realize that massive military aid programs rarely are positive actions toward economic development in recipient countries. Military aid tends to reinforce misallocations of resources away from areas of infrastructural economic growth and into wasteful assemblages of military paraphernalia.

As an alternative to the type of "aid package" we are considering today, I would prefer much more emphasis on multilateral assistance, and greater help in the key area of population control and family planning.

I certainly would vote for this bill if I thought it was in the best long-range interests of both the United States and the developing nations. It is not and I will not.

This is another legislative tool of the military complex and their friends, and I refuse to support their dangerous and tragic policies.

I am for foreign economic development aid, but this is not it at all.

Mr. REID of New York. Mr. Chairman, I rise in support of H.R. 15149, the foreign aid appropriations bill. Normally, my support for this legislation would be strong; but I find it difficult to applaud a bill which sets a new low of $1.6 billion or less than 0.25 percent of our gross national product for the U.S. foreign assistance program.

Yesterday, this House passed by an overwhelming margin a bill appropriating a total of nearly $70 billion to the Defense Department. Of that $70 billion, $1.5 billion—or roughly the amount we will be spending for foreign assistance in this fiscal year—is earmarked for Marine personnel alone. For "operations and maintenance," in the Defense Department, we will be spending more than $20 billion—or 12 times the amount we have allocated for foreign aid in the coming year. I submit that this investment in war rather than constructive economic assistance programs is just one more indication of the upside priorities of this body.

Three aspects of the measure we are considering today are, in my judgment, cause for considerable concern. The most disturbing cuts in the bill were those made in the programs of the Alliance for Progress, through which we assist our neighbors in Latin America in the development process. In the early years of the

Alliance, this country allocated approximately $1.1 billion annually to investment in the nations of this hemisphere. In 1967, following the Conference at Punta del Este, President Johnson requested that that amount be increased by $300 million annually, to a total of roughly $1.4 billion annually. The bill we have before us today provides a mere $275 million—roughly one-fifth of that amount—for loans and grants for the Alianza in fiscal 1970.

It is true that the United States contributes to development in Latin America through programs other than those contained in this bill, including the food-for-peace program and loans made through the Inter-American Development Bank. But it remains true that U.S. assistance to Latin America has shown a catastrophic decline in recent years, a decline which will surely hold back developments in agriculture, education, and family planning—areas in which multilateral organizations provide little assistance, making the U.S. contribution increasingly important. The President has called for "action for progress" in the Americas. Are we, the Congress, to preclude the action needed in the coming decade by refusing to provide the necessary funds? I would hope that we will not fall back on our commitment in this manner.

Another distressing cut is that made by the Appropriations Committee in the U.S. 1970 contribution to multilateral organizations. As my colleagues may recall, this body authorized a total allocation of $122,620,000 for multilateral organizations, of which it was expected that $100 million would go to the United Nations development program. The committee in its wisdom has cut the total appropriation for multilateral organizations to $88.8 million, with $12 million of that amount earmarked for the United Nations Children's Fund—UNICEF. It is currently estimated that the U.S. contribution to the U.N. development program will therefore be held to the fiscal 1969 level of $71 million.

In my judgment, it would be a tragic mistake not to restore full funding for U.S. contributions to multilateral organizations and thus make possible a contribution of the full $100 million to the UNDP. According to Mr. Paul Hoffman, administrator of the program, the U.S. contribution of $71 million in fiscal 1969 helped trigger additional contributions of approximately $425 million from other sources. It is estimated that a U.S. contribution of $100 million for fiscal year 1970, along with the $138 million already pledged by other donor countries and the $20 million expected from interest payments and other sources, could generate $500 million—funds which could have an important impact on the development of the 122 countries which participate in the program.

In my judgment, the United Nations development program is playing a vital role in economic modernization of many countries of the world. Certainly I think any serious student of the UNDP would dispute the Pearson Commission report's statement, with regard to the UNDP and the specialized agencies, that—

> Their operating capacity now . . . seems strained to the limit.

Mr. Hoffman and his staff appear to be doing a superb job, and I would hope that the Members will support the amendment being offered by the gentleman from California (Mr. COHELAN) later today, which would restore full funding for this program.

My colleagues, the gentleman from Massachusetts (Mr. CONTE), and the gentleman from California (Mr. COHELAN) have already called the other major problem to your attention in a letter to all the Members. That is the inclusion of $54.5 million for the gift of jets to Nationalist China—a gift which has been neither requested nor justified by the President, the State Department, AID, or the Defense Department. Furthermore, it is my understanding that none of the agencies involved desires that these jets be given to Nationalist China, and in view of that fact, I would hope that my colleagues will support the amendment of the gentleman from Massachusetts (Mr. CONTE) to strike the appropriation for this gift from the bill.

I recognize the futility of the attempts to restore funds to H.R. 15149, and I therefore urge the Members to support the bill in its present form, without any additional cuts. However, I would hope that the Congress will act more responsibly next year and once again begin to meet the Nation's obligation to the less developed countries of the world.

Mr. VANIK. Mr. Chairman, I must oppose this foreign aid bill because it fails to meet a minimal standard of morality and decency in American foreign policy.

I have been a strong supporter of foreign aid in the past. It was my hope that we would develop a prudent program which would clearly express our Nation's commitment to help developing countries help themselves. It was my hope that America would take world leadership in preventing starvation, poverty and the desperation which would ultimately lead to violence and war.

It was also my earnest hope that our foreign aid program would be utilized to actively support freedom and free governments. From what I can determine, the overwhelming portion of these foreign aid funds are destined for military dictatorships and antidemocratic governments. Foreign aid funds should be used to inspire freedom and free enterprise and not to smother it.

This bill is fatally defective in appropriating $54½ million to provide an additional squadron of jet fighters for Chang Kai-shek and his government of Taiwan. The American people should seek to learn more about the combination of forces, foreign and domestic, which skillfully organized such a coup at the taxpayers expense.

On the other hand, a decent and proper move to increase development loan funds to provide dignified self-help was quickly turned aside. Where have our priorities gone?

Last night, President Nixon, in a matter-of-fact tone, admitted that our country was paying for the services of "volunteers" from Thailand, Korea, and in South Vietnam. These "volunteers" are hired mercenaries and "hired" allies.

My fear is that most of the revenue appropriated under this bill will be diverted to the war effort rather than to urgent human needs. If foreign aid is to be war aid, it belongs in the defense budget.

The time is at hand for a complete review of the foreign aid program and its place in American foreign policy. The administration of foreign aid must meet our moral responsibilities in the world rather than offend them.

Our experience in Vietnam should have set new and positive directions in our foreign policy and the aid program which brings it life.

Mr. SIKES. Mr. Chairman, I am deeply concerned with the possibility that funds contained in this bill for multilateral organization may ultimately be allocated to hostile Communist nations, including Hanoi. To me it would be an inexcusable act to tax Americans to pay those who kill, maim, and imprison American youths. I trust that the committee has explored this possibility and has provided safeguards to insure against such an actuality.

Mr. RYAN. Mr. Chairman, the Foreign Assistance Act of 1969 authorized $40,000,000 for the U.S. share in the development of a prototype desalting plant for Israel as part of a dual-purpose power and desalting project.

The authorized amount of $40,000,000 was determined after full consideration by the House Foreign Affairs Committee and in the light of the recommendation for $40,000,000 made last January by the Department of the Interior.

I regret that the foreign assistance appropriations bill for fiscal year 1970 has cut the authorization by 50 percent—to $20,000,000.

I believe that the desalination plant should be funded to the full level. The proposed plant is important, not only to the immediate water needs of Israel, but also to the development of facilities and techniques for dealing with the problems which have to be solved in order to use sea water to make up for the water shortage in many areas of the world.

The concept of such a project has had support since 1964, when President Johnson announced a joint United States-Israel program of research and development. A year later, the American-Israel Desalting Board reported that a facility was technically feasible, and that it could produce the water and electricity needed by Israel.

In 1967 I first introduced legislation to authorize such a project.

In January 1969, President Johnson promised Premier Levi Eskol support for the plant's construction, and on January 17, 1969, Assistant Secretary of the Interior Max Edwards sent a bill to Congress similar to mine and recommended $40,000,000.

Although my original bill had proposed a plant which would be capable of producing 100 to 150 million gallons of fresh water daily, the plant authorized by the Foreign Assistance Act of 1969 will produce 40 million gallons a day, which will surpass any desalting plant in existence

today. There is no desalination plant with a capacity over 7.5 million gallons daily, although there is one under construction which will be able to handle 20 million gallons daily.

Both Israel and the United States will benefit. It will aid Israel to cultivate land which presently lies arid; it will contribute toward a stable Middle East by creating more arable land and by producing jobs, and it will enable Israel to maintain her industrial and economic growth in the 1970's.

At the same time our own saline water conversion program will benefit from the development of this plant. Techniques for desalination will be developed at a reasonable cost.

Full funding of the authorization is in the public interest, and I hope the other body will vote the $40,000,000 which has been authorized.

Mrs. REID of Illinois. Mr. Chairman, as a member of the Foreign Operations Subcommittee of the Committee on Appropriations, I would first like to say a special word of commendation for our subcommittee's distinguished and dedicated chairman, the gentleman from Louisiana (Mr. PASSMAN), and our extremely able ranking minority member, the gentleman from Kansas (Mr. SHRIVER), for the capable leadership they have afforded our group as we have endeavored to evaluate and assess foreign assistance requests for fiscal 1970. In view of the enormity of our Nation's aid commitments throughout the world—to 99 countries and five territories in 1970—and the increasing domestic needs here at home during a period when it is necessary to curtail Federal expenditures wherever possible because of continuing inflationary pressures, this annual reappraisal has been a most difficult task, to say the least; and we are fortunate to have the special knowledge and experience these gentlemen contribute to this discussion. I believe that the hearing record this year as well as the committee report gives all of us a better understanding of the strengths and weaknesses of our foreign assistance program. I consider it an honor and a privilege to serve with anyone on the subcommittee.

Few Government programs over the past 20 years have aroused as much controversy both in and out of Congress as foreign aid, and this year is certainly no exception. At a time when we are being called upon to provide more Federal aid to support educational needs, to provide help in curbing pollution of our streams and rivers, and to help solve a myriad of problems such as housing, welfare needs, hunger, manpower training, and means of mass transportation that plague our own cities and rural areas, it behooves all of us to take a long, hard look at any request for additional foreign aid funds. I did not support the Foreign Assistance Act authorization bill when it was passed by the House of Representatives on November 20 because of urgent domestic needs and the fact that I am sincerely concerned about our budgetary problems in this country and the need to reduce expenditures in order to help curb inflation and provide relief for our overburdened taxpayers.

A main question raised is how far our Nation should go in continuing to share its resources with the world when our own public debt now stands at more than $361 billion, which is some $57 billion more than the combined public debts of all the other countries. Through June 30, 1969, the United States has extended economic and military assistance, in one form or another, amounting to a net total of $122 billion—of which only $27.5 billion is in loans, with the remainder being in grants. In view of the fact that we have had a surplus in our administrative budget only five times since the end of World War II, it has been estimated that it has cost an additional $60.5 billion in interest on the money we have borrowed to assist other countries. Ironically, three countries which have received substantial U.S. aid—Korea, Thailand, and Taiwan—are now loaning money back to us at a 6 percent interest rate.

An example of the failure of the goals of the foreign aid program can be seen in the case of India. Since 1952, the United States has given this massive and strategic Asian nation more than $9 billion—about two-thirds of its entire outside assistance. During this time an increasingly militant brand of socialism has continued to squander the aid. The masses of Indians are poorer than ever, industry languishes and an increasing trend toward nationalization does not improve the outlook for the future. At the same time, India consistently opposes the United States in the United Nations and is talking about raising its relations with North Vietnam to the ambassadorial level after a break of seven years. Furthermore, the Indians see nothing wrong in using U.S. funds to reinforce their own multi-million dollar foreign aid programs which gives assistance to such countries as Nepal, Bhutan, Sikkim, Indonesia, Ceylon and Burma, while millions of its own citizens are jobless, homeless, and starving. We should ponder what we have actually achieved in our own national interest by supplying two-thirds of India's foreign aid in the last two decades compared to what Communists have achieved on the basis of the U.S.S.R. supplying 5.5 percent of that same total.

Testimony presented to our committee shows that this year's request for the economic and military assistance program is the lowest since the program began.

However, bits and pieces of both the economic and military programs have been transferred to other departments and agencies, and new agencies and programs have been created over the past several years that now handle programs that were formerly funded by the Foreign Assistance Act or its predecessor acts. A compilation of the various budget requests from January 1, 1969, to the present totaled over $10.5 billion for foreign assistance in the form of loans, grants and credits—and this scattered throughout the budget.

The bill before us today would provide new budget obligational authority for foreign assistance activities in the amount of $1,599,380,000. This is a cut of $1,110,640,000 from the budget request, and it is $156.2 million less than the 1969 appropriation of $1,755,600,000—which to date was the smallest amount since the program began. Certainly the reductions recommended by our subcommittee are giant steps in the right direction, but the fact remains that further cuts could and should be made. Also, there is an estimated $18.7 billion of unexpended balances in the pipeline available from prior years' appropriations.

On September 24, 1969, President Nixon named a Presidential task force of 16 private citizens, headed by Mr. Rudolph A. Peterson, the president of the Bank of America, to review the foreign aid programs. This action was taken pursuant to sections 501 and 502 of the Foreign Assistance Act of 1968, which requested the President to make a thorough and comprehensive reappraisal of U.S. foreign assistance programs, and to submit to the Congress, on or before March 31, 1970, his recommendations for achieving such reforms in and reorganization of future foreign assistance programs as he determines to be necessary and appropriate in the national interest in the light of such reappraisal. In my judgment, pending the report of this task force, we should not appropriate any additional funds because of the backlog of over $18 billion in the pipeline.

In view of past failings of our foreign assistance programs, I would hope that the task force will come forward with constructive recommendations. I believe that this is a time to unwind the program as we have known it for the past two decades. It seems to me that with the availability of substantial funds in the AID pipeline, it would not seriously jeopardize any essential foreign commitment of our country. Obviously, it may require additional special legislation to deobligate and reprogram some present commitments so that necessary assistance in some areas—particularly to Vietnam—would not be interrupted.

While I support the efforts of my Foreign Operations Subcommittee and the Committee on Appropriations to reduce foreign aid spending this year, I personally feel that the fiscal crisis in our own country—which made it necessary for the President to ask for a 75-percent cut in domestic public works projects as well as curtailments in other vitally needed programs—makes it imperative that we go even further in redirecting this program and setting new priorities—so for these reasons, I shall not vote for the bill.

Mr. RANDALL. Mr. Chairman, I oppose H.R. 15149, the foreign assistance appropriation bill for 1970, for substantially the same reasons that I have opposed this same appropriation bill in former years.

While it is true the bill, as reported, carries an appropriation of something over $2½ billion, this figure is still far out of proportion to any benefit the American taxpayers can receive from such an appropriation. It is true this appropriation bill is over a billion dollars

below the April budget request, meaning the Nixon budget, and is nearly $400 million below the figure in the authorization bill, and about $375 million below the appropriations for last year, being fiscal year 1969.

Notwithstanding, the facts are that through June 30, 1969, foreign aid had cost the American taxpayer $122 billion. It is argued that about $30 billion of this is in the form of loans and therefore, may at some time be repaid. The facts are, however, that there is no information whether any of these loans have been partially repaid or whether they are being repaid. Just about any way you can slice it, the U.S. taxpayers have been out of pocket a net of nearly $95 billion for foreign aid since 1948. But that is not all of the story. The really disturbing fact is that in interest alone the cost of the program has been over $60 billion.

For years I have opposed foreign aid because of its maladministration and the repeated instances of waste of these funds. I have repeated in the past, and I can now reassert that even if there could be established a good case for foreign aid, there is no justification for this appropriation bill because there is an unexpended balance of previously appropriated moneys in the pipeline of approximately $18 billion. Of course there are those who will offer a rebuttal to this contention by saying that all of these funds are committed. It may be true that they have been earmarked for certain projects but the money has not been actually spent and surely in this year when fiscal restraint is most needed, we could declare a recess for foreign aid appropriations for at least such period of time until these committed but unexpended funds could be used.

As in former years, there are some worthwhile items in the overall foreign aid package. I have always supported the Peace Corps, and there is money in this bill for the Peace Corps, but it is a very small overall percentage of the total. If this bill should be defeated I am sure there would be some type of separate or supplemental appropriation bill to provide for the Peace Corps, and it would receive the support of the majority of the Membership of the Congress.

Again, there is some money which will go to Vietnam as assistance for that country. This, too, should be considered in a separate appropriation and it would undoubtedly receive the support of the Congress. As it is we are not talking about either the Peace Corps or assistance for Vietnam. Instead, in the fiscal 1970 foreign aid appropriation bill, there are funds going to 99 countries.

For those who may be depressed that $2½ billion is an insufficient sum for foreign aid, their spirits can be revived by the knowledge that this appropriation bill certainly does not include all the bills for foreign aid programs. As it is today, foreign aid has been fragmented and scattered throughout several executive departments. When the funds contained in this bill are included with all of the other separate appropriations for foreign aid, the total will be about $10½ billion for fiscal 1970. Put in different terminology, there is $8 billion for foreign aid outside or beyond that appropriated by H.R. 15149.

Mr. Chairman, in consideration of the hard-pressed American taxpayers, and in further consideration of all our other priorities, the foreign aid appropriation bill for 1970 should be voted down.

Mr. OTTINGER. Mr. Chairman, I am voting against the foreign assistance appropriation bill today for the first time since I have been in Congress.

I oppose the bill, not because of its basic provisions appropriating funds for economic assistance, the United Nations, the Peace Corps, the Asian and Inter-American Bank, IDA and other worthwhile programs of assistance to the developing nations of the world. Quite the contrary. I feel the appropriations for these purposes have been cut shamefully, so far as to endanger the future security of the United States. Assistance to the less-developed nations is the constructive part of our foreign policy. It holds out hope to the deprived people of less-developed nations that their aspirations for a decent standard of living may be achieved under a free society. Today, our accent in approaching these people is far too heavily on threats and use of military force. The drastic cuts in the bilateral economic assistance and international assistance programs leave the United States looking at the rest of the world down the barrel of a gun, virtually eliminating the constructive tools of foreign policy, and leaving us only with military tools.

I oppose the bill today because of the series of amendments and legislative provisions that have been added to it that shift its emphasis from economic assistance to military assistance, from constructive help to free nations aspiring to stand on their own feet to an instrument in the cold war.

I particularly oppose the appropriation of $54,500,000 to the Republic of China for the purchase of modern war planes not requested by the administration and for which no justification has been made. Indeed, it is only on hearsay from individual Members that there is any evidence of departmental support for the planes at all, and the debate in the House indicates that the State Department has not declared itself at all on this question. No hearings have been held. No apparent justification exists. How and where are these planes to be used? The crucial question remains unanswered.

I oppose military and supporting assistance to dictatorships in Spain, Greece, Haiti, and various less-developed countries. While we are fighting in Vietnam ostensibly to defend the South Vietnamese right of free elections and self-determination, it seems anomalous to donate American treasure to the aid of Government systematically oppressing their citizens and this is particularly wrong in the case of military aid.

I oppose the large amounts in this bill for various aspects of the Vietnamization program in South Vietnam, feeling that support is being given to the repressive military regime of Generals Thieu and Ky without adequate insistance on elimination of corruption, broadening the base of that government, ending the imprisonment of political opponents, and assuring agricultural and other economic reforms. Every day we are treated to new revelations of how our assistance to that government is diverted into private pockets and Swiss bank accounts. The policy of bolstering the Thieu-Ky regime without insisting on political and economic reform is a bankrupt policy that will result in prolongation of the war.

Finally, I oppose the entire series of legislative restrictions in this appropriations measure. The appropriations committee is supposed merely to fund the programs authorized, not to legislate in the guise of fixing limitations on the use of funds. Various restrictions placed in this bill are likely to require termination of assistance to countries like Pakistan, Burma, Cambodia, Thailand, and the Philippines which will jeopardize our relations with these countries and the stability of Southeast Asia. Other restrictions tie the hands of the administration in its efforts to normalize relations with China. They seek greater efforts to tie U.S. assistance to purchases in the United States, whereas we should be seeking to untie our assistance in conjunction with other developed countries. The tying provisions of our aid cost the recipients dearly. In many cases if agreements could be reached for mutual untying with other developed nations, untying could be accomplished without any adverse balance-of-payments consequences or any dimunition of purchases of U.S. goods and services. The legislative restrictions in this bill also wrongly inhibit the freedom of the administration to try to exploit differences between Communist nations and to try to encourage these nations to exercise greater freedom from the Soviet Union and China.

Considering all these factors, I have come to the conclusion that the bad features outweigh the good in this bill and thus, reluctantly, have decided to oppose it. I earnestly hope that these bad features will be eliminated in conference and that I will be able to support the bill as it finally emerges.

Mr. ROBISON. Mr. Chairman, as my voting record over a 12-year timespan in this House will prove, I have always supported our programs of foreign assistance of one kind or another. This support has not always been politically easy to give, since my own constituents—like those, I suppose, of many of my colleagues—have tended to be disillusioned with foreign aid, as such, concentrating on its manifold and spectacular failures more than they have on the realities of global poverty, and the constant threat to world peace that lie inherently therein.

We must, of course, concentrate on our own problems. The same are widespread, complex in nature and costly of solution.

And, yet, we would ignore only at our peril the fact that there are, in Asia, Africa, Latin America, and the Middle East, hundreds of millions of poor people—people who live with hunger and often die of it; people who are pinned down by ignorance and cannot escape from it; people who are open to attack by every form of killing and crippling disease; people whose homes are rural

shacks or urban slums; people whose children move in appalling numbers directly from the cradle to the grave.

The growing frustrations felt by these global poor constitute an explosive force on the world scene greater in potential, one must believe, than even the atomic terrors we have learned to live with should a conflict break out leading to the use of such weapons of warfare.

Throughout my years of service in this body, and my efforts to communicate at least a bit better understanding of this peril to those I endeavor to represent here, I am pleased to have noted what I have felt to be a softening attitude on the part of my constituents toward the necessity for continued programs of foreign assistance in the fields of economic and developmental aid, technical cooperation, and the like. My last district questionnaire indicated, for the first time, that a slim majority supported such programs—and, apparently, understood the reasons why they should be supported—to which support, though not expressly stated, one has to assume those so voting attached a hope that such programs would be more carefully administered and parceled out than they had been in past years.

In any event, Mr. Chairman, the moneys as contained in this bill for such programs have been cut to a bare-bones state—substantially below President Nixon's budgetary requests for the same. This was, perhaps, a defensible decision in view of our own economic problems and the urgency of our own domestic problems that concurrently cry out for solution. At least, for me, it was an acceptable decision and, until a few moments ago, I had fully intended to vote for this bill.

However, in the past few hours it has become clear that the mood of the House is a continuing one—that has been exhibited all too often in past years—of preoccupation with our military ventures or interests abroad. Not only is the unasked for money for jets for the Republic of China evidently going to stay in this bill, but also, apparently, an additional $50 million in military assistance for the Republic of South Korea is going to take its place alongside that dubious item.

In short, Mr. Chairman, what we seem to be producing here is a sort of "supplemental" defense appropriations bill. I could swallow it, perhaps, if we were just considering the extra money for Korea, but I can see at the moment no justification—and possibly some future trouble for us—in the $54.5 million in the bill for jet aircraft for China. This last item came out of nowhere as the authorization bill passed this body a few weeks ago. I voted against it then, as I intend to do again tonight. It may, possibly, be a justfiable item, but I would like some proof of that before voting for it, and I have not yet seen such justification.

In any event, Mr. Chairman, I cannot support a so-called foreign aid program under which the sum total of our efforts to combat global poverty, and hunger, ignorance and disease, continues to shrink, while programs of military assistance of one kind or another—especially when one adds in the dollar total of such assistance as provided through other vehicles than this one—continue to burgeon and grow.

And, quite frankly, I am more than somewhat weary of watching my colleagues who are so inclined—though I surely do not question their motives in doing so nor their right to do so—vote, year after year, to turn this from an economic assistance program that holds some hope out to the underdeveloped world, and, I believe, gives some future hope for conditions conducive to world peace, into what is more and more a military assistance program that could lead us into further misadventures like that in Vietnam, while counting on Members who feel as I do to carry such bills through on final passage.

Thus, Mr. Chairman, I intend to vote "no" on final passage of this measure, breaking a 12-year string of "aye" votes in doing so, but believing that, in good conscience, I cannot do otherwise.

Mr. PASSMAN. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. There being no further requests for time, the Clerk will read.

The Clerk read as follows:

(3) Multilateral organizations, $88,800,000 (section 401(a)(1)): *Provided*, That no part of this appropriation shall be used to initiate any project or activity which has not been justified to the Congress: *Provided further*, That the President shall seek to assure that no contribution to the United Nations Development Program authorized by the Foreign Assistance Act of 1961, as amended, shall be used for projects for economic or technical assistance to the Government of Cuba, so long as Cuba is governed by the Castro regime: *Provided further*, That none of the funds contained in this paragraph shall be available for transfers authorized by section 202 of the Foreign Assistance Act of 1969.

AMENDMENT OFFERED BY MR. COHELAN

Mr. COHELAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COHELAN: Page 2, line 14, after "(3) Multilateral organizations", strike out "$88,800,000" and insert "$122,620,000".

The CHAIRMAN. The gentleman from California is recognized.

Mr. COHELAN. Mr. Chairman, I rise to offer this amendment which will restore the fund to international organizations. The program that will be most affected by this huge cut—$34 million—will be the U.N. development program—UNDP—which is headed by the able Mr. Paul Hoffman. The committee cut this category which will adversely affect the desirable work of the UNDP. The committee report states that the Pearson Commission Report on the International Development states that the operating capacity of UNDP and other specialized agencies "seems strained". What the committee report fails to mention is that the U.S. contribution is the "lynch pin" of UNDP effort.

I recently spoke with Paul Hoffman and he said these cuts by the subcommittee would have a dire consequence on the orderly planning for UNDP. This organization has projections to expand at the rate of 15 percent per year. Mr. Hoffman assured me that this expansion would be orderly and not impede the quality of the work of UNDP. It was on this basis that UNDP has now solicited over $150 million from other nations for 1969. The United States is pledged to a $100 million contribution—a pledge that can never be fulfilled if this House allows this cut to stand. It should be noted in this regard that 62 countries have increased their 1969 pledges over 1968. It seems in the best interest of encouraging international self-help to fund UNDP at $100 million.

The need is painfully apparent. Two major studies, although 3 years old, came to the same general conclusions—that the need for UNDP projects—surveys to explore latent natural resources, work to strengthen educational and training program facilities for disseminating and applying new technologies, furnishing advisory personnel—was well over $400 million.

The need for these projects has grown considerably in recent years. Although there is this tremendous need, the UNDP moved at a fixed and orderly pace. As I have mentioned there was to be a 15-percent increment per year. This pace would enable the judicious and expert utilization of available resources. Now we are faced with a drastic reduction. It is argued that we are only appropriating what we did last year. Such an attitude leaves no hope for expansion and indeed in the inflated money market it means we have regressed.

In answer to the charge that UNDP is strained within its existing budget, I want to point out again that there is an orderly plan for a 15-percent increase in UNDP effort. This can be appreciated when the area of personnel is analyzed.

There will only be 62 additional staff at the New York headquarters to handle increased projects, a total of 479 people, and there will be a field increase of 195, a total of 2,305 staff. These field personnel will run the gamut from manual workers to economic planners. Of more importance is the plan for an increase of 1,400 expert man-years—EMY—over the next 5 years, to a total of 6,200 EMY. This concept of getting expert personnel to give guidance to the development effort represents the backbone of the UNDP effort. Thus, UNDP has planned for an orderly expansion. I feel that this is the correct direction in which to move, and I feel that with this orderly planning, the organization can relieve the strain, as charged in the Pearson report, and get on with its vital work.

It cannot do this with the existing cut. The increase recommended, $29 million, was to handle this increase in needed manpower and increased projects. Now we are asked to cut them.

This cut comes at a time when UNDP efforts are bearing fruit. For example, the Director announced that by the end of 1968, capital investment commitments of $2.8 billion had resulted from or were related to the findings of projects assisted by UNDP.

I want to point out to my colleagues on the other side of the aisle that this is a fight to save the priorities of your administration. The increase of $29 million for UNDP was done at the direction of President Nixon who wanted increased

emphasis on the technical assistance and the channeling of funds through multilateral agencies.

This then is Nixon priority—and it seems not a little strange that we on our side of the aisle are required to bear the burden, with some notable exceptions for the Republican side, for these Presidential priorities. For myself, I feel the President, in this instance, has made a wise choice. The UNDP shows how U.S. funds can be used not only to accelerate development but to encourage other nations to take up their burdens. It is important to keep this in mind. Every $4 donated by the United States generates $6 from other donors, and in addition, an equal contribution to their projects by the recipient developing nation. Now we are asked to regress. I do not think this is the time for the United States to back out of this effort—and this is exactly what will happen with this $34 million cut.

Given the Presidential support for the objectives for UNDP and the fact that most Members support the concept of self-help in international development and are increasingly accepting the multilateral approach as a valued tool, we should not allow this productive agency to be subject to the Procrustean approach—we should not negate its efforts with a sense of futile economy and at the same time give away funds to other questionable efforts.

Mr. PASSMAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I call the attention of the Committee to the fact that for this account, the international organizations and programs, as it was previously funded, as of June 30 had $171,740,000 on hand unexpended. Under the new budget request, they are asking for $122,620,000. However, as in previous years, we make reductions, but in this particular account on comparable programs last year we appropriated $88,800,000. That is the same amount we are recommending at this time—$88,800,000. I want to refer to the Pearson Commission report. I do not know why we just blind ourselves to the facts of life. This is from the committee report:

> The Committee is of the opinion that this proposed increase of approximately 41 percent in our contribution to the U.N.D.P. is excessive and notes that the recently released Pearson Commission Report on International Development stated, with reference to the technical assistance activities of the United Nations:
>
> A large volume of technical assistance and preinvestment activity is handled by the U.N.D.P. and the specialized agencies, and they have played pioneering roles in many of the improvements of the past two decades. The world owes them great praise and appreciation for these vital contributions. *Their operating capacity now, however, seems strained to the limit.*

There is absolutely no justification for increasing this program by one dime. There was no justification before our committee which would warrant increasing this account.

In voting, I hope the Members will take into account that we travel this same road every year. The Committee on Appropriations makes adjustments. Always those who are for the high dollar come in and offer amendments. Some of us must be responsible and realize that we are closing down projects in America. Seventy-five percent of all new starts will be closed down. Last year it was necessary to impound funds.

On that basis I ask Members to support the committee. This item has cleared the subcommittee. It has cleared the full committee. I certainly hope that the committee will vote down this amendment.

Mr. FRELINGHUYSEN. Mr. Chairman, I rise in strong support of this amendment. The dollar amount is small, $34 million. However, as the gentleman from California has so eloquently stated, it is for a very good purpose. The committee itself recognizes the basic reason for the increase in the funds for the United Nations development program. It says, quoting from page 12:

> This increased estimate reflects the President's decision to increase emphasis in the overall aid program on technical assistance and on channeling of funds through multilateral organizations.

This emphasis would be possible if we would provide the $100 million which is being requested for the UNDP.

If I could borrow a couple of expressions from the gentleman from Louisiana, but not his argument, let us not blind ourselves to the facts of life, and let us remember that somebody must be responsible.

The facts of life are that multilateral organizations can do a meaningful job in assisting developing nations. One of the ways we can assist in that effort is through such programs as are financed by the UNDP. This involves not only contributions from the United States, but also contributions from other nations, which total already about $140 million and may go up to $150 million.

If we cut back because of an insistence on looking backward instead of at what the needs are today, we cannot expect other countries to come forward and help pay the bill. On the other hand, if we modestly increase our assistance there will be some solid benefits both in the field of technical assistance and in the channeling of funds for programs which are needed to help these developing countries.

I do hope we will recognize there is something of susbtance here. No case has been made for a reduction of these funds except for the blind fact that we did not utilize more money last year.

The UNDP has grown. As I said during general debate, four times as much is now available than was available in 1959. It is because this program has grown, and is increasingly useful, that we need to increase our emphasis in this area.

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. FRELINGHUYSEN. I yield to the gentleman from New York.

Mr. BINGHAM. I thank the gentleman for yielding.

Is it not true that this type of program, which Mr. Paul Hoffman has been in charge of for a number of years now, is truly a seed money kind of program? It concentrates either on training, such as vocational training, or on the type of investment that brings private investment and other investments afterward.

Over the years the total amount of investment produced as a result of these preinvestment activities, surveys and the like is truly enormous.

Would not the gentleman agree that it would be false economy to cut back on this program where we are getting big contributions from other countries relative to their strength and we are also getting such large total investment added to the projects after they are completed?

Mr. FRELINGHUYSEN. May I say to the gentleman from New York I agree with him. If we do decide to cut back on the bilateral assistance, we should be wary of also cutting back on multilateral assistance. It does seem to me that when you have a relatively small but expanding program such as this that we should continue with it. We should accept the fact that the President is requesting more and honor his request.

Mr. REID of New York. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment of the gentleman from California (Mr. COHELAN). Because the hour is late, I shall not take the full 5 minutes. However, there are one or two points I would like to make. The United Nations Development Fund basically is a fund that supports an expanding world economy. It is in the interest of U.S. trade. It provides basic seed money for development, as the gentleman from New York (Mr. BINGHAM) pointed out. Last year, in 1969, the UNDP was working in 122 countries and 71 million U.S. dollars resulted in the generation of additional contributions of $400 million to $425 million for effective economic development.

It is estimated by Mr. Hoffman, Administrator of the UNDP, that if the House did restore the funds for multilateral organizations to the $122 million requested in this amendment, which has been offered by the gentleman from California (Mr. COHELAN), which I support, the $100 million U.S. contribution to the UNDP would make it possible to generate some $500 million in additional funds.

Mr. Chairman, I would point out to the Members of the Committee of the Whole House on the State of the Union that to date the United Nations development program has engaged in 1,100 projects resulting in $3 billion—$3 billion—in capital investment. Of the $500 million expected to be generated in 1970, it is anticipated that 40 percent of the funds will go to agricultural projects; 20 percent to investigations of various kinds; 20 percent to vocational training—for example, India, which once had a shortage of plumbers, now has 25 institutes to provide training to meet the demand in this field—and 20 percent for miscellaneous projects.

The most impressive feature of the UNDP is perhaps the multiplying value of its projects. A project to modernize a country's agriculture, for example, results in increased productivity of farmers and workers. With increased crop yields, the farmers have increased income; this leads to a market for industrial products—everything from farm

implements to bicycles. When industry expands, more people move to the country's cities, creating a demand for services. Therefore, a project which begins as an effort to improve a nation's agricultural techniques may in the end result in the modernization of that nation's economy and expanded world trade as that country begins to buy goods on the world market. The UNDP therefore works to the advantage of the developed, as well as the less developed, nations of the world to the extent that it contributes to expansion of the world economy.

One very specific example that could be mentioned that this provision for contribution to the UNDP would now do is to provide support to the Mexican Institute, which is on the verge of a breakthrough in placing more protein into cereals. With this breakthrough, it would be possible to double the world's food supply and provide a better diet for some 250 million children aged 2 through 5 whose growth otherwise could be seriously stunted without this breakthrough with reference to an adequate diet.

Mr. Chairman, I think this is one of the best investments we can make. A small amount of U.S. funds triggers vast additional resources and energizes the best kind of resource development.

I would say, finally, that Mr. Hoffman is not unmindful of the reference in the Pearson Commission Report and the feeling that fact that he is under some strain in this area and he has a problem of how more effective use can be made of UNDP resources. He is, indeed, currently engaged in a study to identify any existing problem areas and find solutions for the problems. It would be surprising, given the progress that has been made, if there were no strains—for strains and progress go hand in hand in this world.

Mr. Chairman, I believe for the small amount of money involved, this represents one of the best investments we can make—an investment in resource development, vocational training, higher crop yields, and a fundamental increase in productivity and trade.

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. REID of New York. I yield to the gentleman from New York.

Mr. BINGHAM. I thank the gentleman for yielding.

Knowing the gentleman's interest in the Middle East, I think it might be worth pointing out to the Committee that this amendment does not involve in any way whatsoever the funds for the Arab refugees with which some of us have great concern, in that camps for Arab refugees may be under the control of terrorists. I spoke on this the other day and have great concern about the way the UNRWA program is being run.

The Cohelan amendment concerns a totally different program. There is no money in this item we are talking about for the Arab refugee program. This is an area where the United Nations work is widely acclaimed. The UNDP is doing a splendid job, and needs the kind of support that the full request from the administration would present.

Mr. REID of New York. The gentleman is correct. I thank him for his contribution.

Mr. Chairman, this program is essential to help countries identify their own resources, train their own people, and achieve the higher productivity fundamental to the third world and to U.S. trade as well. Take, for example, Nigeria, where a dam is under consideration, and might be built. If it is built, it will provide a lake 15 by 70 miles providing hundreds of thousands of acres with irrigation, and would also provide for an inland fishery industry that would produce the protein that is so important here.

I believe this to be a self-help program that helps the developing nations, and for which we provide modest resources.

Mr. Chairman, I very much hope that in our interest the House will support the amendment offered by the gentleman from California.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FRASER. Mr. Chairman, I rise in support of the amendment, and I move to strike the requisite number of words.

Mr. Chairman, at a time when the United States is being questioned around the world we find the committee is recommending that we turn our back on one of the most important multilateral programs that we have in the economic development field.

Mr. Chairman, up until a year ago the United States was making good on its pledge to put in 40 percent of the funds that were being spent through UNDP. Last year, because of the drive for economy, our share fell to something like 33 percent—the first time the United States has turned its back on meeting the commitment of 40 percent which it has had for so long.

Now, if this committee recommendation is sustained by the House our share will drop to 30 percent, or very close to that figure.

I think this is terribly important; that the United States show that it is prepared to sustain its commitments to these international programs. I cannot believe that it will reflect credit on this House to say that in a time when the United States is attempting to disengage from an unpopular war, to say that at a time there is danger of America turning isolationist, to say at a time when those who are criticizing the Vietnam war are the neoisolationists, that we shall draw back and reduce our support for those peaceful, constructive international programs to which we have been committed for so many years.

If we put the money in that this amendment calls for, it is a very small amount when you compare it to the totality of our defense and international programs where we are spending between $70 and $80 billion a year. This amendment calls for $20 or $30 million to redeem our commitment to the United Nations. I really think this is one place where the administration—and an administration I would be proud to support as it moves to give support to the United Nations—this is one place where we can help the administration show that America is not turning its back on the world; that we are prepared to do our part, and that we are not in the name of economy going to cut back and reduce the support that we have pledged for so long in these international programs.

I really think, Mr. Chairman, this is a very small amount of money to maintain the good name of the United States in its willingness to stay involved and committed around the world today.

Mr. Chairman, I yield back the balance of my time.

Mr. SHRIVER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, the previous speakers have discussed the fact that the committee has cut back our support on multilateral international organizations. I fail to see that there has been any cutback—not from that which was appropriated in the prior year.

Mr. ROONEY of New York. Mr. Chairman, will the distinguished gentleman from Kansas yield?

Mr. SHRIVER. I yield to the gentleman from New York.

Mr. ROONEY of New York. Mr. Chairman, I would like to inquire of the distinguished gentleman from Kansas (Mr. SHRIVER) with regard to the $88,800,000 at page 2 of the pending bill, how this amount compares with the amount appropriated for the same purpose in fiscal year 1969, the previous fiscal year?

Mr. SHRIVER. It is the same amount. It is the same amount that was appropriated.

Mr. Chairman, I would like to call your attention to the fact that $17,600,000 was transferred and has been provided for the Indus Basin and a multilateral project of $19,600,000 for UNRA and the U.N. peacekeeping force in Cyprus.

There has been no cutback. This has been a continuation of the efforts of this body to support at the same level as they did in the prior year.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. SHRIVER. I yield to the gentleman.

Mr. COHELAN. Mr. Chairman, in my basic arguments in support of my amendment, I made the point on the authority of the distinguished gentleman from the United Nations himself who has indicated that these funds are badly needed and for the reasons I described.

Of course, so far as the price level alone is concerned, it would be very clear that the full amount is needed.

Mr. SHRIVER. I understand that the amendment before the committee is for a 41-percent increase over the existing present year's appropriation. We have not increased other items in this bill or in other bills by this large of a percentage. In fact, there are many cutbacks as far as that is concerned.

Mr. PASSMAN. Mr. Chairman, will the gentleman from Kansas yield?

Mr. SHRIVER. I yield to the gentleman.

Mr. PASSMAN. Is it not true that on page 12 of the committee report that the Pearson Commission which was selected to study the foreign assistance programs around the world made this report to the committee.

**The Committee is of the opinion that this proposed increase of approximately 41 percent in our contribution to the U.N.D.P. is excessive.**

The significant statement of the Pearson Commission report is:

Their operating capacity now, however, seems strained to the limit.

Do we need any further justification?

Mr. SHRIVER. That comment was in the Pearson report that their operating capacity now, however, seems strained to the limit. So the committee has offered the same amount.

Mr. PASSMAN. The AID justification itself shows that that was the amount that was appropriated last year for this purpose.

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. SHRIVER. I yield to the gentleman.

Mr. BINGHAM. I am sure that the distinguished chairman of the subcommittee did not mean to mislead the committee to the effect that the statement he quoted from the bottom of page 12 was from the Pearson Commission report.

That is the statement of the Subcommittee of the Committee on Appropriations.

Mr. PASSMAN. That is a committee statement. The Pearson Commission report statement is on page 13 of the committee report.

Mr. BINGHAM. I have the report in front of me, but the chairman did quote the statement that—

The committee is of the opinion that this proposed increase of 41 percent * * * is excessive—

As if that were the Pearson Commission's report.

That is not the report of the Pearson Commission.

Mr. PASSMAN. Is it not true that the Pearson Commission report stated that the U.N. agencies' operating capacity seem strained to the limit? Is that not part of the current situation?

Mr. BINGHAM. That is correct.

Mr. PASSMAN. Now if they are strained to the limit of $88,800,000, then they cannot possibly use additional money.

Mr. SHRIVER. I repeat there is no cutback.

Mr. BINGHAM. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I shall not take the 5 minutes—but just to continue this colloquy for a minute, I think those of us who have read the Pearson Commission report—and I have read a good part of it—recognize it as a very splendid report, the entire thrust of which is that the developed countries are doing far too little today about the gap between the rich nations and the poor nations of this world.

The Pearson Commission report makes a most eloquent case for increasing technical assistance and economic assistance to the developing countries of the world.

If we are going to cut back on the bilateral programs, as apparently we are doing, then it becomes more important than ever that we transfer as much of the responsibility as we can to the multilateral operations where other nations are helping to carry the load.

As to the Pearson Commission's statement about capacity being strained, as one of the gentlemen pointed out earlier, this merely means that the international organization needs additional resources to improve its capacity. They are beginning to use additional organizations. They are not going to limit themselves, as they have in the past, to the Food and Agriculture Organization, the World Health Organization, and the others, as the only operating agencies to do the work. They are doing some of this under contract, and that means they will increase their capacity.

So I think it is quite clear that we should not take this one sentence out of the Pearson Commission report and use it as an excuse to cut back on the tentative commitment we made in the negotiations that have taken place at the U.N. We have solicited increased contributions from many other nations and 45 of them, according to the recent report from the UNBP, have agreed to increase their contributions.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. BINGHAM. I yield to the gentleman from Illinois.

Mr. FINDLEY. In an attempt to clarify the situation, am I correct that the amendment offered by the gentleman from California would restore this fund to the level requested by the administration?

Mr. BINGHAM. That is correct.

Mr. REID of New York. Mr. Chairman, will the gentleman yield?

Mr. BINGHAM. I yield to the gentleman from New York.

Mr. REID of New York. There has been some reference to the phrase "strained to the limit." I would say to the gentleman that I have just talked with Mr. Paul Hoffman on this point. He said, "Of course, we are somewhat strained", but I think the remarkable thing is the multiplying effect the UNDP has had and the accomplishments they have succeeded in generating." However, Mr. Hoffman has set up a committee to identify any points of strain and to seek promptly to remedy them. But my point, which I think is also the gentleman's point, is that we should be grateful for the vast amount of progress that has been made; for the resources identified, for increased productivity, for increased investment and trade. If there was not some strain, they would not be doing their job.

Mr. BINGHAM. I thank the gentleman for his contribution.

It seems to me we might as well say that because the Post Office is strained today to handle the volume of mail, we should deny it funds to increase its capability.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. BINGHAM. I yield to the chairman of the committee.

Mr. PASSMAN. Is it not true that there is $171 billion on hand in the pipeline unexpended?

Mr. BINGHAM. I will take the gentleman's word on that.

Mr. PASSMAN. That is enough money for 2 full years without any additional appropriation; is that no so?

Mr. BINGHAM. The gentleman well knows—and this is something that he has been interested in for many years—there are always funds in the pipeline for this type of operation. I have sat in the Economic and Social Council as the U.S. representative at the United Nations. I know these are very difficult and complex programs to work out. It involves working with other nations, and using technicians from all parts of the world who speak many different languages. The UNDP does not rush into things. They wait until they have requests. So it does take time to negotiate. Unless they have the funds assured, they cannot negotiate for the projects, and it always takes time to work them out.

Mr. FRASER. Mr. Chairman, will the gentleman yield?

Mr. BINGHAM. I yield to the gentleman from Minnesota.

Mr. FRASER. I thank the gentleman from New York.

One thing I want to make clear. I do not know whether the chairman acknowledges this or not. Last year we gave the UNDP $71 million. Under the bill before the House, that would drop to $66 million. I checked this with the Assistant Secretary of State for International Organizations as recently as 2 hours ago, and you can get the same figures by doing your own calculations from the committee report. The point I want to make is that we are moving backward at a time when all other countries are moving forward. This is not the time for the United States to go back.

Mr. PASSMAN. That assumption is not correct. They could get the entire $88.8 million, if the Executive so desires.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. BINGHAM. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I do not believe the chairman would want to create the impression that there is a pipeline of funds available for contributions to the United Nations. I am sure he must know these funds are not available, in the sense that a way could be found to make an increase in the U.S. contribution to U.N. agencies over the amount that would be available in this bill. That surely is not the situation.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield for a correction?

Mr. FRELINGHUYSEN. Mr. Chairman, I do not have the floor.

Mr. PASSMAN. Mr. Chairman, will the gentleman from New York yield for a correction?

Mr. BINGHAM. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Mr. Chairman, I said there was $171 billion in the pipeline, unexpended, that will be disbursed in subsequent years. I rest on that statement, because it is in AID's own justifications.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. COHELAN).

The question was taken; and on a division (demanded by Mr. COHELAN) there were—ayes 53, noes 75.

Mr. COHELAN. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. COEHLAN and Mr. PASSMAN.

The Committee again divided, and the

tellers reported that there were—ayes 59, noes 75.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

American schools and hospitals abroad: For expenses authorized by section 304(b), $24,050,000, to be used solely for the following institutions or programs:

| | |
|---|---|
| American University of Beirut, Lebanon | $9,490,000 |
| American Farm School, Thessaloniki, Greece | 100,000 |
| Robert College, Istanbul, Turkey | 2,300,000 |
| American University in Cairo, Egypt | 200,000 |
| Escuela Aricola, Panamericana, Honduras | 200,000 |
| Admiral Bristol Hospital, Istanbul, Turkey | 75,000 |
| Project Hope | 500,000 |
| Weizmann Institute, Israel | 3,000,000 |
| Merkaz Lechinuch Ichud, Israel | 1,900,000 |
| Amana Ulpenat B.A., Israel | 600,000 |
| Hadassah (expansion of medical facilities in Israel) | 5,000,000 |
| Hospital and Home for the Aged, Zichron-Yaakov, Israel | 650,000 |
| Program Support | 35,000 |

Mr. GROSS. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, I have been looking at H.R. 14580, and nowhere can I find in the foreign aid authorization bill an item in this legislation which deals with the expenditure of $650,000 for the construction of a nursing home in Israel.

Can some member of the committee tell me how this got in the appropriation bill, not having been authorized? Are there any other items in this list to be found on page 3 that have not been authorized?

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Louisiana.

Mr. PASSMAN. This is the only item in the bill that is not authorized, with the exception of the foreign military credit sales program. We can certainly justify this project, so we included it in our bill in the subcommittee, and it was approved by the full committee.

This is the only item in the bill of this nature.

Mr. GROSS. Is the gentleman saying I came in late or something? I do not understand how this item got into the bill, and who is responsible for it.

Mr. PASSMAN. If the gentleman can get it considered under the foreign aid program and come in and request it, we will give it consideration.

Mr. ROONEY of New York. Mr. Chairman, will the distinguished gentleman from Iowa yield?

Mr. GROSS. I yield to the gentleman from New York.

Mr. ROONEY of New York. I expect it is I to whom the distinguished chairman of the subcommittee is referring. This is my project. It is for a hospital and home for the aged in Israel and was inserted in this bill at my request. We expected it would be inserted in the authorization bill. Unfortunately, although it is a most deserving item, it was not.

Mr. GROSS. What am I to think in this situation? Am I to think that every one of the 435 Members of the House can walk in to the Appropriations Committee or any other committee and get their personal projects put into a bill?

Mr. ROONEY of New York. I do not think so, at all.

Mr. GROSS. What has the legislative process degenerated into, anyway?

Mr. ROONEY of New York. I do not think so, at all.

Mr. GROSS. This seems to be a first-come-first-served procedure, or something of that kind.

Mr. ROONEY of New York. The difficulty here was the lateness. It should have been included in the authorization bill. Fortunately, we were able to catch up with it in this appropriation bill. This is a very worthy project which is in the best interest of the American people.

Mr. GROSS. I am afraid I do not have a good explanation yet for this item of $650,000.

I will say to my friend from Missouri, Dr. HALL, that one of his favorites and mine is about to be brought to the attention of the House. I understand a message is coming down from the White House asking for some $40 million for the good old arts and humanities.

If we are going to build nursing homes and homes for the aged all over the world, from Timbuktu to Afghanistan and back again, I wish the gentleman from Missouri would tell me where it is proposed to get the money.

Mr. HALL. Mr. Chairman, will the gentleman yield?

Mr. GROSS. And take care of special projects for each one of the 435 Members of the House.

I yield to the gentleman from Missouri.

Mr. HALL. Perhaps the arts and humanities request does not have an Israelite flavor.

Mr. GROSS. Well, that could be as good an explanation.

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Missouri.

Mr. ICHORD. I do not intend to spend my time on this particular question. I have a question which I would like to ask the chairman on another matter.

Mr. GROSS. I still do not have a good answer on this and I doubt if I ever get an answer. But just remember that any Member that has a project that he wants to construct somewhere in the world, should go to the Appropriations Committee and expect to get it.

Mr. ICHORD. Mr. Chairman, if the gentleman will yield, and if I may have the attention of the chairman of the committee, I would like to learn the rationale which the committee used to arrive at the figure of $265 million in the development loan program worldwide. That is, did you come in with a figure of $265 million, because this was the figure the committee came in with last year, did you study the projects, project by project, or does this figure represent a percentage cut?

Mr. PASSMAN. Mr. Chairman, if the gentleman from Iowa will yield, we try to be as reasonable as we possibly can in marking up this bill. We look at the justifications and we look at the commitments and obligations. Then on a subsequent day we spend many hours going over the testimony and we try to recommend a reasonable figure.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. ICHORD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, pursuing this subject further, would the gentleman from Louisiana care to respond further?

Mr. PASSMAN. If the gentleman will yield? Then based upon the projects presented to our committee we reach what we think is a proper level to fund these programs. In many instances we cut them because there is no justification for the level requested.

For instance, on this particular item I want to point out to the gentleman on two programs, the Alliance loans and the development loans, there is a total of $465 million in the bill. We feel that is adequate. However, before this legislation finally becomes law it could be lower than that or it could be higher than that or it could be this figure. But based upon their commitments thus far we believe this is ample funding.

Mr. ICHORD. Is the gentleman saying that you look at the program project by project and the justification just happened to be $265 million, the same figure which you came in with last year?

Mr. PASSMAN. If the gentleman will yield, I can assure the gentleman it is not that scientific. Possibly, we could have come in with $245 million or $275 million. Nothing in this bill is so pinpointed in the justifications. We do not know the exact amount of money they need. This entire program is an "illustrative" program. They say, "We think we will need money for projects in these countries" and based upon our experience in handling this bill and looking at the amount of money they obligated last year and where they obligated that money, we felt that $265 million was the amount we should bring to the Floor at this time. The appropriation a year ago was $300 million and not $265 million.

Mr. ICHORD. Well, of course, the gentleman well knows if we again send over $265 million to the other body, we will probably end up with a figure again of $300 million which will constitute no cut at all.

I might say to the gentleman from Louisiana that I am quite put out with having a figure in this bill representing only a 61-percent cut from the amount requested by the administration when we had to experience a 75-percent cut on domestic Federal construction projects.

I am wondering if the committee has cut enough when it has only cut 61 percent from the figure requested by the administration.

Mr. PASSMAN. Mr. Chairman, if the gentleman will yield further, the budget request was much higher than that. Also, the authorization bill that passed this House called for $425 million. So, we have actually cut it very substantially when you consider the authorization bill that approved $425.5 million and we are only coming in with $265 million which represents a very substantial reduction.

Mr. ICHORD. I thank the gentleman and I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Development loans: For expenses authorized by section 203(e), $265,000,000, together with such amounts as are authorized to be made available under section 203(f), all such amounts to remain available until expended.

AMENDMENT OFFERED BY MR. FRASER

Mr. FRASER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FRASER: On page 4, after line 7, and before line 8, insert the following new paragraph:

"Overseas Private Investment Corporation: For purposes of section 325(f) to remain until expended the sum of $75,000,000."

Mr. FRASER. Mr. Chairman, this is an amendment to put back in the amount requested by the administration to get the new Corporation launched that is going to help promote private investment overseas, the so-called OPIC. This is the amount of money which enables the OPIC to expand its loan guarantees and insurance programs so that investors who invest in other countries can have some protection against the contingency of expropriation, or loss from civil strife or inconvertibility, and so on.

This amount, which is the amount requested by the administration, would enable OPIC to get underway and to move as the Committee on Foreign Affairs hoped it would move in promoting the development of private investment in the developing world.

Mr. Chairman, I think it is important to know that almost every study of development that has taken place in recent years has laid great stress on the role which private investment has to play. I think this provision would help get OPIC off the ground, and I would certainly hope that we could support this amendment. While I have, myself, some uncertainty as to how it will fare, I think, it is important that if we have this program that we should launch it with the kind of support which will give it the best possible chance to prove itself.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. FRASER. I yield to the gentleman from Illinois.

Mr. FINDLEY. Mr. Chairman, I thank the gentleman for yielding. Am I correct that the amendment offered by the gentleman from Minnesota would place the appropriation at the level requested by the administration?

Mr. FRASER. That is right.

Mr. FINDLEY. Further, am I not correct that the OPIC provision is one of the main, if not the main, new elements injected or placed in the foreign aid program this year, at the urgent request of the Nixon administration?

Mr. FRASER. That is correct.

Mr. FINDLEY. I thank the gentleman.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. FRASER. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I should like to commend the gentleman from Minnesota for his amendment. I do so because the one new program and the one new concept, which was discussed at great length in the committee, is the OPIC corporation. If we fund it adequately, we will find it will be of great help in getting the private sector to invest in developing countries.

Mr. FRASER. Mr. Chairman, I thank the gentleman from New Jersey, and I do hope the Committee will give favorable consideration to the amendment. This matter was discussed at great length in the Committee on Foreign Affairs. It is one of the major new provisions in the foreign aid bill, and it does seek to help private investors to invest in these developing countries.

If we can induce private investment in these countries, we will at least save the taxpayers more money. So I think it is one amendment that deserves the support of the entire Committee.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PASSMAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the investment guaranty program, as I said earlier today, has been in this bill for 20 years. During the 15 years that it has been my privilege to be chairman of the committee, the bureaucrats downtown have been trying to pyramid this account.

A few years ago they came in and wanted $180,000,000 added to this account. Upon examination, we could not find where they had adequately justified that amount. We gave them $30,000,000. We cut it by $150,000,000.

Now by any fair analysis, it simply means, if you did not provide one additional dime—and if the experience of the losses in subsequent years are in accordance with the losses during the past 20 years, then they have sufficient funds to carry on the program for 258 years and 4 months.

What justification would there be for putting an additional $75 million in this fund when you have $129 million in the fund at this time?

Mr. Chairman, these people say that they do not actually need the money and they are not going to spend the money, but believe if they can build this account up, it will look attractive to Americans who may want to invest their money abroad.

Mr. GERALD R. FORD. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I certainly must always yield to the distinguished minority leader.

Mr. GERALD R. FORD. As the gentleman will recall, I discussed with him this fund problem as well as a limitation under section 122, on page 15.

Mr. PASSMAN. Yes.

Mr. GERALD R. FORD. Now as I understand the gentleman from Louisiana, he says that there is $129,000,000 available in a revolving fund for OPIC.

Mr. PASSMAN. That is for the Overseas Private Investment Corporation—OPIC fund, if you want to put it that way.

Mr. GERALD R. FORD. As I understand the limitation on page 15, section 122, it precludes OPIC from utilizing any of the $129,000,000 in the revolving fund for any of its set forth purposes. Is that correct?

Mr. PASSMAN. That is not correct. But if the gentleman will permit me to say—this organization has not yet come into being because they just desire to set up an agency within this insurance program and they have been trying to do this for many years. The committee found out that there were 39 agencies that these business people can borrow money from.

I might say that $130,000,000—and I am using round figures—is not available for loans. If you approve this amendment for the $75,000,000 addition—that will not be available for loans.

That is only so that American businessmen can look up and say—Well, there is a lot of money in this fund.

Now the revolving fund has to do with another section of the bill and that is they want to be able to accumulate up to $100,000,000, that was the request, $20,000,000 per year out of repayments to the development loan fund until they build up to $100,000,000 in the revolving fund.

I believe under the amended House resolution, it would be 2 years.

But there is no justification for it, I will say to the distinguished gentleman. They made no case whatsoever for a dime of this money other than that they want to give a job to some bureaucrat and set up another lending agency. The committee left the language in the bill in the event a case could be made subsequently, giving the names of the types of business, how much they would be financed for, and on what terms. Then we would have the basic legislation to back up the request if and when it could be justified, whether that would be this week or next week.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

(On request of Mr. GERALD R. FORD and by unanimous consent, Mr. PASSMAN was allowed to proceed for 3 additional minutes.)

Mr. GERALD R. FORD. May I ask this question: Is the $75 million included in this amendment roughly in the same category or could it be used for the same purpose as the $130 million in the revolving fund?

Mr. PASSMAN. Identical. Identical.

Mr. GERALD R. FORD. Let me ask if this is true——

Mr. PASSMAN. That is true, I repeat.

Mr. GERALD R. FORD. I accept that. I see no need under the current circumstances for the additional $75 million if the $130 million in the fund is available for OPIC's use.

Mr. PASSMAN. It is available.

Mr. GERALD R. FORD. It is not available, as I understand it, because of section 122 in the bill on page 15. Is that correct?

Mr. PASSMAN. May I straighten this out. The $130 million is additional insurance funds. The $75 million would likewise become available to the insurance fund. That is to guarantee overseas investment. We gave the basic language that would permit setting up the fund, hoping that at some subsequent time, if it could be justified, we could make funds available through whatever means Congress in its wisdom should dictate. It may come this week.

Mr. GERALD R. FORD. If the gentle-

man will yield further, you have given them the right to operate, on the one hand, but then, on page 15, under section 122, you would in effect say that they cannot do it. I am against the $75 million amendment if you will give them the authority to use the $130 million in the fund. That is my point.

Mr. PASSMAN. This is an extremely complicated account. They come in with one approach and on a subsequent day they come in with a different type of approach. It is almost impossible for the members of the committee to know just what they have in mind. We went through the record to discover what they have on hand. We discovered the $75 million was to guarantee overseas investments, not to make loans. As I understand it, what they really want is the authority to transfer from the Development Loan Fund $100 million with which to finance loans abroad. It has no connection with this guaranty fund.

Mr. GERALD R. FORD. What I am concerned about, if the gentleman will yield again—and I want to make this point clear—if there is an amendment to or if there is a deletion of section 122, then I am against the $75 million, because I do not believe it is needed, as long as there is $130 million in the guaranty fund.

Mr. PASSMAN. That is correct. That is why the committee cut it out.

Mr. GERALD R. FORD. All right. What worries me is that you give them the authority to use the OPIC program, but then you turn around on page 15, section 122, and say they cannot use the revolving fund.

Mr. PASSMAN. As I understand it, in their presentation they did not ask for the right to use the fund for loans. The fund was to insure loans made abroad by businesses.

Mr. GERALD R. FORD. If they have $130 million in that kind of insurance backup, I do not think they need the $75 million.

Mr. PASSMAN. That is exactly why the committee did not allow it.

Mr. GERALD R. FORD. Then, Mr. Chairman, why do you put the limitation on it so they cannot use the $130 million? That is what bothers me.

Mr. PASSMAN. The limitation has nothing to do with this particular guaranty fund. It has only to do with the proposed revolving fund. This money is available for use. The $129 million is available to pay claims if they should come. The $75 million, if it is appropriated, would likewise become available to pay claims.

As I understand it, the way the legislation is written, the loans would be made out of the $100 million we would set up in a revolving fund out of repayments to the Development Loan Fund.

Mr. GERALD R. FORD. It seems to me by the language of section 122, we preclude them even from using any money that is in the bill—if there is any—and we also limit the authority to utilize the revolving fund, and I think that is the wrong approach.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

(By unanimous consent, Mr. PASSMAN was allowed to proceed for 1 additional minute.)

Mr. PASSMAN. Mr. Chairman, we are dealing with two separate and distinct funds. The $75 million has no connection whatsoever with section 122 as it applies to loans.

Mr. GERALD R. FORD. It seems to me then I had the wrong impression from my own understanding and what the gentleman said earlier when he said the two were one and the same, or they had one and the same purpose. That was the impression I got from the questions I asked.

Mr. PASSMAN. The $75 million and the $130 million, they are the same, identical, and for the same purpose—not for loans, I can assure the gentleman. It is for guarantees only, not for loans.

Mr. GERALD R. FORD. I must confess that still leaves me confused.

Mr. PASSMAN. Mr. Chairman, I ask that the amendment be voted down, because the $75 million will only load up this insurance account.

Mr. MORSE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me speak briefly especially to my colleagues on the minority side of the aisle about this particular aspect of the bill.

The one principal innovation that the administration came forward with this year was the Overseas Private Investment Corporation. The purpose of this particular proposal is to stimulate and to inspire greater private foreign investment, to accommodate the declining public appropriations that have been made for foreign aid.

The Republican Party—indeed all Americans—talk about the role of private enterprise. We are proud of the fact that we are a private enterprise economy. The provisions of this bill which the committee has recommended would prevent this administration from prompting greater participation by the private sector, so as to reduce the strain on the public accounts for foreign aid.

There has been for many years in AID an Office of Private Resources. It has had two kinds of activities, one an insurance program which guarantees against specific risks such as expropriation, unconvertibility, and war or insurrection, and an extended guarantee program which even guarantees against commercial risks.

The reserves of which the chairman of the subcommittee spoke are modest and relate only to the minimal program that has been able to function under the Office of Private Resources. This administration wants to expand this kind of activity, and to do so we need the additional funds for the reserves for the two programs—one, insurance, and the other, guarantees.

The other authority the administration has requested is merely the authority to take from repayments to development loans the amounts of $20 million a year for 5 years—from repayments to development loans—in order to provide a revolving fund which would permit the new corporation to do its work.

This is the one most important creative departure that the Nixon administration has advanced in the field of foreign assistance, and I think it is incumbent upon all of us to support the amendment offered by the gentleman from Minnesota.

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield for a question?

Mr. MORSE. I yield to the gentleman from Illinois.

Mr. ANDERSON of Illinois. Mr. Chairman, with reference to the colloquy that took place earlier between the gentleman from Louisiana (Mr. PASSMAN) and the minority leader, the gentleman from Michigan (Mr. FORD) does section 122 on page 15 then provide what the administration asks for, that $20 million a year be made available for these purposes?

Mr. MORSE. It does for all practical purposes.

Mr. ANDERSON of Illinois. It does?

Mr. MORSE. It does.

Mr. FARBSTEIN. Mr. Chairman, I move to strike the requisite number of words.

I am afraid that this amendment, which is really exceedingly simple and can be explained simply, has been confused all out of proportion.

Whatever moneys were originally authorized for the Overseas Private Investment Corporation for lending purposes have been stricken from the bill. There is no money to lend at all.

All this amendment seeks to do is to permit additional guarantees to be purchased by investors in undeveloped countries. In other words, today all guarantees have been used up. There has to be at least a 25-percent reserve. If this $75 million were added to the bill it would just extend the guarantees, so that this corporation could sell additional guarantees to the extent of $300 million. That is all it does.

It has nothing at all to do with any loans. It has nothing to do with any other funds, because no other funds can be used.

The only thing this does, I repeat, is to permit additional guarantees to be used. Incidentally, as a result of guarantees heretofore sold the Government has made very substantial sums of money. I cannot understand why anyone would object to adding the additional $75 million in order to extend additional guarantees, from which we are making money.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. FARBSTEIN. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Is it not true in this fund they have $130 million now unobligated?

Mr. FARBSTEIN. I do not know what they have unobligated, but it is restricted as a result of the bill presently before us.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield further?

Mr. FARBSTEIN. I yield.

Mr. PASSMAN. Is it not true this is merely putting $75 million more into an account where they already have $130 million and the loss has been only $11 million in 20 years? This is not a loan

fund. This is merely to guarantee investments made abroad, is that right?

Mr. FARBSTEIN. All that this does, I repeat again, is to provide for guarantees. The reserves have been used up. They cannot guarantee any more, because they have to have at least 25 percent of the money to guarantee in the "kitty." The "kitty" has no money. This would put an additional $75 million in.

Mr. PASSMAN. They have only used up $11 million and they have $130 million on hand unobligated. Let us not leave the RECORD showing they have used the money. They have $130 million, enough to last for 238 years.

Mr. GROSS. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, the committee is absolutely right. What is being attempted here is to fund a brandnew empire, another layer of bureaucratic fat in the Government. That is what this Overseas Investment Corporation is going to provide.

Mark well what I tell you here today. This will be the end result if you put any money back in. This Corporation will probably have to have a country club and golf course, as the International Monetary Fund has nearby in Maryland, at a cost of several million dollars.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I am glad to yield to the gentleman from Louisiana.

Mr. PASSMAN. The gentleman is a distinguished member of the Foreign Affairs Committee. Is it not correct that in this reserve fund they now have $130 million surplus?

Mr. GROSS. That is right.

Mr. PASSMAN. And the losses have been only $11 million in 20 years?

Mr. GROSS. That is right.

Mr. PASSMAN. If we put in $75 million they are only going to sweeten this account with funds they do not need and will not spend.

Mr. GROSS. It will become a bureaucratic empire.

Mr. PASSMAN. Did they not say they would not spend the money; that they only want it to look more attractive?

Mr. GROSS. That is right.

Mr. HANNA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, may I have the attention of the gentleman from Massachusetts (Mr. MORSE)? Mr. MORSE, may I have your attention please? In order to clarify my very low level of understanding on this thing, permit me to propound a couple of questions to the gentleman.

The gentleman from Louisiana (Mr. PASSMAN) said that there is $130 million of unobligated moneys available already for this organization. As I understand it—and please correct me if I am wrong—the way this program operates is that it guarantees loans, but the loan requires that it have 25 percent of the money in the kitty for the loan support guarantee; is that correct?

Mr. MORSE. That is absolutely right.

Mr. HANNA. Now, let me ask the gentleman the second question.

The gentleman from Louisiana has indicated that they have only spent $11 million since its inception. Is that how much of the total amount of loans that the insurance company has had to pick up?

Mr. MORSE. Precisely.

Mr. HANNA. If we leave it like it is, it would seem to me that Mr. PASSMAN has told the truth but not the whole truth and nothing but the truth, because it is true that this money which they have not spent is necessary under the law to support what has already been guaranteed and they cannot guarantee any more. The fact that they have only lost $11 million indicates that they have operated in an efficient manner in extending credit, but they cannot make another loan unless we make some more money available; is that correct?

Mr. MORSE. The gentleman is absolutely correct in every particular. Let me underline what he said. What we are talking about is $75 million which is the subject of the amendment offered by the gentleman from Minnesota to increase the reserve fund.

Mr. HANNA. Then, you will be able to make four times as much money available to qualified borrowers in private loan commitments guaranteed with the reserve of 25 percent?

Mr. MORSE. A guarantee of 25 percent investment on the part of the U.S. economy in the development process which is now going on abroad.

Mr. HANNA. The money discussed in the $130 million is guarantee money, not loan money. The 75 million suggested is guarantee money not loan money. In other words to make a loan of 100 percent they have to have a reserve of 25 percent in order to encourage someone to make the loan in the first place?

Mr. MORSE. The gentleman is absolutely correct in his statement. These moneys are not available for expenditure by the OPIC or the Office of Private Investments. They are reserve funds. The fact that they did not have but only $11 million in bad loans testifies to the efficiency of this operation.

Mr. HANNA. And this was precisely anticipated when the law was created in the first instance; is that right?

Mr. MORSE. That is right. I thank the gentleman for his contribution.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. HANNA. I yield to the gentleman from Illinois.

Mr. FINDLEY. I want to compliment the gentleman for his statement today and to also ask him if I am correct in my understanding, as the bill now reads, OPIC simply cannot operate?

Mr. HANNA. That I think is the answer, that they would not be able to make another guarantee of another loan under the existing legislation.

Mr. FINDLEY. So, if Members are determined to get OPIC out of the Foreign Assistance Act, the item that President Nixon wanted in it, the thing to do is to vote against this amendment?

Mr. HANNA. I am not arguing for or against it, but I would like to see some clarity with reference to it.

Mr. FINDLEY. In other words, those who want OPIC ought to vote for the amendment?

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent (at the request of Mr. PASSMAN) Mr. HANNA was allowed to proceed for 2 additional minutes.)

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. HANNA. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Mr. Chairman, there is no legislation requiring a 25-percent reserve on these overseas investments at this time. It is presently in the authorization bill, but it has not yet become law. This program has been going on for 20 years. These are the facts and I want to state them concisely.

The so-called OPIC $75 million appropriation has no relationship to any revolving fund for making loans abroad. The $75 million is to be added to the $130 million presently on hand and unobligated. If we should at some subsequent date enact into law what the Foreign Affairs Committee has already proposed, creating a 25-percent reserve fund then, of course, in a few years we might use up the $130 million and we would have to provide additional funds. But at this time you have no such law, you have no such assurance that you will have any law requiring a 25-percent reserve. As of this time, they have only used $11 million to pay claims while they have $130 million on hand.

If the gentleman will yield further, has the gentleman ever associated himself with anything more confusing than this amendment?

Mr. HANNA. I have not associated myself with anything but the confusion. I would like to finish with this comment, Mr. Chairman: that as I see it, whether you have a law or you do not have a law, I should imagine that any person who goes to a bank for a loan to cover activities in an underdeveloped country would not be successful absent a program behind it with at least a 25-percent reserve.

So I think you can be assured that the bill as now written would take out of the very business community to which you wish to tie the program, the incentives which the guarantees have provided.

I suggest, if I may conclude, that it would be misleading to say that the $75 million is to be loaned any more than the $130 million is to be loaned; it is to guarantee loans to business establishments.

Mr. MORSE. If the gentleman will yield further, that is correct.

However, I would just like to take issue with the language of the distinguished chairman of the subcommittee in talking about the expenditure of these funds. These funds are not loaned, and are not intended, and cannot be loaned; they are for the purpose of guaranteeing. The mere fact that the programs have not worked on occasion does not indicate that the program is not successful.

The way the gentleman from Louisiana speaks, it seems to me that he would be happier if the businesses were going broke.

Mr. HANNA. Speaking for myself, I think if this program will encourage private money to get into the expansion of economies of underdeveloped countries. We ought to continue it that way, and hope the money will not get spent.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CONTE. Mr. Chairman, I rise in support of the amendment, and I move to strike the requisite number of words.

Mr. Chairman, the committee knocked out the $75 million requested for the Overseas Private Investment Corp.—even though—and I am directing the attention of the Members to the hearings—even though there was overwhelming evidence to the effect that private investment has a real role to play in the aid program.

But that is all over with now, even before it got started. The committee saw to it that OPIC would not get the money needed to carry on these programs.

Let me tell you there is $80 million reserve for the $7 billion of insurance programs here, and a 25-percent reserve requirement for the guarantee program. There are two programs here, the insurance program and the guarantee program. Some $85 million is currently available to satisfy these reserves. However, by the end of fiscal year 1971 a total of $165 million will be needed. Without approval of the OPIC request, this requirement cannot be met.

In effect, what the committee has done is kill the whole program that the President wanted.

Now the committee has also made sure that the money from the other loan repayments, from the development loan repayments, would not be available for use by OPIC for direct loans.

The overall impact of these two measures should be clear—no OPIC. Or to put it another way, the committee did not even give the corporation a chance—a chance to save the taxpayers some money, and to bring a highly promising innovation to the aid program.

Therefore I favor giving OPIC $75 million. I offered an amendment in the committee to give them money in order to meet reserve requirements in both the insurance and the guarantee programs. I might note that in the case of guarantees, there is a 25-percent reserve requirement, because lenders must have assurance of prompt payment upon default. Lenders do not doubt the full faith and credit of the U.S. Government, but they do doubt our ability to act fast.

I also propose to give substance to section 322 of the Foreign Assistance Act by permitting the transfer of aid loan repayments to OPIC. And when we come to that part of the bill, section 122, I will move that that section be stricken.

Mr. GERALD R. FORD. Mr. Chairman, will the gentleman yield?

Mr. CONTE. Yes, I am glad to yield to my leader.

Mr. GERALD R. FORD. As the gentleman knows, I have had a colloquy with the distinguished chairman of the subcommittee, and by inference then I said I would oppose the $75 million. But I was very concerned about the limitation contained in section 122 on page 15 of the bill.

I am delighted that the gentleman from Massachusetts has just said that he is going to offer a motion to strike section 122 and I will support that—even though I oppose the amendment to add $75 million. I think it is a responsible position to take, to give them the availability in the revolving fund. I think that is sensible and right.

If you do that, then I think you can vote against the $75 million being added to the bill.

Mr. CONTE. I thank the distinguished gentleman from Michigan. I might point out that they will not need any new appropriation, and I would like to read from a document from the President of the United States—a message to the Congress on May 28, 1969. The President said:

A FRESH APPROACH

This Administration has intensively examined our programs of foreign aid. We have measured them against the goals of our policy and the goad of our conscience. Our review is continuing but we have come to this central conclusion:

U.S. assistance is essential to express and achieve our national goals in the international community—a world order of peace and justice.

But no single government, no matter how wealthy or well-intentioned, can by itself hope to cope with the challenge of raising the standards of living of two-thirds of the world's people. This reality must not cause us to retreat into helpless, sullen isolation. On the contrary, this reality must cause us to redirect our efforts in four main ways:

*We must enlist the energies of private enterprise,* here and abroad, in the cause of economic development. We must do so by stimulating additional investment through businesslike channels, rather than offering ringing exhortations.

*We must emphasize innovative technical assistance,* to ensure that our dollars for all forms of aid go further, and to plant the seeds that will enable other nations to grow their own capabilities for the future.

*We must induce other advanced nations to join in bearing their fair share*—by contributing jointly to multilateral banks and the United Nations, by consultation and by the force of our example, and by effective coordination of national and multilateral programs in individual countries.

*We must build on recent successes in furthering food production and family planning.*

To accomplish these goals, this Administration's foreign aid proposals will be submitted to the Congress today. In essence, these are the new approaches:

*1. Enlisting Private Enterprise*

*I propose the establishment of the Overseas Private Investment Corporation.*

The purpose of the Corporation is to provide businesslike management of investment incentives now in our laws so as to contribute to the economic and social progress of developing nations.

The majority of the Board of Directors including its President, will be drawn from private life and have business experience.

Venture capital seeks profit, not adventure. To guide this capital to higher-risk areas, the Federal government presently offers a system of insurance and guaranties. Like the Federal Housing Administration in the housing field here at home, the Overseas Private Investment Corporation will be able to place the credit of the United States Government behind the insurance and guaranties which the Corporation would sell to U.S. private investors.

The Corporation will also have a small direct lending program for private developmental projects. It will carry out investment survey and development activities. And it will undertake for A.I.D. some of the technical assistance required to strengthen private enterprise abroad The financial performance of OPIC will be measurable. It is expected to break even or to show a small profit.

The Overseas Private Investment Corporation will give new direction to U.S. private investment abroad. As such, it will provide new focus to our foreign assistance effort.

Simultaneously, I propose a mandate for the Agency for International Development to direct a growing part of its capital, technical and advisory assistance to improving opportunities for local private enterprise in developing countries—on farms as well as in commerce and industry.

We do not insist that developing countries imitate the American system. Each nation must fashion its own institutions to its own needs. But progress has been greatest where governments have encouraged private enterprise, released bureaucratic controls, stimulated competition and allowed maximum opportunity for individual initiative A.I.D.'s mandate will be directed to this end.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. FRASER).

The amendment was rejected.

AMENDMENT OFFERED BY MR. ICHORD

Mr. ICHORD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ICHORD: Page 4, line 5, strike out the figure "$265,000,000" and insert in lieu thereof "$168,875,000."

Mr. ICHORD. Mr. Chairman, members of the committee: My amendment is very simple. It cuts the loan development program—worldwide—to 25 percent of the amount requested by the administration. The 25 percent of the $675,500,000 requested by the administration is $168,875,000, which represents a total cut of 75 percent, the same amount by which Federal construction projects were cut back earlier this year.

A few minutes ago, I inquired of the chairman, the distinguished gentleman from Louisaina as to the rationale used by the committee to arrive at the figure of $265 million. Whether this was the amount which the committee found to be justified after considering the program on a project to project basis; whether the committee intended to keep the development program at the same level as the $265 million is the same figure the committee brought to the floor last year; or whether the figure represents a percentage of the amount authorized by the Foreign Affairs Committee on the amount requested by the administration. It was not clear to me what rationale the committee employed. The rationale of my amendment is clear. I do not believe that the Members of this House want to appropriate the same amount this year as they did last year when our own domestic development projects are being deeply cut. Last year we sent $265 million to the Senate and I think it would be safe to predict that the figure will be returned to the House somewhere near or in excess of the $300 million finally appropriated for the 1969 fiscal year.

The time is past when the United States can continue to play Santa Claus through its foreign aid programs. If our own economy is to survive, this huge and unmanageable program must come to a halt, at least until such time as we get

our own fiscal affairs in order and Federal spending more in tune with total incoming revenue. A government, like an individual or business, reaches a point of "no return" when year after year after year spending exceeds income. If the United States would eliminate the entire system of foreign assistance, including disguised programs such as Public Law 480, Alliance for Progress, Asian Development Bank, Inter-American Development Bank, and the International Development Association—the latter three are destined to receive $480 million under H.R. 15149—and all others in which millions of American dollars are sent outside our country to "help" underdeveloped nations, we could, I am convinced, formulate government spending programs to operate "in the black" for a change.

The present foreign aid program, I firmly believe, is in serious need of new direction if it is to be continued, however. It is foolhardy to continue operating a program designed a quarter of a century ago and which, in many instances, has had entries in the record showing dismal failures and prime examples of exorbitant waste exceeding our wildest dreams. Despite my objections based on failures of the program, if we are to have foreign aid, new guidelines should be developed toward the establishment of an effective program, one which would help underdeveloped nations to help themselves through teaching and training by example, not by sending a check or money order or even sending supplies or goods. We should put into practice the immortal words of Abraham Lincoln:

> You cannot help men permanently by doing for them what they could and should do for themselves.

I submit that we should not let our own urgent needs at home go unattended while we send millions of dollars overseas, many of which could be put to much better and more practical use at home. For instance, let us look at the community development program of the Farmers Home Administration and compare it with the development loan program of the foreign aid program. The FHA community development program is designed to provide assistance to rural communities of less than 5,500 population for public utilities such as water and sanitary facilities. This program is without doubt one of the greatest boons to rural area development since the REA was formed. The 1970 appropriation of $78 million for the FHA community development direct loan program for operating in 50 States is a mere pittance in comparison to the foreign aid development loan program. The committee recommendation of $265 million is completely out of proportion to the amount of help we are offering to our own rural towns and cities. This huge appropriation will be used for loans to foreign countries for area development on 40- to 50-year terms at varying rates of interest from three-fourths of 1 to 3 percent while FHA insured loans for rural area development bear an interest rate of 5 percent.

It is difficult for me to explain to the officers and anxious subscribers of about 12 water or sewer districts in my own district that there is not enough money available to fund these vital community facilities while we are sending $1.6 billion overseas for less important purposes. Matter of fact, the FHA recently sent me a notice of the projects in my district which can be funded during fiscal year 1970 based on established priorities along with a list of those project applications which cannot be funded and were rejected solely for "lack of funds." It was interesting to note that only one-third of the FHA project applications in my district could be funded.

It is further distressing to me to see all this money going overseas when our own medical research programs are being drastically reduced because of budgetary problems. The Director of the National Institutes of Health is reported to have stated that 20 percent, 19 out of 93, of our governmentally supported experimental clinical research centers will have to be closed next year because of the announced policy of the administration to reduce operational costs of Government. He also reported, I understand, that a 4- to 10-percent slash in health research will be placed in effect at the National Institutes of Health, including current research projects and studies and impending new project research.

How foolish can we get to turn our backs on our own vital health services and then turn around and send a couple of billion dollars overseas, much of which will be wasted or will fund much less vital programs for people, many of whom really do not appreciate our gratuities.

And to add fuel to the foreign aid controversy, we are having to cut back 75 percent of our own Federal construction program, and this plan of action also affects a public works project in my district; namely, the flood control development in the Meramec Basin in south central Missouri. I am sure the reservoirs already in early stages of preconstruction planning and land acquisition could move along at a more accelerated pace if it were not for the foreign aid commitments.

I call the attention of the Members to certain figures on page 5 of committee report 91–708 which reveal the so-called "pipeline"—moneys appropriated in previous years which still remain unexpended—the total amounts to $18,708,016,000. Particularly interesting to me was the revelation that India still has to her credit in our foreign-aid pipeline $536,190,000. Yet, in H.R. 15149, the give-away artists propose that we give India another $385 million in the 1970 program. Likewise, Brazil has $404,051,000 in the pipeline and we are to give her another $174 million as proposed in H.R. 15149. These are only two startling examples of the fact that we are giving money away faster than it can be spent.

Mr. FRASER. Mr. Chairman, will the gentleman yield?

Mr. ICHORD. I yield to the gentleman from Minnesota.

Mr. FRASER. Mr. Chairman, I say to the gentleman the bulk of our money is going for vast military hardware expenditures. Does the gentleman believe that all which is spent for military hardware is justified?

Mr. ICHORD. I would say it is a matter of priority. Of course, we all see our priorities differently. But I say to the gentleman he should also be interested in the amount going into our health research plan. I am sure the gentleman is.

Mr. FRASER. The gentleman is quite right. I would only suggest the United States has always been the leader in international development, but it now ranks eighth in international development aid. If this bill becomes law, we will drop to the basement. Does the gentleman think this is the role the United States ought to be playing in the world community?

Mr. ICHORD. I would say to the gentleman the United States is in a very serious financial condition, and if the gentleman wants to, he can vote for the same amount in this Development Loan Fund, and accept only 25 percent in our own construction programs, but I am not willing to do so. I put this on a basis of priority. If I can save money here, then I can have more money for our own construction and development projects. For that reason I hope the committee adopts the amendment.

AMENDMENT OFFERED BY MR. CAREY TO THE AMENDMENT OFFERED BY MR. ICHORD

Mr. CAREY. Mr. Chairman, I offer an amendment to the amendment offered by the gentleman from Missouri (Mr. ICHORD).

The Clerk read as follows:

> Amendment offered by Mr. CAREY to the amendment offered by Mr. ICHORD: Strike "$168,875,000" and *substitute* "$425,500,000".

Mr. CAREY. Mr. Chairman, I have asked for permission to revise and extend my remarks, but not to revise and extend the amount in my amendment, because this gives a chance for a clear dichotomy to be set forth in this Chamber at this time.

The amount is not new. All I am recommending is the amount that President Nixon asked for to continue the program on the basis of his estimates. I think I heard rightly when I heard my President state that around the world we were going to use a different kind of quiet diplomacy that meant something to all the people of the world, and I do not know anything that means more to the people of the world in which we live than the maintenance of human life.

I know no program that goes more toward the maintenance of human life than the development loans we are using to try to shore up the living quality in the developing nations.

On page 23 of the report there is pointed out what the loans are used for: Dams, factories, education, and health facilities.

Take health facilities: I read the other day that we had achieved "the millennium," that we had vaccinated or immunized against malaria the 100 millionth African. It sounds like a great goal and a great achievement. In actuality, all we have insured is that one out of two children born in Africa or in

the troubled areas of Latin America or Asia will now live to age 7 instead of age 5 and die from something besides malaria.

Instead of dying from yellow fever or malaria they will now have the opportunity to die from diphtheria or amoebic dysentery combined or the river disease or scarlet fever or the measles or any of the diseases that we have cured in this country. Years ago, after the Louisiana Purchase, we had the courage to go forth into what a doctor by the name of Jackson called "those aboriginal areas" of the Louisiana Purchase to drive malaria and yellow fever and all those diseases out of Missouri and Tennessee and those aboriginal lands that were suffering from all the diseases we now find in Africa and in Asia.

All I am trying to do on the basis of 1970 dollars is to give the same opportunities under my President to the children who will be born in Africa and Asia which we formerly gave to those territorial citizens of Missouri so that they could live and bring up their families and see the day when they would be ready to develop their areas for urban and suburban assistance such as my colleague from Missouri is requesting now.

I have also heard that one of the big objectives in the administration—and I support this—is family planning and program assistance for birth control in these areas. This is in the development loan program. We are never going to get any kind of effective family planning until they develop a health system to deliver family planning adapted to the traditional systems of health which exist in Africa, South America, and Asia.

So if the Members are not prepared to deal with a population crisis, if they insist on the propagation of afflicting diseases in the underdeveloped world, then they will vote for the gentleman from Missouri or the committee sum. But if they are prepared to back President Nixon in 1970, to make this meager contribution to the wealth and the health of the world, then they will back my amendment, which is the President's authorization request.

Mr. FRASER. Mr. Chairman, will the gentleman yield?

Mr. CAREY. I yield to my colleague from Minnesota.

Mr. FRASER. I commend the gentleman. I want to say I strongly support his amendment. His enlightened self interest, demonstrated here, reflects the statesmanship he has always shown in the House of Representatives.

Mr. CAREY. May I make one final point.

I checked with the House surgeon. I found out it is a most painful, painful experience for a Member to go abroad as a Member of the House if he has never gone abroad before, because he has to go into the House surgeon and request a full series of shots. He has to get yellow fever, malaria, tetanus, diphtheria—right down the line. When he comes out he should get a Purple Heart for the way his arm looks after this series of shots.

Do Members know why they have to get those shots? It is because there is not an area of the world they can go today to check on this program where they do not have to adopt a defensive health mechanism so they can live through the areas where people are dying.

If we pass this development loan program we can stamp out yellow fever, malaria, and all killing and crippling diseases which used to exist in this country, and we will never have to go to that surgeon again and defend ourselves with a puncture in the arm against the diseases we find around the world when we go to inspect these programs.

Mr. PASSMAN. Mr. Chairman, I rise in opposition to the amendment.

(By unanimous consent, Mr. PASSMAN was allowed to proceed for 5 additional minutes.)

The CHAIRMAN. The gentleman from Louisiana is recognized for 10 minutes.

Mr. PASSMAN. Mr. Chairman, let us discuss the position that we find ourselves in at this particular time. The adminstration or administrations requested $675.5 million. The authorizing committee reduced that to $425.5 million. The Committee on Appropriations dealing absolutely on facts and statistics reduced it to $265 million. Now we have an amendment to reduce it to $168,875,000 and you have a substitute to move it back up to $425.5 million.

Mr. Chairman, it is true that we had to impound funds last year and slow down projects where you had 4,408 projects in 99 nations and 5 territories of the world and not a one of them lost a single dime. But with privileges come responsibilities. I must be a responsible Member. There is no justification for the $425 million and you would wreck the program if you cut it back to $168,875,000. So, I certainly hope that the Committee will vote down the substitute and, of course, vote down the amendment based upon these actual facts that at this time last year for development loans your committee recommended $265 million. When it went to the other body they increased it to a higher figure, but the final appropriation was $300 million and that proved to be excessive.

Mr. Chairman, your committee believes that the $265 million that we are recommending is fully the amount needed to fund this program. We are now 5 months into the new fiscal year and they have only authorized and obligated $122,575,000. So based upon the obligations so far in these 5 months, they will have ample funds in this Development Loan Fund to take care of all the programs.

Further, may I call to your attention again that buried in this bill in the different titles is some $655 million in different banks such as the Asian Development Bank, the Inter-American Bank and in IDA, and I can assure you that this year as in the previous 14 years that it has been my privilege to report this bill, that we are not underfunding these programs. We are overfunding these programs.

So I plead with you that based upon the facts and statistics the $265 million is ample to fund this program. So I hope, Mr. Chairman, that the Members will vote down both of these amendments and stick with the committee that has been handling this successfully for so many years.

Mr. GROSS. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, I would like to get something straight, if I may have the attention of the gentleman from New York (Mr. CAREY) who made quite an issue of the fact that he had to see a physician before he could take a junket overseas because he had to get shots or something of that nature.

Mr. CAREY. Mr. Chairman, will my distinguished colleague yield?

Mr. GROSS. Just a minute and then I will yield to the gentleman. What happens is you go to the physician and get your shots and then go overseas. Who do you see about your shots overseas or do you not get any shots overseas?

Mr. CAREY. Mr. Chairman, if my distinguished colleague will now yield, I said I referred to the records of the House physician and found that this represented quite an expenditure for shots for Members going overseas. I did not identify myself as one of those Members. But I understand those shots are quite painful and expensive as well to the House of Representatives. I indicated that you needed shots here in order to defend yourself against germs from overseas. Once you get overseas you can get a shot for anything you want, if you can afford to pay for it.

Mr. GROSS. I just wondered if those shots you got overseas are painful or pleasant.

Mr. CAREY. Mr. Chairman, will the distinguished gentleman yield further?

Mr. GROSS. I yield to the gentleman.

Mr. CAREY. If you get a shot from the House physician, it will take you all the way over and back without a secondary booster.

Mr. ROONEY of New York. Mr. Chairman, will the distinguished gentleman from Iowa yield? I would like to say to the gentleman from Iowa——

Mr. GROSS. Mr. Chairman, just one moment. I did not yield.

Mr. ROONEY of New York. Mr. Chairman, I thought the gentleman from Iowa mentioned——

Mr. GROSS. Mr. Chairman, I want to properly identify the gentleman from New York who I am sure doles out more money for more representation allowances than any other chairman of a subcommittee in the House, who probably has in his jurisdiction more booze and entertainment funds than any other chairman in the House.

Mr. ROONEY of New York. I would like to say to my distinguished friend from Iowa, if he will yield at this point, that for over a quarter of a century I have found that the overseas shots are less painful than the shots downstairs in the Capitol physician's office referred to by my distinguished colleague from New York (Mr. CAREY).

Mr. GROSS. Now, Mr. Chairman, I would like to deal with a few facts of life.

The gentleman from New York (Mr. CAREY) mentioned Africa several times. Through the dispensation of the tax

dollars of the American taxpayers, and the Lord knows they are burdened enough, this handout program set out to create in Nigeria the showcase of all Africa. In Nigeria they have taken care of the diseases and the afflictions of children in a down-to-earth way. Thousands of children have been massacred in the war in Nigeria, the AID showcase, or have died of starvation. Yes, they really get down to earth to take care of the children in Nigeria, and by the thousands.

It makes little difference how much this $200 or $300 million is increased. There is little accomplishment except to add to the burdens of American taxpayers.

I discovered a day or two ago that this U.S. Government is financing in Tunisia the buying of crude oil. The chief export of Tunisia is oil.

Can the chairman of the committee give me any reason why this AID outfit should finance the buying of crude oil for Tunisia, from Libya?

Mr. PASSMAN. I cannot give the distinguished gentleman from Iowa an answer. I do not know what he is talking about, to be completely honest with him. We have never discussed Indonesian oil before my committee.

Mr. GROSS. Tunisian oil.

Mr. PASSMAN. Oh, Tunisia?

Mr. GROSS. That is where some of this giveaway money is going.

Mr. PASSMAN. I would answer the gentleman by saying I do not know anything about it.

Mr. GROSS. Here is Tunisia, a country whose chief export is oil, and we provided money for them to buy oil from Libya.

And how about the expenditure of funds from this foreign aid program to train bartenders?

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Louisiana.

Mr. PASSMAN. I must admit that in this bill you may find money to train bartenders, I must admit that. There are some programs much more foolish than that. And that is one of the reasons I have made my criticisms rather mild, so as to not kill the bill. But we had no information whatsoever about this country buying oil from Tunisia, or any other countries.

I can assure the gentleman from Iowa, and I can answer him seriously, this is the first time that I heard that we were buying cheap oil from Libya, and sending it to Tunisia. And I am just as opposed to it as the gentleman from Iowa.

Mr. GROSS. Mr. Chairman, if I could get unanimous consent to proceed for an additional 10 minutes, I would read the President's message that is to come up, I guess, tomorrow noon—is this the 9th or the 10th of December? It will call for $40 million for the arts and humanities. I think we ought to interrupt this session for the reading of President Nixon's message so that everyone could be put on notice that $40,000,000 should be cut from this bill to finance the President's request for that amount to take care of the arts and humanities.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. CAREY) to the amendment offered by the gentleman from Missouri (Mr. ICHORD).

The amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. ICHORD).

The question was taken; and on a division (demanded by Mr. ICHORD), there were—ayes 29, noes 86.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Administrative expenses: For expenses authorized by section 637(a), $50,000,000.

AMENDMENT OFFERED BY MR. CAREY

Mr. CAREY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CAREY: On page 4, line 17, strike out "$50,000,000" and insert "$52,250,000".

Mr. CAREY. Mr. Chairman, I seek support for this amendment in a sense in order to pay my respects to the people who have been managing the AID program.

I have had occasion to look into this program as much as it is possible to do so without looking at the program in person around the world. That is why I have not needed to take the immunization shots to see the on-site developments of this program.

But I have been convinced by the statistics that have been shown to me and by pictures that I have seen and developments that I have been able to witness secondhand from my discussions with representatives of foreign countries who have benefited from this program. I think we ought to second the President's request in asking for the full amount of management funds for this program so that it can be properly managed.

I would like to ask the Committee of the Whole to recognize that what I am seeking here is money to manage the program which the gentleman from Iowa has indicated needs good management. This is just a few dollars less than we are willing to commit to the Chiang Kai-shek government in Formosa to manage world security by use of our latest model jet airplane.

In our system of priorities, it is far more important that we back the Agency for International Development which is our agency, managed by our people in the State Department, to carry our message around the world than it is to put ourselves on record for the Formosan government to take care of mutual security needs of this and other countries around the world with our airplanes.

I want to see where our system of values is in the committee today.

I want to see if we are going to back an American agency which has gone forward in the most trying areas of necessity in the world and which has mounted the programs in Asia, Latin America, and South America and in Africa against the most challenging conditions to try to bring the message of America into these lands in situations that are almost of indescribable in terms of human needs.

I wish the gentleman from Iowa would continue the colloquy with me that he raised before in connection with shots and the need for immunization and what it does for the people who are receiving this aid from America. The malaria program, I indicated, resulted in the immunization of at least 100 million Africans; and yellow fever, 25 million Africans. This means we have reached about 10 percent of those who might benefit from this program which would give them a chance at life. The reason we cannot go further with the program is that the agency itself lacks the manpower, lacks the capacity in terms of management, lacks the means, and lacks the clear rquisite means to go ahead with this program that would save literally millions of lives by the expenditures of relatively few dollars.

I came across this, which I would like to check with the chairman of the subcommittee. I know he knows this program firsthand. We heralded this new gain for America when we proclaimed that it immunized the 100 millionth African from yellow fever and the 25 millionth African from malaria. I asked how it is possible to accomplish this modern miracle of immunization. I was told that we had developed a new kind of vaccination technique, an immunization technique—an airgun which would project into the arm of the patient at a rate of 1,300 jets per minute, an immunization agent which rendered him, as I have said, free from the danger of yellow fever or malaria.

Then I asked, what about the other vaccines? What about measles? What about scarlet fever? What about diphtheria and all the things that save children from dying in this country? Why did we not do the same thing for each patient at the same time? And I was told the money was not there to do it.

I am wondering, as we talk about this program, how we can justify a program that, in one sense, saves a child from one killing disease but leaves him exposed to all others for the sake of a few million dollars.

Mr. PASSMAN. Mr. Chairman, I rise in opposition to the amendment.

I do not think you want to vote until we give you an explanation. The gentleman has talked about a limitation. We are talking about administrative expenses. It takes more personnel to run a $5 million business than it does to run a $2 million business. The budget requests $2.71 billion, and they asked for administrative expenses of $51 million to administer $2.71 billion. In all probability, Congress somewhere along the way will provide $1.75 billion, which means the appropriate amount for this would be $37.5 million.

In our committee we have one distinguished member that wanted to cut it to $40 million. Finally he said he would compromise at $45 million. We insisted on keeping it at $50 million. But there is absolutely no justification for an increase over and above the $50 million,

and I trust the committee will vote the amendment down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

MILITARY ASSISTANCE

Military assistance: For expenses authorized by sections 504(a) and 504(e) of the Foreign Assistance Act of 1961, as amended, including administrative expenses and purchase of passenger motor vehicles for replacement only for use outside the United States, $404,500,000, of which not less than $54,500,000 shall be available solely for the Republic of China: *Provided*, That none of the funds contained in this paragraph shall be available for the purchase of new automotive vehicles outside of the United States: *Provided further*, That none of the funds appropriated in this paragraph shall be used to furnish sophisticated weapons systems, such as missile system and jet aircraft for military purposes, to any underdeveloped country other than Greece, Turkey, the Republic of China, the Philippines, and Korea, unless the President determines that the furnishing of such weapons systems is important to the national security of the United States and reports within thirty days each such determination to the Congress: *Provided further*, That the military assistance program for any country shall not be increased beyond twenty per centum of the amount justified to the Congress, unless the President determines that an increase in such program is essential to the national interest of the United States and reports each such determination to the House of Representatives and the Senate within thirty days after each such determination.

AMENDMENT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CONTE: On line 17, on page 5, delete "sections" and substitute "section". Line 18, on page 5, delete "and 504(e)". Lines 21 through 23, page 5, delete "404,500,000, of which not less than $54,500,000 shall be available solely for the Republic of China:" and substitute "350,000,000:".

Mr. CONTE. Mr. Chairman, I rise to offer an amendment to strike $54.5 million for jets to China.

I do not think the United States should be the weapons arsenal for the so-called free world. The less developed countries cannot afford bright and shiny new weapons systems, and this is precisely why I amended our bill in 1967 to prohibit the transfer of sophisticated weapons to them.

By the same token, I do not believe we should give away sophisticated weapons to any nation just because it is excluded from the provisions of my amendment—especially when they are neither requested nor wanted by the President, the State Department, the agency for International Development, or the Defense Department.

This, however, is precisely what happened in the case of the jets for the Republic of China. Over the strong objection of 169 of its Members, this body authorized $54.5 million for this outright gift. And the committee, I regret to say, went right along with it.

I strongly oppose the appropriation this amendment would knock out because there has been no justification whatsoever for it.

To begin with, I am deeply disturbed over the fact that no request was ever made for the planes and over the circumstances surrounding its unexpected inclusion in the authorization bill. I think my colleagues should be equally disturbed.

Moreover, even during the very limited floor debate on this surprise move, serious doubts were raised about whether Taiwan had any real military need for the jets. One such doubt is that mainland China may very well not have the capability to invade the island republic.

It was also pointed out that Israel, which in contrast to China is faced with daily military threats, paid in full for the jets we sent her. The appropriation this amendment would delete, however, is nothing more than a big fat $54.5 million handout at the expense of the American taxpayer.

This handout is as unnecessary from an economic point of view as it is from a military point of view. The economy of nationalist China is booming—triggered in large part by some $5 billion in U.S. assistance over the last 20 years.

Now I ask my colleagues very pointedly—How do we know whether China needs these jets? Floor debate consisted of some five pages in the RECORD. No supporting material was sent up to Congress. In fact, barely anyone knew anything about these jets until that fateful day in November—the 20th to be exact—when an amendment was offered calling for the expenditure of $54.5 million of the taxpayers' money.

We are already halfway through fiscal 1970 and at the end of calendar 1969. Why, then, not wait on these jets and consider them at a later date in the new budget or even now in a supplemental request? I might note that our Appropriations Committee is currently holding hearings on several supplemental budget requests.

Either way, the delay would give us a chance to question the right people, including Secretary of Defense Melvin Laird, about the need for them. I urge my colleagues as strongly as I can to adopt a wait and see attitude by approving this amendment. My guess is that, if we do, we will see that these jets are not needed and that this money should, therefore, not be thrown down the drain.

Mr. Chairman, again I repeat, neither the Pentagon nor the Defense Department has asked for these planes. There never have been any committee hearings before our committee or the authorization committee, the Foreign Affairs Committee, for these planes. There has been no evidence presented or testimony presented to any committee in the Congress, and the Senate just knocked the planes out of their bill last week.

Mr. ECKHARDT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, when I voted on the authorization bill I did not have available to me the document which the chairman of the subcommittee has presented to us in general debate, which is labeled "top secret." Therefore, I was somewhat concerned when I heard that this document was in existence. The able chairman, however, has made the document available to me, and I must say that my fears with respect to my first vote against the $54.5 million for planes for Taiwan have been greatly relieved.

However, I have not yet been able to peruse with any care the document labeled "top secret." Of course, I am not in a position even to say here what I noted in that document.

There is a second letter. First, I will ask the chairman if it is permissible for me to refer to its date and to the signature on the letter only? I do not want to violate the "top secret" nature of the letter.

Mr. PASSMAN. Revealing any part of this document which is stamped "secret" would be violating rules of handling classified documents. Nothing can be said without violating security.

Mr. ECKHARDT. I certainly have the highest respect for that limitation and shall entirely abide by it, but I wish to submit to the Members of the House that when such a "top secret" letter is not presented to the committees there is no way we can evaluate the letter to determine whether or not it should prevent us from voting for this amendment at this time. Unless the committees consider the letter there is no way the letter may be properly evaluated.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Louisiana.

Mr. PASSMAN. I can reveal that the letter was dated December 5 in the year of our Lord 1969.

Mr. ECKHARDT. Then I suppose it would be permissible for me to note that the previous letter in the file was dated November 19, 1969.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from California.

Mr. HOLIFIELD. These terrible secrets that are being released to the public astound me and concern me. I have looked at hundreds of secret letters and documents, but this is the first time I have ever been told that the date of a letter is to be considered secret.

Mr. ECKHARDT. I would in conclusion like to submit to the House that it would be proper to vote down the $54.5 million increase and, if these letters in fact convince any committee of this House that the $54.5 million is needed then there can be a supplemental appropriation to take care of it.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Louisiana.

Mr. PASSMAN. I respect the gentleman very highly.

The executive branch establishes our national policy. That policy says we will provide military equipment to our allies, including Korea and Taiwan. But it is also a prerogative of this Congress to decide the amount of the aid we shall furnish, just as we did in other bills that were passed by this House. There were

$2 billion of unbudgeted items contained in bills passed by the House. I did not hear the gentleman argue then about the need for justification.

Mr. ECKHARDT. Let me reply to that. I respect this House grealty. I respect the judgment of this House as superior even to the judgment of the committees. But I do not believe that this House can make a judgment without being able to see the letters on which the judgment is based.

Mr. LOWENSTEIN. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to my colleague from New York.

Mr. LOWENSTEIN. I was curious as to whether the gentleman has any idea about who it is the Taiwanese Air Force is supposed to fight with the planes we are asked to give them?

Mr. ECKHARDT. I might answer that, but I would be afraid I would reveal the confidence of the "top secret" letter.

Mr. LOWENSTEIN. Maybe we could discuss this question if we do not mention any specific country. Of course one country, perhaps the chief country, that the Taiwanese might be expected to fight is not supposed to exist at all, so maybe that would make it easier to discuss it without naming it. But my problem is that I want to understand the implications of giving a country an air force. Surely it is not unreasonable, if we are to give a country an air force, to have some idea of what that air force is supposed to be used for. Even if we were only selling someone an air force that question would interest me.

Since the planes we are being asked to give Nationalist China are bombers, presumably they will have to be used to drop bombs, or they will not be very useful. But once we give these planes away, presumably we also give away any control over whom they might be used against. Now, if Nationalist China used these planes to bomb the noncountry we cannot name, does the gentleman know if we would be expected to defend Nationalist China against retaliation? Are we going back in the unleashing China business again. Or perhaps the gentleman can suggest some other potential target for Nationalist Chinese bombers, one that has not occurred to others of us?

Mr. ECKHARDT. I can only say to my colleague that I am not at liberty to discuss the contents of the letter and I must confine myself to what has been prescribed by the chairman of the committee in revealing such information. Were I permitted to see this secret information I think I would be in a position to explain why I do not believe the letter compels me to vote against this amendment.

Mr. LOWENSTEIN. I appreciate the great discretion of the gentleman, and I thank the gentleman for yielding. I trust I will be giving away no secrets if I confess that none of the secrets of the secret letter have persuaded me that we should give away these airplanes. But then, very few facts, however secret, would persuade me that it is in the interest of the security of the United States to give an air force to Nationalist China. For that matter, I am not sure I would favor giving anyone an air force at this time. And what I find especially disconcerting is this procedure of giving one away rather casually, sort of as an afterthought. For all we know, we may be more or less whispering ourselves into a new and totally unexplained commitment, a commitment of which this appropriation is clearly only the first installment. What a strange way this is to do something that is, at best, unexplained and dangerous.

SUBSTITUTE AMENDMENT OFFERED BY MR. BROOMFIELD FOR THE AMENDMENT OFFERED BY MR. CONTE

Mr. BROOMFIELD. Mr. Chairman, I offer a substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. BROOMFIELD as a substitute for the amendment offered by Mr. CONTE: On page 5, in line 18, insert "SEC. 504(d); and in line 21, strike "$404,500,000" and insert "$454,500,000"; and, on line 23, after the word "China", add the following: "and $50,000,000 for the Republic of Korea."

The CHAIRMAN. The gentleman from Michigan is recognized for 5 minutes.

(By unanimous consent Mr. BROOMFIELD was allowed to proceed for 3 additional minutes.)

Mr. BROOMFIELD. Mr. Chairman, I offer this amendment today because of my deep concern about the need for increased military assistance to the Republic of Korea and in order to provide an opportunity for the Members of the Committee of the Whole House to express themselves on this vital issue.

As the Members of this body will recall, the foreign assistance authorization bill approved on November 20 contained language to provide $50 million in fiscal 1970 and $50 million in fiscal 1971 for the modernization of South Korea's armed forces. This language originated as an amendment I offered to the Committee on Foreign Affairs and it received broad support among the committee's members.

The distinguished chairman of the subcommittee (Mr. PASSMAN) has in his possession intelligence information underscoring the urgent need for this appropriation.

There are a number of important factors to be weighed in consideration of this amendment.

As we are all well aware, the United States has maintained a large military contingent in Korea since the Korean armistice of July 27, 1953. That contingent now numbers over 50,000 men.

It supplements a well trained and extremely loyal South Korean military in excess of 600,000.

Together, this combined force confronts an increasingly bellicose and militant government to the north, one which almost daily renews its threats to reunite Korea by armed aggression.

That threat is supported by both word and deed. North Korea is a stable, solidly industrialized, hard-line police state with a military establishment far in excess of normal defense needs for a country of its size.

Five percent of North Korea's people—more than 400,000—are in the armed forces. In addition, it has a popular militia, exceeding 1 million in strength.

In terms of U.S. population, it is as if we had 10 million men in our regular military forces backed by 20 million in the National Guard. Nearly 40 percent of North Korea's annual budget is devoted to the support and maintenance of these forces.

All branches of North Korea's military are well-equipped with modern Soviet and Chinese weaponry, especially the Air Force which exceeds South Korea's both in quality and quantity of equipment.

By contrast, South Korean forces have very little sophisticated weaponry, most of it at least of Korean war vintage. Virtually all of our aid has gone for the repair and maintenance of that equipment, very little toward modernization.

War by miscalculation is a very real peril against this sort of backdrop. And, North Korea has shown no sign that it wants to avoid such a disaster.

Since 1965, the north has embarked on an overt and increasingly aggressive policy of harassment and infiltration aimed at disrupting the South Korean Government and establishing guerrilla bases in the south.

At first, infiltration was confined to the demilitarized zone, but later in 1966 and at an increasing rate since, the north has also launched a campaign of infiltration by sea.

The latter tactic has placed particular stress on the South Korean Navy which is badly underequipped and lacks the high speed patrol boats necessary to cope effectively with this threat.

In 1967 and 1968, the North continued to increase its already high-level of activity and in early 1968 staged two spectacular acts of belligerency.

On January 21, a specially trained team of 31 commandos attempted unsuccessfully to assassinate South Korean President Park and 2 days later North Korean patrol boats seized the U.S.S. *Pueblo*.

In November 1968, in the largest North Korean intrusion since the Korean war, 120 heavily armed commandos landed at points near Ulchin on the east coast. South Korea responded by mobilizing 40,000 militamen to track down the intruders and by strengthening security measures at threatened installations. By the end of the year most of the invaders had been killed or captured.

Major incidents have continued to occur each year until late in the fall when intrusions usually decline because of cold weather and the disappearance of foliage which provides cover for the infiltrators.

This constant and intensive probing by the North will quickly uncover and capitalize on any weakness in the South.

Because of our heavy commitment and preoccupation in Vietnam, the United States has tended to downplay the real potential for armed conflict in Korea and hope for the best. This is a policy which ultimately will lead to difficulty.

It is in this country's interest to maintain a strong counterforce in South

Korea both for the short- and long-range future. For the present, weakness is only an invitation for even greater harassment from the North and a heightened potential for U.S. involvement in another conflict.

For the long range, we can only hope to consider a reduction of U.S. forces in Korea—and I do not foresee that in the near future—after we have embarked on a reasonable military modernization program to preserve the balance of force after we are gone. For these reasons, Mr. Chairman, I urge careful consideration and support for this amendment.

Mr. MONAGAN. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Connecticut.

Mr. MONAGAN. Mr. Chairman, as a matter of information, I would ask the gentleman from Michigan this question:

Do I understand correctly that the gentleman seeks to restore the $54 million for China, and to add the equipment for Korea as well in this substitute?

Mr. BROOMFIELD. To answer the gentleman, because of the parliamentary procedure, I had to offer my amendment for Korea, otherwise I could be precluded in offering this amendment if the amendment offered by the gentleman from Massachusetts (Mr. CONTE) prevailed.

Mr. MONAGAN. But the net effect is to include both?

Mr. BROOMFIELD. The net effect is to include both.

Mr. PIRNIE. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from New York (Mr. PIRNIE).

Mr. PIRNIE. Mr. Chairman, I take this opportunity to commend the gentleman in the well for his amendment. It has been my privilege to see at first hand the need of the South Korean forces for this military assistance. I believe that their capability and their attitude create valuable assistance to the peacekeeping program. This will be timely assistance, which can pay dividends for the peace and security of the world. Again, Mr. Chairman, I commend the gentleman for his timely motion.

Mr. BROOMFIELD. I thank the gentleman for his contribution.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COHELAN. Mr. Chairman, I rise in opposition to the amendment, and I move to strike the requisite number of words.

Mr. Chairman, for the benefit of those Members who were not on the floor when I made my earlier remarks, this issue goes back to the argument that I made during general debate. There is absolutely no justification, in my opinion, for either the Korean amendment or the Chinese amendment.

If these military requirements are justified, the arguments that the gentleman from Massachusetts (Mr. CONTE) and I are making are to let it go through the regular legislative channels.

Mr. Chairman, I indicated in the committee at the time we were arguing this matter that this goes far beyond what is required. Such a serious matter as taking a floor amendment and putting it in on the floor, affects the very foreign policy of this administration. And as I indicated in my earlier remarks, we have not heard a thing from the State Department one way or another. And I can tell you—I assert from the floor of this House—that the problems related to this country's complex and evolving foreign policy in relation to the Far East are at stake. We have the question of Vietnamizing the Vietnam war. There are many people, including some policy planners who for some time have been arguing over the size of our manpower commitments in Korea. And I wondered as I listened to the gentleman from Ohio why it took so long for us to understand that maybe we would have to give military support to the Koreans instead of having 50,000 troops over there all these years. We have been in Korea since 1950. They have 19 divisions. And it is well known by those who are well informed that there has been a very, very hot argument internally over how long and in what number we should keep our troops there.

Now, as our colleague, the gentleman from Michigan (Mr. RIEGLE) said in his separate views—and I urge the Members to read them—if we are thinking about the Vietnamization of the war in Vietnam, we had better start thinking about the Koreanization of the Korean operation. I am not against military assistance to Korea, but I say that it is dead wrong to do it this way. I am more interested in what we should do on this bill as it pertains to helping developing nations.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. COHELAN. I yield to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Chairman, I think it should be made clear first what the parliamentary situation is here.

I have offered an amendment to strike out $54,500,000 for jets for the Republic of China.

The gentleman from Michigan now moves a substitute adding $50,000,000 to the bill for military assistance to Korea.

If this substitute prevails, this bill will be inflated by $50,000,000 for Korea and planes for Taiwan. Therefore, the parliamentary situation is we have to knock down his substitute and then vote on my amendment.

I might say that we have worked very hard, the both of us, and the chairman of this committee, in helping Korea down through the years.

We did not need anybody to get up here on the floor with an amendment. We have given Korea $7.4 billion.

Now we did not need any generals on this floor to come in here and tell us what the new policy should be in Korea or Taiwan.

Mr. COHELAN. In addition to a lot of other supporters—as a matter of fact, and I am sure the gentlemen on the Committee on Foreign Affairs know on both sides of the aisle, this has been one of our stunning economic aid successes. I want to continue that, but I suggest to you the issue here is—how are we going to do this? As I said earlier in my remarks, let this be done in the proper way. Let it be done through the regular foreign policy and military channels—but keep it out of the AID program because as long as you get it all mixed up with this, we will be prejudicing this bill.

I want to say again for the benefit of the gentleman from Ohio, in my earlier remarks I tried to make it clear that you have already seen the House vote on this measure. There is a great deal of opposition to adding this item in this way, and you are prejudicing your own administration's Foreign Assistance Act. I plead with you to defeat this amendment. I support the foreign assistance development loans, technical assistance, and even supporting assistance. I supported the gentleman from Kansas (Mr. SHRIVER) in the full committee on supporting assistance for the reason I want to Vietnamize that war as rapidly as possible and I want to get our men out of there as I want eventually to get them out of Korea. I will say to the gentleman, that I believe they have been there in divisional strength far too long. I would much rather see those two Korean divisions in Vietnam up in Korea where they belong and where they would be operating in defense of their own country. This certainly does not preclude adequate military assistance by the United States.

Mr. SIKES. Mr. Chairman, I move to strike out the last word and rise in support of the substitute.

Mr. Chairman, the substitute amendment by the distinguished gentleman from Michigan will make it possible to vote for funds, badly needed funds for a measure of modernization of weapons for Korea and to retain funds for a squadron of modern aircraft for Taiwan.

There are some publications which have insisted day after day that the administration opposes this proposal—and this is not true; that the State Department opposes it, and that is not true; and even that the Department of Defense opposes it. It has been amply demonstrated here on the floor today that the Department of Defense supports what is proposed.

There are those who have said that the administration should ask for money for modernization of weapons for our friends, and that Congress should not take the initiative. But there have been many cases where the Congress has wisely acted on its own responsibility and has taken the initiative. We should act whenever we see a need. We are not an appendage of the White House or of the State Department or of any other department of Government. This bill contains unbudgeted programs for Israel, and I am glad it does. But no one has raised a question about that.

Now, Mr. Chairman, those who see through rose tinted glasses the prospect of a world in which we will live happily side by side ever after with Communist China—and apparently we have some here—will do well to take another look.

Red China is strengthening its defenses. It has a fleet that contains over

1,200 vessels including 36 submarines—and here in my hand is a listing of the numbers and the categories.

Its air force contains, within striking distance of Taiwan, over 1,400 jet aircraft. Many of them are modern Migs and Red China is manufacturing its own modern Migs.

Red China is promoting revolution all around its borders. Red China is the principal supplier of conventional arms to North Vietnam. Did you know that? I repeat, Red China is the principal supplier of conventional weapons to North Vietnam.

(On request of Mr. RIVERS and by unanimous consent, Mr. SIKES was allowed to proceed for 5 additional minutes.)

Mr. SIKES. Mr. Chairman, this is not a bright new weapons system for Taiwan. It will provide one squadron of 18 aircraft, not even the most modern aircraft in our inventory, but aircraft that are less costly than our most modern aircraft, and aircraft that are a match for the MIG's that Red China has. One squadron, 18 aircraft, to help replace some of the obsolete aircraft on which Taiwan must now rely for protection—F–86's, F–100's—absolutely incapable of withstanding an attack by Communist MIG's. No match for them.

Of course, the aircraft are needed. They are needed if Taiwan is to have a chance to survive in case of attack.

Why do we want to help them? Because they have demonstrated staunch friendship. They offered troops for South Vietnam. There can be no greater test of dependability in time of crisis. The offer was rejected, and many of us think this was a mistake. But they were offered.

Taiwan is a brake on Red China, a needed brake on Red Chinese aggression. Taiwan provides one of the best and surest forward bases now available to us in the far Pacific. Okinawa has been frittered away, making a mockery of the American lives lost there. We are now in the process of downgrading our base structure on Okinawa by making the weapons that we store there subject, to all intents and purposes, to Japanese control. This means Taiwan is doubly important as a secure forward base for U.S. and friendly forces.

As a part of the package which is offered by the substitute, we would be restoring to the bill the funds for Korea which were provided in the House authorization bill. Korea has troops in South Vietnam. They have made the most meaningful contribution of any nation other than our own forces and the South Vietnamese. They have weakened their own forces at home to help us.

Please remember also that U.S. forces along the DMZ between North and South Korea are exposed almost daily to harassment. American lives are being lost all too frequently there through enemy action.

The arrogant hostility of North Korea, her callous brutality toward American personnel, have been demonstrated time and again. There was the *Pueblo*, the EC121. The United States has literally been made to crawl when these incidents occurred. It would be folly to fail to help to strengthen South Korea's defenses to the point that enemy aggression can be thwarted. Here is an instance where American lives are going to be directly on the line if war breaks out. There are 50,000 U.S. troops in South Korea today. They will be directly and immediately involved in the event of hostilities and many more will be required. The funds contained in this bill are very small payment indeed for helping to avoid such a situation.

Mr. ALBERT. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the distinguished majority leader.

Mr. ALBERT. Mr. Chairman, I appreciate the gentleman yielding.

I take this time only because I have just received a letter—and I think the gentleman from Michigan received a similar letter—from the Secretary of Defense strongly urging the adoption of the amendment relating to South Korea. The Secretary points out that South Korea is one of the most valiant allies of the United States. The letter is marked secret, so, if the gentleman will bear with me, I will merely summarize it.

It points out that the North Korean air and naval forces are more formidable than those of South Korea and that these forces are hostile, hard in position, and remain deployed to strike as in 1950 without warning. Of immediate concern are the actual hostilities that North Korea currently conducts throughout South Korea. The South Korean Government has taken the most resourceful and positive measures with some success but still requires substantial assistance from the United States to demonstrate conclusively its will and ability to resist aggression.

Then the Secretary states that the need for funding the $50 million authorized is urgent and has been stated to be such by the United Nations command, the Commander-in-Chief in the Pacific, and our Joint Chiefs of Staff, an opinion which, he says, "I share." The $50 million authorized would materially assist in meeting the needs of this area.

Mr. SIKES. Mr. Chairman, I thank the distinguished majority leader.

Mr. GERALD R. FORD. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the distinguished minority leader.

Mr. GERALD R. FORD. Mr. Chairman, as the distinguished majority leader indicated, not only he but I have received a letter from the Secretary of Defense, our former colleague, Melvin Laird.

This is a very persuasive document. Those of us who have had some background in the effort South Korea has made, an effort they are continuing to make, to be on our side, the willingness on their part to help in meeting the challenge in Southeast Asia, will be convinced as I am beyond any doubt that we ought to approve the substitute amendment.

Mr. RIVERS. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from South Carolina.

Mr. RIVERS. Mr. Chairman, the Korean conflict is a United Nations obligation. Despite this, Korea has sent over 50,000 of their crack troops to Vietnam, never once questioning the fate of these men, and they have not asked yet that the men be withdrawn. They are face to face with the most insidious enemy civilization has ever known. Have we forgotten the *Pueblo* and what that crowd will do to civilized people? Have we forgotten the EC–121 that was shot down? Have we forgotten the countless hundreds of our helicopter pilots who have been trapped over the DMZ and shot down by this crowd of savages?

Are we going to walk out on Korea, one of the greatest allies we have ever known?

Take Nationalist China: Let us not forget that is one of our two allies. They are tying down 19 divisions of an enemy which is on the threshold of an intercontinental ballistic missile. We discussed that in connection with the ABM.

Are we going to walk out on these people to whom we are bound by the SEATO Treaty?

The CHAIRMAN. The time of the gentleman from Florida has expired.

Mr. RIVERS. Mr. Chairman, I ask unanimous consent that the gentleman from Florida have 5 additional minutes.

Mr. CONTE. Mr. Chairman, I reserve the right to object. I want to ask the gentleman from South Carolina a question.

Mr. RIVERS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, it is senseless to drag the red herring of Israel into this debate about Nationalist China. We are bound to these people by treaty, by the SEATO Treaty.

We know good and well there are plenty of us who have and will come to the aid of Israel. Nobody is going to accuse me of not having an affectionate and favorable regard for the existence of Israel. I have gone on record for that.

But, Mr. Chairman, we cannot and must not walk out on people who are committed to bringing the American boys home—and that is all these allies are asking of us. Korea has said time and time again: "Give us the guns. Take your boys home. We have the manpower and the will and the dedication."

Ask anybody who has been there about the Korean army. It is a carbon copy of the American troops—Army, Navy, Air Force, WAC's, WAVES, and everything—and they will die if necessary.

Now, let us get to Nationalist China. Nobody has asked them to come to Vietnam. Had anybody asked them, they would have been there.

Across those straits, as the gentleman from Florida has stated, stand these new MIG airplanes that not only do they possess but they manufacture, and they are committed to destroy this island of Formosa and hence envelop the rest of Asia and ultimately land on the doorsteps of Hawaii.

Are you going to help them?

Are you going to back out on them? That is left to you. I am not.

I agree with what has been said by some of these gentlemen, that this military assistance should be under the Armed Services Committee. But it is not, and I am not going to complain about that, because the great chairman of the Foreign Affairs Committee has seen his responsibility and he has fulfilled it. I believe we could handle the military assistance, but I am not here to debate that.

I know that the gentleman who is going to ask me a question—and I am just about to yield to him—would not vote to take that away from the Foreign Affairs Committee and to vest our committee with jurisdiction over military assistance. I know he would not do that, but if it were there we would be in the same position.

I do not believe this Congress is going tc turn its back on the two tried-and-true friends we have. If it is, God help the sacred signature of America and the pledged word of my country.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. RIVERS. I yield to the gentleman from California.

Mr. COHELAN. I thank the gentleman for yielding.

I merely remind the gentleman, having had the great privilege of serving with him on the Armed Services Committee, I am well aware of the courage of our allies, the South Koreans. But I should like to say to the gentleman that I have never been in favor of maintaining the strength we have in Korea at this time. It comes as passing strange to me that, considering our involvement in Korea since 1950, we are suddenly presented with this tremendous need for these airplanes.

Mr. RIVERS. They need them.

Mr. COHELAN. We have had a military assistance program there all this time.

Mr. RIVERS. Let me answer the gentleman.

Mr. COHELAN. Why do they need this now?

Mr. RIVERS. Let me tell the gentleman. There was a fellow named McNamara who had a policy of not giving them anything new. When the *Pueblo* was taken we had just three planes there. We did not have them. They have been begging plenty of times, begging us to give them the guns, the planes, the tanks and all this stuff to relieve these 50,000-odd men. We just have not done it.

This is a United Nations thing. We did not go there on our own. It is a United Nations force. Truman woke them up in the middle of the night, and told the United Nations to protect them.

Mr. ADAIR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the substitute amendment offered by the gentleman from Michigan.

The gentleman from Florida made reference to the fact that this question was considered by the Committee on Foreign Affairs. That is true. It was given a detailed and lengthy consideration as to the need for it, as to the amount that could be properly used, and as to the effect that it would have on other parts of our program.

Having in mind especially the increased activity in North Korea it was determined, and if my memory serves me correctly by a rather substantial vote, that this amount of money was required and could be put to good use.

Therefore, I would urge the committee that the amendment offered by the gentleman from Michigan (Mr. BROOMFIELD) be accepted.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

I regret that this question cannot be divided. Under the parliamentary procedure it cannot be.

As I understand the amendment offered by the gentleman from Michigan it really is a substitute for the Conte amendment. It provides for both the $54.5 million for planes for China and $50 million for Korea.

I support the purpose of the amendment of the gentleman from Michigan with reference to Korea and I agree with the contents of the letters which were read by the distinguished minority leader and the distinguished majority leader with reference to Korea. I think we should have the opportunity to vote on that amendment alone, and if so, I would vote for it. But I am not going to vote for the substitute now. I am going to vote against the substitute. I will vote for the Conte amendment. There has been some expression here to the effect that we will spend $54.5 million for one squadron of planes for Nationalist China. That is only a down payment. The justification for planes for Nationalist China was made on this floor on November 20 and my friend and knowledgeable colleague, the gentleman from Florida (Mr. SIKES), indicated that his amendment of $54.5 million would provide one squadron of the F4–D planes. If that is so, that is a real bargain basement price, because the cost of a squadron of F4–D planes is $108.1 million. The breakdown for a squadron of such planes runs $83 million for the aircraft, $18.3 for avionier and other gear and $6.8 for spare parts.

Mr. Chairman, we ought to defeat the amendment which has been offered by the gentleman from Michigan. I say it regretfully because I do support his effort to assist Korea. What has been said about the need of additional military assistance in Korea is absolutely correct. I am not going to take a justification made on the floor of this Congress for $54.5 million when the Foreign Assistance bill was considered and vote for it. The justification for Korea was made, as the distinguished ranking Republican, the gentleman from Indiana (Mr. ADAIR), of the Foreign Affairs Committee, stated in the committee as a result of serious thought and consideration. However, that was not done with reference to the item for planes for Nationalist China. Therefore, insofar as I am concerned I am going to vote against the amendment offered by the gentleman from Michigan and I am going to vote for the amendment offered by the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Massachusetts.

Mr. CONTE. I certainly want to compliment my colleague, the gentleman from Massachusetts (Mr. BOLAND), and join with him in expressing the wish that this issue could be divided. The gentleman from Florida came down in the well of the House and talked about these planes in Taiwan becoming obsolete. Did they they become obsolete overnight? If they had become obsolete then why did not the administration come before our committee with reference to this situation?

Mr. Chairman, I have never voted once against military assistance. I joined with my minority leader and Melvin Laird in fighting for more funds for military assistance right in the well of this House. Now, I have to have someone come in here who is not on the committee, with no hearings, no evidence that the administration did ask for this, but they come in here and tell me that we have to do this, we have to give $54.5 million to Taiwan or else we will be knocked off overnight by mainland China. This is fishy and I do not like it. And, if it stays in the bill, for the first time since I came to the House I may vote against the entire bill.

Mr. BOLAND. May I say in conclusion, Mr. Chairman, that these planes as I understand it—and I use the argument of the distinguished gentleman from Florida—are in inventory. We have them as I understand it. Well, if we have them we can have hearings on these by way of a supplemental. This matter can be taken care of in the proper way—by detailed hearings and justifications. The House will be back here early in January, hopefully the third week in January. There is no great rush about these planes. We can give them to them if they justify the need. The fact of the matter is that they have not been justified. This is not the way to legislate. Therefore, I hope the Committee votes down the substitute amendment.

Mr. PASSMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in favor of the amendment.

I think it is rather obvious what it is all about by this time.

The Foreign Affairs Committee brought in a bill authorizing $50 million for Korea. There has been strong evidence given to many members of the Armed Services Committee as well as the Appropriations Committee indicating the need for Nationalist China being far greater than that for Korea and therefore the House of Representatives voted for the $54.5 million for Taiwan.

The subcommittee that I have the honor to chair considered this matter and kept in the money for Taiwan, but over my protest took out the money for Korea.

The bill moved on then to the full committee. The full committee supported the subcommittee and kept the money in

for Taiwan, but did not provide money for Korea.

Mr. Chairman, I fought for this all the way through, but evidently the subcommittee and the full committee felt that the requirement for China was greater than that of Korea. I think they are equal.

Remember, we lost 33,000 Americans in Korea, and at this particular time the people to the north can strike with not a moment's notice. Those people know this. It is important that we put the money in for Korea, and keep the money in for China.

If there is a need for one, then there is the need for both. I can tell the Members without violating any secrets given to me that the requirements for Nationalist China are not $54 million, they are in the neighborhood of $400 million, immediately—not something next year or 2 or 3 years from now—and we are going to have to give consideration subsequently to about $400 million. And when you move into Korea, the same thing is true. If you are going to update their forces, you are going to have to have this money.

Mr. Chairman, I am always trying to cut bills. I am not trying to increase bills. My record speaks for itself. But when my country is at war, I am going to support my country.

This money is needed. I want to assure the distinguished gentleman from Indiana that I fought his battle in the subcommittee, I tried to hold the money in for Korea. I did the same thing in the full committee, and I can tell you on the floor of this House I am just as interested in the money for Korea as I am for Nationalist China. So let us stop playing personalities with the security of our country, and vote this amendment the way that it should be voted so we can provide the funds for both.

Mr. MONAGAN. Mr. Chairman, I rise in opposition to the substitute amendment.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield for a unanimous-consent request?

Mr. MONAGAN. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Mr. Chairman, can we fix a time on this debate? I think we can conclude in 5 minutes.

The CHAIRMAN. Is the gentleman making a unanimous-consent request?

Mr. PASSMAN. Mr. Chairman, I am making a unanimous-consent request that all debate on this amendment and all amendments thereto close in ten minutes.

The CHAIRMAN. On this paragraph of the bill?

Mr. PASSMAN. Yes, that is correct, on this paragraph of the bill.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

Mr. HOWARD. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto close in 15 minutes, on this paragraph of the bill.

Mr. GERALD R. FORD. Mr. Chairman, may I ask the gentleman from Louisiana if he said on this amendment and all amendments thereto?

Mr. PASSMAN. On this amendment and all amendments thereto.

The CHAIRMAN. On this amendment and all amendments thereto.

Mr. GERALD R. FORD. To this section of the bill?

Mr. PASSMAN. To this section of the bill.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana that all debate on this section of the bill, and all amendments thereto, close in 15 minutes?

There was no objection.

The CHAIRMAN. The Chair will state that the gentleman from Connecticut (Mr. MONAGAN) has 5 minutes, the gentleman having been recognized prior to the unanimous-consent request.

Mr. MONAGAN. Mr. Chairman, the question here really is not whether or not we recognize that a threat exists to this country in Southeast Asia. I was in Korea 3 weeks ago and I am aware of the military facts of life there. We all recognize that. The real question is how we are going to handle this matter as a matter of procedure.

We do have committees here in the House. We do have set procedures that have been established over the years because we believe that that is the best way to winnow the programs that are presented, and to determine what is the best thing for us to do for the Nation.

Now I regret, as the gentleman from Massachusets also expressed his regret, that the parliamentary situation is what it is. I did support in the authorizing committee the authorization for the Korean military assistance. But we are now presented not only with that but also with the additional appropriation for the military assistance to China which was not presented to the authorizing committee.

If this is so urgent and so necessary, why was it not presented to the committee? It is only a few weeks ago that the committee on Foreign Affairs was sitting and that the committee presented its final legislative offering to the House.

Surely the facts of these situations could have been presented at that time and the legislative committee could have worked its will on mature consideration. Undoubtedly, such support would have been forthcoming if adequate proof had been provided.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. MONAGAN. I yield to the gentleman.

Mr. COHELAN. Mr. Chairman, there has been some confusion—and I want it to be clarified—about whether or not there were hearings held on the Korean question. Can the gentleman enlighten us on that?

Mr. MONAGAN. The matter of Korean assistance was discussed in the committee.

Mr. COHELAN. But there were no hearings.

Mr. MONAGAN. I have no recollection of any hearings.

Mr. COHELAN. May I say to the gentleman that I have discussed this with the distinguished gentleman from Wisconsin (Mr. ZABLOCKI) who is the subcommittee chairman on the Far East, and he advised me that the State Department gave no testimony on this issue. I merely want to say that I agree with the gentleman that this should go through the proper channels. If this is found to be justified, I would be more than willing to support it.

Mr. MONAGAN. I think all of us would. All we are suggesting is that the proper procedures should be followed. I have no recollection of the hearings. But at least this program was authorized by the legislative committee in contrast to the Chinese planes.

Mr. FRELINGHUYSEN. Mr. Chairman, will the gentleman yield?

Mr. MONAGAN. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Mr. Chairman, as a member of the Committee on Foreign Affairs I am very disappointed that we do not have a chance to vote separately for money for Korea and money for China. Since the two are coupled in the substitute, I am going to vote against the substitute—even though in committee I voted for the authorization for funds for Korea.

It seems to me that this whole debate about assistance for both countries demonstrates the necessity of a more orthodox procedure than we are using with respect to these countries. It is not a question of turning our back on our allies. If hundreds of millions of dollars more need to be spent to protect our friends in Asia, it seems to me that the Committee on Appropriations, the Committee on Armed Services and the Committee on Foreign Affairs should immediately get down to business. We should use the regular process for considering the requests for additional funds.

Mr. MONAGAN. I thank the gentleman for his observation and I fully agree with what he has said. Of course, the easiest way to prove the attitude of the committee is to point to the amount that we in the legislative committee actually authorized. This amply demonstrates the support that the committee has given this year, and also as you know has given in the past, to the military assistance program.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. MONAGAN) has expired.

At the time the unanimous-consent request to limit debate was agreed to, the Chair observed the Members standing.

Each Member will be recognized for about 1 minute.

The Chair recognizes the gentleman from Massachusetts (Mr. KEITH).

Mr. KEITH. Mr. Chairman, I am going to vote for the Conte amendment, which in effect negates the Sikes amendment—and I am also going to vote against the Broomfield amendment.

The procedures in each case do violence to a logical legislative process. The emotional atmosphere that exists here tonight and that existed at the time the Sikes amendment was adopted is not

conducive to deliberate consideration of such important matters. It is much preferable that the arguments for these proposals be first considered in the calm that exists in the committee chambers.

By acting so hastily here we are playing into the hands of those who are critical of our priorities and of our legislative process.

Both here, in our country, and abroad, those who read the record of this debate will get a poor impression of how this House functions.

I would hope that the House in the future will pursue the more orderly procedure that brings measures to the floor in a way that assures logical debates and more informed decisions.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. LEGGETT).

Mr. LEGGETT. Mr. Chairman, I rise in opposition to the substitute amendment, particularly against the provisions providing for the squadron of fighters for Nationalist China. It is my understanding that this is an appropriation for 18 Phantom attack bomber aircraft. The Phantom is an inferior aircraft to the Mig–17 with American pilots in it in a low altitude. It is an inferior aircraft to the Mig–21 at a high altitude. And the only possible purpose for which we could be buying these aircraft and giving them to Nationalist China would be to substantiate or possibly to carry on an attack against mainland China. It has no other purposes as a fighter aircraft. If American fighter pilots have to run with this kind of equipment, certainly Taiwan pilots would be in no better position. So I urge defeat of the substitute.

The CHAIRMAN. The Chair recognizes the gentleman from Alabama (Mr. BUCHANAN).

Mr. BUCHANAN. Mr. Chairman, I rise in support of the substitute and urge its adoption by the committee. I am confident that both of these allies need more in terms of military assistance, not less than that provided in the substitute. If we are ever to reach the position in which we can meet the concern expressed by so many Members of this House that American forces not be engaged in land wars in Asia, it will require more military assistance and more economic assistance to such allies. I urge adoption of the substitute.

(By unanimous consent, Mr. BOLTON and Mr. LOWENSTEIN yielded their time to Mr. FRASER.)

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota (Mr. FRASER).

Mr. FRASER. Mr. Chairman, I regret the parliamentary procedure that we find ourselves confronted with now. I have drawn an amendment which I will offer if we defeat this substitute which will provide in effect that the Korean money would be authorized in place of the money for the Republic of China. There is no credible threat today against the Republic of China. Admiral McCain testified before the House Foreign Affairs Committee and said it would be foolhardy for mainland China to attack Taiwan. I have in my hand a statement of the military balance published by the Institute for Strategic Studies in London, which is a very reliable authority on the forces of the various nations of the world. You cannot find in a statement of forces available to mainland China the seaborne capability which would enable mainland China to mount a successful attack on Taiwan, which was precisely the point Admiral McCain made to us. The secret letter which has been circulated here today does not support this request. The secret letter, if anything, suggests that there are other priorities for Taiwan than the jet aircraft which this amendment seeks to provide. I think we could make a much better case for Korea where there are American troops stationed, where there is always a threat of attack from North Korea into South Korea, than we can for Taiwan. Taiwan is relatively immune today from attack. Taiwan enjoys the protection of a bilateral mutual security agreement with the United States. Any sense of reason or perspective or balance suggests that this money should not go to Taiwan at the present time, certainly not under the kind of shortcut procedures that we have today.

Mr. Chairman, I supported the Korean money in committee. At least we had an opportunity to discuss that problem.

It is true the record itself and the testimony taken do not support the Korean request, but we did spend a great deal of time considering the question during the markup hearing, so there is some justification for that additional amount of money, and I would be prepared to see the money now going to China go instead to Korea.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. FRASER. I yield to the gentleman from California.

Mr. HOLIFIELD. Mr. Chairman, I associate myself with the remarks of the gentleman from Minnesota. This is no way to legislate. I resent this confrontation of the Members with mysterious secret documents and a belated letter from the Secretary of Defense. This matter should have been considered by the House Committee on Foreign Affairs so that justifying testimony could have been offered for committee evaluation.

I shall follow the advice of the gentleman from Massachusetts (Mr. BOLAND) and vote accordingly.

Mr. FRASER. Mr. Chairman, I thank the gentleman from California.

Mr. Chairman, if this money goes to Korea, my own position on the total bill may change from the position I have taken in the past.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. FISHER).

Mr. FISHER. Mr. Chairman, I recognize there are some people who do not consider Red China as a military threat to the peace and security of Southeast Asia or the Pacific or even the United States in the years ahead. It happens I do not share that viewpoint. That is the real issue involved here. In my judgment Korea and the Republic of China, the two countries that are under the gun as far as Red China is concerned, are the two countries that should receive full support from this country, as they have in the past. If anything, the support should be increased. This policy contributes directly to the future peace and security of Southeast Asia. And it contributes to the security of the United States. The need for these funds is urgent. I urge the approval of the substitute amendment.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. KOCH).

Mr. KOCH. Mr. Chairman, I rise in opposition to the substitute amendment.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. COHELAN).

Mr. COHELAN. Mr. Chairman, I merely reiterate what I said in my remarks in the general debate. I protest the method of bringing this before the committee. I feel strongly, and I could possibly vote for military assistance to both Korea and Taiwan if there was justification for it. I think it is absolutely shocking that there has been no testimony from the State Department even in the discussions we have had today.

As I said in my main remarks, I have been in contact with the people downtown, and there has been no official commitment in any way. We have heard from the military types, but we have not heard from the foreign policy types. It seems to me most essential for us to do this.

Mr. Chairman, if we confuse the object of this bill, which is basically development assistance for developing countries with all this military assistance, I think we are making a great mistake.

I have indicated that I protest what is happening because I think it can be done in the proper way.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Chairman, I reject the implications of the statement made by the gentleman from Texas (Mr. FISHER) to the effect that those who are going to vote against this amendment are in any way not cognizant of the threat in the Far East. All of us are aware of that threat, but the fact that such a threat exists does not obviate the need to show the bans for this amendment. That has not been done. There has been sufficient explanation to justify a vote against the substitute and against the delivery of the planes to the Chinese. I, for one, am going to vote against the substitute and in favor of the Conte amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan (Mr. BROOMFIELD).

(By unanimous consent, Mr. BROOMFIELD yielded his time to Mr. GERALD R. FORD.)

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Chairman, again I reiterate that I hope we will vote down the substitute and will vote for the

amendment to knock out the $54.5 million for the jet planes for the Republic of China.

I repeat I have the highest regard for the gentleman who offered the substitute amendment. The gentleman does not serve on our committee. There has been no testimony before our committee or the Foreign Affairs Committee for this money for these jet planes.

Again I reiterate I have never voted against the military assistance program, and if we had hearings, I might be on the floor defending this particular item. I just do not like the procedure used here. I want the administration to come down and make a case for this, and I will not buy a pig in a poke as a floor amendment.

Mr. Chairman, I hope the substitute will not prevail, and I hope the amendment I have offered will prevail.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey (Mr. FRELINGHUYSEN).

Mr. FRELINGHUYSEN. Mr. Chairman, earlier in the debate I said this was no way to legislate. Developments since that time have proved that is the case.

I regret, as I said earlier, that there is not an opportunity to vote separately on funds for Korea and funds for China. Under the circumstances I shall vote against the substitute and vote for the amendment offered by the gentleman from Massachusetts.

Mr. Chairman, I might add also that I am considering voting to recommit the bill before the final vote.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan (Mr. GERALD R. FORD).

Mr. GERALD R. FORD. Mr. Chairman, I am for the Broomfield amendment for two good reasons.

First, I am convinced that the military aid and assistance for South Korea is essential because of the previous recommendation of the House Committee on Foreign Affairs. That Committee with strong bipartisan support recommended this amount on this Korean program in the foreign aid authorization bill. I believe that is good evidence we ought to approve the Broomfield amendment.

Second, I am convinced that we should support the Broomfield amendment because of the communication received from the Secretary of Defense, the communication which was addressed to the majority leader and myself by our former colleague, Mel Laird.

For those two reasons I believe we ought to support the Broomfield amendment.

Let me make an observation, if I might, concerning the effort on the part of the gentleman from Massachusetts to delete the $54.5 million for the government in Taiwan. The same person who wrote to the majority leader and to me about the $50 million for South Korea military assistance communicated with me on his own initiative the day of consideration of the foreign aid authorization bill and said that the Department was not objecting to the proposed amendment of $54.5 million military assistance in the authorization bill for the Republic of China. Now, if his testimony is good in a letter in reference to South Korea his views to me personally on behalf of military aid to the Republic of China is also a good recommendation.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Massachusetts.

Mr. CONTE. I appreciate this. This is the first time I have heard this. It really is.

Is this not an odd way to legislate? Why not come up to our committee? Why not say something to our chairman? Why not say something to the ranking Republican member? Why not send up a supplemental? We would have passed out a supplemental like that.

Mr. GERALD R. FORD. I cannot give the gentleman the answer. I know he called me personally the day of the foreign aid authorization and indicated he did not object to the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from South Carolina (Mr. RIVERS).

Mr. RIVERS. Mr. Chairman, I favor the Broomfield amendment.

(By unanimous consent, Mr. RIVERS yielded his remaining time to Mr. SIKES.)

Mr. SIKES. Mr. Chairman, we hope to change our policies and to be able to achieve a situation where friendly nations can stand on their own feet. We are going to have to provide them with modern weapons if they are to do so. We have been too complacent about this. I believe it is preferable to send weapons, rather than having to send American boys, as we have had to do so many times in the past. That is why I support the substitute amendment. It will be a beginning.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana (Mr. PASSMAN) to close debate on the amendment.

(By unanimous consent, Mr. PASSMAN yielded his time to Mr. HALL.)

Mr. HALL. Mr. Chairman, I am not noted as a big spender or as going against the rules of procedure, but I am strongly in favor of the substitute amendment offered by the gentleman from Michigan.

I am a little tired of hearing those who decry military assistance and still insist upon keeping it as a sweetener for those who would disburse economic assistance around the world.

If this is a question of military intelligence versus State Department viewpoint, I, for one, having investigated the EC–121 incident and the seizure of the *Pueblo*, to say nothing of military assistance around the world, am going to make any error on my part in favor of protecting allies who come to our aid.

The question is not if, but when will we be sucked in to a "slaughter alley"? When will we be sucked into an incident like we were off North Korea when EC–121 was seized? It can happen in many places around the world and I do not want our men or our tried and true allies in any such "turkey shoot."

Mr. DE LA GARZA. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Michigan. I served in the military during the Korean conflict. I saw then the dedication and the devotion which the members of the military of the Republic of Korea and it's people had for the cause of freedom.

To this day I still communicate with one of those gallant soldiers. They are our stanch allies, we have no better friends. I have visited their great country not too long ago, and have seen the tremendous progress which they have made. I have had the honor to visit with their President, with their legislative leaders, with their businessmen, and with many of its people. They all expressed to me their feelings of solidarity with our country. They all expressed to me also their concern over the rapid development of the war machinery of North Korea. I saw evidence of the desires and aims of North Korea and it was not that of a peace loving group.

I have also visited with our Armed Forces in Vietnam and while there had the honor to also visit with our allies from the Republic of Korea. It was an honor to do so, and if I had to go into battle, I would be proud, very proud to have by my side any member of that group.

And now, Mr. Chairman, let me speak to the matter of Taiwan. Here again, Mr. Chairman, we have a great people, perhaps the greatest example in modern times of a freedom loving people who would not be conquered and would not surrender to Communist aggression. In that tiny island they have shown the world the strength and the determination to live as a free people while so many of their brothers, our brothers suffer the agony and the pain of Communist oppression.

I personally look forward to the day when they shall again return to the mainland and reunite all their people under a free and democratic government.

But until this is done, we must help them maintain their position in Taiwan. We must also help them, I believe, Mr. Chairman, for this other reason. While they hold out and live under the threat of the Communists, they still share their knowledge and their energy with others. They help the developing nations. I am well acquainted with the assistance they give in the field of agriculture to African nations.

So, Mr. Chairman, I very respectfully state to you and my colleagues that we have no better allies, we have no better friends, the world has no better example than these two nations of how a freedom loving people will survive and how they will resist with their last ounce of courage the Communist foe. We must stand by them, for in their own way, they stand with us.

The CHAIRMAN. The question is on the substitute amendment offered by the gentleman from Michigan (Mr. BROOMFIELD) for the amendment offered by the gentleman from Massachusetts (Mr. CONTE).

The question was taken; and on a division (demanded by Mr. CONTE) there were—ayes 113, noes 77.

So the substitute amendment was agreed to.

The CHAIRMAN. The question now recurs on the amendment offered by the gentleman from Massachusetts (Mr. CONTE) as amended.

The question was taken; and on a division (demanded by Mr. PASSMAN) there were—ayes 119, noes 82.

So the amendment, as amended, was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

(b) No economic assistance shall be furnished under the Foreign Assistance Act of 1961, as amended, to any country which sells, furnishes, or permits any ships under its registry to carry items of economic assistance to Cuba, so long as it is governed by the Castro regime, or to North Vietnam.

AMENDMENT OFFERED BY MR. GROSS

Mr. GROSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GROSS: On page 9, line 14, strike the period and insert a comma and add the following words: "or to Communist China."

Mr. GROSS. Mr. Chairman, the paragraph to which I have offered this amendment would read as follows:

No economic assistance shall be furnished under the Foreign Assistance Act of 1961, as amended, to any country which sells, furnishes, or permits any ships under its registry to carry items of economic assistance to Cuba, so long as it is governed by the Castro regime, or to North Vietnam. . . .

And I add the words "or to Communist China."

Mr. Chairman, it just seems to me that if this language is to be used elsewhere in the bill, precluding dealings with Communist China, that it certainly ought to be in this paragraph.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Louisiana.

Mr. PASSMAN Mr. Chairman, I am speaking for myself, and as far as I am personally concerned I want to commend the gentleman for offering this amendment. I have not checked this with the committee, but personally I am going to support the amendment.

Mr. GROSS. I thank the gentleman, and yield back the balance of my time.

Mr. FRASER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, as I understand the amendment it would preclude the granting of any economic assistance to any country that might have trading relations with mainland Red China. Is that the intent of the amendment offered by the gentleman from Iowa?

Mr. GROSS. The gentleman is absolutely right.

Mr. FRASER. Could the gentleman tell us what countries would be affected by this amendment?

Mr. GROSS. I do not care how many are affected by it. If the Communist Chinese are going to continue to supply the arms for North Vietnam, I do not care how many countries are affected.

Mr. FRASER. The country of Pakistan has had relations with Red China, and I expect it may carry on some trade with it.

We have given Pakistan both military and economic aid for many years.

I am wondering if the gentleman is looking at this in our national security interest. We may suddenly find ourselves unable to maintain any kind of aid relationship with the country of Pakistan. I am sure the same problem arises in connection with other countries. This is one of those emotional, demagogic kind of amendments that does not do any credit to the House if it should be adopted, and I hope it will not be adopted.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. FRASER. I yield to the gentleman.

Mr. GROSS. Is the gentleman calling me a demagogue?

Mr. FRASER. No, I am calling the amendment that kind of an amendment. I think the gentleman is a very articulate and able gentleman and has done very well here in the House, as I have observed him.

Mr. GROSS. I just wanted to make sure.

Mr. FRASER. Mr. Chairman, this is the kind of amendment that is really substantive legislation and ought to be considered by the Committee on Foreign Affairs. It is ill-conceived. It could destroy aid relationships that we might have with any country trading with Red China and there might be a few we do not know, at this point, how many do carry on some kind of trade relationship with Mainland China.

Mr. Chairman, I certainly hope this amendment will be voted down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. GROSS).

The question was taken; and on a division (demanded by Mr. GROSS), there were—ayes 83, noes 54.

So the amendment was agreed to.

Mr. ZABLOCKI. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have resorted to the pro forma amendment in order to save some time.

I want to point out to the committee that this section—General Provisions title, beginning on line 18, page 6 through line 2, page 16, provides for some 22 sections. Six of them are clearly legislation.

Very wisely the subcommittee of the Committee on Appropriations has preceded most of the sections with the technical term "None of the funds here appropriated" or "None of the funds made available" and thereby technically qualifying them as limiting amendments.

But I still want to point out there are six sections that are pure and simple legislation. As I have stated in the colloquy with the gentleman from Massachusetts (Mr. O'NEILL) during the debate on the rule, that a rule providing waiving points of order is not the proper way to legislate.

There is no point of having authorizing committees if the Committee on Appropriations will legislate in an appropriation bill.

Mr. Chairman, I had intended to submit six amendments as follows:

On page 7, line 4, strike out section 102, providing for reporting engineering and architectural fees and services at least twice a year.

On page 7, line 22, strike out section 105, reiterating opposition to the seating in the United Nations of the Communist China regime.

On page 8, line 14, strike out section 106, a sense of Congress on attempts by foreign nations to discriminate because of race or religion.

On page 9, line 15, strike out section 108, providing for reporting of overseas procurement of any commodity in bulk and in excess of $100,000.

On page 14, line 10, strike out section 119, withholding economic assistance to any underdeveloped country purchasing sophisticated weapons systems.

On page 14, line 20, strike out section 120, providing reporting by the President before furnishing development loans, Alliance loans or supporting assistance after taking into account certain policies of recipient countries regarding military purposes.

I might point out that some of the provisions I happen to agree with, but again I submit such language should not be contained in an appropriation bill. In order to expedite consideration of the six amendments, I intend to ask unanimous consent to consider the six amendments en bloc.

First, I wish to point out they were not explained by the chairman of the subcommittee. They were not even touched upon. And I doubt whether some of them could be explained.

PARLIAMENTARY INQUIRY

Mr. PASSMAN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. PASSMAN. Does not the gentleman's offer come too late, since we have already passed page 9, line 9?

The CHAIRMAN. The Clerk had read through page 9, line 14. Any amendment up to line 15 would not be in order at this time.

Mr. ZABLOCKI. I wish to offer an amendment on page 9, line 15.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 108. Any expenditure made from funds provided in this title for procurement outside the United States of any commodity in bulk and in excess of $100,000 shall be reported to the Senate and the House of Representatives at least twice annually: *Provided*, That each such report shall state the reasons for which the President determined, pursuant to criteria set forth in section 604(a) of the Foreign Assistance Act of 1961, as amended that foreign procurement will not result in adverse effects upon the economy of the United States or the industrial mobilization base which outweigh the economic or other advantages to the United States of less costly procurement outside the United States.

AMENDMENT OFFERED BY MR. ZABLOCKI

Mr. ZABLOCKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ZABLOCKI: Page 9, line 15, strike out lines 15 through line 2 on page 10, section 108.

The CHAIRMAN. The gentleman from Wisconsin is recognized in support of his amendment.

Mr. ZABLOCKI. Mr. Chairman, I regret that I was on the telephone and I was not aware that the Clerk had read through page 9, section 107. Thus I am precluded from introducing three of my amendments. The pending amendment strikes the language of section 108. This section as well as all the sections of the bill the gentleman from Wisconsin intended to amend by striking other language in the bill constitutes legislation on an appropriation measure. The other sections to which I referred earlier would be subject to a point of order if the rule waiving points of order had not been granted by the Rules Committee. Mr. Chairman, if this House is going to follow orderly procedure and if we are going to avoid some of the situations we have witnessed today, I submit that the rule should provide in order a point of order when there is legislation in an appropriation bill.

Section 108 provides:

SEC. 108. Any expenditure made from funds provided in this title for procurement outside the United States of any commodity in bulk and in excess of $100,000 shall be reported to the Senate and the House of Representatives at least twice annually: *Provided*, That each such report shall state the reasons for which the President determined, pursuant to criteria set forth in section 604(a) of the Foreign Assistance Act of 1961, as amended, that foreign procurement will not result in adverse effects upon the economy of the United States or the industrial mobilization base which outweigh the economic or other advantages to the United States of less costly procurement outside the United States.

The gentleman from Wisconsin desires to point out that these reports were not made available to the Foreign Affairs Committee. Certainly the authorizing committee should have these reports if they were requested in the past. Therefore, I suggest to the chairman of the Appropriations Committee that the provision in this section and similar such provisions should not be included in appropriation measures.

Mr. PASSMAN. Mr. Chairman, I rise in opposition to this amendment. This provision has been carried in this bill for years. All we do is require any bulk purchase over $100,000 made outside the United States be reported to the committees twice annually.

What is wrong with having these people report to the committees of the Congress twice annually on these bulk purchases? I trust the Committee will vote it down and not start taking out provisions of this type which protect the Congress of the United States and the American taxpayers.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. ZABLOCKI).

The amendment was rejected.

PARLIAMENTARY INQUIRY

Mr. YATES. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. YATES. Mr. Chairman, how far has the Clerk read?

The CHAIRMAN. The Clerk has read down through line 2 on page 10.

Mr. YATES. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I should like to get the attention of the chairman of the committee for an explanation with respect to the language that appears in subsection (b) on page 9 of section 107. I do not understand the intent of that language, which says:

(b) No economic assistance shall be furnished under the Foreign Assistance Act of 1961, as amended, to any country which sells, furnishes, or permits any ships under its registry to carry items of economic assistance to Cuba, so long as it is governed by the Castro regime, * * *

Mr. Chairman, does this mean, sells ships or furnishes ships or permits any ships—what does the language mean?

Mr. PASSMAN. Mr. Chairman, if the gentleman will yield, my friend is a very able attorney, and I am only a layman. The provision means just exactly what it says, no more and no less. If the gentleman will read it again, he can convince himself there is some sense to it.

Mr. YATES. Mr. Chairman, I point out again the preceding subsection itemizes a number of items which relate to items which are listed as indicating items that cannot be sold or transferred or carried. This section does not.

Mr. PASSMAN. Now the gentleman understands it, does he not? It means just exactly what it says.

Mr. YATES. Mr. Chairman, will the gentleman permit me to ask another question?

Mr. PASSMAN. I will answer it the same way, but certainly.

Mr. YATES. Then there is no sense in asking another question.

Mr. PASSMAN. The gentleman is absolutely correct.

Mr. YATES. That is right under the present circumstances.

Mr. HALEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I very seldom use any of the time of the committee or of the Congress, but I am disturbed about some things that are in this bill.

I should like to direct the questions I have to the chairman. I might say he probably knows more about the foreign aid program than any 100 Members of the Congress. He studies it, I believe perhaps more than he should sometimes, and I am certain he is well qualified to give answers as to what this program will do.

Mr. Chairman, I have opposed this program ever since I have been in the Congress. I will continue to oppose it. I will oppose this bill.

I believe we have disbursed $182.5 billion of the wealth of the people of this Nation on the theory that we may buy friends. We cannot buy friends. They are either our friends because of their interest or they are not.

I believe this program should rapidly come to a conclusion. Originally, as Members well know, it was started under the so-called Marshall plan, for 5 years and $15 billion. We are now way up and past that.

I do not believe that this program is doing anything toward bringing us any real friends for the United States.

I should like to ask the chairman of the subcommittee if there is any money in this program for the nation of Thailand?

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. HALEY. I yield to the gentleman.

Mr. PASSMAN. I might say to the distinguished gentleman that in the foreign aid bill the appropriations are made on an "illustrative" basis. Under the legislation they can ask for funds for a hospital in Brazil and take that money and use it to build a summer resort in Morocco and be within the law. That is a statement of fact. It is all on an "illustrative" basis.

According to the presentation to the committee there are substantial funds in this bill for Thailand in several different sections. The amounts go into tens of millions of dollars. I would have to do some research to be able to tell the gentleman the total amount of money in this bill for Thailand.

Mr. HALEY. The gentleman talks about spigots. I believe we will open another spigot with what I am about to bring before the House.

Is there any money in here for South Korea?

Mr. PASSMAN. Yes. There is substantial money in here for South Korea.

Mr. HALEY. What about Nationalist China?

Mr. PASSMAN. There is no economic aid in this bill for Nationalist China, but I may say to the distinguished gentleman there is a return aid program now, because Nationalist China is one of our cash customers. I believe in 1968 they purchased a net of about $68 million in the United States. Now money is coming in from Nationalist China.

Mr. HALEY. Of course the gentleman is well aware of the fact that we recently borrowed from Thailand $100 million.

Mr. PASSMAN. That is correct.

Mr. HALEY. Repayable at 6 percent interest. We also had borrowed from South Korea last July $15 million. And we have obtained a loan from Nationalist China in the amount of $20 million at 5½ percent interest.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. HALEY. I yield.

Mr. PASSMAN. I might say this about Nationalist China. Uncle Sam's man was going around the world trying to borrow money to build up a surplus in our international balance of payments account. They finally offered to make this loan. They should not have, because it just about emptied their Treasury.

I am not a foreign aid enthusiast. I will give the membership the fact that we gave Thailand over a billion dollars during that same period when Thailand built up its foreign exchange reserves in excess of $1 billion.

We borrowed $100 million of it back from Thailand.

If I told you the whole story—the vote

would not be unanimous on this bill. But I have to be responsive to these questions when they are asked as the gentleman is asking them now.

Mr. HALEY. However, the chairman of the subcommittee will then agree with me that what we have done here is this: We have advanced this money from our own Treasury of the United States and we have given them this money and based upon the interest that we are going to have to pay, we are subsidizing them really to the extent of $40 million, which is going to be put on the backs of the taxpayers of the United States.

So I say to the gentleman from Louisiana you open up another spigot here because we have taken money that we must go out and borrow at 7 percent or 7½ percent, our own money, and we are borrowing it back and the taxpayers must pay $40 million interest for their own money. That is what it amounts to.

Mr. CEDERBERG. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I had not intended to take any time during this debate today. As a matter of fact I have not been in the well of the House for some time. However, I sense a feeling in the House that there are a lot of people concerned about this bill and many are going to vote against it who had previously voted for it because there are certain things in this bill which are not to their liking. I hope as one who has seldom supported this legislation and I have been more often in opposition. May I say to those of you who have been of like mind to me over the years who have voted against the bill, remember this: Remember that supporting assistance for the Vietnamization of the war in Vietnam is contained in this bill.

If you think we can turn this bill down and carry on the withdrawal of our troops from Vietnam, you are wrong. This is one of the reasons that I am going to support this bill this year.

Mr. Chairman, there are many parts of this legislation that I do not like. But I think the No. 1 priority in America today is to support the President of the United States in his desire to get our troops out of Vietnam and to turn it over to the South Vietnamese, this is needed to do it. You cannot do it without the supporting assistance to Vietnam which is contained in this bill.

Now, I know a lot of people who have always voted against this bill will continue to do so. I am one who is going to change. I know a lot of people on that side who have always supported this bill but because there are some jets to go to Formosa, people who are going to hang their hat on that are going to vote against it.

Mr. Chairman, the President of the United States held a press conference last night. He indicated in that conference that there is a possibility he may within a few weeks be able to announce a further withdrawal of our troops in Vietnam.

I say to you if the House of Representatives turns this bill down today for whatever reason you want to use, I do not think the President of the United States will be able to make that announcement until this issue is resolved.

Now, there are plenty of things in this bill that I do not like. But I believe very sincerely, very sincerely, that if we are going to proceed with the Vietnamization of the war we had better support this legislation and take some of the things we do not like and get on with the job of trying to withdraw our troops from Vietnam.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 119. The President is directed to withhold economic assistance in an amount equivalent to the amount spent by any underdeveloped country for the purchase of sophisticated weapons systems, such as missile systems and jet aircraft for military purposes from any country other than Greece, Turkey, the Republic of China, the Philippines, and Korea, unless the President determines that such purchase or acquisition of weapons systems is important to the national security of the United States and reports within thirty days each such determination to the Congress.

AMENDMENT OFFERED BY MR. ZABLOCKI

Mr. ZABLOCKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ZABLOCKI: Page 19, line 10, strike out lines 10 through line 19 (Section 119).

Mr. ZABLOCKI. Mr. Chairman, the gentleman from Wisconsin is a realist. This is another instance of legislation on an appropriation bill. I know that my amendment to strike the language will not prevail, and the legislation will remain in the bill. The gentleman from Wisconsin takes this time to point up again that this section and the next section immediately following constitute legislation. As I said, I am a realist, and therefore I will not call up the amendments. The gentleman from Wisconsin wishes to reiterate that there are six sections to which I had intended to offer amendments. I had hoped that the subcommittee chairman would have explained the reasons why they are in the appropriation bill.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I will be glad to yield to my esteemed and beloved colleague.

Mr. PASSMAN. Mr. Chairman, may I say to my esteemed and beloved colleague——

Mr. ZABLOCKI. Will the subcommittee chairman explain the reasons why the various sections, 22 in all, were included in the bill.

Could the gentleman explain specifically why section 119 was included in the bill; similar if not identical language is in the authorization act.

Mr. PASSMAN. The gentleman would like to know why we put it in?

Mr. ZABLOCKI. Was the reason merely to duplicate language in the Foreign Aid Act?

Mr. PASSMAN. It was simply because the distinguished members of the Committee on Foreign Affairs are so very busy, and their bill is so voluminous, many times they have overlooked these items and we have included them in our bill.

This is known as the Conte-Long-Passman amendment. I am glad the gentleman recognizes the necessity of it, and I am glad he is willing to leave it in.

Mr. ZABLOCKI. Sections 119 and 120 of the bill before us, the so-called Conte-Long-Passman amendments, are in the Foreign Aid Act in the authorization bill.

Mr. PASSMAN. But it does not hurt to repeat it, it is just like making love to your sweetheart; you just tell her you love her over and over again. It will not do any harm.

Mr. ZABLOCKI. Then why not repeat everything in the authorization act in the appropriation bill?

Mr. PASSMAN. If the gentleman is recommending that, we will.

Mr. ZABLOCKI. I do not recommend it. I wish to reemphasize this procedure is not good and proper legislation. It is a violation of the House rules. Therefore, I submit in the future appropriation bills should not come under a rule providing points of order.

Mr. PASSMAN. I will try to be careful.

Mr. ZABLOCKI. Mr. Chairman, in order to save time, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin (Mr. ZABLOCKI) to withdraw his amendment?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 122. None of the receipts from loans made pursuant to sections 203(e) and 204(b) of the Foreign Assistance Act of 1969, or from loans made under the authority contained in the Foreign Assistance Act of 1961, as amended, or from loans made under the authority of the Mutual Security Act of 1954, as amended, shall be available to carry out the provisions of section 322 of the Foreign Assistance Act of 1969 (relating to the transfer of loan receipts to the Corporation).

AMENDMENT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CONTE: On page 15, strike out lines 19 through line 25 and on page 16 strike out lines 1 and 2.

Mr. CONTE. Mr. Chairman, my amendment quite simply would permit the Overseas Private Investment Corporation to use the money from loan repayments associated with the Alliance and Worldwide Development Loans in order to make direct loans itself.

The committee bill prevents these transfers from taking place. Thus, it prevents OPIC from making direct loans.

Earlier today, I spoke at greater length about the programs that OPIC would administer. As a result of the committee action, and the floor action in defeating an amendment offered by my distinguished colleague from Minnesota (Mr. FRASER) OPIC will not be able to engage in the insurance or the guaranty program. The reason is simple—there will not be enough money to satisfy the reserve requirements for these two programs.

I hope at least by this amendment to give OPIC part of the chance I think it deserves. Let us give it a try and see how

direct loans work out under this businesslike operation.

I urge my colleagues to join me in this amendment.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. PASSMAN. I think we should make a little legislative history on this item. This is not the reserve fund—the $75,000,000 account that we had so much confusion on today.

This limitation simply prevents the creation of a special revolving loan fund of $100,000,000 to be funded out of the development loan fund receipts. I believe the first slice is $20,000,000; is that correct?

Mr. CONTE. That is correct.

Mr. PASSMAN. I have discussed this amendment with the distinguished minority Member.

Mr. CONTE. The gentleman is absolutely correct.

Mr. PASSMAN. It is acceptable to him and I have no objection to it.

Mr. SHRIVER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. SHRIVER. Mr. Chairman, this amendment has been discussed with the minority and we are in agreement on it.

Mr. ZABLOCKI. Mr. Chairman, I merely rise to commend the gentleman from Massachusetts for once taking a piece of legislation out of an appropriation bill.

Mr. CONTE. I thank the gentleman.

Mr. PASSMAN. Mr. Chairman, I will state to the gentleman from Wisconsin that this is not legislation. This is a limitation. Let us have that understood.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I want to find out if I can from the chairman of the subcommittee (Mr. PASSMAN) whether this puts the Overseas Investment Corporation on the road. Does this get it started?

Mr. PASSMAN. OPIC was created by the Committee on Foreign Affairs. Of course, this bill must go over to the other body. I do not know what they are going to do. By removing this limitation, it simply means OPIC can draw $20,000,000 from repayments to the development loan funds. The gentleman from Iowa is well aware of the fact and I am aware of the fact that the Committee cannot have its way every time. We have to compromise and I think we have been very fortunate today not to load up this bill. Certainly, I agree; I do not think this new lending agency is needed. I hate to see it started. I think it is completely unnecessary, but since there seems to be some rather deep feelings about it, I decided that in this one instance I would go along and not object taking this limitation out.

Mr. GROSS. All right, I have supported in my feeble way as have other Members supported every move to hold the line on this bill and cut it if possible, and I intend to continue to do that. But now I must ask the question—the $64 question—is this bill going to conference and be loaded up?

Mr. PASSMAN. I can only say to the gentleman that we have never loaded up this bill in conference. You can look at the record—those of you who may be concerned about it—we do not agree to that. If the other body loads this bill, we just do not buy it.

Mr. GROSS. I am glad to have that assurance from the gentleman because with capitulation on this amendment, I am really beginning to wonder.

Mr. PASSMAN. I can assure the gentleman that when we go to conference, we are not going to capitulate. I do not want to give any statistics for the past 15 years because Members of the other body may read the RECORD, but history records what we have been able to accomplish in conference in upholding the position of the House.

Mr. OTTINGER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time to ask the chairman of the subcommittee the justification in the bill for providing $1,500,000 for supporting assistance for Haiti, one of the most repressive dictatorships in the world.

Mr. PASSMAN. That amount is in the budget and the budget is on an "illustrative" basis. It is going to be used entirely for eradication of malaria that we have been successful to some extent in eradicating in other countries around the Caribbean area and we do not want malaria to get started again in that area.

Mr. OTTINGER. I ask the gentleman whether that would come from supporting assistance.

Mr. PASSMAN. It comes out of supporting assistance.

Mr. OTTINGER. Does supporting assistance not have to do with military support?

Mr. PASSMAN. I might say that even though most people are under the impression that supporting assistance is given entirely to nations where they have a military force, that is not so. They can go into any country with supporting assistance.

Mr. OTTINGER. Mr. Chairman, it seems to me that we are fighting in Vietnam supposedly for the principle of self-determination and then we are turning around and aiding one of the most oppressive dictatorships that has ever existed in any part of the world.

Mr. PASSMAN. If I had my way, I would keep it as intended, but it has been based on an "illustrative" basis. They do not program all of these things. They say, "We may spend it here." You could actually insist that they come before our committee and justify funds for hospitals in the field. But I have never been afraid to tell the truth. And they say, "It is true, we are not going to do that." It is on an illustrative basis. I agree with the gentleman that there are some things about this bill I do not like.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. I wonder if I heard the gentleman correctly. Did he say there was $150 million?

Mr. OTTINGER. I did but corrected myself thereafter indicating the amount was $1,500,000.

Mr. LONG of Maryland. Was it $1.5 million?

Mr. OTTINGER. That is correct. I was in error.

PARLIAMENTARY INQUIRY

Mr. CONTE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CONTE. Has the committee voted on my amendment?

The CHAIRMAN. I was just about to put the question.

The question is on the amendment offered by the gentleman from Massachusetts (Mr. CONTE).

The question was taken; and on a division (demanded by Mr. GROSS) there were—ayes 91, noes 19.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

LIMITATION ON PROGRAM ACTIVITY

Not to exceed $2,537,343,000 (of which not to exceed $1,972,200,000 shall be for equipment and services loans) shall be authorized during the current fiscal year for other than administrative expenses.

Mr. MAHON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, we are at a critical time in this session. We are under a heavy mandate to finish our business before Christmas, and we are now moving along rather well. This is the last regular appropriation bill to be considered by the House for the current fiscal year. We will have a final supplemental, which will be reported Thursday of this week, and should be on the floor perhaps Friday, or certainly early next week. That will end the appropriations business of the session except for conference reports on the unfinished bills.

It would just be tragic, if by reason of misunderstanding, or otherwise, we did not pass this bill today and send it over to the other body and move toward a settlement of what shall be done about this bill. We could not afford to continue to operate on a continuing resolution.

I will say this is the lowest bill we have ever had for foreign aid. It is drastically reduced. It is reduced far below what the President had requested and not low enough in some respects. We have got to have a bill.

As the gentleman from Michigan (Mr. CEDERBERG) pointed out so well, without this legislation the President would be drastically restricted in his effort to try to do something about Vietnamization—about transferring more and more of the war effort to the fighting men of South Vietnam and from our own servicemen.

I earnestly hope there will not be a motion to recommit. If the bill were recommitted, it could throw a monkey wrench into the plans for adjournment of this session of Congress. We must move this bill to the other body for a final settlement in this session.

Mr. Chairman, this is a minimum bill. Although it contains some things I do not approve of and would not support if

brought up separately—nobody is totally pleased with it—we do have to have a bill of sorts before we adjourn, and it seems to me this is the best we are capable of doing at the moment. This is the 9th day of December. I just hope that, under all the circumstances, we will pass this bill today and send it to the other body for consideration.

Mr. BOW. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Ohio.

Mr. BOW. Mr. Chairman, I should like to advise the Chairman and the House that there will be a motion to recommit. It will be a motion to recommit with instructions, and I would like to advise the House what it will be.

On page 18, line 17, I will move to strike "$87,282,000" and insert in lieu thereof "$87,000,000."

In other words, Mr. Chairman, I am reducing the bill by $282,000.

Mr. MAHON. Mr. Chairman, in the circumstances, this seems to be a reasonable approach to the problem which confronts us.

Mr. GROSS. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, all I want to say is that the motion to recommit with instructions, as stated by the gentleman from Ohio, confirms the description by the gentleman from Texas (Mr. MAHON), that this is "a bill of sorts."

The CHAIRMAN. The Clerk will read.

The Clerk concluded the reading of the bill.

Mr. PASSMAN. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PRICE of Illinois, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 15149) making appropriations for Foreign Assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. PASSMAN. Mr. Speaker, I move the previous question on the bill and all other amendments thereto to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. CONTE. Mr. Speaker, I demand a separate vote on the so-called Broomfield amendment, providing $50 million for Korea and $54.5 million for Taiwan.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: On page 5, in line 18 insert section 504(d) and in line 21, strike "$404,500,000" and insert "$454,500,000" and, on line 23 after the word "China", add the following: "and $50,000,000 for the Republic of Korea."

The SPEAKER. The question is on the amendment.

Mr. YATES. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 250, nays 142, not voting 41, as follows:

[Roll No. 309]

NAYS—142

NOT VOTING—41

| | | |
|---|---|---|
| Anderson, Tenn. | Hays | Powell |
| Blatnik | Hosmer | Pucinski |
| Brademas | Jarman | Reifel |
| Cahill | Kirwan | Riegle |
| Clark | Kyl | Rooney, Pa. |
| Cowger | Landrum | Ruppe |
| Cramer | Lipscomb | Scott |
| Dawson | Long, La. | Tunney |
| Dingell | Macdonald, Mass. | Utt |
| Eilberg | Mailliard | Vander Jagt |
| Fascell | Mizell | Whalley |
| Flowers | Mosher | Wydler |
| Fulton, Tenn. | Moss | Young |
| Gettys | Nichols | |
| Hawkins | | |

So the amendment was agreed to.

The Clerk announced the following pairs:

Mr. Moss with Mr. Lipscomb.

Mr. Nichols with Mr. Reifel.

Mr. Clark with Mr. Coughlin.

Mr. Fascell with Mr. Cramer.

Mr. Macdonald of Massachusetts with Mr. Cahill.

Mr. Landrum with Mr. Kyl.

Mr. Tunney with Mr. Hosmer.

Mr. Young with Mr. Wydler.

Mr. Dingell with Mr. Vander Jagt.

Mr. Jarman with Mr. Utt.

Mr. Gettys with Mr. Whalley.

Mr. Long of Louisiana with Mr. Scott.

Mr. Brademas with Mr. Riegle.

Mr. Anderson of Tennessee with Mr. Mizell.

Mr. Pucinski with Mr. Mosher.

Mr. Hays with Mr. Mailliard.

Mr. Rooney of Pennsylvania with Mr. Ruppe.

Mr. Hawkins with Mr. Eilberg.
Mr. Fulton of Tennessee with Mr. Flowers.
Mr. Kirwan with Mr. Dawson.

Messrs. ARENDS, AYRES, POLLOCK, and MATSUNAGA changed their votes from "nay" to "yea."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. BOW

Mr. BOW. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. BOW. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. Bow moves to recommit the bill (H.R. 15149) to the Committee on Appropriations with instructions to that committee to report it back forthwith with the following amendment: On page 18, in line 17, strike out "$87,282,000" and insert in lieu thereof "$87,000,000".

Mr. PASSMAN. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. GROSS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 200, nays 195, answered "present"—2, not voting 36, as follows:

[Roll No. 310]

YEAS—200

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Riegle for, Mr. Bow against.
Mr. Cahill for, Mr. Jonas against.
Mr. Clark for, Mr. Lipscomb against.
Mr. Fascell for, Mr. Cramer against.
Mr. Pucinski for, Mr. Mosher against.
Mr. Eilberg for, Mr. Scott against.
Mr. Kirwan for, Mr. Mizell against.
Mr. Hays for, Mr. Kyl against.
Mr. Vander Jagt for, Mr. Utt against.
Mr. Coughlin for, Mr. Reifel against.
Mr. Fulton of Tennessee for, Mr. Nichols against.
Mr. Macdonald of Massachusetts for, Mr. Flowers against.
Mr. Young for, Mr. Gettys against.
Mr. Hosmer for, Mr. Ruppe against.

Until further notice:

Mr. Tunney with Mr. Mailliard.
Mr. Rooney of Pennsylvania with Mr. Whalley.
Mr. Landrum with Mr. Wydler.
Mr. Brademas with Mr. Hawkins.
Mr. Dawson with Mr. Powell.

Mr. CABELL, Mr. DONOHUE, and Mr. LONG of Maryland changed their votes from "nay" to "yea."

Mr. BOW. Mr. Speaker, I have a live pair with the gentleman from Michigan (Mr. RIEGLE). If he had been present he would have voted "yea." I voted "nay." I withdraw my vote and vote "present."

Mr. JONAS. Mr. Speaker, I have a live pair with the gentleman from New Jersey (Mr. CAHILL). If he had been present he would have voted "yea." I voted "nay." I withdraw my vote and vote "present."

PARLIAMENTARY INQUIRY

Mr. GROSS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. GROSS. When the pairs were originally announced, was not the gentleman from Michigan (Mr. RIEGLE) announced as being paired?

The SPEAKER. The Chair will state, in response to the parliamentary inquiry, that the gentleman from Michigan (Mr. RIEGLE) was announced as paired for. The Chair does not take cognizance of pairs.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. PASSMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days during which to extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

## CONFERENCE REPORT ON H.R. 7491, STATE TAXATION OF NATIONAL BANKS

Mr. PATMAN submitted the following conference report and statement on the bill (H.R. 7491) to clarify the liability of national banks for certain taxes:

CONFERENCE REPORT (H. REPT. No. 91–728)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7491) to clarify the liability of national banks for certain taxes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

§ 1. Temporary amendment of section 5219, Revised Statutes

(a) Section 5219 of the Revised Statutes (12 U.S.C. 548) is amended by adding at the end thereof the following:

"5. (a) In addition to the other methods of taxation authorized by the foregoing provisions of this section and subject to the limitations and restrictions specifically set forth in such provisions, a State or political subdivision thereof may impose any tax which is imposed generally on a nondiscriminatory basis throughout the jurisdiction of such State or political subdivision (other than a tax on intangible personal property) on a national bank having its principal office within such State in the same manner and to the same extent as such tax is imposed on a bank organized and existing under the laws of such State.

"(b) Except as otherwise herein provided, the legislature of each State may impose, and may authorize any political subdivision thereof to impose, the following taxes on a national bank not having its principal office located within the jurisdiction of such State, if such taxes are imposed generally throughout such jurisdiction on a nondiscriminatory basis:

"(1) Sales taxes and use taxes complementary thereto upon purchases, sales, and use within such jurisdiction.

"(2) Taxes on real property or on the occupancy of real property located within such jurisdiction.

"(3) Taxes (including documentary stamp taxes) on the execution, delivery, or recordation of documents within such jurisdiction.

"(4) Taxes on tangible personal property (not including cash or currency) located within such jurisdiction.

"(5) License, registration, transfer, excise, or other fees or taxes imposed on the ownership, use, or transfer of tangible personal property located within such jurisdiction.

"(c) No sales tax or use tax complementary thereto shall be imposed pursuant to this paragraph 5 upon purchases, sales, and use within the taxing jurisdiction of tangible personal property which is the subject matter of a written contract of purchase entered into by a national bank prior to September 1, 1969.

"(d) As used in this paragraph 5, the term 'State' means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, and Guam."

(b) The amendment made by subsection (a) of this section shall be effective from the date of enactment of this Act until the effective date of the amendment made by section 2(a) of this Act.

§ 2. Permanent amendment of section 5219, Revised Statutes

(a) Section 5219 of the Revised Statutes (12 U.S.C. 548) is amended to read:

"Sec. 5219. For the purposes of any tax law enacted under authority of the United States or any State, a national bank shall be treated as a bank organized and existing under the laws of the State or other jurisdiction within which it principal office is located."

(b) The amendment made by subsection (a) becomes effective on January 1, 1972.

§ 3. Saving provision

(a) Except as provided in subsection (b) of this section, prior to January 1, 1972, no tax may be imposed on any class of banks by or under authority of any State legislation in effect prior to the enactment of this Act unless

(1) the tax was imposed on that class of banks prior to the enactment of this Act, or

(2) the imposition of the tax is authorized by affirmative action of the State legislature after the enactment of this Act.

(b) The prohibition of subsection (a) of this section does not apply to

(1) any sales tax or use tax complementary thereto,

(2) any tax (including a documentary stamp tax) on the execution, delivery, or recordation of documents, or

(3) any tax on tangible personal property (not including cash or currency), or for any license, registration, transfer, excise or other fee or tax imposed on the ownership, use or transfer of tangible personal property,

imposed by a State which does not impose a tax, or an increased rate of tax, in lieu thereof.

§ 4. Study by Board of Governors of the Federal Reserve System

(a) The Board of Governors of the Federal Reserve System (hereinafter referred to as the "Board") shall make a study to determine the probable impact on the banking systems and other economic effects of the changes in existing law to be made by section 2 of this Act governing income taxes, intangible property taxes, so-called doing business taxes, and any other similar taxes which are or may be imposed on banks. In conducting the study the Board shall consult with the Secretary of the Treasury and appropriate State banking and taxing authorities.

(b) The Board shall make a report of the results of its study to the Congress not later than December 31, 1970. The report shall include the Board's recommendations as to what additional Federal legislation, if any, may be needed to reconcile the promotion of the economic efficiency of the banking systems of the Nation with the achievement of effectiveness and local autonomy in meeting the fiscal needs of the States and their political subdivisions.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7491) to clarify the liability of national banks for certain taxes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The Senate struck all after the enacting clause of the House bill and inserted a new text. The conferees agreed to a substitute for the entire Senate amendment.

Under the conference substitute, the House passed amendment to section 5219 of the Revised Statutes, with no change whatever in substance, will take effect on January 1, 1972. The only difference in form is that under the bill as passed the House, it was stated that for the purposes of State taxation, a national bank "shall be deemed to be" a State bank, whereas the conference substitute provides that a national bank "shall be treated as" a State bank. The change is totally without significance as to the effect of the legislation on State tax laws. The only purpose of the change is an attempt to avoid any expression of congressional intent as to whether the Federal instrumentality doctrine still has any viability as applied to national banks.

Under the bill as passed the House the amendment to section 5219 would have taken effect on January 1 of the first calendar year beginning after the date of enactment. As noted above, under the conference substitute, this amendment will not take effect until January 1, 1972. The reason for the delay is the fact that the tax laws of some of the States are built on the foundation of section 5219 as now in effect, and the delay will enable the legislatures of those States to make such changes as they deem appropriate.

In the meanwhile, section 1 of the conference substitute makes a temporary amendment to section 5219 which permits any State or political subdivision thereof to "impose any tax which is imposed generally on a nondiscriminatory basis throughout the jurisdiction of the State or political subdivision (other than a tax on intangible personal property) on a national bank having its principal office within such State in the same manner and to the same extent as such tax is imposed on a bank organized and existing under the laws of such State." In other words, the State in which a national bank's principal office is located may tax it substantially the same as a State bank, except that intangible personal property taxes may not be imposed. For the purposes of this provision, of course, the term "intangible personal property" includes cash and currency.

As previously mentioned, the tax laws of some States are premised explicitly or by implication on the present provisions of section 5219. For example, there may be a general tax of a type prohibited by section 5219, and instead of an express exemption of State-chartered banks from this type of tax, there may be a provision stating that State-chartered banks need pay no taxes not applicable to national banks. The State law may then further provide additional taxes (of a type permitted under section 5219) applicable only to banks. Thus the repeal of the prohibitions in section 5219, without any compensating action by the State legislature, would have the effect of substantially increasing the tax burden on the banks in that State. To avoid this result, while at the same time very firmly committing to the several States responsibility for their own tax policies, the conference substitute includes a saving provision to the effect that

except for sales taxes, documentary taxes, and property taxes, a tax may not be applied to a bank after the enactment of this legislation unless either the tax was applicable before the enactment of this legislation, or the State legislature authorizes its imposition by affirmative action taken after the enactment of this legislation. This saving provision is effective only until January 1, 1972.

As to taxation of a national bank by States other than the one in which its principal office is located, the temporary amendment to section 5219 made by the conference substitute limits the permissible types of taxes to sales and use taxes, real and personal property taxes, documentary stamp taxes, and license taxes, all of which are more fully and precisely described in paragraph 5(b) of the temporary amendment of section 5219 as set forth in the conference report. This temporary amendment is effective only for the period from the date of enactment to the taking effect of the permanent amendment to section 5219 on January 1, 1972.

On the latter date, States will become free to impose intangible property taxes on national banks just as they have always been free to impose such taxes on State chartered banks. Likewise, any State will be free to impose taxes on income derived within its borders by the operations of a bank having its principal office in a different State, regardless of whether the foreign bank is State or national. This has always been the law with respect to State banks. Some apprehension, however, has been expressed as to whether the expanded taxing powers might be used in a way which could impair the mobility of capital or the economic efficiency of the banking system. For this reason, the conference substitute includes a section requiring a study by the Federal Reserve Board "to determine the probable impact on the banking systems and other economic effects of the changes in existing law to be made by section 2 of this Act [the permanent amendment to section 5219] governing income taxes, intangible property taxes, so-called doing business taxes, and any other similar taxes which are or may be imposed on banks."

The Federal Reserve Board is required to transmit its report of this study to Congress not later than December 31, 1970. Thus, if the report should disclose a serious danger or deficiency in the amendment to section 5219 to take effect in 1972, the Congress would have a full session in which to take remedial legislative action. The conferees from both Houses were agreed that their respective committees would give prompt and serious consideration to any recommendations transmitted by the Federal Reserve Board as a result of its study.

## NEW ERA OF FLIGHT

(Mr. FRIEDEL asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. FRIEDEL. Mr. Speaker, the winds of change are once more upon us. A giant, new commercial air transport—the Boeing 747—has just made its transcontinental press-preview flight and will soon be operated by Pan American Airways over the air routes of the world. Many of us can reflect on the impact the first-generation jets, the 707's and DC-8's, had on air travel when they were first introduced 12 years ago. The debut of the super jet—the Boeing 747—by Pan Am on its maiden commercial flights heralds nothing less than a revolution in travel, a second coming of the jet age.

The 747 has truly been an American miracle in commercial development. Conceived only 3 years ago, the super jet became a reality when Pan American ordered the first 25. And today, under the dynamic leadership of the president and recently appointed chief executive officer, Najeeb Halaby, Pan Am has ordered eight more 747's in anticipation of growing public demand. Mr. Halaby, well known to us as former Administrator of the Federal Aviation Agency and a pilot in his own right, has summed up the merits of the new 747 quite simply, "It will be a strong, safe, reliable airplane."

I would like to include in the RECORD a recent article by Charles Yarbrough in the Evening Star describing his impressions of the 747 in flight. And, from what he relates, this new super jet is quite an airplane and will bring improved travel benefits to all of our citizens. The article follows:

[From the Washington (D.C.) Evening Star, Dec. 3, 1969]

WORLD'S LARGEST AIRLINER OPENS A NEW ERA OF FLIGHT

(By Charles Yarbrough)

NEW YORK.—Maybe a prophecy was being written as the Great Flying Machine's contrail traced a long, following shadow across the solid cloud deck 5,000 feet below.

And perhaps there was a symbol as the largest commercial airliner in the world rose through Seattle's opaque morning toward the dazzling sunshine of 33,000 feet and into a new jet generation.

Those are impressions from the flight of the Boeing 747 in its first transcontinental press preview—almost 600,000 pounds of vibrant machinery and its fuel; man, his baggage and his sustenance hurtling easily eastward at 90 percent of the speed of sound.

It was only 12 years ago that some of us sped across the continent in the Boeing 707 prototype's demonstration and assumed it to be the ultimate.

FLIGHT INTO NEW DECADE

Yesterday, as one of the 190-plus passengers aboard the 747's flight into the new decade, Boeing's Board Chairman William Allen said he had no such misconception about the old 707.

"We never achieve the ultimate."

Up until now, the awesome size of the new 747 had to suffice for most of us. Today, its comfort, performance and passenger compatability outboggle its magnitude.

It is an airplane that can cure high-level claustrophobia without leaving the feeling you're flying in a stadium. It is also an airliner, that, with a saturated capacity of almost 500, can bring woes to airports and ground transport systems.

The arrival at Kennedy airport here was enough to bring out Charles A. Lindbergh, first man to fly the Atlantic alone and now a Pan American consultant.

Here is an airplane which turns seeming incongruities into actualities.

Twelve laps through its widened aisles equals a mile.

A dozen passengers in the forward first class section get to their destination before the pilot because the flight deck above them is behind their seats in the nose.

The Wright Brothers' first Kitty Hawk flight could have been performed within the length of the 747 fuselage, but six functional and decorative galleys serve as "room dividers" to minimize its eye-straining length.

A veteran airline passenger, publisher Wayne Parrish, who averages 75,000 miles a year, was graphic enough:

"I am happy to be one of the few people in the world who sat in the 60th row of anything that can take off."

IN SERVICE SOON

The cabin of this plane is 20 feet wide, about twice that of the Boeing 707 and the DC-8. Seating is in clusters of three, four and two.

Pan American is scheduled to put the first one into service within a few months.

Beginning our Seattle-New York flight yesterday, man and machine weighed 589,630 pounds—200,000 of it fuel and 7,000 the carry-on luggage in attractive locker-type overhead racks. An official announcement on the public address system said there were 192 passengers aboard.

The sound system called frequently for someone to meet someone "in the lobby at the foot of the forward stair"—an arty spiral going to the upper deck lounge. Boeing points out that it has possibilities as a business office, a private stateroom, a private stateroom—or a luxury-lined lounge.

EYES POPPED AT PARIS

The preview airplane is the same one which brought eye-popping to the Paris Air Show a few months ago and paused at Dulles Airport long enough to permit hundreds to walk through.

Though most of yesterday's passengers were aviation oriented, it is highly probable that those who aren't quickly will become un-awed by the 747 width and walking room, or the presence of six galleys and 12 toilets.

The preview airplane (number 004 in the Boeing books) is the first of an eventual 33 on order by Pan American and a forerunner of 185 ordered by 28 of the world's airlines at more than $20 million each.

At the huge, sprawling Boeing plant near Seattle, there were 24 of them in neat array in various airline paint (350 pounds of it per plane).

"Oh, Oh Four" cruised across the Nation at 33,000 feet, encountering some clear air turbulence even at that altitude and, about an hour before beginning the descent into Kennedy airport, reached a peak ground speed of 722 miles an hour.

NO RECORD SOUGHT

The flight took 4 hours and 5 minutes. It is not a record, nor was one sought. But the 747 likely will make the trip about 45 minutes faster than a 707.

Down and rolling at Kennedy (with four hours' fuel still in the tanks the behemoth settled softly, drawing an armada of official cars out of taxiways. Workmen along its taxi route stood, stared and waved.

There was a record set: "The most miles walked in any airplane in the world."

A Pan American spokesman made a play on the company slogan as the 747 rolled to a stop: "Pan American just had another experience and we thank you for sharing it with us."

## EFFORTS TO CONTROL INFLATION BY MONETARY POLICY

(Mr. HANNA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANNA. Mr. Speaker, I would like to bring to the attention of the

House a very significant situation that I think is definitely debilitating any attempts that we have thus far made to control inflation by monetary policy.

Mr. Speaker, 3 years ago there was a little over $3 billion worth of commercial paper that was operative in the money market. Today there is over $32 billion of commercial paper in the money market.

Of this, $3 billion is due to the actions of the bank holding companies, and over $28 billion is because the corporations of America, the large corporations, are going to the money market rather than to the banks to get their money. The result is that they are bidding up the cost of money in the money market—the cost of money which the United States has to pay when it goes with its securities into that same market.

The cost of money to the States, to the municipalities, and to the various districts that are in your particular congressional districts, is going up. The result of this is that there is a shift of dollars from depositary institutions into direct investments which yield more money at these high-bid prices. The result of this is that there is less money in the banks, mutual savings banks, and savings and loan associations. The pressure is being applied by the customers of these depositary intermediaries to go to the euro dollar market for the money which cost them more, which means the prime rates are being pushed up.

I suggest, Mr. Speaker, that there are only 20 or 30 brokers who handle these issues, and there are only 200 major corporations in America bidding for the money. Let us examine the consequences of their actions which have, in the last 3 years, resulted in a 1,000-percent increase in the amount of commercial paper outstanding.

First, what are the restraints on the issuance of commercial paper by major corporations?

Theoretically, the competitive marketplace imposes a restraint on the price corporations can pay for money. This restraint is far more impressive in theory than in practice. This is so because of the lack of any meaningful price competition in most major product markets. The oligopolistic position of major producers means that they, not the market, fix prices. Their position of market dominance means that they can pass on the price of borrowing to their consumers without any reduction in corporate profits. Hence, corporations experience no meaningful restraint on their ability to pay whatever price is required to acquire the money they need. The Government now owns no ability to control the volume or rate at which corporations can issue corporate paper.

In view of the absence of effective restraints, the corporations' natural profit, motives stimulate them to seek out the money they need. The aggressive and unrestrained efforts of corporations to raise the money required to meet their needs has placed great pressure on the Federal Reserve established ceiling on the rates paid by banks on large certificates of deposit. It also exerts immense upward pressure on the prime rates fixed by banks and applying to corporate lending. By depriving the depository institutions of money they might otherwise receive, the issuers of corporate commercial paper tend to motivate the banks to ration credit through price increases which feed inflation. In addition, the competition of commercial paper issuers causes increases in the price of money to competitors, including Government issues, municipal bonds, Federal agency issues, and the instruments offered by State governments.

In short, the advent of large-scale offerings of commercial paper has significantly contributed to—in fact fed—the inflation which plagues our economy. It is ironical that this factor, so inimical to our national interest in price stability, is made possible by forces set in motion by the Federal Government. It is encouraged by a Federal tax structure which allows the corporation to use interest expenses to reduce the amount they would otherwise have to pay in Federal taxes. The use of commercial paper is also encouraged by the fact that the issuers need not admit to the same kind of rate controls imposed on significant competitors in the market, the depository intermediaries.

In a real sense commercial paper is unique. Unlike instruments issued by banks to attract funds, it need not submit to a ceiling on the rate the issuer can pay. It is also different from instruments issued by government which must—in one manner or another—pass the test of rate reasonableness. The only test on commercial paper is that of the marketplace. Such a check is, as indicated earlier, ineffective because the issuers, not the free market so dear to economic purists, control the price at which goods and services will be sold.

I suggest that this situation must be dealt with through effective Government action.

I suggest that the Federal Reserve Board should be empowered to control corporate participation in the market just as they are proposing to control the bank holding companies issuance of corporate paper to raise money in the money market.

Mr. Speaker, I hope the Members will follow my lead and support forthcoming legislation to give power to control this inflationary practice.

## FOREIGN TARIFF RESTRICTIONS

(Mr. DENT asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. DENT. Mr. Speaker, there was a historic decision made last week by the Labor Department in which it approved the payment of import damages to some 5,000 steelworkers at the rate of 65 percent of their normal week's pay. This will cost the taxpayers of the United States, not counting fringe benefits, but strictly on a wage base percentage and not counting losses to the social security system—will cost the Federal Government or the taxpayers $3,642,000 next year.

On top of that, 650 glassworkers were recently laid off, charged to the importation of glass; and the Tariff Commission also rendered a historic decision saying that it was because of imports, so they will be eligible for benefits at a cost of another $4 million this year.

The difference between exports of steel and imports of steel at this time is 17 to 18 million tons. At 7,000 men per million tons production we are faced with a possible cost of some $885 million for 1 year for over 126,000 steelworkers who have been put out of their jobs by imports.

The Germans have announced a decision on chickens that might put all the poultry growers and feed grain growers under this same type of subsidy assistance. They have announced that no chickens can be sold in the German market that have been slaughtered more than 1½ days. It takes 5 days to deliver chickens from the United States. Germany is setting the pace for our largest single market for chickens. They continue to go the route of NATO, but also they are going the route of enacting new protective actions through new nontariff barriers, and these emphatically and forcibly have barred U.S. poultry growers from shipping any chickens into West Germany.

Mr. Speaker, at the same time we are at this moment boycotting chrome and other ores from Rhodesia. The American steel producers in the United States today are paying as much as three times the price of a pound of chrome because we are buying it on the black market, and much of it from Russia.

The Russians are buying Rhodesian chrome and selling it to the United States through their agencies at black-market prices.

The price of nickel alone is going to cost the American steel plants many millions of dollars.

One steel plant in my community has already figured that their cost of production next year because of the black-market prices is going to cost them a million dollars more than they spent this year for their ingredients.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. DENT. I yield to the gentleman.

Mr. GROSS. I commend the gentleman for his statement and point out that the Russians have increased the price of their chrome 81 percent since we started buying from them.

Mr. DENT. The gentleman is exactly right.

## NIXON PRESS CONFERENCE

(Mr. MADDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MADDEN. Mr. Speaker, I hold in my hand the last Sunday edition of the Gary, Ind., Post-Tribune, which has a Christmas story from Washington, D.C., under the following headline: "White

House Decorations Go Up, Nixons Plan Big Christmas."

Over 25,500,000 Americans receiving social security will not have such a happy Christmas if the President carries out the threat against Congress which he made over the networks last night to the American people.

Additional millions of taxpayers will not have such a happy Christmas if he carries out his threat to the Congress that he will veto the meager $200 additional tax exemption which the Congress has enacted to aid the wage and salary earner during these days of rising prices, high interest, and fabulous tax exempt profits of big oil, big foundations, big real estate, and so forth. The President last night seemed to be more worried about diminishing the meager buying power of millions in this country to the excuse that the Government needs more tax money to carry out its domestic and international obligations. This administration's policy of curtailing appropriations for education, health, housing, funds for water and air pollution, highway construction, post office construction, Federal building construction, and so forth, is bringing about a premature expansion of unemployment, scarcity of buying power, and it seems we are on our way to another good old Republican depression.

You younger Members of the Congress, if you review the 12 long years of Republican administration in the 1920's, will find that these same reactionary policies of drying up income and purchasing power of millions brought on the biggest depression in our history in the early 1930's. Thirty years later, during the Eisenhower-Nixon administrations we had three major depressions which were not as serious as the early 1930's because of the avalanche of progressive legislation of Franklin D. Roosevelt and Truman and Democratic Congresses which reestablished our prosperity through social security, wages, retirement funds, pension systems, millions of independent homeowners, and protection of bank deposits.

An economic catastrophe was averted during the Eisenhower period by reason of this financial cushion of prosperity enjoyed by millions of wage and salary earners throughout the country which did not exist in 1930 to 1933.

The President's veto threat speech last night on turning the clock back by a veto threat reminded us of the old days when three Republican Presidents served under the Nation's No. 1 banker, who was Secretary of the Treasury, Andy Mellon. Under President Eisenhower we had the great banker and super-industrialist from Cleveland, George M. Humphrey, who conducted our Nation's economy and gave us three depressions with their accompanying period of unemployment and discontent and misery to millions throughout the country. When the President threatened the Congress last night with a veto of the 15 percent social security increase and the $200 increased tax exemption it could not help but remind we older folks that the Republican leaders have not learned of the failures, or else have forgoten, the old reactionary Republican policies that have proven disastrous to our economy over the last half century.

---

## THE ENVIRONMENTAL CRISIS: THE THREAT OF EXTINCTION

(Mr. THOMPSON of New Jersey asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. THOMPSON of New Jersey. Mr. Speaker, in 25 years, "somewhere between 75 and 80 percent of all the species of living animals will be extinct." That is the personal estimate of S. Dillon Ripley, Secretary of the Smithsonian Institution and a scientist in his own right.

When I first heard Dr. Ripley's statement, I thought he had gotten his figures mixed up. But no. He assured me he meant exactly what he had said: At the rate we are destroying our natural resources and pushing animals from their natural habitats, in 25 years, most animal species in this country will be extinct.

I was inclined to be skeptical at first. I asked for more information, which I have just received and which I intend to put in the RECORD. It is not the whole picture, but it is enough to realize that no one can afford the luxury of being skeptical. Twenty-five years is not a very long time.

What I think is most frightening, in terms of the challenge we have to face in order to prevent this prophesy from coming true, is that we do not have 25 years to do something about it. If 80 percent will be extinct by then, how many will be extinct in 5, 10, 15 or 20 years? Obviously, if Dr. Ripley is right, we do not have time even to be frightened.

What we are faced with is a calamity from which there is no recourse. Once a species becomes extinct, there is no regeneration, no bringing it back to life. Of course, this threat is nothing new. Conservationists have been warning us for years about the dire consequences of upsetting the balances of nature. Long ago they held forth the specter of a bleak landscape presided over by deadly silence. But that possibility seemed too distant, too incomprehensible. Not so any longer. Now the next generation, those being born today, faces the possibility.

Americans must be warned. For years we have gone about our lives, planned our futures and our children's futures under the assumption that the countryside with its mountains, forests, lakes and animals will always be there. That assumption is no longer valid. We must now realine our thinking. Once we struggled against nature; today we must struggle to preserve it.

There must be a line between "using" natural resources and "destroying" them. It is probably an invisible line, which makes it difficult to tell when it has been crossed. Unfortunately, I think we have crossed it too often in the last few decades, and now we are paying the penalty. Air and water pollution are good examples. I see nothing intrinsically wrong with drawing out natural resources to create a rich promise for a satisfying and comfortable life for Americans. But not if the bargain is trash dumps swelling and multiplying across the landscape; cities smothering in smog; lakes and waterways rendered lifeless by industrial poisons and oil leaks; and most irreplaceable of all: the species of animals being pushed to extinction.

There is nothing so valuable about the present that warrants destruction of the future. That is something we realize when we work for our children's futures to provide them with an education and material wealth. That same concern ought to extend to the condition of the land we bequeath them. If we leave them a wasteland of trash-scarred landscape, foul air, stagnant water, and no living animals aside from maybe rats, the other things we pass on are that much less attractive. That could be one big reason why today so many youths are rejecting so much of what their parents worked so hard to achieve.

Already, there are stirrings on American campuses that students are upset with the condition of our environment. I welcome their concern and applaud their awareness. One day the responsibility for running this country will be theirs, and I can think of few things I had rather see than a new generation fully conscious of the value of their natural surroundings and of the need to preserve them.

Still, there is the present to contend with: the threat of extinction of animal species and the destruction of our natural environment. We need thorough solutions, not temporary stopgaps. They must be as timeless as the laws of evolution.

Fortunately, concern is growing over the damage that has already been done to natural resources and animal life. Many dedicated people are working hard to save them, and equally hard to warn the public about the threat.

But it is an immense job. Dr. Ripley says neither the Smithsonian nor any other Government agency is equipped right now to mount the kind of program necessary to warn the American people. The alternative is chilling.

Maybe we can get by without wolves, pumas, beavers, ducks, eagles, and a lot of other species. If survival of the fittest is the rule to follow, then I fear for them—for it is clear they are not fit to live in the world we are creating. As a species I have begun to wonder if even we humans are going to survive in it.

### THREAT OF EXTERMINATION FACING MUCH OF THE EARTH'S ANIMAL LIFE

Virtually all extermination of animals in historic times has been caused by man's activities. The animals either have been killed directly, or their habitat has been so altered that they could no longer survive in it. The rate and the impact of these activities has increased more or less in direct proportion to the

increases in the human population and the level of its technology. Industrialization, agriculture, lumbering, livestock grazing, air and water pollution, and other forms of environmental change are constantly and irrevocably altering what was the natural environment, even in areas not directly occupied by man. For example, penguins and seals in Antarctica, and frogs living over 11,000 feet up in the Sierra Nevada Mountains now have significant amounts of DDT in their body tissues. As a consequence of these factors, the rate of extermination has increased almost geometrically, and the rate is accelerating each year.

Since the time of Christ, man has exterminated about 3 percent of the known species of the world's mammals. However, over half of these losses have occurred since 1900. During the past 150 years the rate of extermination of mammals has increased fifty-five fold. If exterminations continue to increase at that rate, in about 30 years all of the remaining 4,062 species of mammals will be gone.

The International Union for Conservation of Nature and Natural Resources—IUCN—maintains Red Data Books on species of living things which are rare and in danger of extinction. Today about 8 percent of the world's mammals appear in their Mammal Red Book, but the IUCN points out that for most of the world their information is so meager that they have only listed the large and conspicuous creatures, and if the information were available, the true figure would doubtless be many times 8 percent.

Information on rare and threatened species is most complete from the United States. In the "U.S. Red Book of Threatened Species," compiled by the U.S. Fish and Wildlife Service, 60 species of mammals are listed, which amounts to about 15 percent of the 395 species of mammals found in the United States, including Alaska and Hawaii, and in the surrounding waters. However, even here the information is far from complete, especially for the nearly 60 species of marine mammals, most of which do not appear on the red list but which are thought to be in danger.

The above figures refer only to mammals. Birds have certainly fared no better. The IUCN Red Book lists 320 kinds of birds on the danger list today, with the same caution that the information is insufficient and were it more complete the list would doubtless be many times greater.

Although mammals and birds often are conspicuous and are relatively well-known, new species still are being discovered. Our knowledge of the reptiles, amphibians, and fishes is far less complete, and our knowledge of invertebrates is only fragmentary. Scientists believe that only a relatively small percent of the world's invertebrates have been discovered or described as yet. According to one highly respected scientist's estimate, using current taxonomic standards, there are probably about 10 million species of organisms in the world, of which the world's scientists have decribed only 10 to 15 percent. This refers to plants as well as animals, but it does illustrate the state of our knowledge.

Further, given the present rates of extinction and increasing rates of pollution, it is estimated that most of the 80-odd percent of undescribed species will be exterminated before scientists have a chance to identify them. Examples include the estimated million species of mites, possible similar number of ichneumonid wasps, and unknown numbers of flies.

By far the largest number of existing kinds of animals are invertebrates. Although the vertebrate animals are highly vulnerable to extinction, the invertebrates are far more so. As far as we know they do and will continue to comprise the far greater proportion of animals exterminated.

Consequently, unless effective action is taken, both to protect those species and habitats directly threatened, and to avoid or reduce pollution and other forms of environmental modification inimical to animal life, a very large percentage of the world's remaining animal life faces extermination during our lifetime.

## FREEDOM FROM FORCE FOR STUDENTS

(Mr. THOMPSON of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Georgia. Mr. Speaker, today is December 9 and I have taken the liberty of deliberately attempting to arouse the curiosity of the Members over the past week as to this date in order that they would give more than passing attention to one of the most important measures confronted by the American people: the freedom from force bill.

Some are familiar with the chaos brought about in the southern schools due to the arbitrary and sometimes abusive tactics of HEW in enforcing racial balance under the guise of desegregating the schools. I have identified more than 356 schools which have been closed due to the desegregation activities of HEW and the courts. Many of these schools are practically new. The waste to the taxpayers runs into the hundreds of millions of dollars. I sincerely believe that there will be no peace in our school system so long as the rights of the children to attend their neighborhood schools is arbitrarily denied them due to their race, creed, or color, whether this decision be to promote segregation or to promote racial balance. It is just as wrong, Mr. Speaker, to force a child out of his neighborhood school and into a school more distant to promote segregation as it is to force a child out of his neighborhood school and into a school more distant to promote racial balance. Freedom to Americans, even American students, is precious.

The measure I have asked my colleagues to cosponsor will in effect eliminate the race of the student as a factor in his assignment to a school. It is time, Mr. Speaker, that we stop referring to our schoolchildren as black children and white children but simply as students. Each student, of course, should be treated equally and without discrimination. My bill does this.

The law as related to nondiscriminatory education is being unequally applied and enforced in the South and not in the North. For example, in some of the counties in southern Georgia where the racial makeup of the faculty is 70 percent black and 30 percent white, the courts have ordered that this same exact ratio shall prevail in all of the schools. Yet here in Washington where more than 99 percent of the students attend segregated schools the standards established by HEW of such requirement is not enforced. The effect of such arbitrary requirements as this, as relates to the pupils and teachers, is resulting in great numbers of resignations by white teachers and white students fleeing into private schools. The private schools oftentimes are greatly lacking in facilities. Yet the students do not like being forced out of their neighborhood schools and into other schools. As a way of showing resistance to pressure and force in their desire for freedom from coercion they have chosen to leave the public school system. This, Mr. Speaker, is a travesty on the educational system and will be very detrimental, in my opinion, to the future of the country due to the probability of an inferior education for want of adequate facilities.

Mr. Speaker, in short the measure which I have proposed will eliminate the requirements of HEW that there be no racially identifiable schools and will simply state that there should be no discrimination against any students and all shall be treated equally. Mr. Speaker, may I say that I do not accept the premise made by many that a black child in a black environment receives an inferior education and that it is impossible for him operating in such an environment to receive an adequate education. I reject this, Mr. Speaker, because to accept it is to accept the premise that the black American is an inferior American. Rather I believe, Mr. Speaker, that the answer to black education lies in being absolutely certain that if there is a school that is all black due to the neighborhood in which it is located, the students in this area are perfectly capable of obtaining the same quality of education as a white student in a white environment so long as the facilities, instruction, and effort by the teachers is equal. Let me make one point very clear. This is not to say that there should be separate but equal facilities for black but simply that if due to the neighborhood patterns, there is a black school it does not necessarily follow that this is an inferior school for as stated before to accept this premise is a slur on a great number of Americans. In closing, I hope, Mr. Speaker, that my fellow Congressmen will support this measure which I call the "Freedom From Force" bill and recognize that the rights of students not to be shoved about as pawns by social planners is every bit as dear to the students as freedom of speech is to adults.

## A DIFFERENT VIEW: ONE HOUSEWIFE PRESENTS A CONSIDERED AND DOCUMENTED LOOK AT FOOD PRICES

(Mr. TEAGUE of California asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. TEAGUE of California. Mr. Speaker, I call to the attention of my colleagues the following excerpt from the December 1 issue of the Council of California Growers' Newsletter relating to food prices:

Hardly any of the nation's food buyers . . . and certainly none of those who have been critical of food prices . . . have the clear insight . . . and good records . . . of the lady who recently wrote a letter to an Iowa newspaper.

"My recent grocery bill was over $24." But after she had deducted "59 cents, dog food" . . . "$1.79, bug spray" . . . "29 cents, paper napkins" . . . "89 cents, fabric softener" . . . "$1.59, band-aids and shampoo" . . . "$3.75, Thermos bottle and light bulbs" . . . she said that "deducting these, my groceries cost less than $16."

Examining her grocery store . . . the lady wrote that she "was amazed to discover that one fith of the area was used for what I call luxury and prepared foods. We, the consumers, pay for this preparation and we should not include the wages of a hired girl in the cost of food as such."

She said another two fifths of the store area was filled with non-food items . . . and added that "this leaves only two fifths devoted to plain foods."

This perceptive lady went on to say that she also used "prepared foods, snacks, pop and candy, and non-food items." But when she does . . . she takes the items home and then "I break the bill down into the proper categories before listing it in the household account book which I have kept since 1959."

Looking back into this excellent record . . . she wrote that "this book shows that my food bill for 1960 was $971.57 . . . and the household items, $347.98. For 1968 food cost $975.65 and household items, $752.82."

So . . . the normal shopper . . . who may keep records but does not allocate her expenditures . . . would see that her bill to the supermarket has risen 30 per cent in the nine year period. But this Iowa lady's records show that her food bill was up only $4.08 over nine years . . . while the non-food bill was more than double.

If some of our members have similar records . . . it would be interesting to make a comparison. Drop us a note.

---

## DICK ALLISON DAY

(Mr. FULTON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. FULTON of Pennsylvania. Mr. Speaker, on August 3, 1969, Neville Island of Pittsburgh, Pa., honored Dick Allison, often called the Patriarch of Neville Island. Neville Island is a fine industrial community on the island in the Ohio River, specializing in boat and barge building, steel fabrication, refining and chemicals.

Dick Allison celebrated his 86th birthday and has been a resident of Neville Island for 63 years. The whole town turned out to celebrate.

I am glad to bring to the attention of the Members of Congress and the American people the story of this fine patriotic and civic-minded man who has done so much for the citizens of Neville Island, our community, and our western Pennsylvania country as well.

It is a pleaure to read into the CONGRESSIONAL RECORD, the newspaper article from the Pittsburgh Press of July 8, 1969, as well as a copy of the resolution adopted by the board of commissioners of the township of Neville.

I am also placing in the CONGRESSIONAL RECORD the contents of the book, "This is your Life, Dick Allison," which was presented to Dick Allison by the Neville Island citizens.

I recall, with such pleasant memory, the wonderful day August 3, 1969, when the whole town of Neville Island turned out on a sunny, bright day for games, speeches from the bandstand, and tributes from everybody, young and old, to good-humored, healthy Dick Allison.

There were lots of long wood picnic tables on the field, row on row, filled to capacity with golden agers, fathers and mothers, a jillion kids, U.S. flags, as well as lots of dogs, bicycles with decorations, pretty little girls, and babies in their mothers' and dads' arms. Boy! Fried chicken, school band music, chocolate and vanilla cake, ice cream and watermelon. What a wonderful day and celebration.

### NEVILLE ISLAND SAYING THANKS TO DICK ALLISON

It's like everyone on Neville Island owes 86-year-old Dick Allison a tip of the hat.

So the tight little isle is planning to honor its "patriarch," a friend of three generations of children, with a "Dick Allison Day" on Aug. 3.

"I feel as though I've helped raise half the kids that grew up around here," he said.

Dick, of 205 N. Hubert St., is a graduate pharmacist who spurned his profession to become "a people-contacting storekeeper."

#### ONCE PRODUCE CENTER

"When I first came to Neville Island more than 60 years ago, there were swimming beaches along the Ohio River and the place was just one big truck-farm producing vegetables for the Pittsburgh market," he recalls.

He opened a combination barbecue-gas station back in 1926, then switched to a confectionery store later.

"I was Neville Island's penny-candy purveyor for years," he chuckled. "There's no better way to get to know young people than meeting them every day at the bubble-gum counter."

The Aug. 3 tribute is going to be a communitywide "thank you" for all the nice things Dick has done over the years for Neville's youth.

"You name it and he helped organize it," Francis Williams, a Neville resident and "Dick Allison Day" planner commented.

#### PRIME YOUTH ORGANIZER

"He formed the island's first Boy Scout troop, organized the high school band, and set up the youth group at the Neville Presbyterian Church."

Dick founded the Neville PTA and served 16 years on the school board.

That's just a starter.

During the Depression, he organized the island's Goodwill Club, which raised money to buy food for the needy.

"We used to sneak the food baskets into homes after dark," he recalls. "People were down on their luck but they were proud. They didn't want their neighbors to know they were accepting handouts."

Youngsters without shoes got jobs at Dick's business establishment and he persuaded other merchants to hire the needy to handle all sorts of chores.

During World War II, he founded the Servicemen's Club on the island, an organization that played host to Navy personnel which came to Neville's shipyards to pick up LSTs.

#### SAILORS ADOPTED

"We treated hundreds of sailors just as though they were our own sons," he said. Who founded the Little League on the island? Of course, it was Dick Allison.

Turnabout is fair play so there'll be every thing from commemorative Little League games on "Dick Allison Day" to a parade featuring the high school band the old-timer helped form.

"Kids grow up, you know, and a lot of us adults remember everything Dick did for us in bygone days when we were young," said Mr. Williams.

Dick's current interest?

"I'm president of the Coraopolis Golden Age Club," he explained. "Gosh, I guess that means I'm getting old."

---

### NEVILLE DECLARES AUGUST 3 DICK ALLISON DAY

The Neville Township Commissioners at their regular monthly meeting, Thursday, June 12, adopted a resolution honoring Ennis W. "Dick" Allison and declared August 3, 1969 to be known as "Dick Allison Day" in Neville Township.

The resolution is as follows:

#### RESOLUTION 241

It is the desire of numerous citizens of the township of Neville to honor one in our midst; namely Ennis W. "Dick" Allison; by declaring a day to be set aside for this purpose: the board as the official delegate of the citizens wishes to accede to the request.

Whereas, Ennis W. "Dick" Allison has given unselfishly of his time and effort in serving the citizenry of Neville Township; and

Whereas, he has also for many years served as Chairman and worker for countless Community activities, and

Whereas, he has further devoted his energies to the school and its many programs and activities, one of which was in help to found the PTA., and

Whereas, he has inspired our children through example, word of mouth and good deeds and has taught good sportsmanship in all his activities, and

Whereas, for his many contributions for our well being we do hereby declare August 3, 1969 to be known as "Dick Allison Day" in Neville Township.

Now, therefore, be it resolved that the Board of Commissioners on behalf of a truly grateful citizenry extend to Mr. Allison its sincere gratitude and deep appreciation for his untiring and diligent efforts to make Neville Island a better and happier place to live.

Be it further resolved, that copies of this Resolution be a part of the Official Records of the Township of Neville.

Adopted this 12th day of June 1969.

Board of Commissioners, Township of Neville.

GUIDO BATISTA,
*President of the Board.*

Attest: Margaret Selzer, Secretary.

---

### BOOK: "THIS IS YOUR LIFE, DICK ALLISON"

(Presented by grateful Neville Island Citizens)

On July 30, 1883 you were born in the little town of Fairview, West Virginia. You were the only child of Waitman C. and Margaret E. Allison.

Your father passed away in 1934 at the age of 82 and your mother in 1949 at the age of 89.

You attended a one-room country school in Gas Valley, known as Pittinger School.

Every day you rode your pony to school and back, a distance of seven miles. Every once in a while your pony would get a little peeved at you and throw you, and you would find yourself walking home from school.

As there were no high schools then, you went to Frankfort Springs Academy for two years—1896 to 1898. Two of your classmates at the Academy, Anna Krause and A. Dungan, still reside in this part of the country.

Your family moved to Coraopolis, Pa. in June of 1900 and resided at the corner of Fifth and Mulberry Streets. You were 17 at the time and drove a team of horses for Pugh and Curry. Then you went to work at Coraopolis Pharmacy for $2.00 per week as a delivery boy.

In 1904 you graduated from the Western Pennsylvania University as a registered pharmacist. In partnership with Dr. W. J. Stewart of Coraopolis, you bought a drug store on Fifth Avenue and went into business.

On June 20, 1906 you married Edith Gertrude Kleinman, an Island girl, and went to live at 6008 Grand Avenue, Neville Island, where with the exception of about six months, you have lived until this year—63 years in the same house.

At this time, along with the drug store, you also had a hand in drawing the first foamy root beer through a fountain. You advertised for a name for it but got none, and the next year Hires came out with the Root Beer Barrel.

You made the first ice cream cones in Coraopolis. You had a partner and a dozen girls rolling cones in the cellar. While you were on your honeymoon your partner and the cone machines disappeared and you were out of the ice cream cone business. You sold the drug store in 1907 to John Oellig.

Speaking of honeymoons, you and Edith had quite a send-off on yours. We understand some people even took the same train as you and Edith all the way to Youngstown Ohio, just to make sure you two were taken good care of.

You and Edith became the parents of three children: Edward Waitman, Harold Wayne, and Margaret Emma Allison.

You worked at Burns Pharmacy in Butler as a registered pharmacist for the sum of $37.50 every two weeks. From there you went to Chester, West Virginia, where you purchased a drug store and also managed a theater.

While living in Chester, your second son, Wayne, was born in February of 1912. Six months later you and your family moved back to the Island, to 6008 Grand Avenue.

You were sure a busy man thereafter. Upon coming back to Neville Island, you went to work at Sytes Pharmacy at Center and Herron Avenues in Pittsburgh.

After that, you operated an agency for a "tire patch" and then ended up in the used car business at 5919 Penn Avenue with Automobile Securities, the first firm to lend money on used cars. You took on an agency known as "Allison's Hills Motors" but that didn't last very long and you went to Bennett Wreckers and then back to the drug store business in Aliquippa for A. D. Klein. After that you worked for C. P. Sims, Ford dealer in Aliquippa, Pa.

In 1926 you opened the Red, White and Blue Filling Station and Barbecue Stand on Grand Avenue, Neville Island.

Your son, Edward, attended Coraopolis School and then went to Perkiomen Academy and Massanutten Military Academy.

Wayne graduated from Coraopolis High School in 1931 and went to work at Pittsburgh Screw and Bolt Corporation on Neville Island immediately after graduation.

Your daughter, Margaret, graduated with the first class from Neville Township High School in 1937 and attended Grove City College for four years.

In the early thirties you organized the Good Will and Moni Clubs. These organizations were formed to provide food for needy persons on the Island. Mrs. Frank Parsons was the first president of the Good Will Club. Some of the other members at that time were Mrs. Jake Esau, Mrs. William Rushby, Mrs. Ralph Moore, Mrs. Lewis, Mrs. Virginia Hinkle, Mrs. William Waters, Mrs. William Easton, Mrs. Beatrice Brough, and Messrs. Frank Parsons, James Woods, John Worgan, and Edward Martin. You were also a President of this Club.

Members of the Moni Club included James Woods, John Worgan, Frank Parsons, Alex Henk, Edward Martin, and E. J. Clancy.

At that time money was very scarce. There was none even for school picnics and a group of men and women would meet at the school at 3 or 4 o'clock in the morning before the picnic and pack lunches for the children to eat at the park.

Then came the great 1936 flood. The water rose to about eight feet in your first floor. Grand Avenue in front of your house was just like another river. In fact, the only way anyone could get on or off the Island was by boat. After the high water receded, you will remember that a truck load of food was sent here from a little church back of Sewickley and with the help of several school girls, you supervised the distribution of this food to those who needed it. At this time you were Custodian at Neville School and supervised boys from the school moving everything from the shop and basement to higher ground for 25¢ an hour.

You were a member of the School Board when the new High School was being built and fought for Neville all the way. You were a member of the Neville Township School Board for sixteen years.

Your daughter, Margaret, was Valedictorian of the first class to graduate from Neville Township High School.

Then came World War II. You didn't work for three years at this time but helped raise money to send packages to local boys in the service. You belonged to an organization known as the Service Men's Association, along with Mrs. Grace Ridosh, Mrs. Jack Wiley, Mrs. Julia Bereza, Mrs. Virginia Hinkle, Mrs. Steve Kosko, Mrs. William Easton, and Benny Reuben. Every week this Association sponsored card parties to raise money to send candy, etc., to boys in the service. After the war the money remaining in the treasury was used toward engraving names of service men on the monument here on the Island.

Your son, Edward, served with the Military Police Platoon in the Third Army in France and Luxemburg and was awarded the Bronze Star Medal for heroic service while overseas.

Your son, Wayne, served with the U.S. Army Air Force and was stationed on the Island of Guam.

It was a happy day in your life when both boys returned home safe and sound.

For many years you were a member of the Boy Scout Committee with Vern Gillock as Scout Master. All your life you have enjoyed working with and for the younger generation. The young girls and boys seem to have a special place in your heart.

You helped found the P.T.A. on Neville Island and were instrumental in seeing that the Neville School Cheerleaders had their first uniforms. These were hand sewn by Mrs. Sidum. While a member of the P.T.A. you supported them in influencing both the School Board and the Township to work toward supervised recreation in the summer months. This was the first supervised play program on the Island.

While a member of the School Board you were responsible for getting the students to work at the school in the summer instead of contracting the work to outsiders.

You also helped with the program of getting our football squad to Camp.

You have been an active elder in the Neville Island Presbyterian Church almost continually since 1932.

At one time the Church sponsored a softball and basketball team. After the regular basketball season was over, you sponsored, on your own, a team in the Tri-State Tournament in East Liverpool, Ohio. You took care of all the expenses and even though your teams never won the championship they were always in the semi-finals.

You have been active in all civic affairs on the Island for many, many years. Even today, you attend all school functions and can be seen at all football games.

You were a member of the first Planning Committee organized for zoning Neville Island.

On November 28, 1952 your family suffered a great tragedy. Your daughter, Margaret, her husband Sam, and your grandson, Sammy, were killed in a plane crash at Tacoma, Washington, while enroute home from Fairbanks, Alaska, where they had been stationed in the service. Crushing as this blow was, you were still able to bounce back and keep going, perhaps because of your great faith in the One above, and the fact that you were so active in everything that went on in this community helped you through this trying time by keeping your mind on others and their problems rather than your own.

On June 20, 1956 you and Edith celebrated your Fiftieth Wedding Anniversary with a family dinner and Open House. Many of your friends stopped by to extend their good wishes. It was a day to remember.

In June 1965 another sorrow had to be borne by you. In that year your beloved wife, Edith, passed away. Here again, however, you realize that life must go on regardless of what trials await us and you forced yourself to keep active and interested in your surroundings.

At the present time you are President of the Golden Age Club of Coraopolis; active in Boy Scouts; a committee member of the P.T.A.; an active elder in the church; and an Honorary member of the Lions of America.

You now reside at 205 N. Hubert Street, having had to vacate your home (after 63 years) because of the new bridge being built over the Island. The wheels of progress keep turning and we must move with them.

Your son, Edward, lives with you and is a Deputy Sheriff for the County of Allegheny, working out of the Pittsburgh Office.

Your son, Wayne, is married to the former Grace Bennett, and they have one daughter, Linda, who is 14. Wayne works for the U.S. Corps of Engineers on Neville Island and he and his family reside at 211 N. Hubert Street.

Your grandson, Eddie, and his wife, Josephine, and their two children, Alicia and Eddie, Jr., live at 207 N. Hubert Street. You have three great grandchildren living in San Francisco, California—Kenneth, Cynthia, and David.

We believe you are a fortunate man, Dick, to have practically all your family living near you right here on the Island—2 children, 2 grandchildren, and 5 great grandchildren in all.

---

CELEBRATION IN HONOR OF DICK ALLISON—SUNDAY, AUGUST 3, 1969

(Excerpts from Sunday program of The Neville Island Presbyterian Church, First Street, Neville Island, Pittsburgh, Pa. 15225: *Commit thy way unto the Lord; trust also in Him; and He shall bring it to pass*—Ps. 37.5. Enter to Worship—Depart To Serve)

The Chancel Flowers are in honor of Mr. Ennis W. Allison for "Dick Allison Day" today, proclaimed by the community. Flowers are from the Session, the Allison Family, Church Organizations and friends.

Congratulations are extended to Mr. Ennis W. Allison on this particular day by the members of the Session. We thank you for your many years of being a member of this church and for the many years of being an Elder. Your faithful service is acknowledged

and greatly appreciated by the congregation. God Bless You, "Dick Allison."

The Community has planned a Parade and other events throughout the day and all are invited to participate in the celebration of "Dick Allison Day" today.

The Chairman of the General Committee for "Dick Allison Day" is Mr. F. C. Williams. Chairman of the Church Committee is Mrs. Richard Davis with Mrs. Grace Allison's assistance and cooperation of the Elders.

MORNING FESTIVITIES

11:00 A.M.—Church Service at Neville Island Presbyterian Church, Rev. Austin V. Hunter.

12:15 P.M.—Closed Luncheon for Allison Family, Clergy, and invited guests.

*Special groups attending Church Service include*

Coraopolis Womens Golden Age; Coraopolis Mens Golden Ave; Neville Island Boy Scouts Troop 533; Neville Island Cub Scouts Pack 373; Neville Island Board of Commissioners; Neville Island School Board; Neville Island Police, and Neville Island Firemen.

AFTERNOON FESTIVITIES

1:30 P.M.—Form Parade at Dravo Light Metals Plant Parking Lot, South Side Grand Avenue.

Free Balloons & Stickers.

2:00 P.M.—Start Parade to Neville Island Recreation Hall, Neville School Marching Band.

Dignitaries in cars: N. I. Fire Fighting Equipment; Civil Defense Aux. Truck; Friends Marching; Ballons Flying.

Everyone Singing "For He Is A Jolly Good Fellow", "Happy Birthday".

2:30 P.M.—Three Inning Ball Game Upper N.I. vs. Lower N.I.; Footraces—Relay Races; Wheelbarrow—Shoe Races; Three Legged—Piggyback Race, and Softball Throw.

4:00 P.M.—Concert Neville Island School: Stage Band; Boat Parade; and Greater Pittsburgh Aquatic Club.

EVENING FESTIVITIES

5:00 P.M.—Picnic Supper: Share your table and food with friends and neighbors of Dick Allison.

6:00 P.M.—Presentations to Dick Allison.

Welcome: F. C. Williams.

Resolution: Guido Batista.

Civic Presentations: Boy Scouts of America; Lions Club, etc.

Short Congratulatories by Dignitaries.

"This Is Your Life", Reading by Michael Raddick.

Closing Song & Prayer by All.

The "Dick Allison Day" Committee thanks everyone who participated in this wonderful celebration. Those who served in any capacity deserve a special thanks, they were so numerous we can't possibly list them all.

## NIXON ADMINISTRATION SUPPORTS TITLE II REPEAL

(Mr. MATSUNAGA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MATSUNAGA. Mr. Speaker, it was indeed welcome news that the Nixon administration announced its support for legislation to repeal title II of the Internal Security Act of 1950.

This favorable nod by the administration gives added impetus to the move to expunge the disgraceful Emergency Detention Act from our law books. The Senate Judiciary Committee has already reacted by reporting favorably on the Inouye bill to repeal title II. Favorable floor action by the other body is expected within this week.

I know that the more than one-fourth of the members of this House who have joined with me in cosponsoring similar legislation to repeal the concentration camp authorization law, now join me in urging early hearings on this legislation by the House Internal Security Committee. There is no legitimate reason for any further delay.

## NEW MOBILIZATION COMMITTEE TO END THE WAR IN VIETNAM

(Mr. ICHORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ICHORD. Mr. Speaker, on several occasions I have expressed my grave concern about the activities sponsored by the New Mobilization Committee To End the War in Vietnam—New Mobe. On November 4, 1969, I placed in the CONGRESSIONAL RECORD a staff study prepared by the House Committee on Internal Security which I chair. The study disclosed that the leadership of the New Mobe is top-heavy with known Communists and their sympathizers, including members and partisans of both the Communist Party, USA, the Trotskyist Socialist Workers Party and the Communist youth front, the Young Socialist Alliance. The conspicuous Communist presence at major planning sessions of New Mobe indicates Communist manipulation, exploitation, and subversion of the protest movement against United States involvement in Vietnam. Further, the study disclosed that several national leaders of the New Mobe were among the delegates to the World Peace Assembly held in East Berlin during June 1969. That Assembly was sponsored by the World Peace Council, an international Communist front financed from Moscow.

The Communists are thriving on the aid and comfort realized from supporters in the United States and other Western countries. Spokesmen for Hanoi and the Vietcong have been hailing the so-called progressive elements in this country for launching a broad and powerful offensive to demand that the U.S. Government put an immediate end to the Vietnam war. As our enemy, they have every right to be grateful.

Now, the New Mobe has called a meeting of its leaders for Cleveland, Ohio, this weekend to discuss plans for future activities. New Mobe, which was organized in Cleveland last July 4, originally was intended to disband after the November mass march on Washington, D.C. However, dissatisfaction with the lack of militancy and vigor of the Vietnam Moratorium Committee apparently has persuaded the New Mobe to remain active. It is expected that at the meeting this weekend, set for December 13 and 14, the members of New Mobe's steering committee will ratify a decision by the group's executive committee that New Mobe be continued. Also to be discussed are detailed plans for new antiwar demonstrations. Among the possibilities that are to be discussed are "decentralized" demonstrations directed toward industrial suppliers of war materiel.

Another example of the closing of the ranks of New Mobe and the Communist Party, USA, took place at a New Mobe leadership meeting held in New York City on November 22, 1969. At that time Arnold Johnson, the national public relations director of the Communist Party, USA, was named to the executive committee of the New Mobe. Johnson had been a member of the steering committee of the New Mobe since its inception.

Meanwhile, the efforts by some groups to show their support for our enemy in the guise of seeking "peace" continues unabated.

On November 29, 1969, Cora Weiss, one of the cochairmen of the New Mobe, left the United States en route to Hanoi. Traveling with Miss Weiss are Madeline Duckles of Berkeley, Calif., and Ethel Taylor of Philadelphia, Pa., both of whom are leaders of the Women Strike for Peace, an organization represented by Miss Weiss on the steering committee of New Mobe. It is significant to note that Dagmar Wilson, a leader of the Women Strike for Peace, has publicly proclaimed her sympathy for the North Vietnamese forces.

Mr. Speaker, I cannot help but think that among the many individuals participating in the activities sponsored by the New Mobe are those who would withdraw if they knew just how much they are aiding Hanoi and the international Communist movement.

## GUARANTEED ANNUAL INCOME FOR TAXPAYERS

(Mr. RARICK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RARICK. Mr. Speaker, the question of the "guaranteed annual income" is in the news again this week, both from the White House and from the other body.

First, the current White House Conference lived up to its advance publicity by recommending a guaranteed annual income—sometimes referred to as a negative income tax—of something like $5,500 for a family of four. The President, demonstrating his essential conservatism, recommended to the Congress a much lower figure of only $3,900 per annum.

Second, the other body amended our tax reform bill to increase the personal and family exemption, over a period of 2 years, from $600 to $700 then to $800. For a family of four, this would mean an increase from the present $2,400 to $2,800 in 1970 and to $3,200 in 1971. The President, again demonstrating his essential conservatism, let it be known that such a drastic tax reform would be highly inflationary and could well result in his veto of the whole tax reform measure.

Mr. Speaker, I am in favor of a guaranteed annual income for productive Americans.

I will support legislation guaranteeing to such citizens total freedom from Federal seizure of as much as $4,800 of their earnings each year. I have introduced legislation to that effect earlier in this Congress.

I am unalterably opposed to a guaran-

teed give away to the relief rolls, whether it is called an annual income or a negative income tax.

The American people, who are carrying the load, have a very clear understanding of two simple facts, which I call to the attention of this House.

First, if the spending of a dollar is inflationary, it makes no difference who spends it. The argument just will not sell that to take that dollar away from the man who has earned it and give it to the man who has not works some kind of black magic so that its spending becomes noninflationary.

Second, the finest kind of guaranteed income would be a very simple guarantee that the Federal Government would keep its hands off—would cease confiscating—enough of a man's earnings for him to make at least a minimum decent provision for his family. If it is proper to present to the nonproductive a gift of either $3,900 or $5,500 per year for a family of four, it is certainly proper to keep our hands away from the same amount of money earned by the productive citizens.

If fear of swelling inflation is grounds for denying the working taxpayers a long overdue exemption increase, how can the President overlook the inflationary effect of his guaranteed minimum income program?

---

## NATION'S SYSTEM OF MILITARY JUSTICE—PARTICULARLY WEAKNESSES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 15 minutes.

Mr. WHALEN. Mr. Speaker, the military court-martial held at the Presidio and the aborted Green Beret proceedings in Vietnam have served once again to bring to the attention of Congress this Nation's system of military justice, particularly its weaknesses. No doubt the court-martial stemming from the alleged Pinkville massacre will accentuate further the need for reform.

Gen. George Decker, former Army Chief of Staff, has stated:

> No single factor has a greater tendency to destroy public confidence in the (court-martial) system than allegations of command influence

As you will recall, this charge of "command influence" was present not only in the Presido and Green Beret cases, but also there are indications that it may have prevented the Pinkville massacre allegations from surfacing for more than a year and a half.

Because it was my constituent who was killed at the Presido, I was deeply involved in that case. As a result of that involvement, I became very familiar with many of the deficiencies of the present military justice system. Fortunately, the Secretary of Defense already has appointed a group to study stockade practices. However, it is the responsibility of Congress to revise the court-martial code, the procedures through which servicemen are confined to stockades.

It is for this reason that on November 26 I introduced H.R. 15016. This measure is designed to improve the judicial machinery of military courts-martial. First, it removes defense counsel and jury selection from the control of a military commander who convenes a court-martial. Second, H.R. 15016 creates an independent trial command for the purpose of preventing command influence or the appearance of command influence from adversely affecting the fairness of military judicial proceedings.

Last year Congress enacted Public Law 90–632 which requires each service to establish separate commands for military judges. H.R. 15016 incorporates the military judges command into the Military Trial Command which also has divisions for defense counsels and court members. The Command will be divided geographically into judicial circuits, each of which will be headed by a circuit judicial officer. The bill further stipulates that members of the Command will be under the supervision, direction, and control of only the superiors within the division, the circuit judicial officer, and the Judge Advocate General. In addition, the prohibition which prevents the convening authority or any member of his staff from preparing or reviewing any report concerning the effectiveness, fitness, or efficiency of the military judge is extended to defense counsels.

While the assignment of judges and court members by the circuit judicial officer is applicable only to general courts-marital, the bill provides that, subject to regulations of the Armed Forces Secretaries, the circuit judicial officer also may assign them to special courts-martial. Defense counsels will be assigned for both general and special courts-martial.

However, this legislation will not interfere with the convening authority's control over the prosecution of a case.

Mr. Speaker, I believe, as General Decker stated, that command influence can destroy public confidence in the courts-martial system. H.R. 15016 will be a first step in preventing this, and hopefully, it will restore faith in the system.

On December 3 the distinguished Member from Illinois (Mr. PRICE), with whom I serve on the Armed Services Committee, introduced H.R. 15074, a bill identical to H.R. 15016. Today 26 of my colleagues are cosponsoring this legislation. In listing their names here, I would like to thank them for their support. The cosponsors are: Congressmen ASHLEY, BIESTER, BINGHAM, BOLAND, BURTON, CONYERS, DIGGS, EDWARDS of California, LEGGETT, LOWENSTEIN, MCCLOSKEY, MIKVA, MOSHER, MOSS, OTTINGER, PUCINSKI, RAILSBACK, REES, ROSENTHAL, ST GERMAIN, SCHEUER, STAFFORD, STOKES, TAFT, CHARLES H. WILSON, and YATES.

Mr. ASHLEY. Mr. Speaker, today I am joining with several of my colleagues to introduce a bill designed to improve the judicial machinery of military courts-martial by, first, removing defense counsel and jury selection from the control of a military commander who convenes a court-martial and by second, creating an independent trial command for the purpose of preventing command influence or the appearance of command influence from adversely affecting the fairness of military judicial proceedings.

The commanding officer's control of the court-martial proceeding is the factor in the court-martial system which is most likely to produce an actual obstruction of justice or to scar the appearance of justice. As past Army Chief of Staff Gen. George H. Decker has stated:

> No other single factor has a greater tendency to destroy public confidence in the (court-martial) system than allegations of command influence.

The cogency of General Decker's observation was vividly illustrated by the recent public and congressional outcry caused by the suggestion that the court-martial proceedings in the case of the Green Berets were laden with command influence. One might recall that the Green Berets defendants charged that their impending trial could not be conducted in a setting free from bias because of the commander's personal interest in the outcome of their case and petitioned to have their trial removed from his command.

Moreover, the implications of command influence in the recent Presidio mutiny trials produced a similar public reaction including a petition to the Secretary of the Army signed by 45 members of the Harvard Law School faculty asking "whether the intense command interest in prosecuting these soldiers for serious crimes and the unusually severe sentences indicate that the court-martial proceedings did not result in a fair and impartial trial."

Opportunities for a commander to unfairly influence the course of a military trial are inherent in the nature of the military system. The commanding officer who convenes a general court-martial not only has the power to select the counsel for the prosecution but also the power to select the counsel for the defense and the members of the court as well. Moreover, because he selects these participants from his own command, he retains over them the awesome power to affect their efficiency reports, duty assignments, promotions, and transfers.

Surely such singular control over both sides of a criminal case as well as over the triers of fact is inconsistent with the basic principle of judicial impartiality as applied to our civilian courts.

While I firmly believe that this power is rarely abused, the basic structure of court-martial machinery remains an incubator in which improper court-martial influences are innocently and inadvertently bred. So long as the commanding officer retains his appointive and career determining powers court-martial personnel will remain sensitive to the practical realities of military life. As the Court of Military Appeals has noted:

> Courts-martial are manned by officers whose opportunities for advancement and promotion are controlled largely by their commanding officers and it is no reflection on their honesty and integrity to conclude that they desire to make a fine record.

In the same vein, court-martial participants are not oblivious to the risks

inherent in performing in a manner which displeases or is not in accordance with the interest of their military superiors. In this atmosphere, rumors, however unfounded, of the commanding officer's desires in the matter are not likely to go unheeded. And even when the commander in no way seeks to influence the participants, their court-martial performance may well be affected by a conscious or subconscious desire to do that which they presume will please the commander.

Recently, the American Bar Association, the American Legion and the American Civil Liberties Union have called for changes in the court-martial structure that would insulate key court-martial personnel from the influence of the commanding officer and erase the appearance of one-sided partiality.

The calls for reform have not gone unheeded by Congress. In 1948 Congress enacted legislation which criminally proscribed attempts to coerce or unlawfully influence actions of a court-martial. Further, in the Military Justice Act of 1968, Congress established an important safeguard against command influence by creating an independent judiciary of military judges who are completely insulated from the control of the local commanding officer.

Yet the problem of command influence over court-martial proceedings remains in the commander's power to select the defense counsel and his power to appoint and affect court members.

Command authority over the defense counsel represents the most serious weakness of the military judicial machinery. The basic problem is that the defense counsel operates in the same office as the prosecutor and under the direction and control of the staff judge advocate, whose primary responsibility is to assure that the interests of the commander, including his disciplinary interest, are preserved.

So long as the defense attorney remains a part of the military hierarchy responsible for preserving military discipline, he will be deprived of his traditional freedom of action in preparing a client's defense—and that freedom is the best assurance of fairness in any criminal proceeding.

The second obstacle to court-martial fairness is the commander's authority to handpick the members of the court. The inherent vice of this system is that it creates an appearance as well as the occasional fact of the commanding officer stacking the court with members who he believes will support his disciplinary policies and convict the accused.

Any system inviting abuse is as inimical to the appearance of judicial impartiality as an actual showing of abuse. If trials are to be impartial and to appear so, the selection of court members must be removed from the control of the commander and vested in an independent authority.

It is for all the above reasons that I am introducing this bill to prevent command influence or the appearance thereof from adversely affecting the fairness of military judicial proceedings. The bill would remove defense counsel and court member selection from the control of the military commander who convenes a court-martial and place these functions under the control of an independent trial command, along the lines of the independent judiciary which was created by the Military Justice Act of 1968.

I think that the bill strikes a balance between the legitimate interest of the military in preserving discipline and the interest of procedural due process. Thus, while the bill removes defense counsel and jury selection from command control, it does not interfere with the convening authority's control over the prosecution of a case.

With the implementation of this system, defense attorneys and court members will join military judges as independent operators in a court-martial proceeding, responsible only to their superior officers who are not responsible to the commanding officer who convenes the court-martial.

I firmly believe that this system will go a long way toward extending to our fighting men the democratic principles that they are so bravely fighting to preserve. I urge the Committee on Armed Services to give this proposal the closest scrutiny at the earliest possible time.

## SUPPORT FOR PRESIDENT NIXON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. RHODES) is recognized for 5 minutes.

Mr. RHODES. Mr. Speaker, those of us who support the President of the United States in his efforts to bring about a just peace in Vietnam, end inflation and reduce crime and drug usage here at home are encouraged to find that as the days go by increasing numbers of Americans join in that support.

I wish to call to my colleagues' attention the results of a Columbia Broadcasting System poll. The poll, conducted by telephone, found that 81 percent of the people are satisfied with the way the President is handling his job.

Eighty-eight percent identify with the silent majority on the issue of Vietnam, 73 percent approve of his efforts to end inflation, 77 percent like his law enforcement efforts, 73 percent agree with him on his handling of urban problems and 74 percent are in accord with his actions on race relations.

It is polls like this and like the recent Gallup poll which showed his popularity at 68 percent that perhaps have led a leading Democratic authority to predict an overwhelming victory for President Nixon were he to seek reelection today.

Richard Scammon, one of the Nation's top experts on polling and public opinion and a former Census Director, says Nixon would carry 48 States. James McCartney, writing in the Miami Herald, quotes Scammon as saying "right now Nixon has a massive majority behind him on Vietnam. And I choose the word 'massive' with care. Nixon would win by a larger margin right now than Lyndon Johnson had in his landslide victory over Barry Goldwater in 1964."

It appears, Mr. Speaker, that the country has indeed rallied around the President.

## LIEUTENANT CALLEY AND THE INCIDENT AT PINKVILLE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama (Mr. EDWARDS) is recognized for 10 minutes.

Mr. EDWARDS of Alabama. Mr. Speaker, already the slow, premeditated trial of Lt. William L. Calley and his men has begun. Testimony is being heard. Eyewitnesses are being questioned. The jury—in this case, the American and world public—is deciding the case. And yet, the court has not even convened.

I am not going to pass judgment on the guilt or innocence of the lieutenant here today. I do feel, however, that a protest must be raised over the premature trial and verdict of a man who, by all standards of American jurisprudence, is still innocent until proven guilty by a court of law.

The headlines in the papers use such as "Viet Killings" and "Massacre" without any prefix such as "alleged." Radio and television commentaries talk about the massacre in a Vietnamese village or the killing of unarmed citizens, but not about the possibility that it might have been a legitimate act of war, an attack on a Communist stronghold. If the press is not careful in its zeal for the spectacular, it will have this case decided before it ever gets to trial.

The South Vietnamese Government has conducted an investigation and found the charges to be incorrect. But in the eyes of some, the South Vietnamese, who are our allies, are not to be trusted. Yet, we must remember that those in Vietnam who are yelling the loudest and charging the United States with the greatest guilt are the Communists—North Vietnam and the Vietcong. "Pinkville," as it was called, was well known as a Vietcong stronghold. So let us be cautious in throwing charges at our own boys until we know all the facts.

Statements by men of Calley's platoon, some of whom admit a dislike for the lieutenant, receive big play at the hands of the news media men. They seek out a controversial news story regardless of the possible cost to a man's reputation and a country's credibility. Many of these men, who were asked to refrain from commenting on the case by the Department of the Army for the sake of conducting a fair military trial, have disregarded this basic precept of American law.

Frankly, I question the motives of an Army photographer who allegedly *sold* Army photographs to the highest bidder.

Why are these people so quick to assume the worst? So quick to assume that the alleged atrocities must have been committed? We must question all of the circumstances surrounding the attack. We must not be too quick to condemn. We must search out all of the evidence. We must not conduct a kangaroo court in the front pages of the papers and during the prime time of the television and radio news shows.

The press has a great responsibility in reporting the news. Not only should the news be properly reported, but it must be done, in my opinion, in such a way so as not to prejudice a defendant's case.

When a hot issue such as this comes along, responsible journalism is really put to the test.

Consequently, the prudence of some headline writers and some headline seekers must be questioned when they bypass the normal American manner of trying a person by court of law. The facts must be fairly given and all stories should be thoroughly checked out.

Above all, we must not forget, as Gen. William T. Sherman said, that "war is hell." Neither can we forget what the Communists in Vietnam have done to thousands upon thousands of community leaders, and innocent civilians, men, women and children, over the last few years. It has been Communist policy to kill innocent civilians, to terrorize the populace into supporting the Communist cause. This is not the policy of the American Government, or our Armed Forces, and it never has been our policy. All of this should be reported so that we can maintain a proper perspective as we consider the actions of some of our men in Vietnam.

Freedom of the press is as American as apple pie. But so is responsible use of that freedom.

Lieutenant Calley and any others charged must be granted a fair, unbiased hearing in a proper court of law. Once the trial is concluded, then the press is free to condemn the man's guilt or acclaim his innocence as the case may be—but not until then and in any case, we must not tolerate a condemnation of our whole country for what may have been the act of a few.

## BILL TO SET REASONABLE LIMITS ON ACCEPTABLE MARKET PENETRATION BY IMPORTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. SCHWENGEL) is recognized for 10 minutes.

Mr. SCHWENGEL. Mr. Speaker, with some reluctance, I introduce today a bill which seeks to set reasonable limits on the acceptable market penetration by imports so as to prevent them from overrunning our industry.

The Fair International Trade Act of 1969 which I am introducing today, will accomplish this objective, and will at the same time guarantee to foreign manufacturers an opportunity to participate in any future growth of our domestic consumption.

The problem of competition from low-cost goods manufactured in countries having low wage scales was brought to my attention forcefully by one of my constituents, long a manufacturer of work gloves within my district. It was called to my attention that imports of leather-palm work gloves, made of leather and canvas, have grown so steadily during the past 5 years that in 1968, such imports represented 34.8 percent of the domestic shipments of the same gloves. Back in 1964, imports of these gloves amounted only to 5.7 percent of the domestic production of the same gloves. And this trend has continued into 1969. Imports of these gloves during the first 8 months of 1969 were 83 percent higher than they were during the first 8 months of 1968.

I cannot help but sympathize with a situation such as this. During the last war, gloves were placed on the critical list, and there were not enough to supply the industrial and farmworkers. The War Production Board allocated gloves to important industries, leaving the consuming public practically without any supply.

Gloves are still on the critical list, and if this industry were to be destroyed by this low wage competition which is impossible to compete against, we could find ourselves in a difficult time during another emergency. I am, of course, interested in maintaining international trade on as free a basis as possible. But survival of these industries producing critical goods are definitely a matter of grave importance to the citizens of our country. Consequently, I am introducing this fair international trade bill and I join my numerous colleagues who have already introduced identical bills in asking support of a bill which might well be called a live and let live bill.

## TAKE PRIDE IN AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of Ohio. Mr. Speaker, although the United States is not the only or even the oldest federal union of states in the world, is the first to operate successfully a federal system on a large and continental basis. This has been one of America's major contributions to the art and science of government.

## TELL IT TO HANOI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. BELCHER) is recognized for 5 minutes.

Mr. BELCHER. Mr. Speaker, this week one of the finest organizations of young people in this country, the Young Americans for Freedom, is carrying out a major, nationwide counterattack on the so-called Vietnam war moratorium.

There is no question in my mind, Mr. Speaker, that regardless of how many well-meaning, Christian citizens may participate in these moratorium activities—and I know there are many who fit that description—the organization effort behind these demonstrations comes basically from disruptive and destructive Communist and leftist-oriented individuals and groups. Regardless of their good intentions and regardless of the unfortunate fact that it leaves precious little opportunity for any legitimate protest of present policies, those who participate and lend their aid to the moratorium effort are aiding and abetting the enemies of this country and of free people everywhere.

If I may disgress for a moment on this point, I am becoming very alarmed by the usurpation of patriotic and religious symbols for political purposes, and it is happening on both sides. I resent the prevailing attitude that automatically categorizes anyone who displays the American flag as a war hawk. Likewise, I resent the use of the dove—a universal symbol of peace as old as Genesis—to represent the very special views of "peace" essayed by the "peace" demonstrators as if to say that anyone who is not with them does not love peace.

But I think, more than anything else, I resent the most recent usurpation by the supporters of the moratorium of the ancient tradition of caroling at Christmas. I understand that a part of the moratorium activities for December includes caroling. The carolers will be all decked out in armbands and other paraphernalia of the movement and will carol for the purpose, supposedly, of dramatizing the Christmas season as a time of "Peace on Earth—Goodwill to Men" as opposed to the prevailing atmosphere of war in Vietnam.

Whoever has trained the leaders of this movement in propaganda techniques certainly knows his business. I do not believe I have ever encountered a propaganda effort so diabolical and revolting—or so arrogant. It is diabolical because it is so emotion-oriented and therefore so potentially effective. It is revolting because it "uses" mankind's deep desire for peace in a twisted way to promote a chimerical peace—a peace which would be here today, only to be swallowed up in a tomorrow of wider war or peace enforced with chains and slavery. And it is rudely arrogant because it appropriates for a selfish political purpose a universal and beautiful custom and stigmatizes it for the many who would seek to bring happiness to the sick and afflicted by caroling the joy of Christmastide but wish in no way to be identified with the political cause of the moratorium.

Mr. Speaker, the theme of the effort by the Young Americans for Freedom will be "Give Peace a Chance—Tell It To Hanoi." I believe this effort deserves the support of every Member of the Congress and every citizen of this country who wants, with our President, a genuine and lasting peace for all men everywhere.

It is somewhat puzzling to me that the event now being characterized as "the massacre of Mylai" is receiving so much coverage in the news media and is being stamped into the national conscience as an unrivaled atrocity, before the facts are even in. Yet the experiences of a heroic young Army major who escaped as a prisoner of war from his Vietcong captors and who has some very enlightening information about the effects of the anti-war propaganda and activities in this country on our POW's morale, and on Hanoi's will to continue fighting, has received scant attention. It has, indeed, been attacked by some Members of Congress who have been quoted as calling this decorated Vietnam veteran, Maj. James N. Rowe, "a puppet of the Pentagon propagandists," and describing his questioning of the war critics in Congress as "unmitigated effrontery."

I have talked with this young man personally at some length. If some of the "authoritative" war critics had gone through what he went through, I might be more willing to give their views more

consideration. But I prefer to listen to a man who knows whereof he speaks. Major Rowe suffered much because of his devotion to his country and the cause of freedom, and he was betrayed by "peaceniks" in this country who nearly cost him his life while he was a captive. He has as much right to speak his views and have them heard as any Member of Congress—perhaps more. And I deeply resent the unwillingness of major news media outlets to give his story the fair and equal coverage it deserves.

In summary, Mr. Speaker, let me point out—as the Young Americans for Freedom will be doing this weekend—that we all are for peace. The question is, how to achieve peace. This Government has repeatedly made concessions to the Communist regime in North Vietnam, and those overtures for peace have been coldly and systemically rejected by the north. Look at the record:

The administration has set in motion the return of 60,000 troops from Vietnam.

The administration has given top priority to turning the war over to the South Vietnamese, allowing them to protect themselves when we withdraw.

The administration has offered to negotiate a cease-fire under international supervision and has declared that we will retain no military bases in South Vietnam after the war.

The administration has offered to negotiate everything except the right of the people of South Vietnam to determine their own future and has done so not only in the formal Paris peace talks but in informal, unpublicized contacts directly with Hanoi and through a number of intermediaries.

And what has Hanoi done to end the war in Vietnam? Nothing.

This is the message the Young Americans for Freedom carry to the country this week. It is a message all of us should bear in mind—along with the Vietcong atrocities against their own people as well as our young fighting men—along with Hanoi's flagrant violation of the Geneva Conventions regarding the treatment of prisoners of war.

Yes, it is long past time to tell it to Hanoi—and to tell it like it is.

---

## RECREATIONAL BOATING SAFETY

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, our Nation's waters are a resource available for many purposes. They offer a man one of the few remaining natural frontiers which challenge his resourcefulness and excite his imagination. As the pressures of our complex society make their burden felt, we seek release in some form of recreation. Today, one such form of release is recreational boating—a recreation growing in popularity with amazing speed, so that on any given weekend during the boating season one can find more than 40 million Americans sailing or cruising on the Nation's waters.

It has been predicted that by 1975—just 5 years from now—at least 50 million people will be enjoying recreational boating. By 1980, with greater leisure and disposable income, coupled with more available water recreation areas, as we build more dams to save this precious resource, it is entirely likely that more than 60 million Americans will have discovered the pleasures of recreational boating.

But the growing popularity of this sport has brought with it many problems. There have been increasing numbers of deaths due to carelessness in the operation of these boats; increasing numbers of personal injuries, increasingly costly property damage. It also has brought a host of problems to confront the U.S. Coast Guard, which has responsibility for all boating on the navigable waters of our Nation.

The Special Studies Subcommittee of the Committee on Government Operations, of which I am chairman, has held several hearings in the past to evaluate the Coast Guard's administration of its statutory responsibilities for boating safety. These hearings have convinced me—as I know they have convinced the Coast Guard—of a need to require safer boats, more uniform regulations, and some form of compulsory seamanship education for boat operators.

The number of recreational boats on our waterways now approximates almost 9 million, and this figure is increasing at about 200,000 annually. Our bays, lakes, rivers, marinas, and launching ramps are being heavily used. As more and more people engage in this sport, the danger of accidents resulting in loss of life, injury, and property damage increases. Thus, every person who enjoys boating must accept his share of responsibility for minimizing the dangers to himself and his fellow boatmen.

But the boatman is not and should not be alone in carrying out this responsibility. It is and should be shared by government—Federal, State and local, and by the boating industry as a whole.

The Congress has not been indifferent to the problems of recreational boating safety. Back in 1940, when recreational boating was a sport only afforded by our most affluent citizens, Congress passed what has been since known as the Motorboat Act of 1940. This act dealt with specific items of safety equipment required to be carried in such boats. It was later amended to give the Coast Guard penalty procedures which could be invoked against the operator of a motorboat for negligent operation. These penalty procedures, I am sorry to report, have proven to be cumbersome and often ineffective—a fact which was clearly brought to the fore several times during hearings before our subcommitte.

In 1958, the Congress passed the Federal Boating Act. For the first time, State and local jurisdictions were involved in the problem of recreational boating. There was recognition at the Federal level of a need for both uniformity and reciprocity among Federal and State boating laws.

Today we have a situation in which the Congress has previously moved to establish two basic principles: First, that the Federal Government does not have exclusive interest in recreational boating safety, but must share this interest with the States; second, that reckless boat operators should be punished.

However, the hearings before my Special Studies Subcommittee have established the need for congressional enactment of a few more basic principles, foremost of which is the establishment of Federal safety standards for recreational boat manufacturers and producers of associated equipment.

Under the Federal Boating Act of 1958, the injunction that uniformity and reciprocity among and between Federal and State jurisdictions are essential continues to be a clear guidance for future action. Responsibility for safety on our waterways is logically assigned to the Coast Guard. However, the State can assume those safety functions that require direct contact with the boatman when the State has agreed to take on this responsibility in local navigable waters. At the same time, there should be Federal preemption where boating safety standards are concerned. This is necessary for achieving uniformity of standards, rather than having States formulating standards of their own.

I therefore propose a bill to correct the deficiencies in the present recreational boating laws which hearings before my subcommittee have uncovered, and to recognize the future implications of the continuing rapid growth of recreational boating, the amazing development of our technology, and the changing nature of Federal-State relationships.

The purpose of my bill is to broaden the Federal authority to establish minimum safety standards for recreational boats and associated equipment, while encouraging through financial assistance greater State participation in the boating safety programs of law enforcement and education. In the latter instance, it is more cost effective for State and local law enforcement officers to enforce boating safety laws on internal waters of the United States than it is for the Federal Government to do so.

More specifically, my bill would:

Update and consolidate the Federal Boating Act of 1958 and the Motorboat Act of 1940, as amended. The latter will remain in effect for all vessels other than noncommercial craft less than 65 feet in length. Present provisions of the Motorboat Act of 1940 relating to recreational boats would be issued as regulations.

Give broad authority to the Secretary of Transportation, together with the Commandant, U.S. Coast Guard, to establish minimum safety standards, safeguarded by a provision for mandatory consultation with a boating safety advisory council. The Commandant would also be able to consult with this council on other boating safety problems. Advisory panels to the council on enforcement and education matters, as well as safety standards, would be an expected development.

Provide authority for the Coast Guard auxiliary to assist State officials on waters under their sole jurisdiction at their request. This is in line with encouraging greater State participation in boating safety matters.

Provide for a 5-year financial assistance program to the States at a $5 million per year level of funding.

Protect the boatman who goes to the

aid of his fellow boatman in the form of a "Good Samaritan" clause.

Improve accident and casualty reporting.

Establish improved penalty provisions for the reckless and negligent boat operator, and permit the use of the new system of Federal magistrates to hear their cases.

As I have stated before, the hearings before my Special Studies Subcommittee have convinced me that enactment of this bill will reduce boating accidents, and make recreational boating a safer and more enjoyable pastime for the growing millions of Americans who pursue this activity in their leisure hours.

One of the benefits which I hope will result from passage of this legislation will be the certification of all operators of recreational boats subject to licensing. This one factor alone, I believe, would substantially reduce the present high death and accident toll on our waterways.

## CZECHOSLOVAK REFUGEES

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, on the night of August 20–21, 1968, the Soviet Union led hostile forces of Warsaw pact countries in an invasion of Czechoslovakia. Soviet troops and those of associated nations occupied the land.

Today, over 17 months later, there are over 70,000 Soviet occupation troops in Czechoslovakia. The action of the Communist Party in deposing Dubcek and Smrkovsky and sweeping out factions of the Communist Party opposed to the hard line continues to emphasize the suffocating effect of this military occupation.

Under the pressure of Soviet force, tens of thousands of Czechoslovak people have been forced to flee their homeland. Denied their basic human and civil rights they have fled the tyranny and oppression of an alien occupation and a subservient regime. These brave people are now attempting to make a new life for themselves in other areas of the world. In this endeavor they need all the help they can get.

Mr. Speaker, I am today introducing a resolution expressing the sense of the Congress that the President of the United States instruct the U.S. Representative to the United Nations to do whatever is necessary to have the U.N. High Commissioner for Refugees assist the Czechoslovak refugees and to provide the facilities and assistance required to enable them to find new homes. The world which wept at the rape of Czechoslovakia in August 1968, must be willing to help the Czechoslovak refugees to build a new life for themselves.

## OIL IMPORT QUOTAS—NATIONWIDE CONSUMER ROBBERY

(Mr. PODELL asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. PODELL. Mr. Speaker, 10 years ago, America's oil industry approached the Eisenhower administration with a unique request. It was for Executive action to prevent cheap foreign oil from entering the United States—to be accomplished by establishing what we now recognize as the oil import quota system. Their request was quietly granted, and the oil import quota system remains clamped like a financial yoke on the neck of every American consumer who must buy oil and gasoline products. Take a close look at those pump prices or your home heating bill next time, and ponder on how much is pure, usurious profit, over and above a fair markup. Never let it be said that the oil industry ever misses a chance to bury the switchblade—in the consumer's wallet.

These import quotas are in force today, and estimates of what they cost us range from $3.5 to $8 billion annually. Suffice it to say that every American consumer pays twice the going world rate for oil and gasoline products. A barrel of sweet east Texas crude costs $3.98 delivered by tanker to New York. That same barrel from abroad costs $2 at the same place, until the quota system doubles its price—to you. The oil industry obviously believes cash broadens the soul—their souls.

The free world today is practically swimming in a glut of cheap foreign oil controlled almost entirely by major American oil companies. These same organizations made approximately 30 percent of their profits here and 70 percent abroad before the oil import quota system was established. Since then, as mass importation of cheap foreign oil has been dammed up, their profit sources have been almost exactly reversed. Most American oil companies now make about 70 percent of their profits domestically and only about 30 percent abroad. It is in their private vested interest to maintain U.S. prices artificially high through the quota system. Beside what they rake in from this privilege, the chicanery of the 27½-percent depletion allowance is petty larceny. This year, however, has been one of indignant outcry over tax reform. In the process, at last the rock was lifted and the Nation had a chance to see what our oil industry has been concealing. We began to understand the oil import quota system, which has been revealed for what it is—the most effective way of plundering the public since John Dillinger was forcibly retired from his labors.

It has been quite a year for oil stories. There is the major strike in Alaska, which insures us a major supply of cheap petroleum, although the oil industry would have us believe otherwise. Occidental, heretofore a smallish oil company, suddenly found itself sitting on an ocean of cheap crude oil in Libya, and no significant place in the lucrative American market to sell it. So it was willing to pass on to consumers some of the profit in return for a chance to sell it here. Establishing a free trade zone and refinery at Machiasport, Maine, would have turned the trick, allowing energy-poor New England to enjoy cheaper fuel costs. But then every part of the Nation would demand a Machiasport. Couldn't have that. So of course the oil industry fights it tooth and nail. Meanwhile, America's consumers pay ever higher costs for their fuel, as the oil industry has raised gasoline prices alone twice this year. Never let it be said that these boys were ever guilty of generosity or compassion. Cash is their middle name.

The present administration, as we all know, is not happy about erosion of oil industry profits and tax privileges. There is a lot of campaign money in them thar hills, pardner. It has already grumbled over congressional action cutting the depletion allowance. But the cat is already out of the bag. Therefore, we have had establishment of a cabinet-level task force on oil imports, which is due to report shortly to the President. Now whatever will it say? Millions are a-quiver in anticipation of their revelations. Billions may be at stake.

Hopefully, the task force will recommend to President Nixon that he favorably consider action which would allow cheaper oil into the Nation. Industry's national defense argument is so much hogwash, containing about as much truth as the latest U.N. resolution.

The industry bellows about becoming dependent on foreign oil sources. Yet these same sources are totally unsafe in case of world crisis. Better use them now than not at all. This industry has been getting away with perhaps more unadulterated commercial piracy than any other except auto insurance and drugs. Now is the time to make a first gaping slash in their lush private preserve. They plead "poverty" and "national defense" so often, they ought to pay these words overtime wages.

In some circles this is akin to committing treason, assaulting great-grandma, and knocking poor old General Custer. Clutching stock certificates and dividend checks, oil industry defenders will weep of the Battle of New Orleans, Barbara Fritchie, and give us a moving rendition of "America" on a convenient calliope. It will be termed a threat to the unborn, Old Faithful, and highway improvements. It is all specious.

The President may, by Executive order, undo what was done originally by Executive order. The immediate effect of allowing cheap foreign oil in would be to lower energy prices and make our oil industry truly competitive, which it now is anything but. If the task force recommends a system of tariffs and increased quotas and the President ignores their findings, America's consumer will know who to thank for ever higher fuel prices. "Blessed are the biggest contributors, for they shall stand first in line."

## THE MORALE OF OUR SERVICEMEN

(Mr. HUNT asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. HUNT. Mr. Speaker, over the recent past, considerable publicity has been given to statistics showing the number of men in the uniformed services who have gone AWOL or have deserted. Some have already played on these statistics for their own partisan purposes alleging that they illustrate a deterioration of morale among our servicemen, particularly in connection with our involvement in Vietnam.

To be sure, the uniformed services are no less vulnerable to the infiltration of dissident elements than any other or-

ganization and, in some respects, are more so because access to vital security information can be especially damaging to our national interests. Thus, the efforts of some to undermine the morale of personnel from within the organization of the services is a problem requiring the utmost vigilence in the face of the protection of expanding individual rights, regardless of an individual's affiliation.

While I would observe that the penalties imposed on those who have gone AWOL or have deserted have been extremely lenient, perhaps negating the affect of such penalties as a deterrent, I was pleased to note the recent observations of Vice Adm. Isaac C. Kidd, Jr., U.S. Navy, who puts the AWOL and deserter statistics in their proper perspective. Admiral Kidd, whose comments were carried in the November issue of the Officer, the official publication of the Reserve Officers Association, notes the following information which is unclassified and a matter of public record:

Less than *5-percent* of U.S. servicemen ever go AWOL;

*Ninety-nine point nine percent* of our men in uniform do not seek asylum in Sweden;

Since September 1965 to the present, some *47,000* Navymen have *volunteered* for duty in Viet Nam;

Since September 1966, *100,000* Navymen stationed in Viet Nam have *voluntarily extended* their tours for six months or longer;

*Thirty-three thousand* of our incomparable Marines in Viet Nam have done the same. (Emphasis added.)

I am sure a review of the record will reveal proportionately comparable figures for the other services. The great majority of our servicemen who have selflessly and with dedication done their jobs well, under the most adverse of circumstances and at the sacrifice of the lives of thousands among them, deserve the highest praise and gratitude of this Nation. This fact should not be tainted or diminished by the few who, for whatever reason, fail to live up to their responsibility.

## VOLUNTARY PRAYER IN THE PUBLIC SCHOOLS

(Mr. HUNT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HUNT. Mr. Speaker, it has come to my attention that one of the high schools in the State of New Jersey has instituted a voluntary prayer exercise, consisting of a reading of the Chaplain's prayer appearing in the CONGRESSIONAL RECORD every day the Congress is in session, subsequent to a ruling by State Attorney General Arthur J. Sills, in connection with another school—whose school board has since voted 7 to 1 to continue the prayer exercise—that such practice is unconstitutional.

How ironic it is that we in the Congress should be privileged to partake of the spiritual heritage of this Nation at the commencement of each daily session while, in the great State of New Jersey, Attorney General Sills has arrogated to himself the authority to declare this constitutional prayer exercise unconstitutional if undertaken in a public school with the blessing of the local school board. Heretofore, I had believed that such supreme authority rested in the U.S. Supreme Court, and only after litigation in a particular case.

It is to be noted that the high school in question instituted the prayer exercise on a strictly voluntary basis before regular school hours. At the first session, it is reported that 400 of the school's 580 students were in attendance.

I commend the school officials for undertaking this congressional prayer exercise and I encourage all public schools to consider doing likewise, despite whatever threat or intimidation might be forthcoming from the attorney general's office. In my estimation, it would be a very healthy thing to get this issue before the Supreme Court once again since, with its new constituency, the result might well be the restoration of some sanity to the Court's prior prayer decisions, a result that would certainly be in accord with the overwhelming majority of the American people. I look for New Jersey to be a leader in this cause and trust that the insistence of concerned parents will not permit the few to deprive their children of the right to participate in voluntary prayer in the public schools.

## DECLARATION FOR A REVISED AND UPGRADED NATIONAL MARITIME POLICY

(Mr. TIERNAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous material.)

Mr. TIERNAN. Mr. Speaker, due to the recent declaration for a revised and upgraded national maritime policy, and because of the current intermodal and joint rate endeavors by our transportation regulatory agencies, I bring to the attention of the Congress a speech recently made before the National Defense Transportation Association's Container Seminar by Commissioner George H. Hearn of the Federal Maritime Commission, stating some very important facts concerning our merchant marine and that of international maritime powers, as well as the cooperative manner in which the FMC is attempting to help the shipper by allowing joint or intermodal rates to be filed. The manner in which the Federal Maritime Commission is cooperating on this important procedure should be a good example to all regulatory agencies which function, as we all know, as arms of the Congress.

Mr. Speaker, it is my pleasure to place Mr. Hearn's speech in the RECORD at this point:

REMARKS OF COMMISSIONER GEORGE H. HEARN

Upon receiving your invitation to address this Container Seminar, my first thought was of the N.D.T.A. conventions, both here in the United States and abroad, that I have had the pleasure and privilege of participating in. I immediately called my old friend, Chuck Brazie, for a rundown of the event and when I heard that Irv Roth, the Director of the Bureau of Economics, of the Civil Aeronautics Board was also appearing on this panel, I was honored to have been invited. I am also happy for you since, in my opinion, he is eminently knowledgeable in not only aviation transportation, but in all aspects of this great transportation industry.

Although the topic of the panel is "Single Factor Tariff Rates", I thought that in addition to discussing that current important issue I would bring to the N.D.T.A.'s attention several facts concerning protectionism, maritime policy and national flag participation in foreign waterborne commerce by international maritime nations today. I would like to develop that topic rather than just make you aware of the current worldwide situation, but I leave that for a later talk at possibly another forum since "Single Factor Tariff Rates" are the order of the day here. For now I will make some brief comments concerning nationalism and protectionism in foreign commerce.

Recently we heard a plea from England which called for a reduction in government control over maritime affairs. It was alleged that the growth of nationalism and protectionism in shipping is affecting the ability of efficient ship owners to operate as cheaply as possible. The result, it was said, will be a rise in the cost of transportation.

Aside from these generalities, a specific charge was directed at the United States. It was contended that substantial subsidization and protection for a modern United States fleet would be disastrous for other flags.

These statements, I believe, lack a firm foundation in fact. There is no doubt that nationalism and protectionism is widely practiced in marine industries. A recent Maritime Administration publication, *Maritime Subsidies*, reveals that of 49 maritime nations examined 47 engage in some form of subsidization. Such practices take many forms. They include flag discrimination, direct subsidies, tax preferences, bilateralism and other devices.

All such practices should not, however, be condemned in toto. There must be a recognition of the purpose of the particular form of national protection for each country. The merchant marine industry does not play the same role in the economy of all maritime nations. I find surprising, therefore, the allegation that a maritime program in the United States designed to improve our fleet will have disastrous consequences around the world.

The crux of the complaint may be that the efficiency of some ship owners will be threatened by the more modern and more efficient fleets of other shipowners. My view is that if one country, such as the United States, can find a way to build a very modern and efficient merchant marine, other nations will be encouraged to meet the competition. And as it is so often said: in a service industry like transportation, competition is the name of the game.

The meaning of the challenge of competition can perhaps be seen in certain foreign trade figures. According to the latest available information, of the total foreign waterborne commerce of the United Kingdom, 37% is carried in British flag vessels. The comparable percentage for some other leading maritime nations is Norway—43%, Japan—46%, Greece—31%, West Germany—30%, Sweden—30%, France—48%.

In the United States the picture is quite different. While the United States ranks first in the value of its total foreign trade, our flag vessels carry only 6% of the cargo moving in our waterborne commerce.

This country cannot, therefore, be faulted for trying to revitalize and modernize its merchant fleet. The figures I have cited belie the charge that a modern and efficient United States fleet will be disastrous to world shipping when it is seen that some countries carry almost 50% of their ocean commerce, while we carry only 6%.

One further important point must, however, be borne in mind. While a subsidy program may rebuild and modernize our merchant fleet, it will be to no avail if American flag carriers do not increase their share of our ocean commerce.

If the United States is to improve its posi-

tion in waterborne commerce, a modern fleet is not enough. Among the crucial factors, within the United States the government and industry must be attuned to modern developments in transportation. One of these developments is joint rate and through route transportation systems.

In order to help bring the government into a concerted effort with industry, the Federal Maritime Commission is seeking to overcome regulatory inhibitions to the establishment of joint rate systems. I would like now briefly to indicate the steps that we have taken.

Revitilization by subsidy is fine but if American flag carriers are not carrying more of our cargo we will be in trouble and our fleets beyond help.

The entire subject matter of joint rates has been clouded over by doubts and confusion within the transportation industry and the shipping public. The source of the problems relating to joint rates is the fact that different modes of transportation subject to different regulatory agencies, are involved. All three of our transportation agencies are concerned—the Civil Aeronautics Board, the Interstate Commerce Commission and the Federal Maritime Commission. I will speak, however, only of the efforts being made by the Federal Maritime Commission and the Interstate Commerce Commission.

In August of this year the I.C.C. published a rule setting forth the requirements for the filing of joint rates with that agency. The immediate reaction of the Federal Maritime Commission was to request the I.C.C. to delay implementation of its rule pending consultation with the F.M.C., representatives of the industry and the shipping public.

The F.M.C. took that position because it is the agency which is responsible for the regulation of ocean transportation which forms a significant—if not dominant—part of joint rate systems. Thus the F.M.C. has a vital interest in any rule or regulation which affects ocean transportation. We wished to provide the I.C.C. with the best thinking of the agency having expertise in the field of ocean transportation in order to carry out and coordinate the desires of both agencies to facilitate the development of through intermodal transportation. The F.M.C is desirous only that the I.C.C. and F.M.C. work hand-in-hand so that joint rate transportation develops with a strong foundation.

In response to the F.M.C. plea for delay, the I.C.C. did postpone the implementation of its rule and asked for comments on the rule from interested parties. The F.M.C. filed comments with the I.C.C., and also initiated its own rule-making proceeding. These two actions by the F.M.C. are intended to insure a coordinated and effective control over through international rates.

The F.M.C. supports the intention of the I.C.C., but we believe that their rule in its proposed form is inadequate to carry out its purposes and might actually hinder them. If these shortcomings are not eliminated the proposed I.C.C. rule will have a number of undesirable consequences. I will briefly mention a few of these.

*First* of all, the rule as proposed does not distinguish between the portion of a joint rate which represents the inland carrier's participation as opposed to that of other participants. The failure to make that distinction will have several unfortunate ramifications.

Without the ability to determine the inland portion of a joint rate, the I.C.C. will be unable to determine whether a change in a joint rate is attributable to carriers subject to its jurisdiction. Thus, without a division of the rate in the tariffs, the I.C.C. might engage in inadvertent and unauthorized investigations into the lawfulness of ocean carrier rates. Furthermore, the legislative history of the Shipping Act of 1916 clearly indicates a Congressional intent that rates in foreign commerce should not be subject to suspension. The I.C.C. rule, as proposed, might cause confusion in this regard if the I.C.C. does not require that its regulated carriers separately state their portion of joint rates.

Without such separate statement, the I.C.C. might also disapprove an ocean rate by disapproving an entire joint rate. This should not be permitted because disapproval of an ocean carrier's rate is an action for which no standards exist under the Interstate Commerce Act. Standards for disapproval do exist in the Shipping Act of 1916.

Also, under the Interstate Commerce Act, the I.C.C. could not administer Shipping Act provisions such as the Section 17 prohibition against undue prejudice to exporters in our foreign commerce. The inability of the I.C.C. to apply such sections, together with the lack of separate identification of the inland carrier's rate, might appear to remove the protection which Congress intended the American exporter to have.

Other protections cast into doubt by the I.C.C. rule are those relating to dual rate contracts. Section 14b of the 1916 Act entrusts the F.M.C. with the responsibility for approving such contracts and insuring that the contracts contain statutorily required safeguards for shippers. The failure of the I.C.C. rule to distinguish between the ocean and inland carrier's participation makes uncertain the availability of the system itself and these safeguards.

Another problem involves the portion of a joint rate attributable to the foreign inland leg of the service. Unless the I.C.C. requires a break-out of the segment subject to its jurisdiction, there is no way the F.M.C. can identify the foreign inland portion. This will be true even though the F.M.C. already requires ocean carriers to separately state the port-to-port portion of their rates in tariff filings.

A *second* undesirable consequence is that the I.C.C. rule, as written, does not identify the carrier responsible for filing. This could lead to controversy as to whether the I.C.C. intends to require F.M.C. regulated carriers to file at the I.C.C., and I do not think the I.C.C. has the power to require and accept such filings.

*Third,* the rule as proposed is unclear as to whether conferences of ocean carriers may participate in joint rate tariffs filed with the I.C.C. Such conferences are the dominant factor in ocean commere and should not be precluded from participation.

To avoid these shortcomings the F.M.C. has included in its comments to the I.C.C. suggested modifications of its rule. We have suggested that the rule require identification of the portion of the rate to be collected by the I.C.C. regulated carrier, that the rule provide specifically that the I.C.C. regulated carrier is the participant responsible for filing the joint rate with the I.C.C., and that conferences of ocean carriers be permitted to participate in joint rates filed with the I.C.C.

As I said earlier, the F.M.C. has submitted its comments to the I.C.C. in a spirit of cooperation. We, therefore, have made no suggestions to the I.C.C. which we are not prepared to implement within the scope of the regulatory activity of the F.M.C. Evidence of this is in our own rule-making proceeding which the F.M.C. initiated concurrently with the filing of our comments with the I.C.C.

By our proposed rule we would require carriers subject to F.M.C. jurisdiction—and only those carriers—to file with the F.M.C. tariffs naming through rates. We believe the F.M.C. has the authority and regulatory responsibility to accept such tariffs for filing; but to avoid any uncertainty or confusion, and to establish coordination of regulation, the F.M.C. has initiated a rule-making proceeding in the matter of through rates.

According to our proposed rule, F.M.C. regulated carriers would be required to include in their tariffs a statement of the charges for the entire transportation service offered, a separate statement of the portion to be collected by the F.M.C. regulated carrier, a description of the service to be performed by each participant in the through rate, and the through route which has been established.

The F.M.C.'s rule would not extend the jurisdiction of the F.M.C. over the rates of carriers not subject to the Shipping Act of 1916. Consequently we would require F.M.C. regulated carriers to disclose their portion of through rates. This would enable the F.M.C. to determine the lawfulness of their portion under the standards of the 1916 Act.

In fact, however, ocean carriers are already required to state separately their portion of through rate arrangements. The failure to do so is a violation of Section 18(b)(1) of the Shipping Act. This requirement was affirmed last year by the F.M.C. in our famous *Container Marine Lines* case (Docket No. 68–8). That case involved tariffs of Container Marine Lines covering transportation between United States ports and points within the United Kingdom. In our decision, accepting CML's tariffs, the F.M.C. required CML to include in its tariffs an identification of the port-to-port or ocean portion of the through rate.

Nevertheless, the F.M.C. believes it desirable to have a rule as we have proposed. Such a rule would enable the F.M.C. to effectively regulate those matters within its jurisdiction and also eliminate misconceptions as to the regulatory authority involved. Hopefully the result will be that a joint rate and an authentic intermodal operation will finally come into play.

## TRIBUTE TO THE HONORABLE BROCK ADAMS

(Mr. TIERNAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. TIERNAN. Mr. Speaker, I would like to bring to the attention of my colleagues an article which appeared in the November 16 issue of the Washington Star. This focused on the consistent and conscientious work of the gentleman from the State of Washington on the District Committee.

All who know BROCK ADAMS are aware of his hard work on a committee which cannot enhance his own political career. BROCK has made it plain to all in Congress that he is interested in insuring that the people of the District of Columbia will be given their due consideration by the Congress. Certainly those who live in the District could have no better representative than BROCK ADAMS.

I have worked with BROCK on the Interstate and Foreign Commerce Committee, as well as on other congressional matters, and I concur with the statement made by another member of the District Committee, who said that BROCK is "one of the most brilliant and energetic men in Congress."

I am including a copy of this fine article in the RECORD so that all of my colleagues can join me in giving BROCK the recognition that he deserves:

BROCK ADAMS—HE'S GOT THOSE LONELY, LOSING-LIBERAL, HOUSE DISTRICT COMMITTEE-FIGHTIN' BLUES

(By Boris Weintraub)

Congressman Brock Adams is a Democrat who represents that other Washington, the state with the vote, beautiful mountains, and miles and miles of clean air. He is looked upon as the most ardent and effective procity advocate on John McMillan's House District Committee.

Adams should have asked Fred Schwengel,

or John Foley, or Abraham Multer, or even Jack Kennedy, what it was like before he agreed to serve under the rural-conservative coalition that rules the committee which more than any other single agency rules the District of Columbia. Actually, Adams probably knew what it was like because he refused the slot during his first term some six years ago. But then, second time around, he accepted, and today he pouts about the repeated frustrations of being a liberal, low-ranking member of a low-priority and low-prestige committee.

Congressman Adams is the inheritor of a long, losing tradition.

Adams is a lean, athletic-looking, youngish congressman (he's 42) in the Kennedy mold. This is not surprising, since then Attorney General Robert F. Kennedy appointed him to be a U.S. attorney in Seattle just a short spell before Adams made the run for Congress. Appropriately, his office is studded with Kennedy memorabilia, including a bust of President John F. Kennedy.

And there is another, coincidental, connection to the liberal wing of the Democratic party: Adams sounds remarkably like Hubert Humphrey, or perhaps like David Frey's imitation of Humphrey. He talks with a quivering, high-pitched, bubbling sort of stridency.

In his office, Adams unfolds his limbs around his desk chair, recounting disappointments for a reporter. 'Service on the committee is very difficult, very difficult," he says, shifting a leg for punctuation. "We are fighting an established system that's been in existence since 1948. They have done things in the same rather comfortable fashion all that time. They go on the floor on Monday (the House's traditional District Day) with their bills; few members have attended committee sessions, and those were friendly; they passed out bills as they wanted to, and they would put out any kind of bill they wanted to.

"The service can wear you down until you finally say, 'I'm getting off,'" says Adams. "I'm not a contentious person, but there is a constant rolling weight against you until someone has to stand up or violate his conscience."

Unlike those of any other House committee, the District Committee's subcommittees have no names, only numbers. Thus, McMillan has the power as chairman to assign bills as he sees fit, without worrying about whether a particular subcommittee has jurisdiction over the subject matter. In this way, he can carefully guide anything he considers important—or dangerous—to a favored subcommittee chairman like John Dowdy of Athens, Texas, or Thomas G. Abernethy of Okolona, Miss., and keep it away from a unit headed by Charles C. Diggs of Michigan, a liberal Democrat and, for good measure, a Negro.

"The leadership of this committee is such that discussions never really reach the liberal level, they only reach varying degrees of conservatism," Adams says. "Take, for example, increasing the sales tax on food. Around the country, this is no longer an issue; it's been pretty well decided that this is not a good thing. But it's still being debated here."

Getting specific, and sounding increasingly depressed, Adams talks about the parking bill fiasco. To begin at the beginning, he says, you study the parking situation here. Then you conclude that there isn't enough parking space, and that what space there is, is controlled by the big parking lot owners who set rates with no chance for the public to have a say.

As a result of your study, you work with officials and like-minded Senate colleagues and come up with a bill providing for a public parking authority with the power to condemn land for parking, set rates and in other ways work to eliminate some of the problems.

The bill is introduced in both houses. In the Senate, hearings are held before the District Committee, and everybody but the parking lot owners praises your bill. It zips through the committee and onto the Senate floor, where it breezes through on a mumbled, hurried vote of assent. And now it goes to the House and awaits only action there, and now . . .

And now nothing happens. Maybe Chairman John McMillan, of Florence, S.C., sits on the bill for months before assigning it to a subcommittee. And maybe that subcommittee is headed by Rep. Dowdy, who has a long history of opposition to any sort of public condemnation of private property.

So the session ends with no action on the bill, and a new Congress is elected, and the whole process must start all over again.

Adams and a handful of other liberals on the committee, notably Democrats Donald Fraser of Minnesota and Andrew Jacobs of Indiana and Republicans Frank Horton of New York and Gilbert Gude of Maryland, have been trying to shake things up a little, trying to convince the committee leadership that the city needs a little more and a little better than it's been getting. Adams' description of his committee battles is studded with phrases like "Fraser, Andy Jacobs and I" and "Don Fraser called Andy Jacobs and me."

But more than the others, Adams is regarded on the Hill and in the city as the key man—one of his friends on the committee calls him "one of the most brilliant and energetic men in Congress, with an absolute zest for work and natural ability for digging out information, organizing it and following through."

The proposals sponsored by or supported by Adams during his District Committee tenure include home rule, gun registration, the parking bill (twice passed by the Senate and stalled in the House), a constitutional amendment to provide the District with representation in the Congress, the commuter tax and a bill outlawing racial and religious restrictive covenants in the sale and rental of housing.

As befits a former prosecutor, he also has been concerned with crime, though in a different manner than the committee leadership. He has urged what he calls a "massive infusion of time, talent and money" into the police department, an increase in prosecution personnel, the doubling of court staff, a work release program and a big increase in parole and probation staffs to maintain "true supervision."

"This city should be a model," Adams says, sounding the idealistic line that, when you think about it, is responsible for his repeated disappointment. "We have the national treasury here, the attention of Congress, the greatest collection of intellectual talent anywhere. But instead of being a model, instead of being in the forefront of the national debate, we are arguing the concepts of being a small Southern town.

"As long as we won't let the people govern themselves, we should govern well. But we don't. I'm not talking about getting out in front of the nation; I'm talking about just getting even."

The long, generally unsuccessful, history of Adams-like liberals on McMillan's committee dates back to the 80th Congress when John F. Kennedy, a freshman congressman from Massachusetts, became a member. It is not recorded that he took much part in District affairs during his three terms on the committee, but others were pushing for home rule, for instance, even then. Hearings were held in 1949, but no bill emerged. It was to be 10 years later before hearings would be held again, this time spurred by Reps. Foley of Maryland, Multer of New York, two Democrats, and Schwengel of Iowa, a Republican.

But as happens to so many liberals in Congress, District Committee liberals often are from seats that are in jeopardy; if they are re-elected every two years by a "safe" Northern constituency, they move on to better things. Kennedy, of course, went to the Senate. Multer received a New York judgeship, and Foley and Schwengel were defeated in re-election campaigns, in each case by other liberals. (Schwengel won his seat back, and he even said he wanted back his spot on the District Committee, but he didn't get it.) Unlike some of their predecessors, Adams and his associates are trying to take a more active role in serving the city and fighting the establishment.

At the start of this year's term, Adams promised a fight against the leadership in the interest of cutting down on McMillan's power. He lost on the key issue, having subcommittees with specific areas of jurisdiction, but he won a few bones: the right of every member to question a witness for three minutes, the right to bid for membership on a subcommittee, and the right to be notified of subcommittee meetings and the subjects to be discussed at them. Incredibly, this last was an innovation on the District committee.

On a national level, Adams has passed the litmus test for liberalism—Americans for Democratic Action rated him as 92 percent liberal, with one wrong vote out of 12 last year and 88 percent correct on seven out of eight key votes this year. But he says that back home, he's considered more of a moderate, and faced opposition last year from a Peace and Freedom candidate who thought he wasn't strongly enough against the Vietnam war. Adams prevailed and won his third term since being elected in the 1964 Johnson landslide.

The Seattle district he represents is a heterogeneous one, with a little bit of everything. It has all of the state of Washington's minorities—blacks, Indians, Japanese, Chinese, Filipinos. It has Seattle's central core city with all the by-now typical problems. It has well-to-do suburbs with $50,000 homes. And it has the heart of the city's booming industrial area—the giant Boeing Aircraft plant, steel mills, shipyards—with its medium-well-off unionized workers. The people there, Adams says, don't pay much attention to his District Committee work; they're more interested in his service on Interstate and Foreign Commerce Committee.

Like most congressmen, Adams shunned District committee service when he arrived in 1965. He was approached by some people who had friends he knew in Seattle, primarily by Mrs. Joy Simonson, chairman of the District's Alcoholic Beverage Control Board, but he begged off, citing his lack of knowledge, the difficulty of service because of the committee's reputation, and what he feels is a definite attempt by the congressional structure to keep the District Committee conservative.

But Fraser, among others, kept nagging at him to join the committee—Fraser nagged at Jacobs, too, and got him to accept a spot—and Adams filled a vacancy on the committee after winning re-election in 1966. By that time, two of his four children were enrolled in the District's John Eaton School in the Woodley Park area of Northwest; he and his wife followed activities in the PTA and their church, and there was a definite interest established. "More of these congressmen who are trying ot run this city should live in it." Adams says.

He tries in other ways to find out what is going on in the city, what its needs are. He has visited the District jail, both General Sessions and District Courts, many of the schools. He has assigned a staff member, a sideburned young man named Jacques Du Puy, full time on urban problems, reasoning that Seattle will have some of the District's problems in a few years and wanting to have an expert around to help head them off. (This opens the ironic possibility that Adams' District Committee service will pay off—in Seattle.) He has met with city groups and encouraged them to take an active part in committee hearings—"otherwise, you get only those witnesses selected by the committee leadership," he says.

Another source is the District government. Adams says he has a good relationship with

Mayor Walter Washington, but recognizes the "difficult position" the mayor is in:

"He has to deal with the executive branch and the committee, so we have to request the information we want, rather than have them come to us with it. The government is responsive, aware and frustrated. They must have real support from the executive to be effective, and they don't have it now."

If there was a deviation by Adams from what might commonly be thought of as the straight liberal position on District affairs, it was in his role in forcing a rider to the District's revenue bill barring any federal payment until work started on the Three Sisters Bridge.

Adams is no visionary but is a pragmatic politician (a part of the Kennedy tradition often overlooked by hagiographers).

"Both parties on this issue had their feet stuck in concrete," he says. "The result was that nothing has happened and a real transportation crisis was approaching. The only way to break the logjam was to tailor a compromise to get the necessary majority. No one is happy about it. I did what was best for the city.

"Sure, I'm worried about what will happen to all those cars when the bridge is built. That's why it's essential to get the subway built at the same time. There is no hope of solving the transportation problem with more bridges and freeways. We should complete what's started, but the only way to solve it is to build an efficient mass transit system."

If discouragement can be defined as being a liberal—or, as Brock Adams would have it, a moderate—on the House District Committee, then Adams most of the time seems the soul of discouragement when District matters are mentioned.

"If I had lost the subway fight, if that money had stayed stuck, I would have felt so compromised I would have gotten off the committee," he says, sighing. "You've got to have some successes."

Adams, of course, is a practical man, not given to vituperative attacks on the committee leadership. "They just don't understand what I'm trying to do," he says, fretfully. "These men have a completely different viewpoint of what a major, heterogeneous metropolitan area should be. They relate to a completely different environment than what you actually have here."

But then there is that other side to Brock Adams, an optimism and prosecutor's combativeness that goes well with the hard, nonsense sound of his name. Sprawling in his office chair behind the big congressman's desk, one leg stuck straight out, the other tucked up onto the seat of the chair, he pronounces that "the only hope for change is what the leadership of the national parties will do."

Then, for just a minute, there is the fighter's glint, the quickening campaigner's pace in that Hubert Humphrey voice as Adams continues: "And the only way to change them is to carry the fight to Congress, and we must be contentious. We have to bring amendments, report out bills, get to the membership, and get them to understand."

## THE TACTICAL AIR COMMAND

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, I believe all the Members of the House and all those who read this RECORD will be able to feel even prouder as Americans after reading the following statement regarding the Tactical Air Command. "They take the blue from the skies, a pretty girl's eye, and a touch of Old Glory too, and give it to the men who proudly wear the U.S. Air Force Blue" is part of a song written a few years ago for the Air Force, and it was never truer today. The men of the Tactical Air Command are today among the finest examples of that kind of pride a young man has in the service of his country and his flag, that kind of pride exemplified by the young men of the Tactical Air Command, the 4531st Tactical Fighter Wing at Homestead Air Force Base, Homestead, Fla. The men who proudly wear the U.S. Air Force Blue.

The Tactical Air Command is represented in southern Florida by the 4531st Tactical Fighter Wing at Homestead Air Force Base. This base, although under the control of the Tactical Air Command, is a unique base and known most appropriately as "the All American Base" since it supports units of the Air Force, the Army, the Navy, the Marines, and large elements of military reserve forces, not only on the base proper but as far as 120 miles south to Key West and as far as 140 miles north of Miami. This is an extremely diversified support mission since it encompasses everything from aircraft, missiles, radar installations, administrative supplies, and special support for the President of the United States.

About 18 months ago, the command jurisdiction of Homestead Air Force Base was formally transferred from the Strategic Air Command to the Tactical Air Command; receiving command of Homestead Air Force Base on behalf of TAC was Col. Wiltz P. Seguira, 4531st Tactical Fighter Wing.

This changeover was accomplished rapidly and efficiently. The responsibility for coordinating the highly complex job of economically realining the assets of the previous command and integrating these assets, was assigned to Col. Marion A. Bradshaw, director of materiel, for the base.

The job of supporting these tremendous projects fell, primarily, to the 4531st Supply Squadron under the comman of Maj. E. D. Doran, assisted by Mr. Lyman L. Dukes, assistant chief of supply. This mission was accepted and accomplished in an enthusiastic and professional manner by the highly dedicated members of this supply squadron.

I am most delighted to bring to your attention that as a result of this dedication in the highest traditions in the service of our country, the supply squadron has been officially recognized by the commander of the Tactical Air Command as the "Best in TAC," and as a result, it is now being evaluated by the U.S. Air Force for the award of the Daedalion Supply Effectiveness Award Trophy, awarded annually to the base supply organization with the best supply performance record for the report year.

An honor such as this speaks well, not only for the 4531st Supply Squadron, but for the attitude and teamwork of all other units on this "All American Base." It is gratifying to know that this supply squadron earned for itself the honor of being the best in a major Air Force command.

Mr. Speaker, I believe this outstanding unit should be saluted by Congress and receive the appreciation from our Nation for a job well done, and for being recognized as the first such organization to be so honored at Homestead Air Force Base.

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CLARK (at the request of Mr. BARRETT), for today, on account of official business.

Mr. EILBERG (at the request of Mr. ALBERT), for today, on account of illness.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MILLER of Ohio); to revise and extend their remarks and include extraneous matter:)

Mr. WHALEN, for 15 minutes, today.

Mr. RHODES, for 5 minutes, today.

Mr. EDWARDS, of Alabama for 10 minutes, today.

Mr. SCHWENGEL, for 10 minutes, today.

Mr. MILLER of Ohio, for 5 minutes, today.

Mr. BELCHER, for 10 minutes, today.

(The following Members (at the request of Mr. CAFFERY); to revise and extend their remarks and include extraneous matter:)

Mr. GONZALEZ, for 10 minutes, today.

Mr. KOCH, for 60 minutes, December 10.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MADDEN and to include an editorial.

Mr. ANDERSON of California following adoption of conference report on H.R. 12964.

(The following Members and to include extraneous matter:)

Mr. STANTON.

Mr. THOMPSON of Georgia.

Mr. REID of New York in three instances.

Mr. MCDONALD of Michigan.

Mr. ZWACH.

Mr. CONABLE.

Mr. DUNCAN.

Mr. ARENDS.

Mr. WYMAN in two instances.

Mr. DERWINSKI in two instances.

Mr. SCHWENGEL in three instances.

Mr. CLANCY.

Mr. BELL of California.

Mr. ASHBROOK.

Mr. CUNNINGHAM in five instances.

Mr. TAFT.

(The following Members and to include extraneous matter:)

Mr. MOSS.

Mr. PICKLE in two instances.

Mr. YATES in two instances.

Mr. YATRON in two instances.

Mr. GAYDOS in three instances.

Mr. OTTINGER.

Mr. DENT.

Mr. HANNA in five instances.

Mr. FRASER in two instances.

Mr. LONG of Maryland in two instances.

Mr. BURKE of Massachusetts.
Mr. RARICK in three instances.
Mr. WOLFF in two instances.
Mr. LOWENSTEIN in five instances.
Mr. MIKVA in six instances.
Mr. HELSTOSKI in two instances.
Mr. HUNGATE.
Mr. GONZALEZ in two instances.
Mr. EVANS of Colorado.

## SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1232. An act to declare and determine the policy of the Congress with respect to the primary authority of the several States to control, regulate, and manage fish and wildlife within their territorial boundaries; to confirm to the several States such primary authority and responsibility with respect to the management, regulation, and control of fish and wildlife on lands owned by the United States; and to specify the exceptions applicable thereto; and to provide procedure under which Federal agencies may otherwise regulate the taking of fish and game on such lands; to the Committee on Merchant Marine and Fisheries.

S. 2619. An act to amend 5723(b) of title 5, United States Code, relating to length of service required by teachers in Bureau of Indian Affairs schools when travel and transportation expenses are paid to first post of duty; to the Committee on Government operations.

S. 2940. An act to amend the Act of June 28, 1948, as amended, relating to the acquisition of property for the Independence National Historical Park; to the Committee on Interior and Insular Affairs.

## ENROLLED BILLS SIGNED

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 13767. An act to authorize the appropriation of funds for Fort Donelson National Battlefield in the State of Tennessee, and for other purposes.

## BILLS PRESENTED TO THE PRESIDENT

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H.R. 13767. An act to authorize the appropriation of funds for Fort Donelson National Battlefield in the State of Tennessee, and for other purposes.

## ADJOURNMENT

Mr. CAFFERY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 40 minutes p.m.), the House adjourned until tomorrow, Wednesday, December 10, 1969, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1399. A letter from the Comptroller General of the United States, transmitting a report on U.S. assistance of the Kingdom of Thailand, Department of State, Department of Defense, Agency for International Development; to the Committee on Government Operations.

1400. A letter from the Director, Bureau of the Budget, Executive Office of the President, transmitting a report that the appropriation to the Department of the Interior for "Education and welfare services," Bureau of Indian Affairs, for the fiscal year 1970, has been apportioned on a basis which indicates the necessity for a supplemental estimate of appropriation, pursuant to the provisions of section 3679 of the Revised Statutes (31 U.S.C. 665); to the Committee on Appropriations.

1401. A letter from the Comptroller General of the United States, transmitting a report on improvements needed in setting claims for termination of communications services, Department of Defense, Federal Communications Commission; to the Committee on Government Operations.

1402. A letter from the Acting Secretary of the Interior, transmitting a draft of proposed legislation to amend the act of August 9, 1955, to authorize longer term leases of Indian lands on the Yavapai-Prescott Community Reservation in Arizona; to the Committee on Interior and Insular Affairs.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 14733. A bill to amend the Public Health Service Act to extend the program of assistance for health services for domestic migrant agricultural workers and for other purposes; without amendment (Rept. No. 91–711). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 14790. A bill to amend the Public Health Service Act so as to extend for an additional period the authority to make formula grants to schools of public health; with an amendment (Rept. 91–712). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. House Joint Resolution 506. Joint resolution consenting to an extension and renewal of the interstate compact to conserve oil and gas; without amendment (Rept. No. 91–713). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 14289. A bill to amend the act of March 4, 1921, to place the counties of El Paso and Hudspeth, Tex., in the mountain standard time zone; with amendments (Rept. 91–714). Referred to the House Calendar.

Mr. GARMATZ: Committee on Merchant Marine and Fisheries. H.R. 13407. A bill to consent to the amendment of the Pacific Marine Fisheries Compact; without amendment (Rept. No. 91–715). Referred to the House Calendar.

Mr. HAYS: Committee on Foreign Affairs. H.R. 14789. A bill to amend title VIII of the Foreign Service Act of 1946, as amended, relating to the Foreign Service Retirement and Disability System, and for other purposes; without amendment (Rept. No. 91–716). Referred to the Committee of the Whole House on the State of the Union.

Mr. THOMPSON of New Jersey: Committee on House Administration. H.R. 13954. A bill to amend the act of August 22, 1949 (63 Stat. 623), so as to authorize the Board of Regents of the Smithsonian Institution to plan and construct museum support and depository facilities; without amendment (Rept. No. 91–722). Referred to the Committee of the Whole House on the state of the Union.

Mr. THOMPSON of New Jersey: Committee on House Administration. H.R. 13956. A bill to amend the act of October 15, 1966 (80 Stat. 953; 20 U.S.C. 65a), relating to the National Museum of the Smithsonian Institution, so as to authorize additional appropriations to the Smithsonian Institution for carrying out the purposes of said act; without amendment (Rept. 91–723). Referred to the Committee of the Whole House on the state of the Union.

Mr. PATMAN: Committee on Banking and Currency. H.R. 13959. A bill to provide for the striking of medals in commemoration of the many contributions to the founding and early development of the State of Texas and the city of San Antonio by Jose Antonio Navarro; with an amendment (Rept. No. 91–724). Referred to the Committee of the Whole House on the state of the Union.

Mr. THOMPSON of New Jersey: Committee on House Administration. H.R. 14213. A bill to amend sections 5580 and 5581 of the Revised Statutes to provide for additional members of the Board of Regents of the Smithsonian Institution; without amendment (Rept. No. 91–725). Referred to the Committee of the Whole House on the state of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 13448. A bill to authorize the exchange, upon terms fully protecting the public interest, of the lands and buildings now constituting the U.S. Public Health Service Hospital at New Orleans, La., for lands upon which a new U.S. Public Health Service Hospital at New Orleans, La., may be located; without amendment (Rept. No. 91–726). Referred to the Committee of the Whole House on the state of the Union.

Mr. ANDREWS of Alabama: Committee of Conference. Conference report on H.R. 13763 (Rept. No. 91–727). Ordered to be printed.

Mr PATMAN: Committee of Conference. Conference report on H.R. 7491 (Rept. No. 91–728). Ordered to be printed.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. POAGE: Committee on Agriculture. H.R. 7161. A bill for the relief of Leonard N. Rogers, John P. Corcoran, Mrs. Charles W. (Ethel J.) Pensinger, Marion M. Lee, and Arthur N. Lee; without amendment (Rept. No. 91–717). Referred to the Committee of the Whole House.

Mr. POAGE: Committee on Agriculture. S. 65. An act to direct the Secretary of Agriculture to convey sand, gravel, stone, clay, and similar materials in certain lands to Emogene Tilmon of Logan County, Ark.; with an amendment (Rept. No. 91–718). Referred to the Committee of the Whole House.

Mr. POAGE: Committee on Agriculture. S. 80. An act to direct the Secretary of Agriculture to convey sand, gravel, stone, clay, and similar materials in certain lands to Enoch A. Lowder of Logan County, Ark.; with an amendment (Rept. No. 91–719). Referred to the Committee of the Whole House.

Mr. POAGE: Committee on Agriculture. S. 81. An act to direct the Secretary of Agriculture to convey sand, gravel, stone, clay, and similar materials in certain lands to J. B. Smith and Sula E. Smith, of Magazine, Ark.; with amendments (Rept. No. 91–720). Referred to the Committee of the Whole House.

Mr. POAGE: Committee on Agriculture.

S. 82. An act to direct the Secretary of Agriculture to convey sand, gravel, stone, clay and similar materials in certain lands to Wayne Tilmon and Emogene Tilmon of Logan County, Ark.; with an amendment (Rept. No. 91–721). Referred to the Committee of the Whole House.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL of Virginia:

H.R. 15151. A bill to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries of officers and members of the Metropolitan Police force and the Fire Department, to amend the District of Columbia Teachers' Salary Act of 1955 to increase the salaries of teachers, school officers, and other employees of the Board of Education of the District of Columbia, to amend the District of Columbia revenue laws, and for other purposes; to the Committee on the District of Columbia.

By Mr. CHAMBERLAIN:

H.R. 15152. A bill to amend the Federal Food, Drug, and Cosmetic Act to include a definition of food supplements, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DENT:

H.R. 15153. A bill to amend the Walsh-Healey Public Contracts Act, as amended, to exempt certain transportation employees of private carriers from the overtime compensation and hours worked provision of the act; to the Committee on the Judiciary.

By Mr. GIBBONS:

H.R. 15154. A bill to amend title 18 of the United States Code by adding a new chapter 404 to establish an Institue for Continuing Studies of Juvenile Justice; to the Committee on the Judiciary.

By Mr. HARRINGTON:

H.R. 15155. A bill to provide certain essential assistance to the U.S. fishing industry; to the Committee on Merchant Marine and Fisheries.

By Mr. SCHWENGEL:

H.R. 15156. A bill to encourage the growth of international trade on a fair and equitable basis; to the Committee on Ways and Means.

By Mr. SIKES:

H.R. 15157. A bill to amend title XVIII of the Social Security Act to provide payment for chiropractors services under the program of supplementary medical insurance benefits for the aged; to the Committee on Ways and Means.

By Mr. SPRINGER:

H.R. 15158. A bill to amend the Public Health Service Act to provide for the establishment of a National Institute of Gerontology; to the Committee on Interstate and Foreign Commerce.

By Mr. STAGGERS (for himself and Mr. SPRINGER):

H.R. 15159. A bill to amend the Public Health Service Act to provide for special project grants for the provision of family planning services and related research, training, and technical assistance; to the Committee on Interstate and Foreign Commerce.

H.R. 15160. A bill to amend the Mental Retardation Facilities Construction Act to extend and improve the provisions thereof, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. STEIGER of Arizona:

H.R. 15161. A bill to amend the act of August 9, 1955, to authorize longer term leases of Indian lands on the Yavapai-Prescott Community Reservation in Arizona; to the Committee on Interior and Insular Affairs.

By Mr. THOMPSON of Georgia:

H.R. 15162. A bill to prohibit public officials from operating dual school systems, and from requiring racial balance in school systems, and for other purposes; to the Committee on Education and Labor.

By Mr. WHITEHURST:

H.R. 15163. A bill to prohibit public officials from operating dual school systems, and from requiring racial balance in school systems, and for other purposes; to the Committee on Education and Labor.

By Mr. BLATNIK:

H.R. 15164. A bill to amend the Tariff Act of 1930 so as to exempt certain private aircraft entering or departing from the United States and Canada at night or on Sunday or a holiday from provisions requiring payment to the United States for overtime services of customs officers and employees; to the Committee on Ways and Means.

By Mr. BLATNIK (for himself, Mr. HOLIFIELD, Mr. JONES of Alabama, Mr. ROSENTHAL, Mrs. DWYER, Mr. ERLENBORN, Mr. BROWN of Ohio, and Mr. FINDLEY):

H.R. 15165. A bill to establish a Commission on Population Growth and the American Future; to the Committee on Government Operations.

By Mr. FALLON (for himself and Mr. BLATNIK, Mr. JONES of Alabama, Mr. EDMONDSON, Mr. CRAMER, Mr. HARSHA, and Mr. DON H. CLAUSEN):

H.R. 15166. A bill authorizing additional appropriations for prosecution of projects in certain comprehensive river basin plans for flood control, navigation, and other purposes; to the Committee on Public Works.

By Mr. FARBSTEIN:

H.R. 15167. A bill to amend title 28, United States Code, to provide amnesty for certain first offenders under Federal criminal law, and for other purposes; to the Committee on the Judiciary.

H.R. 15168. A bill to amend title II of the Social Security Act to provide for the payment of social security benefits on a semimonthly basis; to the Committee on Ways and Means.

By Mr. THOMPSON of Georgia:

H.R. 15169. A bill to amend the Watershed Protection and Flood Prevention Act of 1954, as amended; to the Committee on Agriculture.

By Mr. TIERNAN (by request):

R.R. 15170. A bill to amend the Railway Labor Act in order to change the number of members of the National Railroad Adjustment Board; to the Committee on Interstate and Foreign Commerce.

By Mr. TIERNAN (for himself, Mr. HECHLER of West Virginia, Mr. SCHEUER, and Mr. STOKES):

H.R. 15171. A bill to amend the Communications Act of 1934 to prescribe fees for applications for new commercial television broadcasting station licenses and for renewal of such licenses; to the Committee on Interstate and Foreign Commerce.

By Mr. WHALEN (for himself, Mr. BIESTER, Mr. MCCLOSKEY, and Mr. RAILSBACK):

H.R. 15172. A bill to amend title 10, United States Code, in order to improve the judicial machinery of military courts-martial by removing defense counsel and jury selection from the control of a military commander who convenes a court-martial and by creating an independent trial command for the purpose of preventing command influence or the appearance of command influence from adversely affecting the fairness of military judicial proceedings; to the Committee on Armed Services.

By Mr. WHALEN (for himself, Mr. ASHLEY, Mr. BINGHAM, Mr. BOLAND, Mr. BURTON of California, Mr. DIGGS, Mr. EDWARDS of California, Mr. LEGGETT, Mr. LOWENSTEIN, Mr. MIKVA, Mr. MOSHER, Mr. MOSS, Mr. OTTINGER, Mr. PUCINSKI, Mr. REES, Mr. ROSENTHAL, Mr. ST GERMAIN, Mr. SCHEUER, Mr. STAFFORD, Mr. STOKES, Mr. TAFT, Mr. CHARLES H. WILSON, Mr. YATES, and Mr. CONYERS):

H.R. 15173. A bill to create a catalog of Federal assistance programs, and for other purposes; to the Committee on Government Operations.

By Mr. BELL of California:

H.J. Res. 1025. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. COLMER:

H.J. Res. 1026. Joint resolution proposing an amendment to the Constitution of the Unnited States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. CORMAN:

H.J. Res. 1027. Joint resolution to give immediate effect to the provisions of the Child Protection and Toy Safety Act of 1969; to the Committee on Interstate and Foreign Commerce.

By Mr. GIBBONS:

H.J. Res. 1028. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. MONAGAN:

H. Con. Res. 465. Concurrent resolution expressing the sense of the Congress concerning assistance to Czechoslovak refugees; to the Committee on Foreign Affairs.

By Mr. BROTZMAN (for himself and Mr. BIESTER):

H. Res. 745. Resolution to amend the Rules of the House of Representatives to create a standing committee to be known as the Committee on the Environment; to the Committee on Rules.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEALL of Maryland:

H.R. 15174. A bill for the relief of Mrs. Mary Jane Robb Frye Harden; to the Committee on the Judiciary.

By Mr. FLOOD:

H.R. 15175. A bill for the relief of Kimoko Ann Duke; to the Committee on the Judiciary.

By Mr. ROYBAL:

H.R. 15176. A bill for the relief of Miss Ngan Fei Mo; to the Committee on the Judiciary.

By Mr. UDALL:

H.R. 15177. A bill to authorize the Secretary of the Interior to convey certain lands situated in Arizona to Mrs. Hallie Griffin; to the Committee on Interior and Insular Affairs.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

352. By the SPEAKER: Petition of the 34th Infantry Division Association, Des Moines, Iowa, relative to equalization of retired pay of members of the uniformed services of equal rank and years of service; to the Committee on Armed Services.

353. Also, petition of the National Association of State Departments of Agriculture, relative to the repeal of cargo preferance; to the Committee on Banking and Currency.

354. Also, petition of the executive board, district 5, United Mine Workers of America, Pittsburgh, Pa., relative to a report of the U.S. Department of Labor concerning the United Mine Workers; to the Committee on Education and Labor.

# EXTENSIONS OF REMARKS

## REVERSION OF OKINAWA TO JAPANESE CONTROL

### HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

*Tuesday, December 9, 1969*

Mr. BYRD of Virginia. Mr. President, the Northern Virginia Daily, of Strasburg, Va., published, on December 4, a thoughtful editorial on the subject of the recent talks between President Nixon and Japanese Prime Minister Sato relative to reversion of Okinawa to Japanese control. The editor of the Northern Virginia Daily is James J. Crawford.

I ask unanimous consent that the editorial, entitled "The Okinawa Talks," be printed in the Extensions of Remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE OKINAWA TALKS

There appears to be wide-spread misunderstanding regarding the outcome of President Nixon's consultations with Japanese Prime Minister Sato on the future return of Okinawa to Japanese sovereignty.

We raise the question now because many Americans, including some of our readers, are under the impression that the communique issued by the President and the Prime Minister, at the conclusion of their talks on November 21st, categorically agreed to the return of the island to Japan by 1972. This was not the case.

Prime Minister Sato, who is under tremendous political pressure at home for return of the territory, did not get, nor did he expect to get, an unrestricted promise of compliance by the U.S.

What the President and the Prime Minister agreed to was, first, that the two governments would immediately enter into consultations regarding specific arrangements for the return of the territory to Japanese control. Secondly, it was agreed that the consultations would be "subject to the conclusion of these specific arrangements with the necessary legislative support."

Thus, the only commitment so far made is the agreement to work together in exploring possible avenues for the future return.

Sen. Harry F. Byrd, Jr., reminds us that on November 5th the Senate served notice that any changes in treaties previously ratified by the Senate must be submitted to the Senate for approval. President Nixon, and by indirection Prime Minister Sato, acknowledged this principle by specifying in their joint communique that any specific arrangements made by them in the future regarding the sovereignty of Okinawa would be subject to legislative support action. In view of the Senate's November 5th resolution, this can only mean subject to approval of the Senate.

Though the principle of consulting the Senate on matters of this kind has not always been followed by previous administrations, it is the proper procedure. In fact, under the Constitution, the President can make treaties only with the advice and consent of the Senate, and only after two-thirds of the senators present concur. By the same token, treaties which run in perpetuity can be abrogated or changed only with the consent of the Senate.

The fact that President Nixon openly and clearly recognizes the Senate's role is reassuring. Along with Sen. Byrd, we also feel that if the U.S. is to continue its widespread military commitments in the Far East we must retain unrestricted use of Okinawa as a base.

As a result of the Nixon-Sato talks we have surrendered nothing, nor have we agreed to anything except to consult and explore the possibilities of return of the islands to Japan sometime in the future.

---

## CHARLES H. FLYNN, EDITOR AND FRIEND

### HON. JOHN S. MONAGAN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 8, 1969*

Mr. MONAGAN. Mr. Speaker—

Whenever there was a good cause to support, a good man to encourage, a good fight to win, Mr. Flynn took part.

This was in part the editorial tribute paid by the Ansonia, Conn., Evening Sentinel to its eminent editor, the late Charles H. Flynn, who died on Thanksgiving Eve, Wednesday, November 26, 1969.

I valued Charlie Flynn as a warm, personal friend and I admired him as well as a newspaper man of talent, integrity, and outstanding ability.

Connecticut has lost a powerful newspaper voice with the death of Charles H. Flynn and I heartily concur in the Ansonia Sentinel's comment that "all of us whose lives he affected for the better know that his like will not be seen again."

As a further tribute to Charles H. Flynn, I include here the text of an editorial, an orbituary story, and commentaries on his passing which appeared in the Ansonia Sentinel on November 29, 1969:

[From the Ansonia (Conn.) Sentinel, Nov. 26, 1969]

CHARLES H. FLYNN

Charles H. Flynn, whose death we mourn today, devoted his life to the Valley. As a family man, devout communicant of his church, leader in civic causes and editor of The Evening Sentinel he played a prominent and beneficial role in our community for a long generation.

Whenever there was a good cause to support, a good man to encourage, a good fight to win, Mr. Flynn took part, either personally or through the editorial columns of The Sentinel.

His reputation and influence extended far beyond the Valley, however. In point of service he was the state's senior editor, widely recognized by his colleagues as being at the head of his profession.

He took a leading part in Connecticut journalistic activities, always working to improve newspaper standards and fighting encroachments on the free flow of the news. But it was for his personal qualities that he was most widely loved and respected. Firm but fair, occasionally quick to anger but always quicker to regain his equanimity, bright, charming and humorous in personal conversation or on the public platform, Mr. Flynn made an unforgettable impact on all who were fortunate enough to know him.

All of us whose lives he affected for the better know that his life will not be seen again.

---

C. H. FLYNN, 62, DIES; EDITOR OF THE SENTINEL

Charles H. Flynn, editor of The Evening Sentinel and for a generation an influential voice in the Valley and the state, died this morning in Griffin Hospital. He was 62-years-old.

Mr. Flynn devoted his life to the newspaper profession in general and to The Evening Sentinel in particular. He started at The Sentinel in 1927 as a cub reporter and rose to the paper's top news and editorial posts.

For many years his lucid, erudite editorials clarified public issues, pricked the public conscience and prodded public officials into action. Some influenced the governor and the legislature.

But his influence was exerted personally as well as through The Sentinel.

He took a prominent part in a multitude of activities benefiting his community and his church: the Valley United Fund, Catholic Family Services, the Red Cross, an orphanage, a library, a children's camp and civic and fraternal organizations.

A devoted Catholic, he was a communicant of the Church of the Assumption, Ansonia, and a member of the Assumption Parish Council.

Some years ago he summed up his philosophy of life in two sentences:

"What can anyone do but his best? With trust in God, life turns out much better than can be hoped for."

Mr. Flynn's personality made a powerful impact on those who knew him. He was usually bright, cheerful and loquacious, a quip frequently on his lips.

Occasionally, however, his features would cloud, his long shock of gray-white hair would toss above his massive head and his voice would thunder out imprecations against some malefactor or some injustice. But if he was quick to anger, he was just as quick to forgive and forget.

His Irish wit and commanding presence made him much in demand as a speaker and toastmaster through the Valley.

Charles H. Flynn was born on New Year's Day, 1907, in Derby, son of the late Charles H. Flynn and Kate Killoy Flynn.

He was a graduate of Derby High School, Class of 1924, of which he was president. He earned his bachelor of arts degree at the College of the Holy Cross, Worcester, Mass., graduating in 1929 cum laude.

It was more than 42 years ago—in 1927—that he first joined The Sentinel, temporarily suspending his studies at Holy Cross to earn money for his education. He worked as a reporter for a year before returning to college, rejoining the paper after graduation.

At The Sentinel he became friendly with a fellow reporter, Miss Eileen V. Hennessy of Ansonia. They were married in 1938 in Ansonia's Church of the Assumption. They had three children. Mrs. Flynn died in 1956.

Mr. Flynn was promoted to managing editor in 1944. He took charge of all news and editorial operations of the paper.

"A local paper has a duty to keep the community informed," he said years later. And keeping the community informed is what Flynn devoted the rest of his life to doing.

He rejected all requests to keep names of arrested persons out of the paper.

"What is fair for one is fair for all," he would say.

As managing editor of The Sentinel, Mr. Flynn gradually won a state-wide reputation among newspapermen. They named him to serve on the Connecticut Associated Press continuing Study Committee—the body that

keeps a continuous check on the quality of wire service news. He was elected secretary of the committee.

Three years ago, Mr. Flynn was elected treasurer of the Connecticut AP Circuit. Two years later, he was named vice president and then president. Last May he was re-elected president, which office he held at his death.

Mr. Flynn was also a member of the new England Society of Newspaper Editors and of Sigma Delta Chi, the national journalism fraternity.

A life-long interest was freedom of information—the unfettered flow of news from public officials through the press to the people.

"The public does not realize why reporters should have access to public information," he said. "We are not asking for a commodity to sell (the papers sell anyway). We are fighting the battle of the people. The people have the right to know."

At the time of his death, Mr. Flynn was Connecticut's senior editor in point of service.

Mr. Flynn was the first president of the old Diocesan Bureau of Social Services. He was re-elected annually ever since, the last time in May 1969. The organization became the Catholic Family Services in 1967.

He served as president and chairman of the budget committee of the old Ansonia Community Chest. When the Valley United Fund was formed, in 1968, he became its first vice-president, a position he held until his death.

Mr. Flynn also served on the board of directors of the Highland Heights Orphanage, New Haven; on the Board of Directors of the Lower Naugatuck Valley Chapter, American Red Cross; as a director of the Ansonia Public Library, and as president of the Ansonia Board of Assessors.

He was also a member of Father McKeon Division, Ancient Order of Hibernians; past district deputy of the Councils of the Knights of Columbus of the Valley, and past grand knight of Paugasset Council, Knights of Columbus, of Derby.

Mr. Flynn lived at 141 Howard Avenue, Ansonia.

Mr. Flynn is survived by two sons, Joseph P. Flynn, an Ansonia lawyer, and Spec. 4 Michael A. Flynn, U.S. Army, stationed in Germany; a daughter, Miss Eileen M. Flynn of Ansonia; a sister, Mrs. Thomas F. Keane of Stamford, and a brother, Frank Flynn of Tallahassee, Fla.

Services will be held at 10:15 a. m. Friday at the William E. Stapleton Funeral Home, 72 Howard Ave., Ansonia, with a solemn high Mass of requiem at 11 a.m. at the Church of the Assumption. Burial will be in Mount St. Peter's Cemetery, Derby.

Calling hours are 7 to 9 p.m. today and tomorrow at the funeral home.

Members of the Valley Council, K. of C., Ansonia, will meet at 7:30 p.m. tomorrow at the funeral home to pay their respects.

Paugassett Council, K. of C., Derby, will pay its respects at the same time and place.

Members of Local 285, International Typographical Union, will meet at 6:45 p.m. tomorrow at the funeral home to pay their respects.

The Ansonia Library will be closed from 10:30 to noon Friday in respect for Mr. Flynn, a member of the library board of directors.

TRIBUTES TO CHARLES H. FLYNN

Tributes to Charles H. Flynn, editor of The Evening Sentinel, who died this morning at Griffin Hospital, poured into Ansonia today from the Valley, state and nation. Here are some of them:

L. P. YALE, STATE AP CHIEF

If I may use an old, but in this case true, cliche, Charlie Flynn was a newspaperman's newspaperman.

His long experience and vast knowledge of the news business made him a valuable adviser in handling problems of the industry.

His activities in the Associated Press Connecticut Circuit, capped by his service as president—a post he held at the time of his death—were always enthusiastic, knowledgeable and solid.

THOMAS J. DODD, U.S. SENATOR

The death of Charles Flynn, editor of The Evening Sentinel is a great loss to his family, community and indeed to the whole State of Connecticut.

He was a man of great intellectual integrity. Charlie Flynn was a journalist from the old school, a good school, the school of fact and not of fiction.

I have known him for a great many years, and have often sought his advice because he was a sensible, thoughtful and reflective man. He had no poison pens among his quills.

JOHN S. MONAGAN, U.S. CONGRESSMAN

Charles Flynn was a tower of strength in the advocacy of the principles by which he lived. He spokes clearly and with conviction in defense of the rights of the individual, and in support of things of local and national interest.

His editorials have influenced decisions at the local, state, and national levels on matters of significance to the Naugatuck Valley and the State of Connecticut.

WARREN F. GARDNER, MERIDEN RECORD

There wasn't a better newspaper editor in all of Connecticut, nor a more unassuming one. Charles Flynn had personal integrity and professional competency. He had a rare way with words.

Those of us who had a professional association with Charlie over the years feel his loss deeply. I am reminded of the words that the Guilford poet, Fitz-Greene Halleck, wrote of a friend: "None knew him but to love him nor mentioned his name but in praise."

STEPHEN A. COLLINS, DANBURY NEWS-TIMES

Charles H. Flynn held the esteem of his fellow editors for his high standards.

Their admiration was for his craftsmanship with words and their respect for his wide knowledge of his area and the manner in which he sought to serve the best interests of the readers of The Evening Sentinel.

Most of all he was a friendly man in the finest sense of that word. Even his frequent quips could not hide his deep affection for mankind.

JOSEPH B. BUCKLEY, STATE SENATOR

He did more than just put out a newspaper. He made news through his extensive investigations and questioning. Through his editorials and prodding of local officials and congressmen, he helped the $15.3 million flood-control project in Ansonia and Derby become a success. The project would not be there today without his efforts.

JOSEPH A. DOYLE, EX-ANSONIA MAYOR

Charles Flynn followed the flood-control program for 12 years on his own, often writing letters on his own in addition to his newspaper writings.

We are all saddened by his death. He dearly loved Ansonia and the Valley and through his pen, he inspired citizens in times of distress and stimulated all of us to achieve greater heights for our community.

GUY MARCUCIO, GRAND KNIGHT

Paugassett Council, Knights of Columbus, of Derby has learned with deep sorrow of the death of Past Grand Knight Charles Flynn. Although he had many commitments, his deep interest in the Council never abated.

REV. JOSEPH PETTIT, CFS DIRECTOR

As president of the Catholic Family Service Advisory Board he gave leadership and direction to the agency.

Without his help through many years, this agency could not have risen to the stature it now enjoys. For this untiring effort we in the community will always be grateful.

Charlie Flynn was a person of strong faith and manly love for God and his fellow human beings. Those who knew him will never forget him in death.

JOSEPH A. SMITH, VALLEY UNITED FUND

One of Charles Flynn's proudest accomplishments was to have worked successfully with others for the development of the Valley United Fund. This he did from the first days as president of the Ansonia Community Chest in 1965, a position he held until 1967 when he became first vice-president of the new United Fund.

In that office, one for which he was again nominated this year, he gave of his time and energy most unstintingly.

He was active at almost every executive and board meeting of the Valley United Fund. He discussed, and aided in the new approach to the new directions with which our emerging organization has been constantly confronted.

THOMAS J. NELLIGAN, EX-ANSONIA MAYOR

He was a tremendous help to me when I was mayor. His advice was always worthwhile and I will miss him very much. He was a wonderful man and will be missed by the whole city.

FRANK FITZGERALD SR., EX-ANSONIA MAYOR

Charlie was one of our foremost citizens with a deep interest in the affairs of the city. He was always willing to cooperate in anything in the interest of the welfare of the public.

PAUL SCHUMACHER SR., TOWN, CITY CLERK

There are many scrapbooks in the city that bear his wonderful editorials and his nostalgic recordings of events in the Valley. He fought like the devil for anything he thought was right for the Valley.

LEO T. MOLLOY, EX-DERBY EDITOR

Mr. Flynn was an excellent writer and a fine reporter. He had a profound knowledge of world and domestic affairs and was always keenly aware of happenings in the Valley.

His knowledge was reflected in his editorials. His passing will be deeply felt by his associates in the newspaper world and his many friends and acquaintances in the Valley.

HERBERT A. STOCKING, FORMER CITY EDITOR

The Connecticut newspaper profession has lost one of its ablest, honest and fearless members, one with keen editorial insight.

---

## PRESIDENT'S NEWS CONFERENCE ON FOREIGN AND DOMESTIC AFFAIRS

---

## HON. HUGH SCOTT

OF PENNSYLVANIA

IN THE SENATE OF THE UNITED STATES

*Tuesday, December 9, 1969*

Mr. SCOTT. Mr. President, I ask unanimous consent to have printed in the Extensions of Remarks the transcript of the President's news conference yesterday on foreign and domestic affairs.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 9, 1969]

TRANSCRIPT OF THE PRESIDENT'S NEWS CONFERENCE ON FOREIGN AND DOMESTIC AFFAIRS

*Following is a transcript of President Nixon's news conference last night, as recorded by The New York Times:*

Nixon. Won't you be seated, Mr. Smith.

Q. Mr. President, do you see any signs of the Vietnam war cooling off?

A. Well, looking over the long period—yes.

As far as recent weeks are concerned, since my speech of Nov. 3, no significant change. When we compare the situation with regard to infiltration and casualties this year with last year, there is a great difference. And looking to the future, if that situation continues I believe that we can see that the Vietnam war will come to a conclusion—regardless of what happens at the bargaining table. And it will come to a conclusion as a result of the plan that we have instituted, on which we are embarked, for replacing American troops with Vietnamese forces.

MYLAI MASSACRE

Q. In your opinion, was what happened at Mylai a massacre, an alleged massacre, or what was it, and what do you think can be done to prevent things like this? And if it was a massacre, do you think it was justifiable on military or other grounds?

A. Well, trying to answer all of those questions, in sorting it out, I would start first with this statement: What appears was certainly a massacre, and under no circumstances was it justified. One of the goals we are fighting for in Vietnam is to keep the people from South Vietnam from having imposed upon them a government which has atrocity against civilians as one of its policies, and we cannot ever condone or use atrocities against civilians in order to accomplish that goal.

Now when you used the word "alleged," that is only proper in terms of the individuals involved. Under our system a man is not guilty until proved to be so. And there are several individuals involved here who will be tried by military courts, and consequently we should say "alleged" as far as they are concerned until they are proved guilty.

As far as this kind of activity is concerned, I believe it is an isolated incident. Certainly within this Administration we are doing everything possible to find out whether it was isolated, and so far our investigation indicates that it was. And as far as the future is concerned, I would only add this one point: Looking at the other side of the coin, we have a million, two hundred thousand Americans who have been in Vietnam. Forty thousand of them have given their lives.

Virtually all of them have helped the people of Vietnam in one way or another. They built roads and schools; they built churches and pagodas. The Marines alone this year have built over 250,000 churches, pagodas and temples for the people of Vietnam. And our soldiers in Vietnam and sailors and airmen this year alone contributed three-quarters of a million dollars to help the people of South Vietnam.

Now this record of generosity, of decency, must not be allowed to be smeared and slurred because of this kind of an incident. That's why I'm going to do everything I possibly can to see that all the facts in this incident are brought to light, and that those who are charged, if they are found guilty, are punished, because if it is isolated it is against our policy and we shall see to it that what these men did—if they did it—does not smear the decent men that have gone to Vietnam in a very, in my opinion, important cause.

AGNEW AND MEDIA

Q. Mr. President, Vice President Agnew in recent weeks has made two speeches in which he has criticized the news media—broadcasting in particular.

A. Yes, I know.

Q. What, if anything, in those speeches is there with which you disagree?

A. Before this audience? The Vice President does not clear his speeches with me, just as I did not clear my speeches with President Eisenhower. However, I believe that the Vice President rendered a public service in talking in a very dignified and courageous way about a problem that many Americans are concerned about, and that is the coverage by news media—and particularly television news media—of public figures.

Now let me be quite precise. He did not advocate censorship. On the contrary, he advocated that there should be free expression. He did not oppose bias. On the contrary, he recognized—as I do—that there should be opinion.

Let me say on that score that I don't want a bunch of intellectual eunuchs either writing the news or talking about the news. I like excitement in the news, whether it's on television or whether it's in the columns.

He did say, and perhaps this point should be well taken, that television stations might well follow the practice of newspapers of separating news from opinion. When opinion is expressed, label it so, but don't mix the opinion in with the reporting of the news.

It seems to me these were useful suggestions. Perhaps the networks disagreed with the criticisms, but I would suggest that they should be just as dignified and just as reasonable in answering the criticisms as he was in making them.

TAX REFORM BILL

Q. Sir, if the final version of the tax reform bill now pending in Congress includes the Senate-adopted $800 exemption provision and the 15 per cent Social Security increase, can you sign it?

A. No.

Q. May I go back to Mr. Parnell's question, asked in the light of the Mylai incident. Would you prefer a civilian commission, something other than a military inquiry in this case?

A. Mr. Thyss, I do not believe that a civilian commission, at this time, would be useful. I believe that the matter now is in the judicial process and that a civilian commission might be, and very properly could be used, by the defendants' attorneys as having prejudiced their rights.

Now if it should happen that the judicial process, as set up by the military under the new law passed by Congress, does not prove to be adequate in bringing this incident completely before the public, as it should be brought before the public, then I would consider a commission. But not at this time.

Q. Mr. President, Secretary of Defense Laird is reported to have said that you would be expected to announce a further troop cutback from Vietnam later this month, probably 40,000 men. Also today, Senator George Aiken is reported as having said that you have already withdrawn, or ordered withdrawn, another 9,000 that was not announced. Could you give us your thinking and the prospects and the substance of both of those reports?

A. As I indicated in my speech on television on Nov. 3, the reports from Vietnam with regard to infiltration and with regard to casualties and with regard to the training of the South Vietnamese indicate more progress on all fronts than we had anticipated when we started our troop schedule withdrawal in June.

There will be a troop cut with a replacement by South Vietnamese later this month, I would say within the next two to three weeks. As far as the number is concerned, the number is still under consideration. It will depend upon the events and our analysis of the events between now and the time I make the announcement.

PENTAGON PERSONNEL

Q. Mr. President, there are two flagrant instances of intimidation and harassment and threats against Pentagon personnel who may have divulged information to Congress and to the public about cost overruns, and mismanagement and irregular industrial alliances. These two instances are related because some of the same people are involved.

I refer, one, to a disgusting, Gestapo-like interrogation of Pentagon personnel to see who leaked information to Sarah McClendon for news stories. This involves Barry J. Shilako and Edward Sheridan. I also refer to the firing of A. Ernest Fitzgerald, whose divulgement of cost overruns saved the American people $2-billion. His greatest critics were Dr. Robert Luke and Barry J. Shilako. Can you do something about this, please, sir?

A. I better after the way you put that question.

CONFERENCE ON FOOD

Q. Mr. President, last week the White House Conference on Food and Nutrition strongly recommended approval of a bill which has passed the Senate to reform the food stamp program, but it's locked in the House, and another bill which would reform the school lunch program, which has passed the House but is blocked in the Senate. Your Administration is reported to be lobbying against both bills. Will you follow the recommendations of your White House conference, and what course of action will you take?

A. I favor the approach that our Administration has put before the Congress as being the more responsible approach on both scores. I will, of course, consider the recommendations of the White House conference, which will be made to me, at my request, within approximately 30 days.

There is another recommendation by the White House conference which I unfortunately cannot give really sympathetic consideration to, and that is the one recommending a $5,400 minimum for a family of four in America. That would cost approximately $70- to $80-billion in taxes, or $70- to $80-billion in increased prices. I do not say that to discredit the conference.

I simply say that all of us in this country want to end hunger in the United States. All of us want the poor to have a minimum floor, and that minimum be as high as possible. All of us, for example, want Social Security to be higher. But when I consider all of these matters, I have to think also of this fact: the fact that I as President am the one who has the primary responsibility for the cost of living in this country. Referring a moment ago to the tax question, it would be very easy for me to sign a bill which reduces taxes. But if I sign the kind of a bill which the Senate is about to pass, I would be reducing taxes for some of the American people and raising the prices for all the American people. I will not do that.

FAIRNESS OF REPORTING

Q. How fair do you think the news media has been in reporting on you, and on Vice President Agnew, and on your Administration in general?

A. Generally, I think the news media's been fair. I have no complaints about the—certainly the extent of the coverage that I have received. And I also will have no complaints just so long as the news media allows—as it does tonight—an opportunity for me to be heard directly by the people, and then the television commentators to follow me. I'll take my chances.

Q. Mr. President, do you think that the wife of the Attorney General, like the Vice President, has rendered a public service by her statements on the protest movement and on her political activities?

A. Well now, I decided when this Administration came to Washington that I would take the responsibility for answering for my own personal family and for my Cabinet family, but that each Cabinet member would answer for his family, and so I'll leave that question to the Attorney General.

SUPPORT OF POLICIES

Q. To broaden that a little bit, on Nov. the 3d you called for support for your policies in Vietnam. You since received a response that some of your aides feel is gratifying. My question is, however, have you not, with the help of Vice President Agnew—and I'm re-

ferring to some of his recent speeches—purchased this support at the cost of alienating a sizable segment of the American public and risking polarization of the country?

A. Mr. Semple, one of the problems of leadership is to take a position. I like to be liked. I don't like to say things that everybody doesn't agree with. When peace marchers come to Washington, it would be very easy to say that I agree with them, I will do what they want.

But a President has to do what he considers to be right—right for the people; right, for example, in pursuing a just peace, not just peace for our time, for a little time.

I believe that I pursue that path. I do not believe that that is a disservice to the public interest, because I believe that sometimes it is necessary to draw the line clearly—not to have enmity against those who disagree, but to make it clear that there can be no compromise where such great issues as self-determination and freedom and a just peace are involved.

SPECIAL SESSION

Q. Could you assess for us how you see now the prospects of a special session of Congress during the Christmas holidays?

A. Well I've had some conversations with some of the members of the House and Senate since I indicated to the Republican leaders that I might call that session. And I would say the jury is still out. The House is moving much more speedily, the Senate has begun more speedily. If the present progress continues at this rate, it may be that we can all have some vacation after Christmas. But, if they do not pass the appropriations bills, as I indicated, I will have to call a special session, much as I would not want to do so.

SALT POSTPONEMENT

Q. The United States today asked for a postponement in the SALT talks, the strategic arms talks. Can you tell us why, and assess the talks for us, please?

A. Well, the postponement does not have any long-range significance. It's only for the purpose of developing the positions in a proper way. As far as the progress is concerned, I would say it is encouraging. I say that somewhat cautiously because I would not want to leave out the hope that we would have an agreement within a matter of weeks, or even months.

But it is encouraging because both sides are presenting positions in a very serious way, and are not trying to make propaganda out of their positions. Both sides, I believe therefore want a limitation on strategic arms. As long as this is the case, there is a chance for an agreement.

Now it's going to take some time because what is involved here, as distinguished from the test ban and as distinguished from the nonproliferation treaty—both of which were important but which were basically peripheral issues—here you have the basic security of the United States of America and the Soviet Union involved. Therefore both must bargain hard.

But I believe that the progress to date has been good. The prospects are better than I anticipated they would be when the talks began.

ADDITION OF TROOPS

Q. Mr. President, as the Vietnamization process moves along, are there any circumstances, such as perhaps a series of defeats by the South Vietnamese Army, that might lead you to want to reverse the process of troop withdrawals and increase our troops in Vietnam?

A. I do not anticipate that at this time. I want to make it of course clear that we do not anticipate that there will not be troubles. The enemy still has the capability of launching some offensive actions, not certainly the capability that it had a year ago. It's much less because their infiltration has been less.

But the present prognosis that I think I can make is this—that we can go forward with our troop withdrawal program and that any action that the enemy takes, either against us or the South Vietnamese, can be contained without that program.

ALLIES AND TROOPS

Q. Mr. President, is there any truth in the reports that have been rather persistent for the last couple weeks that we paid Thailand something like a billion dollars for their cooperation in Vietnam? And, in that connection, where do our allies, like Thailand, South Korea and their troops, fit into our withdrawal program?

A. Well, first, with regard to the second part of the question: Both Thailand and South Korea have no intention—at least none that has been indicated to us—of withdrawing forces at the time that we are withdrawing ours, because we have a much greater commitment there than they have.

Second, with regard to the billion dollars that allegedly has been paid to Thailand, the amount is, of course, far less than that. But, quite candidly, yes, the United States is subsidizing the Thai troops. We also are subsidizing the South Korean troops. We're doing exactly what we did in Western Europe immediately after World War II when we subsidized virtually all of Western Europe, due to the fact that they could not maintain forces themselves for their own defense. These are newly developing countries; they are unable to maintain their forces for their own defense, and, therefore, we think that subsidy is correct. And I could only say this: It seems to me it makes a gread deal of sense. The Thais are in Vietnam as volunteers, and if they are willing to go there as volunteers I would much rather pay out some money to have them there than to have American men fighting there in their place.

Q. Since Ambassador Lodge resigned, you've not named a successor as chief negotiator. Is this in effect downgrading the Paris talks because they have been nonproductive?

A. No. Mr. Habib is a very competent career diplomat, and he will be able to discuss anything that is brought up seriously by the other side. We're simply waiting for a serious proposal.

NEGOTIATED PEACE

Q. Considering how things have gone in Paris, how do you now rate the chances of a negotiated settlement of the war?

A. Not good. Quite candidly, I would like to say that they were good; but looking at the present situation, the enemy's line continues to be hard; their proposals quite frivolous as the ones by the VC today. And I do not anticipate any progress on the negotiating front at this time. But I have put in this one condition: As our program for Vietnamization continues to work, and as it becomes apparent, as I believe it increasingly will, that it will succeed. I think the pressures for the enemy then to negotiate a settlement will greatly increase, because once we are out and the South Vietnamese are there, they will have a much harder individual to negotiate with than they had when we were there.

INTEGRATION POLICY

Q. Before the Supreme Court ordered immediate school integration you said you preferred a middle road policy, that is, between segregation forever and instant integration. What's your policy now?

A. To carry out what the Supreme Court has laid down. I believe in carrying out the law even though I may have disagreed as I did in this instance with the degree that the Supreme Court eventually came down with. But we'll carry out the law. Yes, sir?

TAX PROBLEM

Q. The question on your broad philosophy on the tax problem that we're all struggling with. You often pointed out that this is a very rich country, and there are some people who argue that the American people can tax themselves whenever they want to and when they are prepared to make the sacrifice in order to provide the very substantial sums that are necessary for the big problems at home, the cities getting their housing program rolling and so forth, and that we might very well do it now and get on with the job because the end of the Vietnam war apparently is not going to release very substantial amounts of fresh funds. Could you comment on this hairshirted approach to the tax problem?

A. Well, it is, it is of course a very complicated but a very fundamental question. I would put it very briefly and answer in this way.

Approximately 35 to 37 per cent of the total income of the United States goes to taxes—that is, Federal, State and local taxes. I believe that amount is high enough. I believe that when a nation takes a substantially larger portion of the national income than that for taxes, that then the nation loses its character as a free private enterprise economy and turns over and becomes primarily a state-controlled and oriented economy.

Therefore, while I believe that the United States can afford what it needs to do in many fields—including the environment and others that I will be touching upon the State of the Union—I do not want to see a substantial increase in the tax burden, or as a percentage of our gross national income.

RECORD OF CONGRESS

Q. Mr. President, getting back to the Congress for a moment, House Democratic Leader Carl Albert today said that an Administration spokesman had issued misleading statements about the Congress in an effort to undermine public confidence in it, and he went on to say, and I quote him as saying, the Administration—it's the fault of the Administration for delays, obfuscations, confusion and lack of leadership on the part of the Administration. Would you care to comment?

A. Well, that sounds like a pretty good political statement by Mr. Albert, and I can understand why he, as the majority leader, might find it necessary to make that statement. However, I think he knows, as all of you know, that for six months we've had a major crime control package before the Congress with no action, for months, we've had other programs in a number of fields there without action.

This Congress has the worst record in terms of appropriations bills of any Congress in history. Now, let me say, I'm a defender of the Congress, and having said all this I'm also a defender of Carl Albert—I like him, I want to continue to work with him. I don't want to answer that question any further at this point.

NUMBER OF NEWS PARLEYS

Q. Mr. President, two related questions, sir: Why have you only had three full-dress news conferences in six months, and what is your reaction to the general philosophy among some of us in the press that the press is not doing its job if it doesn't hold an Administration—any Administration—to account without, shall we say, coziness?

A. Well, I don't think I've had any problem with regard to the press holding me to account in my political lifetime. I think if I could paraphrase Winston Churchill—a statement he made in 1914—I've always derived a great deal of benefit from criticism, and I've never known when I was short of it.

Now, as far as the press conferences are concerned, I try to have press conferences when I think there is a public interest—not just a press interest or my interest—but the public interest in having them. And

also, to use various devices; as you know, I've had conferences in my office, I had a conference in Guam, I've also made three major television addresses in prime time.

If I consider that the press and the public need more information than I'm giving through press conferences I'll have more. I welcome the opportunity to have them. I'm not afraid of them, just as the press is not afraid of me.

Q. Will our Vietnam involvement be reduced in your Administration to the point where it will command a little more public opinion than say, earlier than now?

A. Well that is certainly our goal. And I think we are well on the way to achievement of that goal. We have a plan for the reduction of American forces in Vietnam, for removing all combat forces from Vietnam, regardless of what happens in negotiations. That plan is going forward, and as I will report to the nation when I announce the troop withdrawal three weeks from now, I believe that developments since my Nov. 3 speech have been on schedule.

LIMIT ON INFORMATION

Q. Mr. President, what limits do you put on what the United — the people of the United States ought to know about the war that's going on in Laos and the American involvement in it?

A. The public interest, as far as I'm concerned, the people of the United States are entitled to know everything that they possibly can with regard to any involvement of the United States abroad. As you know, in answer to a question I think Mr. Potter asked at the last news conference, I pointed out what were the facts. There are no American combat troops in Laos. Our involvement in Laos is solely due to the request of Souvanna Phouma, the neutralist Prime Minister, who was set up there in Laos as a result of the Laos negotiation and accords that were arranged by Governor Harriman during the Kennedy Administration. We are attempting to uphold those accords, and we're doing that despite the fact that North Vietnam has 50,000 troops in Laos. We are also, as I have publicly indicated and as you know, we are interdicting the Ho Chi Minh Trail as it runs through Laos. Beyond that, I do not think the public interest would be served by any further discussions.

POSSIBILITY OF DEFICIT

Q. Budget director Mayo said recently that uncontrolled Federal spending is likely to push the fiscal '71 budget beyond the $200-billion mark and that the eventual elimination of the surtax could produce a deficit that year. I have two questions. Do you foresee the possibility of a deficit in '71? And, if that is the prospect, would you recommend continuing the surtax beyond June 30?

A. The answer to the first question—the second question is that I do not intend to recommend the continuation of the surtax beyond June 30. And with regard to the first part of the question, only by use of the Presidential veto and by impounding funds are we going to be able to avoid the kind of a situation that Director Mayo has described.

But I can assure you that I intend to use all the powers of the Presidency to stop the rise in the cost of living including the veto.

INFILTRATION INCREASES

Q. Mr. President, the enemy's infiltration has been up recently in Vietnam. Could you give us your assessment of this, specifically whether you think he is replacing losses, or building up for an offensive, and what significance could this fact have in terms of your own plans for troop reductions?

A. It has great significance because, as I have pointed out, enemy infiltration, the fact that it was down, is one of the reasons we've been able to go forward with our own troop-withdrawal programs. However, I have been analyzing these reports week by week.

The figures that we got two weeks ago seem to have been inflated. The inflation rate is not as great as we thought then. It is higher than it was a few months ago. It is still lower than it was a year ago.

We do not consider the infiltration significant enough to change our troop-withdrawal plans. Now something may occur in the next two or three weeks that may give me a different view on that, but at this time that would be my observation.

ANTIPOVERTY PROGRAM

Q. A move is under way in the House, and it's supported by the Republican leadership, to change the structure of the antipoverty program to give the Governors a veto over programs in their states. What is your position on that?

A. I support the director of O.E.O. He has asked for a two-year extension. He has pledged to reform the O.E.O., and I think he should be given the chance to reform it. I hope he's able to work out with the leadership in the House, most of whom are Republicans in this instance who want the changes and some Democrats will be able to work out some kind of accommodation with them. But of course I support my director that I've appointed.

REACHING THE YOUNG

Q. Mr. President, getting back to the polarization question. Your Administration has been charged with the failure to reach the young people—both those who protest and march and those who don't. Have you any specific plans for reaching the young people of this country?

A. I think you reach the young people more by talking to them as adults than talking to them as young people. I like to treat them as adults. I like to talk to them. I was rather encouraged by the number of letters and calls I received with regard to my Vietnam speech from young people. They didn't all agree, but at least they had listened, they had paid attention. I know a way not to reach them and that's to try to pick No. 1 as far as football teams are concerned.

## MYLAI—PROPAGANDA IS FAR FROM PROOF

### HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 8, 1969*

Mr. RARICK. Mr. Speaker, those of our colleagues who are attorneys and who have been following the media trials of the alleged Mylai atrocity will, no doubt, be astounded by the actual charges and specifications on which Lieutenant Calley and Sergeant Mitchell are to stand trial.

I have received a copy of the charges from the Department of the Army on Lieutenant Calley and related material on Sergeant Mitchell which I include in my remarks for the benefit of members of the bar, with the suggestion that they conduct a mental exercise in an effort to determine how it is possible either to prosecute or defend an individual accused, and facing capital punishment, on such loose charges.

Where in the United States could anyone find a judge who would refuse a motion to quash such an indictment?

Under Anglo-American law it is necessary first to prove that a specific individual actually existed before charging someone with his murder. Even murder mysteries insist on the corpus delecti. From the shape of these charges it does not appear that the Government is prepared to prove the actual existence of a single one of the alleged victims of the alleged massacre.

Perhaps the missing piece to the puzzle is that at an appropriate time Hanoi will provide a list of names, ages, and so forth, through its "dear American friends."

Mr. Speaker, I include a copy of the above-named documents received from the Department of the Army as a part of my remarks.

The documents follow:

DEPARTMENT OF THE ARMY,
OFFICE OF THE SECRETARY OF THE ARMY,
*Washington, D.C., November 24, 1969.*

*Information for Members of Congress:*

Major General Orwin C. Talbott, Commanding General of Fort Benning, Georgia announced today that First Lieutenant William L. Calley, Jr. will be tried by general court-martial for premeditated murder. This case will be tried as a capital offense. Charges and specifications are attached.

The trial will be held at Fort Benning. Date of trial is not known at this time. The date will be determined by the length of time needed by the defense and prosecution to prepare for trial. It is anticipated that this will require at least a month.

Lieutenant Calley will be represented at the trial by George W. Latimer (Salt Lake City, Utah, former judge of the Court of Military Appeals) and Major Kenneth A. Raby.

The trial will be open to the public. The Military Judge, however, is authorized to close portions of the trial to spectators to prevent the unauthorized disclosure of classified security information.

CHARGE: VIOLATION OF THE UNIFORM CODE OF MILITARY JUSTICE, ARTICLE 118

Specification 1: In that First Lieutenant William L. Calley, Jr., US Army, 40th Company, The Student Brigade, US Army Infantry School, Fort Benning, Georgia (then a member of Company C, 1st Battalion, 20th Infantry) did, at My Lai 4, Quang Ngai Province, Republic of South Vietnam, on or about 16 March 1968, with premeditation, murder four Oriental human beings, occupants of the village of My Lai 4, whose names and sexes are unknown, by means of shooting them with a rifle.

Specification 2: In that First Lieutenant William L. Calley, Jr., US Army, 40th Company, The Student Brigade, US Army Infantry School, Fort Benning, Georgia (then a member of Company C, 1st Battalion, 20th Infantry) did, at My Lai 4, Quang Ngai Province, Republic of South Vietnam, on or about 16 March 1968, with premeditation, murder an unknown number, not less than 30, Oriental human beings, males and females of various ages, whose names are unknown, occupants of the village of My Lai 4, by means of shooting them with a rifle.

Specification 3: In that First Lieutenant William L. Calley, Jr., US Army, 40th Company, The Student Bridage, US Army Infantry School, Fort Benning, Georgia (then a member of Company C, 1st Battalion, 20th Infantry) did, at My Lai 4, Quang Ngai Province, Republic of South Vietnam, on or about 16 March 1968, with premeditation, murder three Oriental human beings whose names and sexes are unknown, occupants of the village of My Lai 4, by means of shooting them with a rifle.

Specification 4: In that First Lieutenant William L. Calley, Jr., US Army, 40th Company, The Student Brigade, US Army Infantry School, Fort Benning, Georgia (then a member of Company C, 1st Battalion, 20th Infantry) did, at My Lai 4, Quang Ngai Province, Republic of South Vietnam on or about 16 March 1968, with premeditation, murder an unknown number of Oriental human beings, not less than seventy, males

and females of various ages, whose names are unknown, occupants of the village of My Lai 4, by means of shooting them with a rifle.

ADDITIONAL CHARGE: VIOLATION OF THE UNIFORM CODE OF MILITARY JUSTICE, ARTICLE 118

Specification 1: In that First Lieutenant William L. Calley, Jr., US Army, Hqs. Company, The Student Brigade, US Army Infantry School, Fort Benning, Georgia (then a member of Company C, 1st Battalion, 20th Infantry) did, at My Lai 4, Quang Ngai Province, Republic of South Vietnam, on or about 16 March 1968, with premeditation, murder one Oriental male human being, an occupant of the village of My Lai 4, whose name and age is unknown, by shooting him with a rifle.

Specification 2: In that First Lieutenant William L. Calley, Jr., US Army, Hqs. Company, The Student Brigade, US Army Infantry School, Fort Benning, Georgia (then a member of Company C, 1st Battalion, 20th infantry) did, at My Lai 4, Quang Ngai Province, Republic of South Vietnam, on or about 16 March 1968, with premeditation, murder one Oriental human being, an occupant of the village of My Lai 4, approximately two years old, whose name and sex is unknown, by shooting him with a rifle.

Staff Sergeant David Mitchell, currently assigned to Company C, 5th Battalion, 6th Infantry, 1st Armored Division, Fort Hood, Texas, has been charged with violation of Article 134, Uniform Code of Military Justice, assault with intent to commit murder. Charges involve offenses allegedly committed against Vietnamese civilians while Sergeant Mitchell was serving with the American Division in Vietnam in March 1968.

The case has been referred to investigation under Article 32, UCMJ. The investigation is continuing and the date of completion cannot be anticipated at this time. Whether the matter will be referred to trial by court-martial will be determined upon completion of the investigation. Prior to any decision to convene a court-martial it would be inappropriate for the Army to release details of the charges and specifications. To do so might prejudice the rights of the accused and of the Army.

---

Statement of Service

Name: Staff Sergeant David Mitchell, RA 54 232 256.

Date and place of birth: 16 August 1940, Hardwood, Louisiana.

Home of record: St. Francisville, Louisiana.

SUMMARY OF SERVICE

From 1960 to 1962: U.S. Army Reserve not on active duty.

From Nov. 62 to Jun 63: Company A, 1st Battle Group, 12th Infantry, Fort Lewis, Wash.

From Jun 63 to Jul 64: Combat Support Company, 12th Infantry, Fort Lewis, Wash.

From Jul 64 to Aug 65: Company B, 1st Battalion, 8th Cavalry, Korea.

From Aug 65 to Sep 66: 5th Battalion, 1st Training Brigade, Fort Jackson, S.C.

From Sep 66 to Nov 66: Company C, 10th Battalion, 2d Training Brigade, Fort Bragg, N.C.

From Nov 66 to Jul 67: 5th Battalion, 1st Training Brigade, Fort Jackson, S.C.

From Jul 67 to Dec 67: Company C, 1st Battalion, 20th Infantry, 11th Infantry Brigade, Hawaii.

From Dec 67 to Nov 68: Company C, 1st Battalion, 20th Infantry, 11th Infantry Brigade, American Division, Vietnam.

From Nov 68 to Present: Company C, 5th Battalion, 6th Infantry, 1st Armored Division, Fort Hood, Texas.

AWARDS AND DECORATIONS

Vietnam Service Medal; Vietnam Campaign Medal (Vietnamese); National Defense Service Medal; Combat Infantryman Badge, and Good Conduct Medal—Second Award.

---

## DEMOCRATIC PARTY REFORM IN IDAHO

---

## HON. FRANK CHURCH

OF IDAHO

IN THE SENATE OF THE UNITED STATES

*Tuesday, December 9, 1969*

Mr. CHURCH. Mr. President, on August 25, 1968—prior to the opening of the Democratic National Convention at Chicago—I stated that the "time has come to face the fact that the convention system is obsolete. National conventions, for both parties, are a remnant of 19th-century horse-and-buggy politics."

The 1968 national conventions, of both parties, offered astringent proof of the need for reform. Indeed, this was apparent at the time, as evidenced by the Democratic National Convention's resolution directing State parties to democratize the selection of their convention delegates.

While such reform is an essential beginning, it is not a final answer. Selecting a presidential candidate is much too serious a business to be transacted at a political carnival—where the voice of the people is all too often lost in the clamor and confusion of the convention hall. Too often it is purely a matter of accident if the nominee turns out to be the man the people really want.

Because of my conviction that we must replace the archaic convention system with a presidential primary, national in scope, where party candidates for President and Vice President will be nominated by direct vote of the people, it was with great interest that I recently read a proposal of a longtime friend and fellow Idahoan, Mr. Charles E. Bilyeu of Pocatello, in support of these objectives.

"Chick" Bilyeu is no armchair politician. As Democratic Party chairman for Bannock County and a popular faculty member at Idaho State University in Pocatello, he serves an area noted for "politics by participation," where all are encouraged to take a hand in the political process. For Chick, politics is also a family avocation. Mrs. Bilyeu, in addition to her many other activities, is a State senator in Idaho's Legislature.

I found it significant that the opportunity for Chick Bilyeu's presentation calling for a presidential primary was a public meeting in Idaho Falls sponsored by the Idaho Democratic Party to obtain—directly from the voters—their views on election reform in Idaho.

This effort is being coordinated by a committee established by the Idaho Democratic Party under the able chairmanship of James Donart, a noted attorney from Weiser. The committee has held public meetings throughout the State. Shortly, it will draft recommendations for the Idaho State Legislature, looking toward the necessary changes in our election laws. The Republican Party is being asked to cooperate in a spirit of mutual accommodation.

In my State, it is the Democratic Party which is taking the lead in the long-neglected area of election reform. Men like Chick Bilyeu and James Donart, among many others, are demonstrating their concern with meaningful action and creative proposals.

Mr. President, I believe that the challenging outline for a presidential primary laid out by Mr. Bilyeu merits the attention of every Senator. I ask unanimous consent that it be printed in the Extensions of Remarks.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

DEMOCRATIC PARTY REFORM IN IDAHO

(By Charles E. "Chick" Bilyeu)

The Democratic Party of the United States has proved once again that it is the oldest political organization in the world not by accident but because it reacts with sensitivity and sensibility to the needs of the people in a world which is continually accelerating its rate of change.

The Democratic National Convention of 1968 in Chicago was brutal in its honesty of exposing to all Americans some of the antiquated political habits our nation has come to accept as doctrine. Although these habits may be comforting to certain segments of our population, they create great discomfort for millions of our younger citizens.

The Democratic Convention of 1968 exposed shortcomings in our political system under the brilliance of spotlights generally reserved for theatrical spectaculars, and, as a result, has given many citizens the impetus to cogitate about the American system of handling the all important political aspects of our national life.

First and foremost to be considered in the American political system must be the method used to choose our Chief Executive. No longer is it acceptable to the American voter to be allowed to choose between the single candidates presented by each of the nation's major parties!

The American citizen of today has far more comprehension of the effect of political action on his own individual welfare than any citizen of any period in history. The American of 1969 wants more voice in determining his own future than ever before. So I submit the following as a proposal which, if tempered by thoughtful discussion, might generate political action in our nation that could bring a new dimension to the concept of self determination and which might reaffirm our faith in democracy in the United States.

I propose a national presidential primary in which each major political party would endorse up to five (5) nominees in a national convention. These nominees would be acceptable to their parties traditional standards and historical philosophies. This would permit each party to present to the people of the U.S. nominees of liberal, moderate, and conservative stands. Or to use hindsight the Democratic party could have endorsed in its 1968 convention V. P. Hubert Humphrey, Senator Robert Kennedy, Senator Eugene McCarthy, Senator George McGovern, and Senator Edmund Muskie. The people of the United States, in a national presidential primary, would then have named from these five outstanding Americans the one to be the Democratic candidate in the general election.

This method would maintain the necessity of the candidates adherence to party responsibility thereby preserving one of the great strengths of the two party system. This method would give all American citizens the opportunity to determine which leaders they preferred from a field of many rather than a choice of one out of two as is currently the case.

In order to implement this proposal the

national conventions should name the men of their choice by the first week in June. The national primary should be accomplished in September by the first Tuesday after Labor Day and the general election should be accomplished by November 30 in presidential election years.

The State of Idaho, in order to conform to action taken by the 1968 National Democratic Convention, should elect its delegates to the National Convention (June) at its own state convention to be held no later than the last week in April. This would allow at least one month for the state delegates to prepare for the National Convention.

In order to comply with the spirit of the 1968 National Democratic Convention, all individuals instrumental in selecting delegates to the National Convention should be elected during the calendar year of that election year. The case in point would be the election year of 1972. Therefore Idaho law should spell out in detail an election calendar which would culminate in selection of state delegates to the National Conventions *to commence after January 1, 1972.*

In keeping with the main thrust of this proposal i.e. to implement more participation at the grassroots level, Idaho Law should stipulate that precinct assemblies would be held on the first Friday in February and that precinct delegates to the Legislative District Assembly be duly elected that day and reported in writing to the legislative district chairman no later than the following Monday and that the instrument sent to the legislative district chairman be certified by the precinct committeeman and two voters registered in the precinct.

Next—Each legislative district should hold a district assembly on the second Friday in March and should elect in addition to the legislative district chairman and incumbent legislators (all of whom shall be automatic delegates) eight delegates to the state convention. These delegates shall be certified to the state chairman no later than the Monday following the assembly by the district chairman and the duly elected secretary.

Thus the election calendar would look like this visual aid.

ELECTION CALENDAR—1972

1. February—Precinct Assembly.
2. March—Leg. Dist. Assembly.
3. April—State Convention.
4. June—National Convention.
5. September—National Primary.
6. November—General Election.

Item No. 1.—The Precinct Assembly in February would comply with the 1968 Democratic National Convention resolution which stated in part that "all feasible efforts be made to assure that delegates are selected through procedures open to public participation within the calendar year of the National Convention." The function of the Precinct Assembly is to elect delegates to the Legislative District Assembly.

Item No. 2.—The Legislative District Assembly in March is preferable to a county assembly in that it adheres to the democratic principle of one man-one vote and would more nearly accomplish reapportionment in political party activities than has been the case heretofore. The function of the Legislative District Assembly is to elect delegates to the state convention.

Item No. 3.—The State Convention would need to be held in April so that state strategy along with other planning could be accomplished in sufficient time previous to the National Convention. The State Convention would elect delegates to the National Convention.

Item No. 4.—The National Convention would serve its new function best in June. Naming several favorite sons instead of one would require considerable time for each to campaign for the National Primary.

Item No. 5.—A September National Primary. This would give the candidates almost three months in which to mount a campaign for the General Election to be held before the end of November.

The foregoing proposal would satisfy the most recent expectations for more public participation within political parties and is hereby submitted for consideration by the Idaho State Democratic Party and the 1970 session of the Idaho State Legislature.

## AIR POLLUTION AND THE AUTOMOBILE

### HON. BERTRAM L. PODELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. PODELL. Mr. Speaker, on December 8, 1969, I sat as a member of a congressional panel investigating automotive air pollution. The seriousness of air pollution is increasing daily. In the United States, studies have shown that auto exhausts account for 60 percent of all air pollution.

The hearings in New York City provided an excellent opportunity to discuss the controversies surrounding the problems of our environment and the possible alternatives and solutions. I believe the hearing went a long way toward clarifying some of the issues and served as an important first step toward action in this area.

Because I feel that discussion should not stop with Monday's panel, I am inserting a transcript of my remarks into the RECORD:

TEXT OF TRANSCRIPT

A thought occurred to me the other day—What about passing a law that each automobile come equipped with the following warning: "Warning: automobiles may be hazardous to your health." A bit extreme you may think? I think otherwise, and just think what an effective bumper sticker it would make!

In the 1960's urban man has become the victim rather than the master of his environment. In past centuries, man was a victim of natural disasters; today he has fallen prey to manmade disasters. Over 173 million tons of pollutants fall on the United States each year. Over 88 million tons of such waste can be traced to motor vehicle emissions. Such residue falls heaviest on the shoulders, the lungs, the eyes, and the noses of the urban man.

Physicians have delved into the physical effects of air pollution. Our elderly, our youth, individuals suffering from respiratory and pulmonary diseases have become the helpless victims of our negligence in this area. Repeated exposures to contaminated air have been known to wear down the body's defense mechanisms against respiratory disease. An association between high density living, air pollution and respiratory illness has been found by researchers. Indeed, urban living may impair health!

In many areas we have come a long way from the "let the public be damned" attitude of the 19th century. The consumer today is assumed to have certain inalienable rights—rights that were alien only a few years ago. Unfortunately, there have been notable exceptions to this new policy. In still too many cases, technology and progress have been justified only on the basis of immediate economic benefits.

I feel that the automobile industry has been guilty of disregarding public demands. Only when the clamor became loud enough, did they finally begin to activate themselves. Yet, today, effective emission control devices remain the exception rather than the rule. Instead, the consuming public has been given engines with greater horsepower—which come in very handy in midtown traffic jams. Yet, anyone who has ridden behind a bus in one of those jams knows that he is facing a test of survival—he must prevent asphyxia from setting in.

Do we have to wait for major snowstorms when automobiles are banned from the streets to get air pollution down to a tolerable level?

Perhaps public clamor has not been loud enough. Or perhaps because there are only a few large firms controlling the market, these firms can afford to ignore public demands. Our legal system has ceased to tolerate contracts in restraint of trade. But it has not been forward looking enough to condemn *market practice* in restraint of trade. I think that our courts could become an arena for the solution of some of those problems.

In the past, we have looked upon air as the most infinite of our resources. We may have droughts; we may have to find new sources of fuel; but we always thought we would have a supply of air. It was invisible—yet omnipresent. As the amount of contaminated air over our cities increases, we must view that resource as finite, and in danger of possible extinction. A view from the New Jersey side of the Hudson or from the top of any large building will confirm the change that has taken place. As air ceases being invisible, it ceases to be healthy. To some extent, the old cliche "what we cannot see, cannot hurt us"; is true of air. It is time to make air invisible again.

I feel there has been a technological and institutional lag in the area we will be discussing today. Traditionally, nothing has been too much of a challenge to American industry or to the American scientists. The operating code has been: "the impossible takes a little longer". Yet, to achieve the impossible requires time, will, and resources. The Federal budget for air pollution control is only 1½% of our defense budget. Federal grants to New York City to combat air pollution totaled only $212,608 in the first half of the fiscal year 1969. I think the time for a basic reassessment of our national priorities has come.

I believe that today's hearings will go a long way toward clarifying some of the questions that are being raised. Is there a workable alternative to the internal combustion engine? Is there a device that can be installed on the engine that could cut the amount of poison spewing into the atmosphere? How far away are we from the development of such a device? And what can the Congress do to speed up the process?

Congress has been in the forefront of the fight against pollution. It has been the major innovative body. As a Member of Congress, I do not want to see that initiative fall by the wayside. I want to see it expand into broader and better programs. I want to see more imagination and insight brought to the difficult problems that require action.

I am, therefore, happy to be here to learn, to ask questions, and to voice my opinion on the matter of auto emissions and the pollution it has fostered. I plan to see that effective enforcement procedures are enacted.

Looking at our pollution problem, I now know why we are asked to see America first—If we continue to pollute our atmosphere at the rate we have been, we will find it difficult to see anything in the years ahead.

## EVERETT McKINLEY DIRKSEN—A FAREWELL

### HON. RALPH T. SMITH

OF ILLINOIS

IN THE SENATE OF THE UNITED STATES

*Tuesday, December 9, 1969*

Mr. SMITH of Illinois. Mr. President, I ask unanimous consent to have printed in the Extensions of Remarks an excellent letter entitled "Farewell to Dirksen From a School Boy," written by Doug Frazer.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[From the Moline (Ill.) Daily Dispatch, Sept. 23, 1969]

FAREWELL TO DIRKSEN FROM A SCHOOL BOY

DEAR EDITOR: Politics, the saying goes, is the art of the possible, and in the world's preeminent deliberative body, Sen. Everett McKinley Dirksen was a practitioner of the possible "par excellence." With the late Sen. Robert Taft of Ohio, Sen. Dirksen probably was the most widely respected Senator of his generation.

Yet, whereas Sen. Taft was revered for the power of his intellect, Sen. Dirksen was admired for his gifts as a political technician.

Sen. Taft was a philosopher; Sen. Dirksen basically was a philosophical doer. In an age that practically has forgotten what rhetoric is, Sen. Dirksen was the closest thing we had to a Ciceronian rhetorician.

Perhaps when all else about him is forgotten, he will be remembered for that. Words fell from his mouth mellifluously. Listening to him in comparison with most other contemporary senators was like listening to a 33 rpm recording of the New York Philharmonic played on the best stereo set, in contrast to a 78 rpm recording to the local 5th grade band played on grandpa's old Victrola. He knew what well-chosen words, well-spoken and properly laced with humor, could do. For him and the United States, they did a great deal.

The essential purpose of rhetoric is to persuade. Sen. Dirksen's extraordinary talent as a legislator was his capacity to persuade a majority of senators to vote with him on a particular issue. As the Senate's Republican leader for 10 years, during none of which he had a Republican majority in the Senate, and during eight of which he had a Democrat in the White House, Sen. Dirksen worked political miracles.

In doing so, he infuriated all segments of the political spectrum. His efforts brought about Senate confirmation of the Nuclear Test Ban Treaty in 1963, and Senate passage of the Civil Rights Bill of 1964.

Yet, he was instrumental in the Senate's recent approval of the Safeguard Anti-Ballistic Missile System, and he labored diligently for the day when constitutional amendments could be approved that would alter the effect of the Supreme Court's reapportionment decisions and deny the court's authority in cases involving nondenominational prayers in the public schools.

"The letters of Cicero breathe the purest effusions of the exalted patriot," Jefferson wrote. So did the orations of the last Cicero, Everett Dirksen. He loved America, loved it absolutely. His patriotism was manifested in many ways, but perhaps no more clearly than in his constant forensic struggle to make the marigold the national flower.

The marigold, he told the Senate, has a "rugged humility of character; and, like the American eagle and the American flag, (is) an exclusively American emblem." He might as well have been describing himself, for behind the clouds of florid verbiage, there was a ruggedly humble senator who stood exclusively for American interests. For that, too, we who remain behind, must send him final gratitude and wish him every success as he delivers the votes on the celestial Senate floor.

DOUG FRAZER, age 15.

## WHEN RELIEF FROM TAX ISN'T

### HON. LESLIE C. ARENDS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. ARENDS. Mr. Speaker, President Nixon urged that the Congress institute certain reforms in our tax structure, with a view to closing the loopholes and insuring that the burden of taxes were more equally borne. He urged an undertaking that had long been neglected—all too long.

The House responded by the passage of a tax reform bill on August 7. It may not have been to the liking of the administration in every respect, nor to the liking of any one of us. It was nonetheless a tax reform measure of considerable magnitude and merit. In writing this measure our Committee on Ways and Means took into account not only the need for reform that all would pay his fair share, but also the need for revenue to keep our budget in balance.

What has been taking place in the other body may be politically popular, but it is fiscally irresponsible. What began as a tax reform bill is being converted into a tax relief bill. This is being done at a time when all of us are called upon to tighten our belts to combat inflation.

I am inserting as a part of my remarks an editorial entitled "When 'Relief' From Tax Isn't," which appeared on December 5 in the Danville, Ill., Commercial News. It well says what needs to be said on this vitally important matter.

The editorial follows:

[From the Commercial-News, Dec. 5, 1969]

WHEN "RELIEF" FROM TAX ISN'T

Tax relief is desired so universally that opposition to any form of it is bound to be unpopular.

But before Americans begin to applaud the Senate's action in raising personal income tax exemptions from $600 to $800 per year, some sober analysis is in order.

Ultimately, the approved amendment sponsored by Sen. Albert Gore, D-Tenn., would result in an annual revenue loss of some $8.8 billion to the government. This is about the same as the estimated cost of the House-approved tax reform measure, which leaves the personal exemption as it is. But the Gore bill, proposing a $100 hike in the exemption next year and in 1971 would cost $5 billion more in the first 2½ years.

If an expanding economy can make up the difference, or most of it, that is one thing. But some economists warn of at least a mild recession in the first half of 1970. Should their predictions prove correct, government income will drop.

This would make balancing the budget even more difficult. And unbalanced federal budgets have contributed substantially to a decline in value of the dollar—or to put it another way inflation.

The more the dollar drops in purchasing power, the higher prices will go. As cost of living rises, the demand for higher wages becomes more intense. The likelihood of strikes increases.

The question the public must ask itself is this: Would the extra amount taxpayers might keep through greater personal exemptions translate into more purchasing power? Or would it, in the end, contribute to an accelerated inflation that would more than wipe out this kind of tax "relief?"

Further, many of the senators who voted for the Gore amendment want the government to spend more in fighting poverty and pollution, more for mass transportation systems, more for education, more for almost everything—and the devil take the consequences fiscally. If they would promise prudence in demanding greater federal expenditures in return for assisting the taxpayers, their posture would seem reasonable.

Giving lower and middle income taxpayers a better break on rates, plugging up loopholes so that the tremendously wealthy may not escape paying their fair share, eliminating special concessions for favored groups all are legitimate and sensible phases of tax reform. So also, perhaps, is a stretched out plan to increase personal exemptions.

But the approach must be more reasoned than that exhibited by the Senate. It is simply impossible to have it all ways: Sizable and immediate increases in personal exemption; a slowing of inflation, hence, a brake on cost of living rises, and enough money for the federal government to fight the war and do those things for the nation which the big spenders in Congress are demanding.

Let us hope that the House, which has shown itself to be more practical about tax reform and relief, will be able to moderate the enthusiastic but imprudent zeal of the Senate.

## FLORISSANT TAKES LEAD IN BANNING OF DDT

### HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. HUNGATE. Mr. Speaker, the city of Florissant, Mo., in my district, has taken the lead in banning DDT. I believe my colleagues will be interested in the following communication from Florissant's mayor, James J. Eagen, which explains the city's position:

FLORISSANT TAKES LEAD IN BANNING OF DDT

Mayor James J. Eagan hailed the Florissant City Council's passage of the Bill he introduced, banning DDT, as a major breakthrough in Missouri. The City is the first municipality to ban the storage, use, sale, or disposal of DDT, effective January 1, 1970.

The Mayor took issue with the Federal Administration's plans to limit the use of DDT over a two-year period. "This is a small step forward," he stated, "because the Federal Administration has now gone on record that DDT is a threat, and that,—even if it were banned tomorrow,—purging the country of the effects of this toxic killer will take at least ten years!"

"Why must we wait over two years?" Mayor Eagan asks. "Overwhelming evidence is now at hand that this chemical and similar hard pesticides are destroying wildlife and fish, and are affecting human life."

A respected conservationist recently stated that the milk of human mothers is so poisoned with DDT that it would be illegal to ship it under inter-state commerce standards.

Over 180,000 tons of this toxic chemical are

being dumped yearly into our atmosphere and waterways. How many hundreds of thousands of tons are now being manufactured, or are in storage, waiting to be spread over the country?

A Comprehensive Report on the dangerous effects of DDT was recently compiled by Florissant's Director of Parks and Recreation Director, Jerry Bachmann. His conclusions are that the pollution caused by the use of DDT is the worst type of pollution threatening man and his environment today.

"A complete and immediate ban on this use of DDT," Mayor Eagan contends, "should have the highest priority with legislators and government officials everywhere!"

## THE GREAT RACE

### HON. DONALD D. CLANCY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. CLANCY. Mr. Speaker, recently I received a letter from a young man in my district, and I would like to present the remarks of a Cincinnati teenager regarding one of the most pressing problems facing us today—pollution. I am sure that all Members of the House of Representatives will be most interested in what this young gentleman has to say. His words demonstrate the sincere interest some teenagers have in solving the problems of our day. His letter reads as follows:

DEAR SIR: A race is being run in these United States, and we're losing. A dark finish line approaches as we round the final bend. A great cry has risen from the stands, and those stands are filled with American people. For that race is their race and the results will weigh down not only upon them but upon all the generations that follow them.

If you have not already guessed, the above paragraph refers directly to our fight against environment. Since the days of Teddy Roosevelt we have been engaged in a conflict of monumental proportions and now the final crisis has come. The time for words is over and the time for action is at hand!

In the name of "progress" and "prosperity" we have polluted our streams, poisoned our air, and, destroyed the natural blessings which God has bestowed upon our country. No longer can our natural resources be ruthlessly expoited by the hands of a few at the cost of all. The situation, to say the least, has grown out of hand, for even our own population threatens our future happiness.

The area in which you and I live is a perfect example. The Miami Rivers, the Ohio, or any of our streams have become terribly polluted. Park areas are undersized now. What will they be like twenty years from now? Our factories have been extremely lax about pouring their wastes into the air. (I know, because I live next to one). Many of us have waited patiently for action, but we are tired of being kidded and treated with apathy.

Though I am only of sixteen years, I do not feel that you and your generation are more responsible than mine; just as your parents were no more responsible than you for the things that happen. We collectively are responsible and we collectively can and must act!

I am thankful for this land, thankful for its government, and thankful for its leaders who have risen to every need. May they once again meet this challenge and seek to solve it through their unselfish devotion to this land and its people. We the American people are behind you. Do not hesitate to act. Now is the time oh statesmen and politicians to come to the aid of your people.

Sincerely,

ANDY BREWER.

131 Burns, Cincinnati, Ohio.

## THE DYING PASSENGER TRAIN

### HON. JAMES A. BURKE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. BURKE of Massachusetts. Mr. Speaker, may I take this opportunity to bring to the attention of the Members of Congress a very interesting article written by Sylvia Porter entitled "The Dying Passenger Train" that appeared in today's Evening Star. The slow progress being made in the field of improved passenger train service is very evident. The United States of America with its crowded highways and airways is fast approaching a crises.

This Government should be moving forward in the mass transportation field. The accent that has been placed on laying miles and miles of cement highways should be shifted to an area that can bring some relief to our urban areas. Commonsense is needed. A railroad policy is sadly helping to contribute to the disappearance of the train passenger. As we approach 1970 we find the railroad industry has not come up with one new idea. Foreign countries have put this Nation to shame. Japan, Canada, France, and Italy are a few of the nations of the world that have fast, comfortable passenger railroad service. Why not us?

The article follows:

[From the Washington (D.C.) Evening Star, Dec. 9, 1969]

THE DYING PASSENGER TRAIN

(By Sylvia Porter)

A San Francisco family is planning to come East for a visit next summer. They want to come by Pullman train because this might be the last chance the children have for a long-distance overnight train ride.

They cannot go directly from California to New York without changing trains in Chicago or flying the last leg of the trip. The last through California-New York sleeping car was discontinued in 1958.

Today you cannot get a direct train between such major cities as Pittsburgh and Cleveland, Memphis and Nashville, Tulsa and Oklahoma City, Boston and Portland, Me.

The truth is passengers have abandoned the passenger train. In 1968:

Long-haul train travel was cut 20 per cent—the biggest yearly drop in passenger miles since World War II.

The number of passengers carried by the long distance lines dropped to 296 million—one third the number carried in 1944.

Railroad passenger revenue on long-haul lines dropped to $291 million, against $1.7 billion a quarter century before.

The number of sleeping cars dwindled to 1,037 vs. 6,223 in 1948 and the number of dining cars to 627 from 1,730.

In 1929 there were 20,000 passenger trains. There are now fewer than 500.

So complete is our abandoning of the railroad that today only 1 percent of long-distance travelers in the United States go via trains. In contrast, the number of miles traveled on car trips each year has soared past one trillion and the number of miles by plane each year is over 100 billion.

A major factor in this, to be sure, has been the railroads' contempt for passenger convenience and comfort. Frequently, the dirt and discomfort, lack of dining cars and filthy bathrooms are enough to turn even the most sympathetic into a train hater.

But whatever the causes, the big long-haul trains are losing huge amounts today on passenger service—at a time when mail revenues, which for years have helped subsidize passenger trains, have also been dropping sharply.

Congress is now grappling with a half dozen different proposals for saving long-distance railroad passenger service. One bill, introduced by Sen. Vance Hartke, D-Ind., would require the federal government to cover the deficits on any long-haul passenger service it requires the railroads to continue for the public good. In addition, it would authorize the federal transportation department to invest in modern, new equipment which would then be rented to the railroads for long-haul runs. The precedents are: Washington already has invested billions in highways for automobiles and now wants to invest more billions in airports.

The Transportation Department wants to set up a Comsat-type private corporation which would try to run good, profitable, high-speed trains in high density corridors such as San Francisco-Los Angeles, Chicago-Cleveland, Houston-New Orleans, Chicago-Indianapolis-Cincinnati, Milwaukee-Chicago.

But, despite the instant success of the fast trains running between New York and Washington and New York and Boston, an astonishing point is that neither government officials nor the railroad have undertaken a definitive nationwide market survey to find out what kind of service you really want.

As congestion on the highways and airways intensifies, top-notch trains could have a real appeal to many people, even if they take considerably longer. We should find out how this service can be intergrated into our future transportation network.

## THE TAX REFORM MESS

### HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. CONABLE. Mr. Speaker, in today's New York Times appears an editorial entitled "The Tax Reform Mess," by Tom Wicker. I do not always agree with Mr. Wicker; indeed I do not subscribe to everything he says in this editorial feature. Nevertheless, I am placing what he has written today in the RECORD because I think it is a timely warning with taxes so much on our minds. Mr. Wicker points out that the bill being debated in the Senate is reform of increasing modesty, while it now represents about $12 billion loss in revenue. I addressed the House on this subject yesterday, and I am not here to repeat myself today. But I think my colleagues will be interested in Mr. Wicker's tentative conclusions. He seems to propose an extension of Presidential power over taxes, questioning whether Congress can or will be responsible enough to handle intelligently this central issue between the Government and the people. His voice is not a lonely one and we must realize that our branch of Government is constantly being tested by forces within and with-

out to see if it can measure up to the needs of the Nation. Those of us who believe in representative government had better be prepared to help it function responsibly, if we are not prepared to help liquidate its most basic functions, including the taxing power.

The editorial follows:

THE TAX REFORM MESS

(By Tom Wicker)

WASHINGTON, December 8.—Anyone who wonders why so many Americans have become skeptical, if not cynical, about the ability of their political institutions to function equitably and efficiently need only look at the mess being made of the tax reform bill by Congress, without much counterbalance from the Nixon Administration.

What started out as a tax reform bill has become much more nearly a straight tax relief bill. The essence of reform ought to be that it closes loopholes and enhances equity, raises some taxes and lowers others, but does not much affect total revenues. At last look, the bill now being debated in the Senate had some reform in it all right—notably a reduction of the oil-depletion allowance—but its net over-all effect on the budget, including $6.5 billion worth of increases in Social Security benefits, would be a loss of about $12-billion in revenue.

SHORT-RUN BONANZA

No doubt this revenue loss will be reduced in the Senate-House conference that will put together the final bill—but the wheeling and dealing is not over in the Senate and it now seems likely that the bill is going to be a short-run bonanza for taxpayers.

Short-run is the right word. One reason is the inflationary effect of a big tax cut, which could eat up much of the reduction before the taxpayer realizes it. Another is the blow to already poor prospects for funding the badly needed social programs which have been so long starved by the war, the inflation and the usual political penury in this field.

SPECIAL PROVISIONS

The biggest breaks are not even necessarily going to those who need them most. Moreover, the bill—unknown to the lay readers—apparently is full of special provisions for large corporations and foundations; one of these, for instance, might cost telephone and natural gas customers as much as $1 billion a year in higher rates.

Senator Edward Kennedy detailed some of these concessions, including one he sponsored for the Western Massachusetts Electric Company, on the sensible grounds that it was better for the public to know about such matters. Otherwise, Kennedy said, it might appear that "their sponsors had something to hide." Indeed it might. As Kennedy said, some of these special tax breaks are justified—but then so would be the special provisions thousands of individual American citizens might be able to get for themselves if they could afford to hire powerful lobbyists, batteries of tax lawyers, or even a politician or two, to handle their grievances.

Coming on the heels of the long battle President Johnson had to wage to get the original surcharge enacted, and the struggle Mr. Nixon had to go through to get it partially extended, the mess being made of tax reform will surely re-enforce those who believe Congress ought to delegate the taxing power—as it has already delegated the tariff power—to the executive branch.

The executive is by no means infallible. The inflation that is still one of Mr. Nixon's major problems got its biggest impetus when the Johnson Administration, for political purposes, underestimated the cost of the Vietnam war for fiscal 1967 by $10 billion—almost 50 percent. This helped create the kind of climate in Congress that caused Mr. Johnson to delay far too long in asking for the surcharge and stretched out the battle to approve it for more than a year. Had the President been more open about the cost of the war, and demonstrated the need for new taxes long before he did, the inflation might have been far more effectively controlled.

PRESIDENTIAL POWER PROPOSED

Nevertheless, President Kennedy's suggestion that the President should have the power to adjust tax rates up or down, subject to the veto power of Congress, looks better all the time. Herbert Stein of the Nixon Council of Economic Advisers has suggested a scheme by which Congress would set a basic tax rate for a period of years, but the President would propose for each year either a negative or a positive surcharge—that is a percentage to be either added to or deducted from a taxpayer's basic tax—for Congressional approval.

Considering the experience of recent years, this might make possible more sensitive and responsive budgetary and economic management, which only the executive branch can provide. Whether the executive could handle complex and subtle questions of major tax reform any more equitably than Congress is another question; maybe, as Stein recently said, the whole subject is a "Pandora's box" that cannot be opened without the wind of scrambling for advantage being seen in the Senate.

## BEHAVIOR OF TROOPS IN VIETNAM

## HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. LONG of Maryland. Mr. Speaker, our combat troops in South Vietnam must be prepared for moral as well as physical confrontations. Immediate steps must be taken to include specific instructions on behavior toward civilians in basic and advanced troop training. I have conveyed my views and recommendations on this subject to Secretary of Defense Melvin Laird in a letter which I should like to share with my colleagues:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
*Washington, D.C., December 4, 1969.*

Hon. MELVIN R. LAIRD,
*Secretary of Defense, Department of Defense, The Pentagon, Washington, D.C.*

DEAR MR. SECRETARY: The alleged massacre of hundreds of women, old men and babies by the United States Army troops in Song My, Vietnam, is deeply depressing to every American.

The Song My incident points up a serious gap in the training of our hand-to-hand combat troops with regard to treatment of civilians. I have learned that instructions given our fighting men on how to react to all the various situations involving civilian personnel, specifically the type of situation in which an officer or sergeant orders the killing of civilian non-combatants, are vague, general and inadequate. This was apparent at Song My, where members of Charlie Company, in some cases fearful of disobeying an order, reportedly took part in a massacre.

Combat calls for reflex action. Troops must be prepared to react instantly to every situation that might arise, including encounters with civilians. Otherwise, events such as at Song My—and others that have been reported—will be repeated. At the very least, a U.S. soldier in Vietnam should know:

(1) What is United States policy toward treatment of civilians in Vietnam? One soldier who walked through Song My after the alleged massacre told reporters, ". . . if you can shoot artillery and bombs in there every night, how can the people in there be worth so much?"

(2) How should civilians be dealt with in combat situations? A corporal said of one village: "They're all V.C., you can just tell. You don't see many young men in there, do you? All women, children and old men. Where'd all those guys go? Out with the V.C. that's where." American soldiers must be taught where to draw the line between Viet Cong and non-combatant civilians.

One of the participants of the alleged massacre at Song My is said to have told reporters, "It just seemed like it was the natural thing to do at the time. My buddies had been getting killed or wounded. What it really was—it was just mostly revenge." American soldiers must also be taught to draw the line on revenge!

(3) What to do if given a command which violates the U.S. policy toward civilians? One of the members of Charlie Company actually shot himself in order, so he reported, to keep from participating in the massacre!

(4) How and when to report an illegal command or an illegal action without fear of reprisal—when, for example, the command is accompanied by a threat? In another incident, not connected with Song My, one young patrol member—ordered by his sergeant to kill a Vietnamese girl that his four comrades had kidnapped and raped—was allegedly told that if he refused to carry out the order "he would be reported KIA"—killed in action.

(5) How to insure that unlawful acts will not be tolerated or "hushed up"? When the same young soldier reported the rape-murder to his platoon commander, he said he was told, "What's happened is the way things are, so why try to buck the system . . . its . . . hopeless to try to buck it in the middle of war. Better relax about that Vietnamese girl. The kind of thing that happened to her—what else can you expect in a combat zone?"

Indeed, one Congressman who attempted to initiate an investigation of the Song My massacre said publicly yesterday that had L. Mendel Rivers, Chairman of the Armed Services Committee, not interceded, "they [the Defense Department] would have routed [my letter] to some public affairs officer in Vietnam and I might never have heard anything." The Defense Department should set up effective and speedy channels through which to report charges of gross misconduct with the certainty that they will be fully investigated.

It is not enough to prepare our troops for physical confrontations; we must also prepare them for moral confrontations or dilemmas. I urge that immediate steps be taken to make instruction in how to behave toward civilians a part of both the basic and advanced training of our troops. I urge, too, that the Code of Military Justice be revised to deal specifically with these points.

I look forward to hearing from you on this grave and urgent matter.

Sincerely yours,

CLARENCE D. LONG.

## BIG TRUCK BILL

## HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. SCHWENGEL. Mr. Speaker, my editorials for today are from the Washington Star, and the Washington Daily News of July 19, 1969, and Septem-

ber 6, 1969, in the District of Columbia. The editorials follow:

[From the Washington Star, Dec. 9, 1969]

GRUMBLES ABOUT BELCHING GIANTS

(By John Sherwood)

Because he has voluntarily chosen the lot of the far-suburban dweller (with whatever hardships it may have to offer) over the lot of the city dweller (with whatever hardships that might have to offer) the Rambler, who occasionally finds himself driving home to the boondocks late at night, has had to deal with bellowing giants.

Gliding home toward Severna Park near Annapolis, on the John Hanson Highway (Route 50), he is often pursued by steel monsters weighing 73,000 pounds and loaded with cargoes of frozen shrimp and squawking chickens.

Their bright eyes seem to come out of nowhere until they're looking down the Rambler's back and blinking for him to get out of the way. There is much spitting and coughing and backfiring and smoke pouring out of the diesel-drinking dragons, and all the Rambler can say is that if he were about 80,000 pounds heavier he might give them a bit of a quarrel.

When they finally pass, after great struggles, the road shakes and the Rambler shakes. The muffler is sticking straight up to heaven and releasing poisonous fumes with a furious, frantic fury, and fiery sparks fly out of those rusted smokestacks.

The driver is bouncing up and down in his seat in a white, grayish undershirt, and he must have the feeling of getting out of hell safely as he passes the Rambler's weary six cylinders with a vengeance like that of bullies armed with brass knuckles. The Rambler slows down, thinks about hollering "Road Hog!" and then passes him at the crest of the next hill as the heavily loaded truck struggles to make it at 6 mph.

Tractor-trailers stink. They make far too much noise. They are sometimes operated recklessly. They are often dirtier even than the Rambler's machine, and even if they do deliver most of the consumer goods that sustain and sometimes please him, he is not a truck fan.

So now the Rambler hears that a House Public Works subcommittee is conducting hearings on a controversial bill that would allow these highway hogs to be increased in weight by more than 35,000 pounds from 73,280 pounds to a maximum gross weight of 108,500 pounds, increased in length to 70 feet and use up to nine feet of highway width.

And the Nixon administration is giving qualified support to the bill, calling it an economic boon.

Well, the Rambler doesn't think it will work.

Many a night over the last five years he has seen trucks wrecked and piled up in the ditches along the John Hanson Highway between Washington and Annapolis, and he can't help thinking that perhaps the drivers were being overworked and were falling asleep at the wheel. And now, apparently, there are drivers willing to testify to this.

Truck companies are being accused of forcing their drivers to drive to the point of exhaustion for increased profits. The Rambler doesn't dare to even think about safety and mechanical repairs.

The drivers also have a habit of pulling off to the shoulder of the road to sleep at the intersection of Rt. 50 and the Beltway, and there is much frantic jockeying for position as trucks come off the ramp at full chugging speed to encounter us little ones.

At one point in his commuter life the Rambler was confronted with a situation whereby a truck was zooming up the ramp as another truck was blasting out of a sleeping spot. The ramp truck jumped immediately into the eastbound passing lane and forced the Rambler across a muddy median strip, over the westbound lanes, and into a field.

No one stopped, and the Rambler's courageous little vehicle eventually had to be towed.

But the worst places to encounter trucks are in tunnels. Never has the Rambler heard such roars for the sheer sake of roaring. Truck mufflers must be built with holes in them.

No . . . the Rambler finds nothing glamorous and polite or knightly about these boxcars on rubber wheels.

Got time for a horror story? Once, as the Rambler was heading north toward Baltimore on Route 3 after leaving Rt. 50, he found himself in the passing lane, passing a car at about 60 mph.

On the rising side of a small hill, as he approached its crest, he thought he detected headlights coming head-on toward him in the wrong direction.

The Rambler jumped back into the right-hand lane just in time as two headlights of a roaring comet rocketed by.

Tooting his horn in righteous indignation, the Rambler watched the great tractor fly by. To this day he wonders if he ever made it to Richmond.

---

[From the Washington Daily News, July 19, 1969]

THE TRUCK BILL AGAIN

Congress, which last year shelved a bill to permit longer, wider and heavier trucks on the Interstate Highway System, is engaged now in studying a somewhat modified version.

The new bill would lift the present 73,280-pound weight limit, extend the width limit from eight to eight-and-a-half feet and impose a length limit of 70 feet. This last provision was absent from last year's bill.

The trucking industry argues an axle-spacing formula set out in the new bill would permit more even weight distribution, thus easing the strain on bridges and highways despite heavier loads and greater length.

These factors, the truckers contend, also would promote safety by permitting improved braking ability for big rigs and better road visibility for their drivers.

The industry's primary interest in the bill, of course, is the greater "economic return" larger vehicles would provide for truckers and lower per unit hauling costs for customers—a legitimate interest, certainly.

But that interest must be weighed against the public's interest in the use of the Interstate System—a $60 billion, taxpayer-financed project—and the other highway arteries onto which it empties.

Executive Vice President George Kachlein of the American Automobile Association, which opposes the bill, charges the extra truck weights permitted (up to 108,500 pounds for a nine-axle truck) would cost $1.8 billion for road repairs in 10 years.

And even if the bigger rigs could operate safely on the Interstate, millions of miles of feeder roads on which some of them would have to travel are far below the Interstate's design and safety standards, Congress has been warned by the National Association of County Engineers, the National Association of Counties and other opponents.

Further, the improved safety factors of the bigger rigs are projected rather than proved. And the sight of a passing truck 15 feet longer and tens of thousands of pounds heavier than the 55-foot vehicles now permitted thruout most of the East seems unlikely to steady the nerves of the average motorist.

On balance, the truckers' interests are outweighed by the public interest in safe and economic use of the highways. The new bill should join the old one on the Congressional shelf.

[From the Washington Daily News, Sept 6, 1969]

SAFETY AND BIG TRUCKS

The campaign for longer, fatter trucks and buses on interstate highways has taken an odd turn that could lead to future trouble for the nation's motorists.

Tho it insists on a number of changes in the proposed bill, the Nixon Administration seems willing to accept a softening of the law before the safety factor is fully explored.

As a precaution, there would be a three-year delay in the effective date of the new regulations while the Department of Transportation devised safety standards for the bigger trucks.

It would be more logical to check the safety first and consider the bill later.

The bill, backed by the trucking industry, would increase the maximum truck width from eight to eight-and-a-half feet, increase the maximum weight (loaded) from 73,280 pounds to 108,500 pounds and set a 70-foot length limit—longer than now permitted in most states.

Federal Highway Administrator Francis C. Turner, who suggested the three-year moratorium, would like to set the maximum length at 65 feet and the maximum weight at 95,000 pounds.

Testifying before a House sub-committee on public roads, he said the new limits should apply to all roads built with Federal funds, not just to the 42,500-mile interstate system.

The motoring public is understandably wary of the big trucks now on the roads. And a glance at this week's newspapers shows why:

A Kentucky judge and his wife were killed when a tractor-trailer skidded on an Illinois highway, overturned and crushed their car.

A few hours later, a gas truck lost its brakes on a hill in upstate New York, collided with an oncoming station wagon and burst into flames, causing fires that destroyed four homes and popped the manhole covers from nearby sewers.

In view of the public concern about such accidents, Congress would be wise to go slow on the unproven super trucks.

Passage on a questionable bill—even with a built-in delay for safety testing—would not be in the public interest.

---

## CAN WE PREVENT AN IRRITATION FROM BECOMING A MASSIVE INVASION OF PRIVACY?

---

## HON. CORNELIUS E. GALLAGHER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 8, 1969*

Mr. GALLAGHER. Mr. Speaker, if a man's home can be said to be his castle, then he needs the right to be able to raise the drawbridge occasionally. This means, among many other things, that he must be able to influence the contents of his family's mailbox. Yet, there is an industry in the United States which now has the capacity to diminish, if not destroy, this necessary part of civilized living, and which is becoming increasingly irritating to many of our citizens.

This is the complex of firms which have grown up around the renting and selling of names of individuals to commercial and nonprofit organizations. There is the suspicion that some commercial firms make more money selling lists of their customers than they do by servicing those customers, and there are

many firms who do nothing else but compile and distribute names, coupled with selected attributes or habits of our citizens. Those Americans who now regard the product of this virtually unregulated activity—junk mail—as an invasion of personal privacy have little recourse under current law.

Mailing list brokers and the direct mail industry do provide real and genuine services to the American people and to American business but, like any other group which touches every home in the Nation, they should be expected to balance the interests of their customers with the interests of our citizens. I intend to introduce, Monday, December 15, new legislation which, hopefully, will do just that.

Mr. Speaker, the Washington Post's Potomac of November 23, carried the following well-written article by Mr. Paul Hodge on this industry. It provides important background data for proposed action:

THOSE IRRITATING JUNK PHONE CALLS

(By Paul Hodge)

A young Capitol Hill woman, just two months pregnant, recently returned from her first visit to an obstetrician when she received a telephone call from a baby stroller salesman.

"I hardly knew myself that we were going to have a baby," her husband said, "when through the door comes a man with free baby gifts, trying to sell us a $369 stroller that converts into a crib, bassinet, high chair, rocker, table and nine other things.

"He plugs in this record player with slides, narrated by Hugh Downs, and he sits in a corner reading a Sam Snead golf book—'Do you mind, I've seen this so often,' he says—while we listen for 40 minutes to the machine. He offers to throw in a free youth bed if we buy the stroller that night and when we say no he packs up his machine and his Sam Snead book and disappears."

It was the first of a new round of calls, letters and visits they were to receive from local salesmen. Their names had been added again, in several places, to the more than 500 million names now on computerized, categorized, telephone numbered, addressed, Zip Coded lists.

The lists, rented back and forth among the nation's businesses—for $2.50 per 1000 names and up—are the source of most junk mail and junk telephone calls.

If you buy a car or boat, subscribe to a publication, give to a charity, attend a convention, have a telephone or charge account, belong to a club or church, buy a house or rent an apartment or even send in a cereal coupon you will probably be added to somebody's list.

Donors to the Catholic Missionary Society (USA) not only contributed cash but their names—114,000 contributors are now on a list for rent by Dunhill International List Co. for $22.50 per 1,000 names.

The New York based firm also offers lists of over 500,000 Republican and Democratic contributors, 93,000 doctors who attend conventions and even 28,000 supporters of anti-Vietnam War appeals (all for $22.50 per).

Many lists come from less obvious sources. The name of the woman who was two months pregnant was apparently given secretly to the stroller company by one of her friends, who was paid for the "referral" with a vaporizer or other small appliance, according to a spokesman for the Stroll-O-Chair Co. A nationwide door-to-door firm, it sells $1 million of its contraptions a year in the Washington area and "we've just opened a branch in England."

Even people with "unlisted" phones are listed, and sold. Haines "Criss Cross" directory of Ohio, which lists 870,000 Washington area residents by telephone number and address (for $95 a year) also offers its patrons "a select address" list of 30,000 unlisted and unpublished phone owners here.

"Only hermits could avoid getting on lists," says John J. Daly of the Direct Mail Advertising Assn., "but then they'd probably get on somebody's list of hermits."

"Where did you get my number. Where did you get my name?" is becoming a more and more common cry across the country as citizens, business and courts mull over whether the increasing quantity of junk mail and telephone calls is becoming an invasion of privacy.

The California Motor Vehicle Department is now being sued by car owners who object to the almost universal practice of selling their names (complete with number, make, model, year and license numbers of the cars they own) to the highest bidder. The car lists can provide names of all Cadillac or Mercedes owners in a state, names of two-car families, etc.

Maryland's Deputy Motor Vehicles Commissioner Ejner Johnson agrees the practice "raises the question of invasion of privacy. It is also an anachronism and the state will possibly modify the procedure."

Maryland has sold car owners names to commercial outfits for 30 years, Johnson says, first on an unofficial "handshake" basis and now under provisions of state law. The names were offered recently for $30,000 (for one year) to the R. L. Polk Co., a Detroit-based firm which publishes alphabetical and address directories in more than 1,000 U.S. cities.

Polk paid $11,000 last year for Virginia's computerized list of 2 million vehicle owners and $150 to the District for its list of 277,000 vehicle owners (it also gave the District 53 free copies of the list for police and city use).

Addresses and new phone numbers are a highly-prized source of potential customers for newspapers, dairies and other home-delivery firms, as well as for most stores.

New phone numbers—like unpublished numbers—are considered top secret by the Chesapeake and Potomac Telephone Co. In the past many telephone companies, including Baltimore's regularly sold such lists. Because of customers complaints, however, most stopped the practice.

Still, lists of new local numbers are bought and sold here regularly, as they are around the country. Fred Langbein, a C&P spokesman, insists the lists do not come from his company. The head of Phone Power, the only telephone interviewing and soliciting firm listed in Washington's Yellow Pages, is more skeptical.

"There's no question in my mind that there is collusion between phone company officials and various vested interests.

"Such lists are exchanged either *sub rosa* or above board. Many firms pay to get lists. I got them for years (in another city), not for folding money but from a friend who wanted to help me when I was starting out in the business," says Susan Klein. The wife of a Justice Department lawyer, Mrs. Klein began Phone Power in her Vienna home three years ago and now has accounts for weekly newspapers, cosmetic and industrial firms and also does public relations work for hotels and businesses.

It's definitely a black market situation, she says. "The list sells here for about 10 cents a name.

"Other solicitors confirm that lists of new numbers are sold in Washington, usually paid for in cash to unidentified persons, and probably are taken from the phone company's "Daily Addendum"—a closely guarded list of new and changed numbers.

The Addendum may be secret but some new numbers escape quickly. During the April 1968, riots an editor of a local newspaper installed a private hot line between his desk and other top editors. The number was known only to them and the telephone company. The first call on the hot line came the following morning. A woman cheerfully said "Good morning" and inquired if he wished to buy a subscription to his own paper.

It's not illegal to sell customers' names, but complaints have forced most utilities to keep them confidential. Washington Gas Light Co. PR man John Raymond admits "one employee was fired not too long ago for making extra copies of our list of new customers and selling it to a milk company.

Apartment houses and real estate dealers are additional suppliers of names. Some dealers feed names to movers and other appreciative parties. And apartment house managers, mostly women, are known to be easily persuaded—with Green Stamps—to do the same.

Getting names, addresses and phone numbers—the two-car family with the boat, executive father, three kids, rich census tract, choice Zip Code, new street in new development of $50,000 homes, right ethnic name, subscribes to Fortune and gives to charities (there is a listed prospect for every product)—that's only the beginning.

Then comes the "performance" for telephone and door-to-door salesmen and the mailing for the mailers.

"The telephone is a performance. Each time, a small dramatic performance," says Mrs. Klein. "First a telephone salesman must have a pleasant voice . . . sound attractive physically. The chances are they will have a pleasant conversation—the public is generally pleasant—for the majority of people are glad to receive calls.

"Remember 85 per cent of those who answer the phone are women. The world is becoming a lonelier and lonelier place each year (think of all the women who sit at home and drink all day). It makes them feel good when someone calls."

"I've employed handicapped, blind, every race, creed and color, but I'm just interested in how they sound. One problem with hiring the handicapped is it's often harder to get afflicted persons to laugh, to enjoy conversation. I have one 76-year-old girl working for me now, and one 300-pound woman, and they're doing very well."

Mrs. Klein, who admits to interviewing 10,000 persons before hanging up her headset for a managerial post, says "we're a threshing machine, we separate the suspects from the prospects." Most calls will not result in sales, she says, "the ratio depends on what you're selling. Maybe one in 100 will buy an airplane, maybe one in 10 will buy three pairs of nylons for $1.89 . . . we sift out the persons who are going to buy." Thus not only do her girls make sales, they create a new, preferred list of purchasers.

The actual purchases are consummated by door-to-door salesmen, she says, since "phone sellers usually are bad door-to-door salesmen, and vice versa. They're different types, different temperaments. The phone after all is a scientific instrument, requiring mental, not physical activity, and a person must be able to sit in front of it hour after hour."

On telephone abuses Mrs. Klein speaks out loud and clear. A former magazine solicitor—she opened Time Inc's first Southern office (New Orleans) in 1957—she criticizes most magazine sales pitches today as "not ethical, a very skillfully written hoax." "One pitch," she says, "makes the housewife answer yes, yes, yes and the first thing she knows she's said yes to 17 magazines for 60 months and a little man arrives at her door the next day."

Many names and numbers given by magazine solicitors are fictitious, she adds. They can reach you but you can't reach them. She supports the Oregon law that requires all callers to identify themselves within 30 seconds (recently enacted by several other

states). Her girls always identify themselves immediately, she says, and if a person objects in any way to a call "we say 'I'm sorry I disturbed you' and hang up. I have a very small business but an honest one. I don't have to resort to crud like using fictitious names."

Besides magazine solicitors—for whom almost no one has kind words—Mrs. Klein also detests commercial organizations which greet new residents.

"They are just little spy organizations. They walk into a woman's house with free toothbrushes and walk out knowing everything about the family. All that information is then published and sold to local merchants. It's worse than a fraud, because the hostesses come to new families on the pretense of being friends and welcoming you into the neighborhood. I have seen the lists; they make juicy reading . . . Mrs. Jones needs drapes, etc."

Welcome Newcomer, affiliated with the Washington Credit Bureau, is currently under investigation by the Federal Trade Commission. Rep. Cornelius E. Gallagher (D-N.J.), chairman of the special Subcommittee on the Invasion of Privacy, charged earlier this year that credit bureaus "were hiding behind the skirts of Welcome Newcomer hostesses" to gain information about new families for commercial purposes. Credit Bureau officials have declined to answer reporter's inquiries about Welcome Newcomer.

Telephone solicitation campaigns go in streaks. Last year magazine and encyclopedia salesmen ran rampant over the Washington area—followed by numerous complaints and newspaper stories about high-pressure sales.

This is the year of the land sale, free dinners, "free" Florida vacations (you pay for transportation and food) and expensive lots from the Pennsylvania mountains down to the Caribbean.

One of the larger Florida land-development firms, General Development Corp.—the Cowles family (Look Magazine) has long been a major stockholder—is a busy telephoner and dinner-giver here. Choosing names from the Criss Cross directory (avoiding only the poverty Zip Code area), they offer free three-hour dinners every night of the week.

"We used to offer free trips to our Florida properties but we dropped that. Too much of a gimmick," says Mrs. Ruby Moyer—whose first question was "How did you get this number? It's unlisted." (A "customer" revealed it).

"General Development owns St. Luci, near St. Petersburg, where Vice President Agnew played golf this summer," says Mrs. Moyer. Lots go for $2,395 for less than one-fourth acre ($300 down and $30 a month) then "all the way up," she says.

Not all land developers sell house lots. Indian Acres International, a 750-acre campsite near Fredericksburg, Va., offers a place to throw your sleeping bag or tent for under $1,000 ($995).

Located on the Po River, with man-made lakes, swimming pools, stables and a Teepee Pavilion now under construction, it offers "Heap Big Fun. That's our motto," says 33-year-old James C. Foote, president of Chase Continental Corp of Annadale, holding company for Indian Acres. Lots cost a minimum $195 down, $20 a month with $48 a year dues, he says. "We're having a corn roast in November, 6000 ears of corn, come on down . . . we're in business to have fun, to have a good time."

Telephone solicitors, as a rule, have little time for direct mailers. "A person phoning, who has taken the time to call you, is one thing," says Mrs. Klein. "But mail coming into a house . . . is just a piece of paper."

The bulk mailers return the compliment. "You can say anything you want over the phone . . . there's a lot of misrepresentation . . . just fringe operators use it . . . it's unregulated," says Henry Pearlman, manager of the "nation's largest single source of lists," Dependable Mailing Lists, 1025 Vermont Ave. NW.

"The public has confidence in mail," he says. "It's controlled and the average person knows about the controls (laws against obscene mail and mail fraud).

Like all salesmen, they both agree the public loves their products. "Most people enjoy getting direct mail," says Pearlman. "It's a highly sophisticated business now, often tied in with TV ads. And almost everything is sold through the mail, all the way down to peanuts . . . many people like peanuts."

Any restrictions on the right to send mail, junk or otherwise, "borders on restraint of trade and freedom of speech," declares John J. Daly. Anyway, "for most people receiving mail is a status symbol," he explains. "They want to get it."

He and Pearlman—broker for 15,000 mailing lists and 200 million names—believe strongly in the legitimacy of mailing lists and in the public's right to receive junk mail.

How can anyone protest the sale of his name, wonders Pearlman, when "a name is usually public property."

The few who do protest, however, can do little to remove their names from lists. They can write junk mail and phone solicitors and ask their names be removed, which may or may not help, and they can change their telephone number and ask for an unlisted number (not published in the white pages but still appearing in the commercial Street Address directory) or an unpublished number (theoretically LOT available anywhere).

The phone company does not encourage this as 141,000 area phones—15 per cent of Metropolitan Washington's 950,000 phones—are already unlisted or unpublished. It means more work for operators and problems for those who cannot reach friends' unpublished numbers.

Nonetheless, 57,000 new families have requested such phones in the past six years.

If families are harassed continually by one caller or receive obscene calls, the phone company can step in with detection devices to help identify the caller—who can then be prosecuted under the 1968 Federal abusive phone call act (it applies only in the District and across State lines).

One unusual approach to stopping junk mail is to claim it is obscene. In September, Wilber F. Lawrence, assistant general counsel for the Post Office, ruled that obscenity was in the eye of the beholder and a resident could claim all his junk mail obscene and have such mail stopped.

"Most people gripe about junk mail but don't do anything about it. But under the law, they can declare that an ad for a sack of potatoes looks sexy to them. And, if they do, we're obliged to act," Lawrence said.

Ultimately, the easiest method of disposing of junk mail and telephone calls and the one recommended by the Better Business Bureau, telephone companies, public officials and even solicitors (who are themselves bothered by solicitors) is to hang up the phone and throw out the mail.

That is seen as a negative approach by directory and mailing list men. They like to think of the good things that have come from their works.

One cites the extensive recalls of unsafe motor vehicles by Detroit auto manufacturers, all simplified by R. I. Polk's extensive lists of car owners.

John Nagy, general sales manager of Haines Criss Cross directory, remembers that Robert Kennedy "used our books" across the country in his 1968 Presidential mailing and phoning campaign.

Even Maryland's Ejner Johnson sees a somewhat patriotic duty to release his state's list of motor vehicle owners, despite his reservations about invasion of privacy. "If we can develop information that can be useful to industry in making proper corporate decisions, a legitimate concern of the State, all well and good."

But Nagy summed it up, perhaps even for the pregnant Capitol Hill wife—who will soon be receiving a rash of calls from diaper services and baby photographers—"Mail and phone solicitation have become a way of life."

---

## FOOD IS REALLY A BARGAIN

### HON. JOHN M. ZWACH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. ZWACH. Mr. Speaker, being a farmer, I am naturally concerned every time I hear someone complaining about the high price of food because I know the prices we get for our produce is not high. It is still at depression-level lows.

The other day I read a column by Paul Harvey which explained very clearly what is happening to our household budgets.

I recommend reading this column to all of my colleagues, who, too, may be wondering about the high price of their grocery budget:

FOOD IS REALLY A BARGAIN!

(By Paul Harvey)

When peanut butter recently went to 71 cents a jar at the store where the Harveys shop for groceries, Mr. Harvey became borderline indignant: "What are they trying to do to us!"

But before I could launch a proper tirade against the peanut-butter people, I heard from a housewife in Glidden, Iowa, Mrs. Frank West.

She made her food budget of 1960 and her more recent one available to the Des Moines Register. And Mrs. West just about has me convinced that food is not more expensive now than then. Let's hear her out:

Recently Mrs. West ran down the supermarket's cash register tape seeking to ascertain why such a small number of purchases came to more than $24 and she discovered that much of what she is now buying at the grocery store is not groceries.

There are paper towels and paper napkins, $1.66. In the old days Mrs. West and the Harveys and you took time to home launder and re-use cloth towels and napkins.

Here's 59 cents for dog food. In the old days, Rover used to eat table scraps.

$1.79 for bug spray to execute what we used to swat.

89 cents for fabric softener where we formerly depended on a windy day.

$1.59 for shampoo and Band-aids. In 1960 some of us were shampooing with soap and bandaging with strips of worn-out shirt.

$3.75 for light bulbs and Thermos bottle; items which formerly showed up on the "hardware" bill.

We've been complaining about the high cost of eating at home when many or most of the items which we pay for at the grocery store are inedible.

Mrs. West discovered that, of her $24 grocery bill, groceries cost less than $16.

Adding the Harveys' experience to hers and dividing by two, I was similarly surprised to see that fully one-fiftn of the floor space in a supermarket is occupied by luxury or prepared foods which were unavailable 10 years ago.

Two-fifths of the store is likely filled with nonfood items.

That leaves only two-fifths of the grocery store displaying plain old foods.

It may be that you do not use frozen foods or TV dinners or other pre-prepared items, but most housewives now do.

And the grocery list is likely to include snacks and pop and candy, too.

Some have been charging to "the exorbitantly high cost of groceries" such things as liquor and beer, seltzers and toothpaste, magazines and cosmetics, kitchen gadgets, even some dishes and nylon stockings.

Anyway, Mrs. West, who has kept categorized records, discovered that her food bill for 1960 was $971.57. Household items that year came to $347.98.

This past year she paid only $3 more for food. For household items, she paid $725.82!

---

NEWSLETTER

## HON. FLETCHER THOMPSON

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. THOMPSON of Georgia. Mr. Speaker, in order that those who read the CONGRESSIONAL RECORD will have an opportunity to review the newsletter I send to my constituents I am inserting it in the RECORD at this point:

U.S. CONGRESSMAN FLETCHER THOMPSON REPORTS TO YOU

DEAR FRIEND:

Holidays approaching: Christmas is almost here and your Congressman longs to spend the season back home . . . but work of Congress continues, with occasional snow on the ground (see photo). (Photo not reproduced in RECORD.) Hopefully, we will recess by the 23rd of December . . . and be home for Christmas . . . and New Year's.

Why the long session: Nixon is first President in 120 years to take office with Congress controlled by opposite party. Delay in legislation has political overtones. Example: Fiscal year began July 1 but by December 1 only 4 of 13 appropriations bill had been sent to President. Some think this embarrasses the President. I believe it points out the foot-dragging tactics of Democrat committee chairmen trying to embarrass the President . . . but it won't work.

911 progress: Serious study is now being given to my bill to establish 911 as single national emergency telephone number. Through Justice Dept. grant, six pilot areas including Atlanta has been visited to evaluate feasibility of project. Strong backing from WQXI-TV who promoted idea, helps chances. If this becomes reality, you could reach any emergency service—fire, police, ambulance, etc.—by calling this number.

Rewarding work: Though a Congressman's prime duty is studying, proposing and voting on legislation, his most rewarding work is helping individuals who have problems involving federal agencies. Some victories we've won for you in 1969 were . . . getting badly wounded Vietnam veteran's disability rating upped from 70% to 80% . . . helping destitute wife qualify for over $4,000 in back Social Security benefits . . . obtaining compassionate leave for soldier with fatally ill mother . . . assisting disabled WW II vet with increased VA benefits and $2,000 in back Social Security payments. All you need to do to get help is ask for it.

Who's helping you: We win cases like those above because of competent staff help. Our Washington staff pictured with me are, left to right, Mrs. Pat Baldus, caseworker; Miss LeAnn Henche, grant applications; Miss Paulette Charney, receptionist; Miss Trudy Steckbeck, legislative assistant; Miss Kit Telfair, academies; Jim Sheldon, research assistant, and Richard Ashworth, Administrative Assistant. (Picture not reproduced in RECORD.)

My thanks . . . to the Air Line Dispatchers Association and the Americans for Constitutional Action for their recent awards honoring my service in Congress. Unanimous vote of Dispatchers giving me Honorary Membership for "outstanding contributions to advancement of Air Safety" . . . was first such award given a legislator in 30 years . . . ACA presented me Distinguished Service Award for 1969, a biennial award given to legislators whose voting records "serve to strengthen and defend spirit and principles of U.S. Constitution."

Stopping smut: Continuing to ignore items by Atlanta newspapers that my efforts to stop the flow of smut and filthy material into the District amounts to censorship, I am not deterred and will continue to fight this obscene material. It may take a constitutional amendment unless the Supreme Court loses its power to strike down lower court decisions banning pornographic films and literature . . . or Nixon appointees change court philosophy. You have a right not to have this material forced upon you against your will.

Atlanta staff: Left to right, Mrs. Connie Russell, stenographer; Mrs. Shirley Sutherland, receptionist; Knott Rice, field representative; Miss Susan Tucker, stenographer.

Freedom from force: To Americans, black or white, freedom is precious. The neighborhood school system is threatened with extinction because of bussing, pairing and closing of schools to force racial balance. Some Georgia Congressmen want me to do nothing but I believe you want something done. Below is a bill I am asking all Congressmen, black and white, from the North and the South to co-sponsor. Do you approve?

---

A bill to prohibit public officials from operating dual school systems, and from requiring racial balance in school systems, and for other purposes

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Freedom From Force Act."

TITLE I—GENERAL PROVISIONS

SECTION 1. The right of elementary and secondary education students to attend their neighborhood schools shall not be abridged by any person or authority based upon the race, creed or color of the student.

SEC. 2. Each local "unitary school system" shall have the right to determine their own attendance zones without interference from Federal authority as long as they are reasonably drawn so as to serve the needs of the community and no effort is made by drawing such attendance zones to force a student to attend a particular school because of his race, creed or color.

SEC. 3. Each local "unitary school system" shall have the right to determine the placement of any new school or school facility without interference from Federal authority so long as the new school or facility is placed so as to reasonably serve the needs of the community and no effort is made through its placement to discriminate against any student or group of students based upon race, creed or color.

TITLE II—DEFINITIONS

SECTION 1. For purposes of this Act:

(1) The term "unitary school system" whenever applied to any school system receiving public support means a school system wherein all schools comprising the system function as a part of an overall single administrative unit and in which there is no force or discrimination present, based upon race, creed or color, in establishing the makeup of the student body, faculty or in the allocation of funds, books and facilities to the respective schools.

(2) The term "dual school system" whenever applied to any school system receiving public support means any school system other than a unitary school system (as defined in subsection (1) of this section).

The term "pairing" whenever applied to any school or school system receiving public support means any act required by any governmental authority or person or board acting pursuant to such authority to cause the merger of schools or the alteration of the grade structure for the purpose of altering the race of ethnic make-up of the student body.

TITLE III—ILLEGAL ACTS

SEC. 1. (a) The operation of a dual school system shall be illegal.

(b) The pairing of schools shall be illegal.

(c) The closing of any school for the purpose of forcing any student into a different school so as to alter the racial or ethnic make-up of the student body shall be illegal.

(d) Forcing a child to leave his neighborhood school to attend another more distant because of his race, creed or color shall be illegal.

TITLE IV—PENALTIES

SEC. 1. Any person who violates section 1 of title III of this Act shall be subject to be imprisoned for not more than one year, or fined not more than $1,000, or both.

(Mail to: 514 Cannon Building, Washington, D.C. 20515.)

Do you favor:

1. Busing and closing of schools (356 closed so far) to force racial balance in the schools?

Yes ---------- [ ]
No ---------- [ ]
Undecided ---------- [ ]

2. "Freedom From Force" bill above which your Congressman is trying to get passed?

Yes ---------- [ ]
No ---------- [ ]
Undecided ---------- [ ]

Remarks:

---

---

Name ----------
Address ----------
City ---------- Zip Code-------

It is a high honor for me to serve you in Congress.

Yours very truly,

FLETCHER THOMPSON,
*Member of Congress.*

(NOTE.—Printing and paper paid for by your donations sent in and by myself.)

THE MISUNDERSTOOD MINORITY

## HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. PUCINSKI. Mr. Speaker, the Chicago Daily News, in its December 2 edition, carried an excellent article by Rev. Andrew M. Greenley which captures in great depth the problems and attitudes of America's ethnic communities.

The Daily News is to be commended for its daily feature, "Insight," which provides an outstanding form for discussion of the Nation's and the world's most pressing problems.

The problem of the Nation's ethnic communities is one which has been ignored much too long.

Reverend Greeley is a Roman Catholic priest and program director of the Uni-

versity of Chicago's National Opinion Research Center. He is a professor of sociology of education at the University of Illinois Circle Campus.

He has conducted very extensive research into the hopes, the aspirations, the fears, the insecurity and isolation of the white ethnics and has concluded that this subject needs a national dialog for thorough understanding.

I am placing into the RECORD today Reverend Greeley's excellent analyses and take this opportunity to congratulate the Chicago Daily News for making possible the beginning of what I believe will become a nationwide dialog on the misunderstood minority.

Reverend Greeley's article follows:

THE MISUNDERSTOOD MINORITY—FEAR, INSECURITY AND ISOLATION OF THE WHITE ETHNIC NEEDS MORE ATTENTION, A DISTINGUISHED SOCIOLOGIST SAYS

(By Rev. Andrew M. Greeley)

White ethnics are America's not-so-silent minority.

Their voices have been raised on the nation's most nagging problems, from public schools to foreign policy.

Their neighborhoods have been described as citadels of parochialism, marked by invisible boundaries of anger against outsiders.

The ethnic has been tagged with the image of national pride and racial prejudice.

Yet despite the conspicuous visibility of the white ethnic—and he will not melt mildly away into the American "mainstream"—he is only imperfectly understood.

There is, especially on the part of political, social and intellectual elites, a strong element of snobbery and even disdain toward white ethnic groups.

The liberal elite, in particular, often dismiss this larger part of our population with the sneer "white ethnic racist," a term as pejorative as "nigger."

The state of our knowledge about the present condition and the past social history of American ethnic immigrant groups is astonishingly bad. Sociologists have taken ethnicity so much for granted that they have barely bothered to study it.

The view that follows is an attempt to get inside the skin of a white ethnic, to analyze and explain, not to argue or advocate.

We should realize first that it is no longer appropriate to write off white ethnics as being "poor" or "working class."

Some white ethnics are indeed poor, although they are a small minority; others are indeed members of the working class. Nevertheless, many white ethnics, particularly in large cities, are college-educated, and many more have children going to college.

Some are firmly established in what may be considered, by anyone's standards, the upper middle class.

Whatever their ranking on the social scale, white ethnics are not far removed from their immigrant experience. A few years ago half the adult Catholics in the country—and most urban ethnics are Catholic—were either immigrants or the children of immigrants.

INSECURE ECONOMICALLY

Ethnics are well aware of, and indeed proud of, the fact that they are "different" from the rest of American society. At the same time, they hold a powerful loyalty to the United States while not being sure they are accepted by the United States.

In addition to feeling the social insecurity that comes from being relatively close to the immigration experience, ethnics also tend to be economically insecure.

The State income taxes being adopted around the country tend to fall hardest on the lower, middle and working classes. Given the fact that a great deal of tax money is going into welfare programs, it seems understandable that ethnics feel they are being taxed more heavily to subsidize other social groups.

They will argue that no such subsidies ever were offered to them.

The white ethnic's commitment to his family, home and neighborhood is profound in a way few who are part of the more cosmopolitan elite understand.

Any threat to home and neighborhood is a threat to the very core of the white ethnic's personality.

NEIGHBORHOOD PROTECTED

But in addition to having invested himself in his home and neighborhood, the ethnic also has invested a good portion of his economic resources. Given the feeling of financial insecurity that is still very much with him, a threat to this home and neighborhood is a threat of destruction.

It is extraordinarily difficult to persuade such a man that the arrival of other social groups in his neighborhood is not a threat.

We may tell him it is "block busters" who create panic. We may tell him that careful studies show that over the long run property values go up, not down, after blacks move in. We may even tell him statistics show only a slight increase in crime at the first sign of black in-migration.

The white ethnic may or may not believe such statements, but it does not matter. For him they are irrelevant. By any realistic standard he knows, the arrival of other groups in his neighborhood is a threat.

It always has seemed to me that the failure of the liberal elite to understand this reaction, much less to have compassion for it, is the greatest single evidence of snobbishness toward white ethnics.

I do not pretend to know how the problem of changing neighborhoods can be resolved, but I am appalled at the thought it is so casually dismissed as a manifestation of white ethnic racism.

It seems to me that much of the rhetoric of social reform not only is lost on white ethnics. It actually creates a greater sense of alienation and confusion among them.

PLIGHT OF BLACKS

We must remember that these groups are only a generation or two removed from the Old World. To be told that they are responsible, or ought to feel guilty, for the plight of blacks puzzles them.

It was not their ancestors who brought black slaves to this country. It was not their ancestors who kept blacks enslaved until a century ago. It was not their ancestors who arranged the national compromise whereby slavery was replaced by serfdom. It was not their ancestors who enacted the Jim Crow laws. It was not their ancestors who imported blacks to the big cities as cheap labor.

They may not like blacks—they may fear them—but it seems to the ethnic groups that they are being asked to pay the heaviest price for social wrongs for which they have little responsibility.

Furthermore, the white ethnics are close enough to their own immigrant poverty to realize that reform groups were not particularly concerned about them.

No one ever worried about the Polish poor or the Irish poor, and no one seems to worry much now about the residual poverty groups in both these populations.

Unless we understand that many white ethnics think this way with some justification, and that their feelings represent an important dimension of social reality, we shall never come to grips with the problem of unity in our big cities.

LAW AND ORDER

Another issue on which the voice of the white ethnic has been heard is "law and order."

White ethnics are afraid of violence. There was much of it in their own past, both here and in Europe. They have worked hard to achieve economic and social security. They now have much more to lose by violence than they did in the past.

We may argue that threats by militants to burn down the city or engage in guerrilla warfare in the streets are meant mainly for internal consumption.

But when someone postures like Mussolini on television and warns that he is going * * * destroy a city, white ethnics are quite prepared to take him at his word.

There are many responses we have offered to the law-and-order issue, all of them patently inadequate.

We have argued that the nation has a violent past. We have pointed out that violence is done daily to the black population. We have said so-called crime waves are exaggerated, and indicated many weaknesses in uniform crime statistics.

All of these arguments are quite correct, but they will do nothing to lessen the fear of violence among white ethnics. Nor does the tendency of the liberal elite to make scapegoats of the police lessen their fears.

The failure of the elites to understand the relevance of the law-and-order issue has been a disastrous political and social mistake. By denying the problem, they have turned its solution over to demagogues, and failed themselves to make much in the way of intelligent solution to the problem.

It ought to have been the function of the liberal elite to stress these points rather than to leave the field to those who think law and order can be achieved simply by "cracking down."

White ethnics are deeply committed to American society. While society may not have completely accepted them, the ethnics are close enough in memory to the poverty and tyranny of their own pasts to be grateful to a nation that has provided them both affluence and political freedom.

STUDENT PROTESTS

They are thus, for instance, completely incapable of understanding student protesters.

From the white ethnic viewpoint, the students are much worse than the blacks because the blacks at least have "real problems" to protest. But the students have no problems, in their view, and simply are spoiled children of the rich.

When the ethnic stops to think about it, he also is inclined to argue that these are the children of the elite group that are demanding that the ethnics yield their neighborhoods to blacks and pay higher taxes to support black "attacks" on their neighborhoods and cities.

This makes them even more angry at the students, and less likely to understand legitimate grievances.

While there are few things more valued by ethnics than a college education, there are few things they suspect more than intellectualism. In this they are not so different from the rest of society.

The moral and intellectual arrogance of university faculties and students as displayed in the mass media merely confirms what the ethnic thought all along—education doesn't guarantee that professors have much common sense.

The white ethnic also is concerned deeply about primary and secondary education.

He assumes, with little justification, that the increase in costs and deterioration in quality is related to the presence of large numbers of blacks in the public school system—blacks who appear to him more interested in protesting or demonstrating or engaging in vandalism than in getting an education.

It is all well and good for the suburban liberal elite to talk about integrating the school system, for he can send his children to suburban or private schools.

Once again, the elite appears to the ethnic to be bent on improving the lot of the blacks at no cost to themselves and a considerable cost to the white ethnics.

ISOLATION INCREASES

There are, of course, many holes in this line of argument. Yet, if we cannot understand why ethnics might think this way, we miss the whole point of the present crisis of unity in the cities.

Finally, we should notice that ethnics find themselves increasingly isolated from their own political leadership.

In cities like Chicago, where precinct organizations still maintain some communication between the grass roots and city hall, the problem is less acute than it is in cities where so-called "good government" has cut off the liberal elites who run the city from the ethnic hinterlands.

But even in cities where ethnic politics is still a way of life, the alienation of white ethnics from their leadership is growing. The leadership is forced to fall back on experts and technicians for solutions to grave social problems, and it is precisely these experts who arouse deep suspicions among the ethnics.

In summary, white ethnics in the large cities are afraid. They are afraid of what will happen to their neighborhoods, they are afraid of violence and of higher taxes and of black militants and of experts and of liberal do-gooders and of being left out by those who have real power in society.

They are wrong, one might say, but they don't think they are wrong. And it must be confessed the rest of us have done precious little to convince them that they are wrong.

It will not help to lecture them about their prejudices, or to demand of their religious organizations that they campaign against prejudice. It will do no good to moralize, to pontificate, to lecture or to blame.

DEMAND FOR DESTINY

We must first seek to understand, although whether we have the patience and the tact and the compassion to do so is open to serious question.

We must also realize that the desire to participate, to have some control over one's destiny, is every bit as legitimate when it is manifested by one social group as it is when manifested by others.

If demands for black power and student power are valid—despite the distortions and paranoia that sometimes accompany such demands—then are not the demands of ethnic groups for more control over their own destiny also valid, despite the bigoted and paranoid distortions that sometimes accompany them?

## SOKOLS HONOR "POP" ZABRANSKY

### HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. HELSTOSKI. Mr. Speaker, last year the Little Ferry Sokol organization celebrated the 70th anniversary of its existence, and it still continues to instill the spirit of its objectives into the Little Ferry community.

One of the principal organizers of the Little Ferry Sokols was William Zabransky, Jr., affectionately known as "Pop."

Mr. Speaker, I was pleased to be in attendance at the banquet which honored "Pop" for his constructive and valuable services in its primary objectives, that of promoting physical education and gymnastics among the Czechs and Slovaks of this country.

The constructive services of "Pop" Zabransky could just as well have been a reason for the community of Little Ferry in honoring this man as a cornerstone in the incorporation of the borough 75 years ago, and his continued interest in the civic and community affairs of Little Ferry.

"Pop" Zabransky numbers his friends by the thousands, for he has always been available to participate in any community function which younger persons were unwilling to tackle.

A happy person, "Pop" Zabransky has been an inspiration to the borough of Little Ferry. He mixes well among those he serves and meets. He is one of tremendous courage. He listens with interest. He likes to converse, to laugh, to assist, to encourage, to suggest, and to receive suggestions. At 81 he still has a magnetic personality. He has the ability to bring people close to him and leave them feeling at ease, comfortable, and happy in his presence. He is a man of impeccable character, of scrupulous dealings, of courteous manners, and of a humble spirit. He is always smiling and pleasant. He is a friend of all, and an enemy of none.

Mr. Speaker, as part of my remarks, I would like to include an article which appeared in the Sunday Record Call of November 30, 1969, and reflects Mr. Zabransky's activities in Little Ferry.

The article follows:

[From the Sunday Record Call, Nov. 30, 1969]

LITTLE FERRY HONORS ITS REVERED PATRIARCH

(By John Walker)

LITTLE FERRY.—It was a long time coming, but never in doubt as the American Sokol Organization of Little Ferry honored William Zabransky, Jr., at a testimonial dinner at Sokol Hall last night.

Pop Zabransky, as he is known throughout the borough, has been a resident since the borough's incorporation 75 years ago, and a member of Sokol since its backyard borough beginnings in 1896, all of which make him the community's most senior of citizens.

Although it is Sokol that honored him, it may as well have been the community fathers themselves. Many of whom are members of the organization that began in Czechoslovakia over 100 years ago.

Regarded as the borough patriarch, Zabransky has always been an active participant in community affairs, and his 81 years have not prevented his regular attendance at borough council meetings.

"I was a pretty fair gymnast in my young days with Sokol," says Zabransky, who attributes not only his physical health, but his spiritual and moral well-being to the optimistic philosophy of the organization.

Conversing with Zabransky is like perusing a volume of historical highlights of the borough. He has a huge collection of photographs and a little nostalgia for the old days, both of which add up the color of his stories about the borough's great historical tradition.

"It was once the site of an Indian massacre," he says of the community, "and later a haven for George Washington's troops, and finally (in his childhood) just a nice pleasant place to live."

From his own accounts, it seems that Zabransky grew up alongside and within most of the borough's organizations, and his name is no doubt a household word for residents.

Having been more notably a past president of the Community Savings and Loan, Chief of the Fire Department and a member for 61 years, and president of the school board, Zabransky has given two sons, six grandchildren, and 15 great grandchildren to the borough, many of whom have served, or may serve, as borough officials.

Zabransky is also a pretty fair country plumber, having begun his own business at age 19 and built it into one of the largest in Northern New Jersey. His experience got him a job making installations on battleships and destroyers during World War I for the Steam Engineering Dept. of the U.S. Navy at their yard in his native Brooklyn.

While he has adopted Little Ferry as his home, Zabransky has never forgotten his European origin. He and his wife and two sons took part in the 100th Anniversary of the Sokol held in Prague, Czechoslovakia in 1932, one of four times he has visited the country as a representative of the organization.

A treasurehouse of memories, Zabransky is proud of the tradition of his family and his community.

He will recount tales of the old savings and loan which did not cost its shareholders a penny during the Depression; of the great fire of 1937, which he recorded on film; and of countless borough celebrations up to the 70th Anniversary, when he was chairman of the Tercentenary Committee, a most fitting task for a man as long-lived as the community itself.

## MINNESOTA'S GOVERNOR OPPOSES THE MURPHY AMENDMENT, SUPPORTS THE ADMINISTRATION'S POVERTY BILL

### HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. FRASER. Mr. Speaker, strong bipartisan support is developing for a simple 2-year extension of the Economic Opportunity Act. In the House, Members on both sides of the aisle are working to see that the poverty program is not crippled when the OEO bill supported by the administration, H.R. 12321, reaches the floor later this week.

Many State and local officials share our concern about the need to maintain the independence of the legal services program and the other important antipoverty activities authorized by the Economic Opportunity Act. Recently, the Governor of Minnesota, Harold LeVander, wrote to me expressing opposition to the Murphy amendment and support for the administration's bill. I am inserting Governor LeVander's letter in the RECORD at this point:

STATE OF MINNESOTA,
OFFICE OF THE GOVERNOR,
*St. Paul, Minn., December 1, 1969.*

Hon. DONALD M. FRASER,
*U.S. Congressman,*
*House of Representatives,*
*Washington, D.C.*

DEAR CONGRESSMAN FRASER: As Governor of Minnesota and one whose power would be extended by the Senate passed amendment to the Economic Opportunity Act, I wish to declare my opposition to the "Murphy Amendment" that would limit the OEO Legal Services program.

While I support Congressional attempts to gain greater State involvement and authority in the conduct of OEO poverty programs, I do not believe that giving state governors

a veto over the Legal Services would be wise and fair action.

It is my belief that states should be concerned and involved to a greater extent in assuring proper conduct in Community Action and other OEO programs. But, we must, at the same time, assure the poor and those working on behalf of the poor in our nation, that they have access to the legal process. Only through an unfettered Legal Services program can this assurance be given.

Public officials must not be in a position where legal recourse can be denied any of our citizens—rich or poor!

I urge that the House action be in favor of retaining an effective program of Legal Services, so that all citizens may have confidence in our legal institutions, and turn to the courts, rather than the streets, for the resolution of disputes.

I support with great enthusiasm the President's proposal for a two-year extension of the Economic Opportunity Act without crippling amendments.

Sincerely,

HAROLD LEVANDER,
*Governor.*

## THE PACIFIC ISLANDERS AND THEIR LAND

### HON. PATSY T. MINK

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mrs. MINK. Mr. Speaker, as the United States examines and redefines its role in the administration of the Trust Territory of the Pacific Islands, it is vital that we meet the responsibilities conferred upon us in trust by following an equitable land policy in the Pacific Islands.

Ownership of land is the very basis of the community and peer relationship in the trust territory. It is, therefore, vital we do absolutely the least necessary to disturb this factor in their social relationship. Therefore, our Government should avoid ownership of land in Micronesia and should instead arrange only leases for whatever land is required. The lease should provide rental payments which reflect this intrinsic value to the owners.

Mr. Frank E. Midkiff, who served as high commissioner of the trust territory is author of an essay, "The Pacific Islanders and Their Land," which was presented before the Social Science Association in Honolulu, Hawaii, on November 7, 1955. Because of its prophetic nature, and because Mr. Midkiff's views coincide with my own, I am pleased to present the essay at this point in the RECORD:

THE PACIFIC ISLANDERS AND THEIR LAND

(By Frank E. Midkiff)

It has been said that what a man sees is *back* of his eye. Certainly the attitudes of a man from the Middle West or the Great Plains of America transplanted to a small Pacific Island, are markedly different from the attitudes of the native of that little island toward the land of his atoll.

In our great country of America, we have had the habit of thinking that there is an enormous quantity of land awaiting occupation. We recall the settlement of the great homestead areas of Oklahoma. We think of the vast stretches of prairies where for mile after mile we see no human being. This tends to color our thinking toward the value and availability of land. Our American continent really is vast, and certainly it seems *big* to a Pacific Islander.

For on the small Islands of the Pacific, for the most part, land has been occupied for generations just about to the extent of its ability to sustain human life.

There are atolls where the economy is a subsistence economy based upon the coconut, together with taro in most areas, and the fish and sea plants of the lagoon. These atolls have been inhabited for centuries and are fairly crowded with coconut trees. They have a very thin lens of fresh water under them, adequate to permit the growth of coconuts and usually some taro, but in many cases not permitting growth of breadfruit trees or many other types of plants and vegetables. And although actually there may have been no institutionalized infanticide, the practical results were not far from institutionalized customs of population control. The older people succumbed through lack of food and care in many cases, and the infant death rate was exceedingly high.

Since the advent of modern medicine and improved public health practices throughout the Pacific Islands, the population increase has become alarming. It is estimated that the population, now somewhat in excess of 50,000 people in the Trust Territory of the Pacific Islands, exclusive of the Marianas, will be doubled by 1970 if continued at the present rate of increase. It is recognized that such an increase of population will be beyond the competence of many of the atolls to support. Land already is exceedingly scarce throughout the Trust Territory; and the problems of providing habitations and livelihood for the increasing population, emphasize to a distressing degree the value of land on the Pacific Islands.

*Alienation of Title:* Land is so limited and so basic to the entire society of the Pacific Islands that a man or a family or extended family, tribe or clan without land is simply a man or family "without a country." If his land is lost, his status is lost. The title which he has acquired by inheritance or otherwise is based upon and associated with the land which he has occupied, used and owned for many generations. He may be separated from the land temporarily and still retain his authority and the status of his family; but if he loses title to his land, he loses his "mana" or his authority or spirit and is without importance amongst other members of the area. This is true generally in Micronesia, although in the Saipan District the old land customs have become lost sight of to a large extent, and the Chamorros as a people are unstable because of it.

*The Case of the Land of the Hawaiians:* In accordance with ancient custom, title to all the land of the Kingdom was vested in Kamehameha I, the highest chief, or the "King", as he conquered and brought all the islands under his control. This was similar to our "Spoils System"; it followed a king's conquest.

The King, while still himself owning all land permitted very high chiefs on each island to retain, at the King's pleasure, possession and use of all the ahupuaas, or large divisions of the lands on such respective island.

A particularly competent chief of the island—or, island "Governor"—looked after the King's interest on each island and, in the name of the King, permitted high chiefs under him to occupy ahupuaas of land with their prerogatives; and they in turn permitted lesser chiefs (Konohikis) to occupy and use smaller areas (ilis, leles).

In turn, the lesser chiefs permitted small holdings of land—Kuleanas—by commoners and their families.

All such holdings were occupied at the pleasure of the next higher echelon of chiefs right on up finally to the King, the owner of all lands, and made the holder subject to annual hookupus, or taxes, and to provision of soldiery in case of war. As long as these dues were forthcoming, title and area occupancy were undisturbed; failing such, a new occupant was moved in. This, in oversimplification, was the old Hawaiian system of land tenure.

The business elements of Hawaii, being non-Hawaiians, were endeavoring long prior to the middle of the last century to produce a reliable export commodity to exchange for imported goods and equipment that would raise the standards of living above the mere subsistence level.

Sugar began to be milled in a small way, and was regarded as the most promising export possibility.

In order to set up expensive mills, plants, and other improvements, these entrepreneurs desired assurance of permanent land holdings for sites, so that after making large investments they could not be dispossessed by a whimsical chief.

They finally persuaded the King of Hawaii, a lineal successor to Kamehameha the Great, in 1848 to divide the lands so that title could be acquired in fee.

This was known as "The Great Mahele."

King Kamehameha III surrendered his feudal rights, and gave permanent title to large land divisions over to various chiefs.

At about the same time, and in part out of the personal lands held by King Kamehameha III, he set aside a substantial portion of land for the Government. These were the beginning of the "government lands." What he personally retained were known as "crown lands." In a similar manner, many other chiefs surrendered portions of their land to the government, thus further building up the "government lands"; in turn these chiefs were rewarded with clear titles to the remainder of their holdings.

Based on the Land Act of 1845, the great divisions held by the highest chiefs were to be divided in "The Great Mahele" for fee simple ownership amongst lesser chiefs who had been in possession of and using, these divisions. These were called "Konohiki lands." In turn, these chiefs were to provide smaller holdings of land—called Kuleanas—for fee simple ownership of the commoners who were in occupation at the time. Kuleanas also were provided for the commoners both from "crown" lands and from lands set aside as government lands. A law soon was passed permitting government lands to be sold to commoners at a low price.

Summarizing, in addition to the one third of all the land held personally by the King as "crown lands", there were two further parts: theoretically, one-third of the land was "government lands," to support the government of the Kingdom. Another third was to be divided amongst, and shared by, the chiefs or Konohikis—the "Konohiki lands." In each third there were to be areas set aside for the commoners. Appurtenant water rights went with the land titles.

However, through lack of understanding and default, the commoners actually acquired title to much less than a third of the total area, and what they failed to acquire was added as a general rule to the government lands although in many cases Kuleanas within a chief's ahupuaa escheated to the chief if the commoner did not prove up on his title. The government, therefore, at one time after "The Great Mahele", had ownership of more than 50 per cent of all the land in the Kingdom of Hawaii.

Alienation of the Hawaiians' Land: Somewhat later another law was passed permitting "alienation" of the Hawaiians' lands; i.e., permitting foreigners also to purchase and acquire title to lands.

About as soon as the Hawaiian individuals realized that they owned land and themselves could convert it into cash, most of

them sold it. Not very many actually kept their land. Selling land was a novel idea to the Hawaiians. Probably at the time of sale they had no true realization that they were to lose the right at a future time again to occupy and use it.

Having sold the land, they usually came to the seaport towns.

The Malihini (newcomer), according to foreign law, English common law, but not Hawaiian custom, had acquired ownership of the land, and availed himself of the opportunity after 1903 to secure a Land Court Award for the title, and held on to it.

The Hawaiian People learned the value of land the hard way. In general, the Hawaiians became a landless people with neither title to, nor occupancy and use of, lands that from time immemorial had been solely theirs to use and occupy.

However, there were exceptions:

*First:* A few commoners held on to their Kuleanas. These Hawaiians highly prized their Kuleanas and some do so to this day. There originally were about 13,000 awards of small Kuleanas but it is believed there may be less than a tenth of these held by Hawaiians today. Nearly all the Kuleanas that were good for sugar cane or agriculture or for city residences have been sold.

To show the extent of change today, there are around 7,000 purchasers of fee simple property each year. There are now over 65,000 owners of fee simple land in Hawaii, averaging around 6.8 acres each. However, most of the land purchased today is of house lot size. Most of the nearly 65,000 holders of small sized parcels in the Territory are non-Hawaiians.

*Second:* There are also eight *landed charitable* trusts—such as the Bernice P. Bishop Estate, which was the land of The Kamehameha chiefs and which is the endowment of the Kamehameha Schools for Hawaiian boys and girls. Other charitable landed trusts include the Zion Securities Company, whose beneficiary is the Mormon Stake in Hawaii; the Queen's Hospital Trust and the Queen Emma Estate, endowment of the Queen's Hospital; and the Roman Catholic Church lands.

These charitable trusts are perpetual trusts, and their income is used for public benefit. They are conservatively but efficiently managed, so as to increase the wealth and standards of living of the Territory as a whole. Eight such charitable trusts total 407,742 acres or 9.9 percent of the total land of the Territory.

There were other charitable trust estates such as the Lunalilo Trust for Aged Hawaiians created by Hawaiian chiefs, that originally were landed estates. However, these trusts converted their land holdings into so-called "gilt edge" securities long ago; thereupon they ceased to grow, but remained static as to the value of their corpus and today are very small estates.

*Third:* Several newcomers with business experience, had married Hawaiian chiefesses or landed women. Having seen how the Hawaiians were disposing of their lands and losing their heritage these men created trust estates, setting the land areas owned by their wives in trust as the corpus of such estates.

These private trust estates, by Hawaiian law, may continue for the life of the last beneficiary in being at the time of the death of the testator, plus 21 years.

*What has Happened to the Chiefs' Lands?* Of all the 252 chiefs acquiring title to "Konohiki" land under the Great Mahele, there now remain 24 substantial private landed trust estates owned by descendants of the Hawaiian chiefs, and they control about 9.4% of all the land of the Territory or around 387,000 acres.

Eight others of the chiefs set aside their Konohiki lands as charitable trust estates—now 9.9%.

As to other large land ownerships, 47 American corporations have acquired large land holdings totaling 18.6% or 768,000 of the Territory's acres. These holdings for the most part originally were "Konohiki lands" but they also included thousands of Kuleanas of the commoners.

Thirty-three non-Hawaiian individuals are "large" land owners (that is each owns over 600 acres) and control about 12% or around 496,000 acres of the Territory's land. These lands also originally were "Konohiki lands" plus Kuleanas. These holdings by foreigners contrast with the 9.4% held by the private Hawaiian Trust estates.

SUMMARY OF LARGE LAND HOLDINGS IN HAWAII TODAY

(These lands were very largely Konohiki and "Crown" Lands.)

There is shown below a summary of lands in excess of 600 acres each. The owners may be grouped as follows:

| | Number | Acreage | Percent of total of territorial land |
|---|---|---|---|
| 1. American corporations | 47 | 768,211 | 18.652 |
| 2. Caucasians: Individuals and C. trust estates | 21 | 414,824 | 10.072 |
| 3. Chartible trusts | 8 | 407,742 | 9.900 |
| 4. Private Hawaiian trusts | 24 | 387,285 | 9.403 |
| 5. Chinese landowners | 6 | 62,370 | 1.514 |
| 6. Japanese landowners | 3 | 14,591 | 0.354 |
| 7. Portuguese landowners | 3 | 4,640 | .113 |
| Total | 112 | 2,059,663 | 50.008 |

Combining all the foregoing, we see there are 112 so-called large land owners in the Territory, each of whose land holdings is in excess of 600 acres, and whose total acreage is about 50 per cent of the total or 2,059,663 acres.

This is in contrast with the 65,000 small land holders in Hawaii today, who won an average of 6.8 acres each. And relatively few of these small holders are Hawaiians. Most of the small holdings also have been alienated.

GOVERNMENT LANDS

A fairly recent summary showed about 303,536 acres, or 7.4 per cent of the total acre of Hawaii is held by the Federal Government, and about 1,267,576 acres or 30.8 per cent of the total 4,118,600 acres is held by the Territorial and City-County Governments. In other words, 38.2 per cent of all land in Hawaii is held and owned by the government.

In the days before the foreigners came, the land was held in feudal title by the King and the chiefs for the Hawaiians alone.

OWNERSHIP OF LANDS OF HAWAII AT VARIOUS PERIODS

| Period | King's land or crown land | Konohiki or chief's land | Government lands | Commoner's land |
|---|---|---|---|---|
| I. Prior to Great Mahele in 1848. | Title to the total lands of Hawaii was vested to the king. | Land for the chiefs was occupied at will of the king. | | Occupied at the will of the chiefs or King. |
| II. Just following the Great Mahele. | ½ of total lands were crown lands to support the crown. | ½ of total lands were chief's or Konohiki lands. These included the lands awarded to the Kamehamehas and their close kin personally as chiefs. | ½ of total lands were government lands. | Commoners were to be given the Kuleanas they occupied—whether from crown lands, Konohiki lands, or government lands. |
| III. A few years after the Mahele. | Reduces to about ⅛ of total lands, due to king's selling of crown lands to pay their personal debts, etc. | About ⅛ of total lands remained in possession of the chiefs. | About ½ of total lands | About ⅛ of total lands, a decrease from the intended ½, due to defaulting. |
| IV. Present day | Upon creation of the Republic, all crown lands passed to the government. This was the case with the success or territorial government at annexation. Former crown lands are now Government lands. | Over ½ of total lands. About 9.9 percent of all lands are now Konohiki lands set aside as charitable trusts. About 9.403 percent total lands are now held by descendants of Hawaiian chiefs. About 31.197 percent of total lands (61 percent of the Konohiki lands) now are owned by aliens (non-Hawaiians) such as American corporations, Caucasians, Chinese, Japanese and Portuguese. | Approximately 38.2 percent of total lands. Over ½ of all lands. | Approximately 11.79 percent of total lands or 487,225 acres are owned by nearly 65,000 small owners, very few of whom are Hawaiians. This percentage is increasing annually. Government lands and chief's lands are being subdivided and sold to small owners at the rate of several thousand lots each year. |

RESULTS OF THE MAHELE IN HAWAII

The "Great Mahele" proved to be beneficial for the economy of Hawaii, and at the time was believed to be necessary in order to encourage foreign or "Malihini" investment. But the question, "Was it for the best interests of the Hawaiians as a people?" causes us to reflect. Hindsight shows losses amongst the gains even in the new type of Paradise that has developed in Hawaii since the Mahele.

Of course discussion of a *fait accompli* is largely only academic and probably is best left alone. Little can be done about it now. In fact it is worse than pointless—it is destructive—to renew recriminations and arguments as to whether depriving the Hawaiians of their lands, or the American Indians of their lands, was very bad or not. There is much overall good that has resulted that it is unseemly to dwell on the losses and injuries.

Forced innovations amongst native peoples always cause changes. Adjustments are sometimes destructive. The advent of whalers and furriers in Hawaii, before the missionaries came, had a big part in the Hawaiians' loss of respect and fear of their dieties and kapus. This led to a decree to destroy the idols and abandon the kapus. For a time the Hawaiians suffered a degenerating license and disregard of the controls evolved by them through the ages.

This status is hardly to be confused with our present day American ideals of independence and freedom. At any rate, soon after the loss of the ancient controls and the idols, the Hawaiians espoused Christianity and its new and noble forms of controls.

The great growth of America and a wonderful American way of life causes us to give no time to philosophic consideration of what

happened to the American Indian and his loss of land. In some cases, those Indians who have survived and who have not been incarcerated in strange reservations, have made fair adjustments to new ways and are modern Americans learning to get along with different customs and in the new environment. As the years go by, more will make the adjustment, ceasing to be "Indians" and becoming normal American citizens.

As to the Hawaiians and the effect of the Mahele upon them, one seldom hears this mentioned today or if the subject is brought up the response is usually only a silence followed by changing the subject. This is indicative of the fact that little or nothing can be gained now by discussing it. Here, too, the American way of life has resulted in wonderful development of the islands and the land that once all belonged to the Hawaiians.

One fact however "can be tied to," and in any discussion of the status of the Hawaiians it is worth stressing: There is one large landed estate that is conserved for the benefit of the aboriginal owners of these islands. This is the Bernice P. Bishop Estate, which today has around 370,000 acres or about 9.23% of the area of the Territory. This is the foundation of the Kamehameha Schools, soon to enroll 2000 Hawaiian children each year.

There are other lands made available for long term occupancy and use of the Hawaiian people through the Hawaiian Homes Commission Act. These total 210,000 acres. Presently 54,000 acres are inhabited by 1621 Hawaiian families (10732 men, women and children). The remaining 156,000 acres are under lease to corporations or are waste lands, etc. Some of this Hawaiian Homes Commission land is fair to good agricultural land; some is homesites. Hawaiian Homes Commission lands are proving to be beneficial to an increasing number of pure Hawaiians and half-Hawaiians.

One lesson to be learned from the experience of the "Mahele."

It is fortunate that the Bishop Estate and the Hawaiian Homes lands exist. These provisions as a minimum should not be disturbed.

This is a fair and humane as well as practical conclusion to be drawn from the experiences of the Hawaiian People with the "Great Mahele." The Hawaiians on the average and as a general rule to date have not recovered from the cataclysmic changes wrought by loss of their lands, to the extent that they are equal in personal acquisitive powers to the more aggressive groups that have come to Hawaii in such large waves.

It is the basic desire of the Trustees of the Bernice P. Bishop Estate as rapidly as possible through the Kamehameha Schools education to aid the Hawaiian young people to hold their own with all other groups in all ways including home and land ownership, and *that* according to the American free enterprise system. But this is not going to be consummated in a year or a few years. It is a long evolutionary pull toward a new idea of land ownership.

Private land ownership and individual competitive activity for acquisition of land were entirely foreign to the Hawaiians' way of life, just as they are today amongst the other Islands of the Pacific. This was *not* true for the people of America, Asia, and Europe who have come to Hawaii since the Mahele. With these latter peoples, private land ownership was the rule from time immemorial.

In contrast with Hawaiian experience, land has never been alienated in Samoa because of the effect that alienation of land in Hawaii had upon the Hawaiian people. Similarly, it was decided that the Micronesians' land never should be alienated. This is an excellent basic principle and it is terrifyingly dangerous to consider the possibility ever to deviate from it.

While I was High Commissioner of the Trust Territory, I had many requests from well-to-do people for Islands that they might purchase. They stated that they would like to live on an Island for a part of the year, to come in with their yachts, enjoy the beautiful weather, get acquainted with the people and they promised to try to benefit the people by their presence. I informed them that it would be impossible to sell the islands to aliens, that it is prohibited by the terms of the trusteeship agreement and that it would be a serious precedent to establish, separating the natives from the land which they hold so dearly.

ALIENATION OF LANDS OF OTHER PACIFIC ISLANDERS

Authorities who have appraised conditions throughout the islands of the Pacific, including Tasmania, Australia and New Zealand, are inclined to deplore the fact that the original owners and occupants of the land have been summarily dispossessed. One has said, "Throughout the more sordid chapters of modern Oceanic history events have shown all too clearly that, next to introducing epidemics into their midsts or putting shots into their bellies, the most effective way to destroy natives is to take away their lands. *Land* is far more than a source of subsistence to the Pacific Islanders. It is a fundamental of their social groupings, a measure of their status and self-esteem, and an ingredient of their spiritual lives. If a single criterion were to be used to test the survival value of any native community it would be: To what extent have they retained their lands?

"No Oceanic areas have altogether escaped the aliens' quest for land, and in two cases, Australia and New Zealand, the colonists' greed for territory was the most characteristic and the most devastating feature of culture contact."

The appraisal goes on to show that very little consideration was given to the fate of the Australian aborigines in seizing their land and as a result these aborigines have almost disappeared except for some few thousands of scattered half castes and a few small groups or bands ekeing out meager existence over large unproductive areas. It is reported that thousands of the "abos" were exterminated when they attempted to kill or appropriate live stock pastured by the new settlers on the abos' horde territories. It is reported that there were systematic drives set up for the extermination of the aborigines in some cases. It is said that this tragedy was played to its finish in Tasmania. There the Tasmanian's land was taken and the people not only rendered landless but almost entirely exterminated. Doubtless there has been much exaggeration in such reporting but it is clear that the overall results have not been very favorable to those subject aboriginal people.

Conditions were not so bad in New Zealand, nevertheless I have often heard a former distinguished member of our association deplore the treatment the Maoris received at the hands of newcomers, and the resulting lack of status, and loss of spirit which followed dispossession of most of their lands—reportedly all but about 1/16 of their original holdings.

Where as the New Zealand colonial legislature expressed support for the Maori principle that regarded native land inalienable save by full tribal consent, it is stated that lawmakers devised sophistries that made it possible for individual Maoris to sell native land to the crown. This proceeded so far that the Maoris finally became disillusioned and angry, and they confederated themselves into a Kingdom—an entirely novel institution in native New Zealand—for defense of their property. Bloody Maori wars lasting for ten years were fought, which reduced the Maoris to a condition of abject misery. Three million acres of their remaining best lands are said to have been confiscated, and the Maori survivors were pushed back into unwanted and less desired corners or allowed to drift along, in the slums of the cities.

The fact that recently there has been a Maori revival is greatly to the credit of these people. For some decades Maori leaders have labored incessantly to revive their people's pride in their heritage and raise their status economically and politically. This has been of great value. According to students of the case, the future of the Maoris will depend to a large degree upon their ability to hold on to their main lands for without such lands the Maori people would be only Maori in the shape of their head and the color of their skin.

*Payment of Annual Rental Versus Eminent Domain for Lands Used for Public Purposes:* It is customary in lands using the basic concepts of English Common Law to acquire for public uses by the process of eminent domain any land that the government needs for administrative purposes. The fairness of eminent domain in our country is manifest, because the land is used for the benefit of the public in the first place and, in the second place, the payment for the land enables the man deprived of his land by eminent domain to buy land near to the land which he lost. In other words, there is ample land in our country to permit a subsequent land purchase, and the status and economy of the man whose land is taken is not materially effected adversely.

BUT IT IS DIFFERENT ON THE ISLANDS OF THE PACIFIC

Conditions are very different in the small islands of the Pacific. Already land has become crowded. There is not enough for the needs of the people except on the areas in the high islands back from the sea, usually having serious slopes or gradients.

Homesteading will care for some displaced persons on the big islands of Ponape and Babelthaup for a while, but not for long because most of these "high islands," like Oahu, must be kept as forest reserve.

Therefore, it is impossible, if land is taken away from a chief or his family or clan, for him to take the money he might receive pursuant to the use of eminent domain proceedings and go elsewhere and buy land so that his family will have status and be landed people.

Since the man's status derives to such a large extent from his land ownership—though he be removed from it for a time as for example by the use of his land by the government—if he still has title to the land and receives rental payments, he retains his status and is able to carry on his affairs according to the well-established customs of the islands.

A PROPOSED LAND POLICY FOR PACIFIC ISLANDS

I therefore propose for fullest consideration by our Government the following policy: In our Trust Territory of the Pacific Islands, over which we are Trustees and of which islands we have renounced any intention of ownership or title acquisition through our successful World War II conquest, the system of annual rental payments should be followed, for land occupied and used by our Federal Government for administration or security purposes, and we should avoid depriving the people of Micronesia of their title to scant land areas by eminent domain procedures.

It is my belief that the adoption of the above policy would be wise and in the light of history would be appraised as a high example of Trusteeship, consonant with trends becoming evident in the world today. I believe this would be for the best interests of the people on our Trusteeship islands.

The annual amounts involved in such rental would be small.

Rental payments, not the use of our customary Western style eminent domain seem to me to be best in the Pacific Islands.

*Fair Values of Land:* It is almost impossible for one who is accustomed to the vast areas of the United States to appreciate the intrinsic value of the limited land in the small islands of the Pacific where the population is increasing very rapidly.

The population probably will double by 1970. The limited area of land, therefore, have to provide the food and the residential sites for all the people. This limited area is intensively agricultural but, far more than that, every habitable atoll is so crowded that the entire atoll and its islands are also *in fact* residential subdivisions. The population on many islands, therefore, has reached the point where the land is inadequate for the very life of the people, and every foot of it is both intensely agricultural and intensely residential.

As one reflects upon the Pacific Peoples, he recognizes that these islanders have existed on their home atolls and high islands for centuries. He knows that they have been war-like people, driven by the desperate necessities of existence, of confronting a merciless sea and typhoon weather, and that they have shed their blood to retain their precious islands and lagoons. He sees how the people have come to respect their chiefs who have shepherded and helped them defend themselves and their islands and have helped them conserve their limited food and water.

One then grasps the idea that these Pacific isles are far more than mere farm land, or mere house lots such as a new subdivision in an American Mainland city. Thousands of new Mainland subdivisions are being opened up each year, and the possibilities are limitless. The islands and the lands of Micronesia are far from limitless. The limit of availability has been reached in many cases.

Ordinary land may be regarded as worth $100 an acre in many sections of the United States; this is good grazing land. Farm land is worth possibly several times that figure in most arable agricultural states. In Hawaii with highly scientific agricultural practices, cane and pineapple lands are valued at $1,000 per acre up. On the other hand, raw and unimproved *residential* lands run from 10¢ per square foot (i.e. over $4,300 per acre) upward to several dollars per square foot depending upon the location, desirability, and scarcity of the type of land. It can be seen, therefore, that by ordinary American appraisal criteria, agricultural land in the tiny and crowded islands of the Pacific can be worth $1,000 an acre for agricultural purposes alone and many times that for the residential purposes to which the land is put.

It is a fact that land is almost priceless to these people.

Thus rentals that might seem high for Mainland America *agricultural* land, could be very low and underpaid rentals for *residential* areas in even the smallest hamlet of our most backward states; and certainly they could be held to be too low for the desperately needed acres of islands of the Pacific.

It could prove to be a serious *mistake in the long run to under-value* the land of which the Micronesians have been and now are deprived and from which they have been removed to make it available for government administrative purposes. Whatever values are decided upon and annual rentals set, it must always be kept in mind that the areas used by the government and held from habitation by Micronesians will have to be kept to an absolute minimum.

It was the policy of my Administration carefully to look into the whole subject of *public domain* of land that has been expropriated by the preceding governments of Germany and Japan, in order to determine how much of this land is required for continued administrative uses and how much of it could be returned to former owners under policies to be agreed upon, and all according to old local customs of land tenure.

Today, there is an encouraging aspect to the matter of dependent peoples, even though the hour has become late insofar as many of them are concerned. There is a new attitude abroad in most nations of the Free World today, which are taking commendable humane and compassionate steps to improve the lot of such dependent people as fall to their jurisdiction. For example, we have an Office in our Department of State that is devoted to service of dependent peoples; and our Nation, through both State and Interior, is laboring to see that the lot of dependent peoples with whom we deal and also of all those dependent peoples with whom the United Nations deal, is steadily improved.

If one has the responsibility of governing the people on the islands of the Pacific, he must sense in them their desire to achieve and maintain a status equal to that of the other nationals who have inundated their shores from time to time. He must respond to their desires to acquire the ability to read and write, to use Arabic numbers, and to apply science to their endeavors. But even more basically, he must respond to their fierce desire to retain their land, and thereby retain their spirit, their courage, their self-confidence. He must see how they hate the idea of becoming wards of Uncle Sam or anyone else. They wish to be free and independent people.

As long as they own their land, they can go far. Their souls will not be submerged. They will feel secure and they will put forth the effort to attain suitable goals and to excel. Take away their land, limited in area though it is and not attractive to corporation exploitation, it is feared that as a People they would dwindle into nonentities, just wards.

---

## DAVENPORT FIRE CHIEF SCHICK PRAISED

### HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. SCHWENGEL. Mr. Speaker, the November 1969 issue of Fire Chief magazine contains a story about our fire chief in Davenport, Lester R. Schick. The article rightly praises Chief Schick for the manner in which he operates the Davenport Fire Department. I would like to add my personal praise to that contained in the article. The chief has done an outstanding job, not only for Davenport, but for the State of Iowa, and the whole Nation.

Because of his broad interests in the field of fire safety and fire prevention, Chief Schick calls our attention to a very pertinent problem: that of adequate funds for the National Commission of Fire Protection and Control. It is hard to imagine many "investments" which the Congress could make and realize a more immediate and profitable return. The chief's advice should be heeded by the Congress.

The article follows:

LESTER R. SCHICK, NATIONAL LEADER

(Fire Chief Lester Schick, Davenport, Iowa, is a leader of national reputation, having served as IAFC President among his many fire service activities. The cover photo depicts Chief Schick's unique method of allocating manpower, and shows the new district headquarters station with hose tower that doubles as drill tower.)

Fire Chief Lester R. Schick, Davenport, Iowa, needs no introduction to most of the nation's fire chiefs. He is widely known for his leadership at the national level. He served the International Association of Fire Chiefs as its president during 1966–67. He was a member of the Wingspread Conference Committee, the ad hoc committee of distinguished fire service leaders who met in 1966 to discuss the nation's fire problem and offer recommendations.

Chief Schick has served on so many fire service committees and organizations it is not possible to list them all here, but here are a few: For the IAFC he served as first and second vice president before becoming president, the board of directors, and as a director of the Missouri Valley Association of Fire Chiefs. He has served as president of these organizations: Davenport Fire Fighters Association, Scott County Firemen's Association, and the Iowa Fire Chiefs Association. He is currently a member of the Board of Trustees and Executive Board Member of the International Fire Administration Institute, which has recently prepared a report on higher education for the fire service. Locally he is a member of the American Legion, Loyal Order of Moose, and Legion of Moose.

Chief Schick joined the Davenport Fire Department in 1939 and was promoted to chauffeur in May, 1944. In June of that year, he joined the U.S. Army and was assigned to the 2nd Division, 9th Infantry Regiment in the European Theatre of Operations. He was discharged in February 1946 and returned to the fire department. He was appointed Lieutenant in January 1947, at the same time that the former chief retired. A civil service examination was given and Lieutenant Schick ended up on top of the eligible list. He was appointed chief only three months after he had become Lieutenant. At the age of 31, he was one of the youngest men ever appointed chief of a major city.

Davenport, a city of some 100,000 plus population, covers an area of 61 square miles. The fire department consists of 126 paid men, operating in two districts.

Although Chief Schick feels that he will never outlive the thrill, excitement, and challenge of facing a fire situation, he says that he has gained the most satisfaction from this work in observing the personal development and progess of the men working under him.

He believes that motivation comes through challenge, "We continually challenge our personnel. We also encourage participation of all men in the development and improvement of the department. This creates an *esprit de corps* in that it now becomes 'our system' or 'our brain child.' Under this approach, the youngest member will often make a major contribution."

Here is one example of how the Davenport Fire Department challenges its men: Chief Schick, an excellent public speaker himself, believes that by digging into a subject to prepare a presentation, a man builds his self-confidence—first, by knowing his subject well, and second, by standing before others and speaking. The training officer assigns each company of the department a subject to prepare for presentation—salvage, ventilation, etc. (The men are in classroom session every day except Saturday and Sunday.) The company officer is in charge of developing the subject matter into a two-hour classroom training session. Everyone on the department is required to participate. For his first presentation a young recruit may only introduce the speakers or subject matter, but as he develops confidence he will take a more significant part in future presentations. The sessions are given at district headquarters or headquarters. All companies of that district will be brought in for the class.

Davenport firemen make up their own promotion examination questions. The questions are researched, developed, and categorized as to rank, by the department personnel. Then men pick the questions from the extensive libraries found in each station. The system takes much of the criticism from the Civil Service Commission as to examination content and its applicability to local situations. And, since the questions have come from their own libraries, if the men don't know the answers, they have only themselves to blame.

Davenport's new district headquarters building is unique (see cover photo). It has a two-story living section in the center with one-story apparatus floors on each side, providing space for the chief's car, aerial ladder, and two pumpers. The hose tower doubles as drill tower. It has windows and catwalks so that minor hose and ladder evolutions can be performed up to the third-story level at district headquarters.

The cover photo also shows Chief Schick's unique method of manning apparatus on the fireground. Davenport runs three-man companies. The District Chiefs' cars are manned with the chief officer, chauffeur, and two firefighters. The chauffeur and the two firefighters can man a second line to create a six-man engine company crew, or can be assigned to the ladder for rescue, ventilation, or other truck work. The system also offers flexibility of manpower. The men riding the chief's car can be split up on major fires with the chauffeur becoming aide to the chief officer. Often the chief's car is first on the scene. He can thus assign the extra men as he makes his size up.

While president of the IAFC, and in his many other fire service activities and speaking engagements, Chief Schick has traveled widely throughout the United States. While serving in Europe during World War II, he served for three weeks with the London Fire Brigade. He was recommended for entrance to the National Fire Service College (British Officer College), and completed 240 hours of instruction there. Chief Schick holds the only certificate of attendance from this college in the U.S. fire service.

Although Chief Schick has served his entire career with the Davenport Fire Department, his travels and keen perception have given him a panoramic view of our nation's fire service—and he has developed some strong feelings and bold ideas about the nation's fire service needs. About this he says:

"The basic organization of the U.S. fire service as local entities without a counterpart on the county, state, or federal level makes it virtually impossible to bring a coordinated attack on the fire problem as a whole. I sincerely and deeply feel that the major problem facing the fire service today is the inability to get the Congress of the United States to recognize the complexity of the entire fire problem, and the urgency of the need to fund the National Commission of Fire Protection and Control, as provided in the Fire Research and Safety Act. This appears to be the only hope of the American people to bring about a broad, in depth, objective study of the fire problem . . . It would also appear to be the only hope to bring the complete utilization of the knowledge, technological advancements, and administrative know-how of the space age in combating the fire problem in this country."

Chief Schick relates all this to the need for unity in the fire service, "The failure to impress this urgent need upon the members of the Congress is a prime example of the lack of coordination in the fire service and related groups. In the meantime the citizens of the United States continue to experience the most appalling loss of life and property of any country in the world."

Chief Schick's dedication to the fire service is founded in his devotion—he likes his work. When asked about his hobbies he replied, "My hobbies are confined primarily to golf, sports interests, and, truthfully, the fire service has been more of a hobby than a job to me."

A clue to the secret of his success may be his philosophy of leadership which he sums up with this quotation of Theodore Roosevelt: "A good executive is one who surrounds himself with good men, gives them a job to do, and has the intestinal fortitude to leave them alone while they are doing it."

---

## RETIREMENT OF MONSIGNOR DEMJANOVICH

## HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. HELSTOSKI. Mr. Speaker, today I wish to recognize and pay tribute to a man in my congressional district, who has for 18 years rendered outstanding service to the community of Rutherford, and its adjacent areas.

The Right Reverend Monsignor Charles C. Demjanovich has retired from the pastorate of St. Mary's Roman Catholic Church, after serving 18 years in Rutherford.

It has been my good fortune to know Monsignor Demjanovich for many years. I have admired his courage in facing up to the many problems which confront the pastor of a parish of several thousand families.

In his position of overseeing the expansion of St. Mary's he has been responsive to the needs of his parishioners and the rest of community citizens. He has shown a progressive attitude toward every endeavor which would enhance the life of Rutherford citizens.

Monsignor Demjanovich had implicit faith in the potential capabilities of people and believed that these capabilities could be developed through education and training. And, in this respect we see the improved educational standards of the classes at St. Mary's.

The monsignor was vitally concerned with being effective than being merely efficient in the operation of his parish's activities. He had a quest for knowledge and was general in sharing it with others. He understood that cultural pursuits and opportunities are also necessary for a well-rounded individual and community development.

Monsignor Demjanovich was not content to conceive ideas and dreams, but has persisted sometimes in the face of grave obstacles, in putting these ideas and dreams into action. He has given graciously of himself and his resources to his adopted community of Rutherford, N.J., and the surrounding area.

We, in Rutherford will miss Monsignor Demjanovich, but we wish him well in his retirement years. May the good Lord provide him with the long life of ease in repayment for his 46 years of work in the House of the Lord.

Mr. Speaker, as part of my remarks, I would like to include an article which appeared in the Herald-News of December 1, 1969, a newspaper which has a wide circulation in the Ninth Congressional District of which Rutherford is but one small part.

The article follows:

[From the Herald-News, Dec. 1, 1969]

MONSIGNOR DEMJANOVICH, 18 YEARS IN RUTHERFORD, RETIRES

(By Howard B. Klausner)

RUTHERFORD.—Eighteen years is a fairly long time for a pastor to remain in one parish, and after 18 years in Rutherford, the Rt. Rev. Msgr. Charles C. Demjanovich has impressed his personality on both the parish and the community.

While officially retiring from the pastorate of St. Mary's R.C. Church yesterday, Msgr. Demjanovich will remain at the church "for a while." Then, he says, he will remain active in some new capacity.

"There are lots of things to do," he said, in his rectory office, recently. "There is plenty of work to be done."

Not an orator and not a diplomat. Msgr. Demjanovich has been a teacher and a builder.

A conservative in most matters, he has moved slowly in innovations but he has built solidly.

SON OF IMMIGRANTS

The son of immigrants from Ruthenia, a tiny, mountainous pocket in eastern Europe, he observed the Greek Rite of the Church until he was a young man.

"My parents were called dumb greenhorns because they couldn't speak English," he recalled. "But they knew German, Slovak and Polish, while the natives here spoke just one language."

A member of a minority within a minority, the Bayonne-born, first-generation American was ordained a priest on May 26, 1923, at the age of 24, in St. Patrick's Pro-Cathedral, Newark.

Both studious and practical, he was soon appointed to the faculty of Seton Hall College and Immaculate Conception Seminary. When the seminary was moved to Darlington from South Orange, he was appointed its procurator.

In this post, he was in charge of the physical plant of the seminary, handling its finances and its repair, and teaching as well. His subjects included the history and philosophy, canon law and Slovak.

He remained there until 1951, when he was named pastor of the Rutherford parish.

PARISH SMALL

At that time, the parish had some 4,000 members. The grade school had 11 classrooms, while the high school, with some 550 students, had a growing budget and limited facilities.

"They used to say that Rutherford had no bars and no Catholic Church. Today, that's changed. People know we're here, and they know that we are here for good purpose.

"Now I'm a member of the Ministerial Association. Only with my Jewish colleague and I, it is now the Clergymen's Association."

Parishioners were predominantly Irish, German and Italian, and some parents recall rehearsing their children in now to say the slavic name of the new pastor.

Father Demjanovich went to work vigorously.

NEW CONVENT RISES

He saw to it that the teaching Sisters were housed in a new convent, instead of the frame house, they had previously used. He began a fund raising drive for a new and larger church edifice.

He worked hard on the school to keep up its standards.

Three years later, in October, 1954, he was elevated to monsignor.

St. Mary's High School and Grammar School attracted more and more Catholic families to Rutherford. More grammar school classes were added. The school was

modernized, with new facilities added each year.

When more land was needed, the pastor bought the property indirectly, through a third party. "Today, people come to us to offer property for sale, but in those days, they would have been afraid to sell it to us."

Msgr. Demjanovich also worked to weld the Catholic community into an effective political force.

By 1956, he was engaged in a controversy with the Board of Health over the providing of physical examinations for parochial school pupils.

The parish wanted a complete, or "strip" physical. The board maintained it could only provide limited inspection by a nurse.

The growing controversy served to solidify the parish behind the pastor, as he insisted on a change in the Board of Education.

A MAYOR PROMISES

"The mayor at that time promised us he'd do something for us, but the Board of Health kept voting, 'No, No.' So we decided to do something about it.

"The candidate who ran against him promised to appoint someone to the board who would be unbiased. So I mentioned this to people, and this candidate won by a thousand votes.

"But then he appointed someone to the board whose wife had made speeches against our school program. And he kept voting the same way.

"Well, I told people about that. And the mayor came to my office and pleaded with me for over an hour, saying I was delivering the election to his opponent. And I had to tell him I could only tell the truth.

"So he lost by a thousand votes."

MONSIGNOR WINS POINT

After this election, the new mayor appointed members to the Board of Health who saw things differently about the strip physicals, and the pastor won his point.

Another time, the pastor took on the Board of Recreation and the Community Fund, arguing that they were funneling public money into a secretarian organization, the Young Men's Christian Association.

"Our children had to join the 'Y' and become dues-paying members in order to enjoy its benefits," he said. The Recreation Commission agreed to stop making contributions to the "Y". A few years later, the Rutherford YMCA became a branch of the Bergen County YMCA.

More recently, the pastor fought successfully to keep the street adjoining the Grammar School closed to traffic during certain hours, as a play street.

After a Rutherford resident obtained an injunction against the closing of the street, the pastor worked to have a new law passed by the state legislature, permitting a town to close streets to traffic.

AGAIN IN TRENTON

Then, after the law was enacted, the pastor discovered that a Trenton official still denied the town the right to close the street.

"I went to Governor Hughes, and told him about it. He picked up a telephone, and called Miss Strelecki (director of the State Division of Motor Vehicles). The permit was granted."

The last few years have been relatively tranquil on the political front.

With almost 11,000 parishoners, the parish is now more than half the population of the borough.

In its administration and outlook, the town remains as conservative as ever. In a sense, the town has absorbed the new population as much as the new population has absorbed it.

There are now 37 classes in the grammar school, with more expected. The high school population has been kept the same, while the standards have been steadily improved.

The school has been accredited by the Middle Atlantic States and Maryland Association, and more than half its graduates enter college.

EXPANDING AGAIN?

Masses now have to be offered in the Rutherford High School on Sundays, and it seems apparent that the parish must expand again.

The directions the parish will take are now to be left to others. The retiring pastor is of a generation now far removed from the management of the Roman Catholic Church in America.

On May 27, 1958, at a dinner honoring the 50th anniversary of the founding of St. Mary's Church, Msgr. Demjanovich said, "The seed was sown by those who were here in the early days. It was watered by those who followed. And we are still reaping the fruit.

"There is still much to do. Whatever material progress has been made has been because you want it."

---

## FACT SHEET ON NEW INDUCTION PROCEDURES

---

## HON. DOMINICK V. DANIELS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. DANIELS of New Jersey. Mr. Speaker, my office has been receiving numerous requests for information regarding the new draft procedures and regulations. Recently the Honorable L. MENDEL RIVERS, chairman of the Committee on Armed Services, printed a copy of a "Fact Sheet on New Selective Service Induction Procedures" which I have found most helpful in answering questions from constituents. Chairman RIVERS is to be commended for this service. I recommend the "Fact Sheet," which follows, to any of my colleagues who have not yet seen it:

FACT SHEET ON NEW SELECTIVE SERVICE INDUCTION PROCEDURES

BACKGROUND

President Nixon, under the authority vested in him by the Selective Service Act of 1967, as amended by Public Law 91-124 of November 26, 1969, has issued a proclamation and an executive order which directs the implementation of important changes in draft policy and procedures.

The purpose of this fact sheet is to identify these major changes in draft procedures and briefly discuss their implementation.

MAJOR CHANGES IN DRAFT POLICY AND PROCEDURES

*1. The "First Priority Selection Group" during 1970.*—President Nixon has directed that during Calendar Year 1970 the "first priority selection group" from which inductees will be selected will consist of all registrants who were born on or after January 1, 1944, and on or before December 31, 1950, and who are classified I-A or I-A-O.

Stated another way, during Calendar Year 1970, the "first priority selection group" available for selection for induction will consist of those registrants who had attained their 19th birth date *prior* to January 1, 1970, and those registrants over age 19 who will not attain their 26th birth date *prior* to January 1, 1970, provided they are classified I-A or I-A-O.

It is important to note, however, that if a registrant in this age group (19 through 25) attains his 26th birth date during Calendar Year 1970 *before* his number has been reached by his local draft board for induction, he will be transferred out of this "first priority selection group" into a lower priority group of registrants not normally available for induction. Liability for induction of such registrants over age 26 will then, for practical purposes, be eliminated except in those instances in which the registrant had been deferred by reason of graduate student training in one of the health specialties and therefore subject to possible induction until age 35 under the so-called Doctor Draft Act.

On the other hand, any such registrant whose random sequence number has been reached and who would have been ordered to report for induction except for delays due to a personal appearance, appeal, preinduction examination, reclassification, or otherwise, shall, if and when found acceptable, and when such delay is concluded, be ordered to report for induction next after delinquents and volunteers, even if the year in which he otherwise would have been ordered to report has ended, and even if (in cases of extended liability) he has attained his 26th birth date.

*2. The "First Priority Selection Group" during Calendar Year 1971 and Later Years.*—The "first priority selection group" during Calendar Year 1971 and each subsequent year thereafter, will consist of:

(a) Registrants who prior to January 1 of each such calendar year have attained the age of 19 but not of 20 years and are in Class I-A or I-A-O; and

(b) Those registrants who prior to January 1 of each such calendar year have attained the age of 19 but not of 26 years, and who had not previously been fully exposed to vulnerability for actual induction in the "first priority selection group" (by reason of a student deferment or otherwise).

"Full" exposure is considered to have occurred if the registrant was in the "first priority selection group" on December 31 of the calendar year and his random sequence number had not been reached by that date.

Thus, during Calendar Year 1971 and in subsequent years, the "first priority selection group" will consist of registrants in their 19th year of age and those other registrants age 20 through 25, not previously fully exposed to induction by reason of deferment or otherwise.

*3. Order of Call for Inductees.*—Under previous draft selection procedures, registrants within the age group 19 to 26 who were classified I-A or I-A-O and otherwise available for induction were ordered for induction on the basis of the "oldest first system". Thus, the birth date of registrants in the "pool" established their sequential order of call.

President Nixon has now changed this procedure by instituting a random system of selection (authorized by Public Law 91-124 of November 26, 1969). The random selection procedure, as implemented by the Selective Service System, will determine the order in which registrants in any available "pool" will be ordered first for induction.

The system now adopted by the Director of Selective Service results in a scrambling of dates of birth of each registrant and the substitution of a randomly-arrived-at sequential number for each registrant.

A national lottery was held at Selective Service Headquarters in Washington, D. C. on Monday, Deecmber 1, 1969, which established the sequence of numbers which will be observed by each local board in ordering registrants for induction from its available manpower pool.

The order of induction for registrants (ages 19 through 25) in the "first priority selection group" during 1970 has been established as follows:

RANDOM SELECTION SEQUENCE, 1970

| | January | February | March | April | May | June | July | August | September | October | November | December |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | 305 | 086 | 108 | 032 | 330 | 249 | 003 | 111 | 225 | 359 | 019 | 129 |
| 2 | 159 | 144 | 029 | 271 | 298 | 228 | 350 | 045 | 161 | 125 | 034 | 328 |
| 3 | 251 | 297 | 267 | 083 | 040 | 301 | 115 | 261 | 049 | 244 | 348 | 157 |
| 4 | 215 | 210 | 275 | 081 | 276 | 020 | 279 | 145 | 232 | 202 | 266 | 165 |
| 5 | 101 | 214 | 293 | 269 | 364 | 028 | 188 | 054 | 082 | 024 | 310 | 056 |
| 6 | 224 | 347 | 139 | 253 | 155 | 110 | 327 | 114 | 006 | 087 | 076 | 010 |
| 7 | 306 | 091 | 122 | 147 | 035 | 085 | 050 | 168 | 008 | 234 | 051 | 012 |
| 8 | 199 | 181 | 213 | 312 | 321 | 366 | 013 | 048 | 184 | 283 | 097 | 105 |
| 9 | 194 | 338 | 317 | 219 | 197 | 335 | 277 | 106 | 263 | 342 | 080 | 043 |
| 10 | 325 | 216 | 323 | 218 | 065 | 206 | 284 | 021 | 071 | 220 | 282 | 041 |
| 11 | 329 | 150 | 136 | 014 | 037 | 134 | 248 | 324 | 158 | 237 | 046 | 039 |
| 12 | 221 | 068 | 300 | 346 | 133 | 272 | 015 | 142 | 242 | 072 | 066 | 314 |
| 13 | 318 | 152 | 259 | 124 | 295 | 069 | 042 | 307 | 175 | 138 | 126 | 163 |
| 14 | 238 | 004 | 354 | 231 | 178 | 356 | 331 | 198 | 001 | 294 | 127 | 026 |
| 15 | 017 | 089 | 169 | 273 | 130 | 180 | 322 | 102 | 113 | 171 | 131 | 320 |
| 16 | 121 | 212 | 166 | 148 | 055 | 274 | 120 | 044 | 207 | 254 | 107 | 096 |
| 17 | 235 | 189 | 033 | 260 | 112 | 073 | 098 | 154 | 255 | 288 | 143 | 304 |
| 18 | 140 | 292 | 332 | 090 | 278 | 341 | 190 | 141 | 246 | 005 | 146 | 128 |
| 19 | 058 | 025 | 200 | 336 | 075 | 104 | 227 | 311 | 177 | 241 | 203 | 240 |
| 20 | 280 | 302 | 239 | 345 | 183 | 360 | 187 | 344 | 063 | 192 | 185 | 135 |
| 21 | 186 | 363 | 334 | 062 | 250 | 060 | 027 | 291 | 204 | 243 | 156 | 070 |
| 22 | 337 | 290 | 265 | 316 | 326 | 247 | 153 | 339 | 160 | 117 | 009 | 053 |
| 23 | 118 | 057 | 256 | 252 | 319 | 109 | 172 | 116 | 119 | 201 | 182 | 162 |
| 24 | 059 | 236 | 258 | 002 | 031 | 358 | 023 | 036 | 195 | 196 | 230 | 095 |
| 25 | 052 | 179 | 343 | 351 | 361 | 137 | 067 | 286 | 149 | 176 | 132 | 084 |
| 26 | 092 | 365 | 170 | 340 | 357 | 022 | 303 | 245 | 018 | 007 | 309 | 173 |
| 27 | 355 | 205 | 268 | 074 | 296 | 064 | 289 | 352 | 233 | 264 | 047 | 078 |
| 28 | 077 | 299 | 223 | 262 | 308 | 222 | 088 | 167 | 257 | 094 | 281 | 123 |
| 29 | 349 | 285 | 362 | 191 | 226 | 353 | 270 | 061 | 151 | 229 | 099 | 016 |
| 30 | 164 | ---------- | 217 | 208 | 103 | 209 | 287 | 333 | 315 | 038 | 174 | 003 |
| 31 | 211 | ---------- | 030 | ---------- | 313 | ---------- | 193 | 011 | ---------- | 079 | ---------- | 100 |

Since it is probable that in many instances local boards will have more than one registrant with the same "number" for induction by reason of their having the same birth date, their sequence of induction will be determined by the first letter of their names (last name and, if necessary, first name), which have also been arrived at in a random sequence established by a supplemental drawing which also was conducted at Selective Service Headquarters on December 1, 1969. The sequence of this alphabetical drawing for Calendar Year 1970 is as follows:

| | | | |
|---|---|---|---|
| 1 | J | 14 | C |
| 2 | G | 15 | F |
| 3 | D | 16 | I |
| 4 | X | 17 | K |
| 5 | N | 18 | H |
| 6 | O | 19 | S |
| 7 | Z | 20 | L |
| 8 | T | 21 | M |
| 9 | W | 22 | A |
| 10 | P | 23 | R |
| 11 | Q | 24 | E |
| 12 | Y | 25 | B |
| 13 | U | 26 | V |

The relative sequence established for all registrants, ages 19 through 25, as reflected in the number assigned to their birth date, will remain with the registrant permanently. Thus, despite the fact that a new "lottery" will be held each year for young men attaining age 19 on or after January 1, 1970, 1971, 1972, 1973, et cetera, these subsequent annual lotteries will not have any effect on registrants previously lotteried.

Stated another way, once a registrant receives a lottery number to establish his sequence for possible induction, he retains that number permanently, regardless of the calendar year during which he is actually exposed to induction.

*4. Transfer of a Registrant from the "First Priority Selection Group" to a Lower Priority Selection Group.*—A question may be raised as to the period of time which a registrant must spend in the "first priority selection group" in order to discharge his prime liability for induction. Generally speaking, registrants will remain in the "first priority selection group" during the entire calendar year of exposure, i.e., from January 1 to December 31. However, because of a possible deferred status, a registrant may only spend a relatively short period of time before the end of the calendar year in this "first priority selection group" as a registrant classified I–A or I–A–O and available for induction; therefore, the regulations issued by the President indicate that only those registrants who are in the "first priority selection group" on December 31 of the year of their exposure and whose random sequence number had *not* been reached by that date, shall be assigned to a priority group which is immediately below the "first priority selection group".

Stated another way, a *deferred* registrant (one not classified I–A or I–A–O) will remain liable for transfer back to the "first priority selection group" during any given calendar year until such time as he has had the maximum possible exposure to induction by virtue of having been in the "first priority selection group" on the last day of the calendar year and providing that his particular sequence number had *not* been reached by that date.

SUMMARY

The changes in draft policy announced by President Nixon and implemented by the Director of Selective Service make no changes in the manner in which young men are required to *register* for the draft at age 18; nor do they change existing law or regulations concerning the manner in which these registrants are subsequently *classified* by their local draft boards.

The changes merely involve the manner in which registrants are *selected* and the time frame of their *vulnerability*.

During Calendar Year 1970 the ages of registrants who have maximum vulnerability for induction will range from 19 through 25. Thus during Calendar year 1970, the only marked difference between the existing system heretofore observed by Selective Service, and the new system which will be placed into effect on January 1, 1970, relates to the manner in which these young men who are classified I–A or I–A–O and are available for induction are to be *selected* for induction. The existing system simply required that the "oldest first" in the pool be ordered for induction, the oldest first being determined on the basis of the registrant's birth date.

The new system selects registrants for induction on the basis of the sequential number assigned to the individual registrants in lieu of his birth date. As previously explained, the sequential number assigned to each registrant is one arrived at by "random selection". This number will establish the individual registrant's relative order of call.

Calendar Year 1970 is therefore a transitional period during which the Selective Service System hopes to move into the final phase of its announced policy to reduce the period of uncertainty facing young men as regards the draft from the present 19 to 26 year period down to the 19–20 year period.

The period of transition, i.e., Calendar Year 1970, is necessary so as to ensure that registrants above age 20 and below age 26 who have been given a deferred status will be given some exposure to the draft.

Beginning with Calendar Year 1971, the new system will become fully effective. At that time, the "first priority selection group" will then consist primarily of registrants ages 19 to 20 and those older registrants under age 26 who had not previously been "fully" exposed to the draft.

## GAINS IN REHABILITATION

### HON. OGDEN R. REID

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 8, 1969*

Mr. REID of New York. Mr. Speaker, for 24 years, Dr. Howard Rusk, director of the Institute of Rehabilitation Medicine of New York University, has been writing a weekly column for the Sunday New York Times. The column that appeared yesterday was Dr. Rusk's last on a regular basis.

The reason for the termination of the column is quite related to the reason for its inception. In 1945, Arthur Hays Sulzberger, publisher of the Times, observed that if there was any good to war, it was that the good lessons of war could be utilized for the benefit of all people. He hoped that the rehabilitation programs for servicemen could be made available to all people and the wanted The New York Times to provide a "forum for public education and national and community action toward this end."

Largely through Dr. Rusk's tireless efforts and skill, this objective has been realized. The handicapped are employed regularly in offices and factories; hospitals provide comprehensive rehabilitation services where previously there were none at all; the training of physicians in this field and the number of physical and occupational therapists has increased enormously.

Too often, we take the accomplish-

ments of modern medicine for granted, and fail to recognize the years of painstaking research and experimentation that now make routine procedures possible. Dr. Rusk's final column reviews the strides we have made in the last quarter century in the field of rehabilitation medicine. I think that Members will find it of interest, and I hope that they will add between the lines as they read the fact that Dr. Howard Rusk, a great American doctor and humanitarian, made much of it possible.

The material referred to follows:

[From the New York Times, Dec. 7, 1969]

GAINS IN REHABILITATION—PROGRAMS FOR DISABLED OF WORLD WAR II NOW GENERALLY AVAILABLE TO WHOLE NATION

(By Howard A. Rusk, M.D.)

(This is Dr. Howard A. Rusk's final column for The Times on a weekly schedule. Dr. Rusk, director of the Institute of Rehabilitation medicine, New York University Medical Center, will remain as a contributing editor of The Times on health and medical affairs.)

This column first appeared 24 years ago this Sunday. It has been published each Sunday since with but two exceptions. One was in 1953 when it reported a stroke suffered by Sir Winston Churchill and its complications and prognosis. Since the British Government had not officially announced that Sir Winston had had a stroke, The New York Times felt such disclosure was not appropriate.

The writer was on his way to Korea at the time and could not be reached so the column was not published.

Two years later, however, when angered in a debate in the House of Commons, Sir Winston in true Churchillian rhetoric warned his opponents that he had had a stroke and conquered it and he would conquer his opponents in the same way. The story of Sir Winston's stroke was then reported in this column.

COPY LOST IN MAIL

The second instance was far less dramatic. The copy was lost in the mail between 34th Street and First Avenue and Times Square.

The genesis of this column 24 years ago resulted from a meeting with the lat. Arthur Hays Sulzberger toward the end of World War II.

In inviting the writer to join the staff of The New York Times, Mr. Sulzberger said, "If there is anything good about war it is taking the good lessons we have learned because of war and utilizing them for the benefit of all people. I think the program developed for our disabled servicemen should be made available to all people. I would like The New York Times to provide a forum for public education and national and community action toward this end."

During the last 24 years great strides have been made throughout the world in improving the lot of the physically handicapped. For those who were paralyzed by poliomyelitis or stroke or had suffered amputations from accidents or who had broken their back, there was little chance for employment.

Securing employment for the severely disabled is still not an easy task but it is commonplace now to see the severely disabled at all kinds of work. Labor and management have learned that hiring the handicapped is good business.

During World War II, Veterans Administration hospitals were termed the "backwash of American medicine." Shortly after the war they were completely reorganized and have functioned for the last two decades with high professional standards and efficiency.

At the end of World War II there was not a single comprehensive rehabilitation medicine service in any civilian general hospital in the United States. Now all modern hospitals have such services.

PROGRAMS IN SCHOOLS

At that time none of the medical schools in the United States had organized programs to teach young physicians the principles of rehabilitation medicine.

Now the majority of the nation's medical schools have departments of rehabilitation medicine and include this subject in their curricula.

The national supply of physical therapists and occupational therapists 24 years ago numbered in the hundreds. Although such people are still in short supply their numbers are now in the thousands.

In 1945, the total number of disabled persons rehabilitated into employment under the public program of vocational rehabilitation was but 41,925. In the fiscal year ended last June a record total of 241,390 disabled Americans were rehabilitated into gainful employment through the program.

The total Federal investment in vocational rehabilitation in 1945 was about $7-million. This year it is close to $558-million.

Studies show that these investments by the Federal Government are returned 10 times in income taxes alone paid by those rehabilitated.

RESEARCH IN UNIVERSITIES

There were no Federally supported research or training programs in 1945 and few universities trained rehabilitation personnel.

Today, practically every large university conducts extensive programs of research and training supported by both Federal and voluntary funds.

These gains have not been limited to the United States. Organized, effective rehabilitation services can be found in all of the developed nations of the world and in an increasing number of the developing nations.

This is the last Sunday that this column will appear as a regular feature in The New York Times. It will be published, however, from time to time and will deal not only with rehabilitation but also with the pressing problems of social medicine, medical economics, health manpower shortages and the delivery of health services.

The column is being discontinued on a regular Sunday basis, for after 24 years the objectives of the late Arthur Hays Sulzberger have been met and the rehabilitation program developed for our disabled servicemen in World War II has generally become available to our population.

## THE KILLING OF BABY SEALS

### HON. GEORGE P. MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. MILLER of California. Mr. Speaker, an article appearing in a national magazine has caused a great deal of concern among all nature lovers.

The result has been that the Bureau of Commercial Fisheries of the Department of the Interior and other Government agencies have received many letters of protest and letters inquiring as to the reliability of the story.

The Bureau of Commercial Fisheries has prepared a statement on this subject which was unofficially brought to my attention by the Library of Congress. I would like to make the report of the Library part of these remarks so that concerned people may know the truth in this matter. The killing of baby seals has never been practiced in this country. The report follows:

THE KILLING OF BABY SEALS

(By Elmer W. Shaw, analyst in conservation and natural resources, Environmental Policy Division)

The Legislative Reference Service has received many inquiries regarding the killing of baby seals in Alaska, based on a letter from a 9-year-old girl, Lillie Leonard, which was published in the November 4, 1969 issue of *Look Magazine* under the title "A little girl asks Why Must They Die?"

Some of the impressions created by this article are misleading. The killing of baby seals was formerly practiced in Canada, but not in Alaska. Sealing operations under the jurisdiction of the U.S. Government are frequently inspected by the Humane Society of the United States and the World Federation for the Protection of Animals. The following explanation prepared by the Bureau of Commercial Fisheries in the U.S. Department of the Interior refutes parts of the *Look Magazine* article and describes how fur seals are harvested in the United States.

"The letter from Lillie Leonard was in error since baby seals are not harvested in the United States nor in any sealing over which the United States has jurisdiction. Pup seals have been harvested on the ice off eastern Canada by Canadian and Norwegian nationals. The United States has no jurisdiction over those seal stocks since they are in Canadian and international waters. No U.S. citizens take part in the harvest. Recently Canada announced a ban on the taking of "whitecoats," which are the very young pups previously harvested. Seals now have to reach the "beater" stage before they may be taken. "Beaters" are seals whose coat has darkened and which are able to swim.

"The fur seal harvest on the Pribilof Islands, Alaska, is conducted under the jurisdiction of the Department of the Interior. Almost all seals harvested are 3- and 4-year-old males. No pups are taken. The northern fur seals of the Pribilof Islands are the subject of an international treaty first formed in 1911. Under the protection of this treaty and through the management of the Department of the Interior, the herd has increased from only about 200,000 animals in 1912 to the present level of over 1½ million.

## "SANTA LOOP"—DOWNTOWN CLEVELAND BUSLINE

### HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. STOKES. Mr. Speaker, approximately 2 weeks ago, the Urban Mass Transit Administration announced a $30,000 grant to the city of Cleveland to demonstrate the feasibility of a special downtown busline for use during the Christmas holidays. These funds, plus $35,000 in local money, are now being used to add 12 buses to the normal schedules to facilitate the circulation of Christmas shoppers in the downtown area.

Friday, December 5, I had the pleasure of accompanying my Cleveland colleague, BILL FEIGHAN, Carlos Villarreal, the Urban Mass Transit Administrator, and members of his staff, to Cleveland to formally dedicate the "Santa Loop." The trip, which was jointly coordinated by the Congressional Liaison Office at HUD, and the mayor's office in Cleveland, was both enjoyable and enlightening.

I was particularly impressed with the concept of inner-city circulation busing.

Revitalizing the downtown sections of our large urban areas is of tremendous importance to most of us here in Congress. We all equally understand the relationship between transporting people from their homes to downtown and such vitalization. I am afraid, however, that we often overlook the problem of inner-area transportation. In the large, spread-out territories that make up the hearts of our downtown districts, a day of shopping can often mean either a substantial expenditure for bus and/or cab fare, or very tired feet for a shopper wishing to cover all the stores. The usual result is that the buyer winds up using only a few shops in a limited area.

The "Santa Loop," which provides continuous circulating buses for a minimal fare—10 cents—appears to be an excellent solution to this problem. Mr. Villarreal assured me that if the project proves to be successful, it will be both continued in Cleveland and replicated in other downtown areas. Therefore, Mr. Speaker, I should like at this time to salute the Urban Mass Transit Administration and the city of Cleveland for their foresight in arranging and funding the "Santa Loop." I wish them every possible degree of success.

## MARYLAND SOLDIER, MARINE DIE IN VIETNAM

### HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. LONG of Maryland. Mr. Speaker, S. Sgt. Daniel L. Seekford and L. Cpl. Robert B. Hamblett, two fine young men from Maryland, were killed recently in Vietnam. I wish to honor their memories by including the following article in the RECORD:

SOLDIER, MARINE DIE IN VIETNAM—SEEKFORD AND HAMBLETT ARE KILLED IN ACTION

The Department of Defense announced yesterday the deaths of two Maryland servicemen in South Vietnam.

They were:

Army Staff Sgt. Daniel L. Seekford, 20, of 258 Baltimore avenue, Dundalk.

Marine Lance Cpl. Robert B. Hamblett, 19, of 3415 79th street, Forestville, Md.

Sergeant Seekford was killed last week by an enemy grenade while he was on patrol. He had been scheduled to return home December 15.

A native of Baltimore, he entered the Army in June, 1966, shortly after his 17th birthday. He attended Dundalk Senior High School, and completed high school while in the Army.

"I tried to talk him out of an extra six months tour of duty in Vietnam, but it didn't help," John E. Bender, his stepfather, said yesterday.

"He said the Vietnamese people needed him and the young fellows coming over also needed him to stay alive a little longer. He wanted to stay because he felt he belonged to Vietnam," Mr. Bender added.

Sergeant Seekford, who had belonged to Troop 438 of the Boy Scouts of America in Dundalk, received his basic training at Fort Jackson, S.C., and took advanced infantry training at Fort Dix, N.J.

He took airborne training at Fort Benning, Ga., and a special sniper course at Fort Bragg, N.C., where he also received Ranger training. He went to Vietnam in October, 1967, joining Company B, 3d Battalion, 503d Airborne Infantry in the 173d Airborne Brigade.

He participated in the fight on Hill 875 near Dak To during Thanksgiving, 1967, an action which won his unit a Presidential Unit Citation.

Sergeant Seekford was awarded several Air Medals and a Bronze Star.

He is survived by his father, John Seekford, of Florida; his stepfather and mother, Mr. and Mrs. John E. Bender, of Dundalk; two sisters, Mrs. Anne Tabor, of Brown Point, N.Y., and Mrs. Bonnie Bennett, of Baltimore; two stepbrothers, John Bender, Jr., of Fort Lee, Va., and Robert Bender, of Baltimore; and his maternal grandmother, Mrs. Anne Dice, of Baltimore.

Corporal Hamblett joined the Marine Corps in September, 1967. In the spring he had graduated from high school in Roanoke, Va.

He was the son of Mr. and Mrs. Silas D. Hamblett, of Forestville.

He had about 70 days to go in Vietnam, when he was killed on a mission November 12. He was in the 1st Battalion of the 7th Marines, 1st Division.

In addition to his parents, he is survived by three brothers, James, Lawrence and Mark Hamblett; and two sisters, Marsha and Terri Sue Hamblett; all of Forestville.

## A NATIONAL CORPS OF YOUNG IDEALISTS?

### HON. JACK H. McDONALD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. McDONALD of Michigan. Mr. Speaker, on July 9, informed the Members of the House of Representatives that I had formulated a proposal which I feel can serve as a general foundation upon which we can build a comprehensive program to fulfill the occupational needs of our technological society as well as to provide the chance for a young person to serve his or her country in some way other than in a military capacity. In order to study the feasibility of establishing a national service academy program, on August 5, I appointed a five-member task force of leading educators. Due to my interest in this area, I was particularly intrigued by an article in the Wall Street Journal written by Prof. Amitai Etzioni, chairman of the department of sociology at Columbia University. I feel his observations are certainly thought-provoking and I would like to share them with my colleagues at this time:

[From the Wall Street Journal, Nov. 28, 1969]

A NATIONAL CORPS OF YOUNG IDEALISTS?

(By Amitai Etzioni)

Many over 30 view America's youth as a drug-crazy, promiscuous, politically misguided, unwashed generation. A strong idealism, however, characterizes that same youth, particularly the sons of the affluent. While many of the young workers and children of minorities still seek the Good Life in the traditional terms of material objects, many of the middle classes sneer at the consumer culture and the hard labor required to attain it.

A study conducted for Fortune in mid-1969 divided the American youth into non-college, college and "forerunners." The forerunners (or activists), the study shows, set the patterns that many others soon follow. Asked what will affect their choice of career, only 21% of the forerunners mentioned "money" as a major determinant (compared to 58% of college and 57% of non-college), but 80% listed "opportunity to make a meaningful contribution" (compared to 55% of non-college youth and 71% of college youth).

FAVORING PUBLIC SERVICE

The young idealists see in most business pursuits a search for self-aggrandizement. They favor either public service that permits little self-gain (the Peace Corps and VISTA) or public service combined with a modestly comfortable career (teaching or social work). A June 1968 Gallup poll of students reports: "The traditional goals of college students of making money and 'getting ahead in the world's appear to have lost some of their charm. No less than two college students in every three said they would have an interest in working either in VISTA or the Peace Corps.'" This would total 4.3 million out of 6.5 million college students.

Much of this idealism is rather pliable; it can take a large variety of forms ranging from completely legitimate voluntary national service and political campaigning (the McCarthy kids) through peaceful demonstrations (the Vietnam Moratorium) to disruptions of campuses and cities (see any daily newspaper). Whether the idealism spills into the street or is channelled into constructive outlets depends on two major factors: The extent to which the active youth can identify with the national purpose, and the availability of concrete opportunities. The overwhelming majority of the young Americans not only seek no part of the war in Vietnam, but find it difficult to work for a nation that wages it. As the end of the war may be approaching, it makes sense to ask what opportunities for national service will be available after it is terminated. Around which projects may the youth and the nation be reconciled?

At first it might seem rather easy to ask these young persons, to put their shoulders where their mouths are; why not join the Peace Corps and VISTA? But these organizations can accommodate only a very small number of volunteers. VISTA involves about 6,000 full-time volunteers; the Peace Corps about 11,000. Last spring, the Peace Corps had 3,004 qualified applicants for 1,261 openings. At the same time, VISTA has become more selective, rather than more open. Each year about 4 million Americans reach the age of 19. If only one out of eight volunteered, the opportunities for national service would have to be multiplied 25 times.

A proposal that has small but active support, both in the educational establishment and in Congress, would offer each young person, on completing high school or college, a number of alternative forms of national service, including an expanded Peace Corps, a much enlarged VISTA. Conservation Corps (to help preserve or restore America's natural resources and beauty). Teacher Corps (to help tutor children in slums) and job Corps (to carry out public works and train those who would otherwise be unemployed). Military service, at this stage, might no longer require a compulsory draft and could be treated as one option available for national service.

Some advocates of the idea favor making such a year of service mandatory. This, however, would rob the service of much of its idealistic appeal. The young idealist who is forced to serve can hardly be expected to be enthusiastic; he may also find himself among people who do not wish to teach, work, or whatever, but are merely serving their year.

Some incentives would help a voluntary service. For instance, the universities may recognize the contribution of the young volunteers by making national service a prerequisite for awarding a fellowship. The civil and foreign service may prefer candidates who served their country first. Private employers may also come to take such service into account in their hiring.

Finally, colleges suffer today from too

many youths who enter "too young," without a clear vision of the world or what they will do in it. A study of "drop-outs" suggests that leaving the educational hothouse for a year often helps a young man find what he is after, as well as what he is himself. Unfortunately in the existing system, dropping out for a year entails stigma. A year of national service would provide a legitimate opportunity for "dropping out," and with a clear point for gracefully terminating the "moratorium" (as experts refer to the period of psychological suspension of career and identity decisions) once the year is out.

"A YEAR-LONG PAUSE"

Furthermore, a volunteer would be less alienated, as a major source of restlessness of students today is the highly regimented nature of the educational system. Students who move directly from high school into college feel that they "never had a break" or "moved from one marching team into another." A year-long pause, in which the young person can lead a less scheduled and less structured life without being labeled a "drop out" or considered a deviant might be extremely useful.

There is a small lobby for such a national service in Washington, which consists mainly of one young dedicated man, Donald J. Eberly, who has been promoting it for the last five years. Sen. Hatfield introduced a bill in the 91st Congress providing for the establishment of a National Youth Service Foundation. Sens. Mathias, Percy and Saxbe co-sponsored the bill. The Russell Sage Foundation financed a National Conference in which the idea was endorsed by a large number of educational and public leaders. But, so far, the measure has not been enacted; the White House, preoccupied with other matters, has not given the idea active support although President Nixon is on record as highly in favor of "the voluntary way."

A major deterent is the price. Somehow one does not expect idealism or a voluntary service to cost much. On the contrary, one expects the national servicemen to save some resources by providing free teaching, low cost labor for conservation projects and so on. Actually, voluntary labor is not free, and free labor is not wanted. To take a young person out of his home and to put him into the field means food and shelter, a minimum of clothing and some medical attention. Supervision is necessary to ensure the success of the programs. It is estimated that these services would cost $4,000 a year per youth. If all the 4 million who reach the age of 19 each year were to volunteer, this would amount to a hefty $16 billion a year, an amount few would be willing to pay for a national service, whatever its merits. Even if one out of four of the youth joined, $4 billion a year is still twice as much as the Government now invests in the war on poverty and almost the amount allotted by the Federal Government to support education at all levels.

Even if financial support could be found, there remains the question of what these young men and women would actually do. In a conference devoted to the subject two years ago both business and labor spokesmen warned against unfair competition. The AFL-CIO executive council stated. "The national service concept raises serious problems from a practical viewpoint . . . an artificially low pay rate will result in the emergence of a large manpower unfairly competing with the remainder of the labor force." Roland M. Bixler, president of J-B-T Instruments and a director of the National Association of Manufacturers, asked, "How can we reconcile the manpower needs of other sections of our society if we drain off the nation's young men and women into national service?" The problem is somewhat akin to the work of inmates in prisons. Although the work itself is desirable, almost everybody agrees that inmates, subsidized by the government, should not be allowed to provide cheap labor or to undercut the market prices of products produced by the private sector. Even without trespassing into the domains of business and labor, it might be difficult to find a million meaningful assignments a year for the national servicemen. The advocates of the plan, hence, call for starting with small contingents, to develop such roles and explore outlets. They seek a budget of nor more than $75 million for the first year, rising to $300 million for the third.

Part of the answer may be found in a very different corner. The Government is considering substantially expanding support for higher education after the war. There is already a grand debate among experts over how the new support should be allocated: Should it be given as institutional support to the colleges; allotted to states to hand out as they see fit, or provided to parents in the form of a tax deduction? A sizable body of experts favors still another option: Giving it to the students in the form of fellowships. This could be linked to national service by requiring the student, as a condition of receiving a public fellowship, to spend a set amount of time as a tutor of students from disadvantaged backgrounds on his own campus or in slum schools. Because such tutoring is LOW nobody's job, large numbers of servicemen could be employed without depriving others.

DRAWING IN THE DISADVANTAGED

Opportunities for volunteer service should also be provided to the more than 50% of our young who are not going to college. The Job Corps, which carries out projects and provides training, might be one way. As it would draw many persons from disadvantaged backgrounds, it could be financed in part from funds that otherwise would provide unemployment or relief benefits to the same persons. There would be much less stigma attached to such a service year in the Job Corps than there is now if it were part of a national organization in which young people of all backgrounds served.

Thus, part of the costs of the new program may be charged against Federal aid to education and against Welfare and Labor Department budgets. Still another part could be subsidized by the military, which would draw a significant part of the servicemen.

The program does face a number of difficulties and is much easier to endorse than to implement. However, its proponents argue that the country needs such a national service if the present alienation of the youth is not to extend deeply into the post-Vietnam area and if idealism is to be moved from the streets into a regeneration of America.

---

## WHEN TRAFFIC JAMS STALL THE NATION

### HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. PICKLE. Mr. Speaker, during the 20th century, man has made more progress than in all the culmative centuries preceeding it. Ironically, man is beginning to realize that he must balance the promise of technological advance with its attendant problems.

Getting to specifics—transportation. We can move men and material to the moon and back—but we cannot get across town during the rush hour.

We are running out of time and this Government must take the lead. We cannot keep moving ahead with our random patterns of transportation. We must have a cohesive national transportation policy.

The dark side of our transport picture is wrapped-up in item-by-item fashion in the December 6 issue of Newsweek. At this time, I insert the following article:

WHEN TRAFFIC JAMS STALL THE NATION

Congestion—noisy, wasteful, polluting, frustrating congestion—will characterize transportation in, around, and above cities throughout the 1970s. It will become so bad that it will force New York to ban private automobiles from the middle of Manhattan Island before the conclusion of the decade.

For most of the 20th Century, Americans have taken for granted the right and ability to go anywhere at any time by any of a multitude of means. They are going to go right on believing this, building highways and buying cars and trucks and planes until, in a few key places, they run out of the one thing they cannot manufacture: space.

BETTER WAYS TO GO

Actually, there are all kinds of vehicles available today—or soon to become available—that can provide more efficient transportation and keep the cities from choking. High-speed mass transit systems, such as commuter railroads, subways, or even monorails, could be built relatively easily and cheaply to relieve the congestion.

But as Assistant Transportation Secretary Paul Cherington puts it: "The most efficient sleeping arrangements are those in barracks with triple-tiered bunks, and no one seriously suggests we should live that way." In city after city, a majority of the people has consistently failed to approve the necessary financing. In part, the voters assume that whatever is built will resemble the crowded, noisy, dirty transit systems of the Northeast. More important, no such mass transit system offers the instant door-to-door transportation provided by the automobile—instant, that is, in the sense that a person can leave whenever he wants. Getting there is often less than half the fun.

MOTORISTS' PLOY

Even in the San Francisco Bay area, a huge exception to the rule, a fascinating fact was uncovered after a $750-million bond issue just squeaked through several years ago to permit work to start on the Bay Area Rapid Transit System. A significant number of people who voted for the issue—probably the difference between passage and failure—later admitted they did not plan to use the high-speed trains. They voted for BART in the belief that enough of their neighbors would use the system to unsnarl the freeways; these voters could then have a pleasanter trip downtown in their automobiles.

Carlos C. Villarreal, Urban Mass Transportation Administrator, admits BART will be in trouble at first, with passenger loads failing to come up to expectations right away. But it will be only a matter of time, he believes, before the scales will tip in favor of the transit system. Once commuters see that the drive into San Francisco or Oakland is too time-consuming and costly—with hardly any place downtown for parking—they will switch to BART.

MANHATTAN DISARRANGEMENT

In the New York metropolitan area, which already has an intricate pattern of commuter railroads, the world's largest and possibly most unpleasant subway system, and untold thousands of urban and suburban buses, the sardine-packed crowds of today will seem pleasant compared to the horrifying congestion still ahead. The millions upon millions of square feet of new office space opened up in the 1970s will require hundreds of thousands of additional workers. Call them commuters, for most of them will insist on living outside of Manhattan.

"I don't know how it's going to be done, and I don't know what streets will be involved," says Cherington. "I can't say whether it will be prohibitive tolls on the bridges and tunnels or barriers across streets or gendarmes. But this I know: There will be no private traffic in midtown Manhattan. Nothing on the drawing boards will arrive in time to save New York."

URBAN SPRAWL

Most U.S. cities that do not have rapid transit systems now probably will not have them. Instead, each urban area will continue to spread out until it comes up against a neighboring city growing toward it. The whole sprawl will be connected by an ever-growing grid of highways and streets to accommodate the 130-million cars and trucks expected to be registered by the early 1980s.

Yet it is impossible to build enough highways and parking lots for all these vehicles. Something will be done to ease the congestion—but only when things get so bad that a majority of the population becomes sufficiently aroused to vote for relief. And that relief may put limits on a driver's right to go where he wants.

The first steps will be tiny. A few municipalities are trying exclusive bus lanes on highways and streets. The most closely watched experiment of this type is in northern Virginia, not far from the Washington offices of the Transportation Dept. One lane of a 15-mi. stretch of Interstate 95 is set aside for express buses from the suburbs during rush hours. These buses, which are well patronized, shave 15 to 20 minutes off the time it would take the average commuter to get to town in his own car, according to a Transportation official.

The bus lane idea will inevitably spread. Even this will take political courage to make it stick as motorist-voters sit stalled in traffic jams, glaring at empty concrete in the next lane or at an occasional, partially filled bus roaring by.

COMPUTERIZATION

The next step also is well within the present state of technology: using computers to control street signals and access to freeways. Again, this step will inhibit the freedom of motorists and also cost a lot. One city with computer control of traffic lights is Toronto. According to a long-time resident, the two Univacs that regulate most of the city's 870 traffic signals do a pretty good job of speeding traffic. The best measure of this, he says, is how big the traffic jams get when one of the computers breaks down.

But many U.S. cities will not vote money for the computer approach until the congestion problem gets much worse, even though there will in all probability be substantial sums of federal money made available on a matching basis in a few years.

ELECTRONIC ROUTE

The really big breakthrough will come out of a combination of exclusive lanes and computer controls—with an important addition: Control equipment will have to be installed inside the vehicle. When congestion becomes intolerable in another five to 10 years, this electronic solution may well be made mandatory.

In the probable chain of events, a few test highway lanes will be equipped with electronic devices to control vehicle speed. At first, only big buses will have the necessary hardware to operate in a controlled lane. The large bus has the same drawback, though to a lesser degree, as the rapid transit vehicle. It does not have enough flexibility in picking up and delivering passengers; its customers must go to it, instead of the other way around.

In time, therefore, six- to 10-passenger vehicles will circulate in bedroom communities, probably picking up passengers on call and then going to the nearest access to a controlled highway. There, they will be locked into a high-speed traffic flow, controlled from without the vehicle, that will carry them to the appropriate exit.

Eventually, private autos will be equipped to take advantage of the system. But few people think this will be widespread within the next 10 years.

FREIGHT FLOW

The system also will accommodate trucks. Probably within the Seventies, the 40-ft. truck trailer will have to be outlawed from some downtown city streets. (If political laws do not do the job, economic laws will.) Highway tractors will pull two, three or possibly even more shorter trailers over an expanded interstate highway network. On arrival at a terminal on the outskirts of a city, the highway tractor will drop one "train" and pick up another.

The trailers will be assigned to smaller tractors equipped with the electronic control devices needed to use the controlled highway lanes. This way the flow of goods to and from widely scattered suburban and exurban shopping centers and factories will continue with the reliability required for smooth inventory control.

For the railroad industry, which could do much to alleviate congestion on the roads, the early part of the 1970s will be a turning point. Within the past few years, service and profitability have deteriorated. Many railroad presidents are of the opinion that the rate of decline is quickening.

If management, labor, and the government do not succeed in changing conditions in a very few years, the industry will be nationalized within the next decade. "God knows, we aren't reaching out for it," said a high government official last week. "But I'm awfully afraid it's going to be forced on us."

The problems of air traffic congestion above the biggest cities today are similar to those on the highways and streets, and so are the solutions that will evolve during the Seventies.

What is planned for airplanes is, first, to get a far more accurate idea of where they are in the sky, both vertically and horizontally and then map out where each is going. Computers will plot courses that avoid collisions, and the information will move instantly, continuously, and automatically to control towers. Thus, a great many more airplanes will fit into the same amount of sky than is possible today.

Full operation of this system is at least 10 years away, however. To make it work, it will be essential that all planes entering such controlled airspace come equipped with very sophisticated and very expensive electronics. The occasional flyer is not going to like it, and if he cannot afford the equipment, he will have to stay out. Even with the best electronic gear, corporate jets are going to lose some of their appeal as the skies become more crowded and delays make travel plans less reliable.

Not so long ago, many seers predicted that as communications improved—with data transmission, picture telephones, and the like—there would be less need for travel. It has not yet worked out that way. But if transportation becomes harder and more uncertain, and corrective steps are not taken, Ma Bell's "next best thing to being there" will become far better than trying to get there.

## A VOTER'S OPTIONS

### HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. YATRON. Mr. Speaker, the right of the people to assemble peaceably is guaranteed by the first amendment. Civil disobedience, however, such as seizing buildings by force and disrupting traffic, clearly infringes upon the rights of others.

Ours is admittedly an imperfect society, but violating the law is neither a proper nor effective way of solving America's problems.

An editorial in the Reading Times of Saturday, December 6, written by editorial board member Harry Glover, explains in a brief and readable manner the various avenues of peaceful protest. I commend this editorial to my colleagues and to all Americans, and insert it in the RECORD at this point:

A VOTER'S OPTIONS

One way to let the government in Washington know you don't like what it is doing is to stage lie-downs on the street or in somebody's office, or to go around waving a Viet Cong flag.

Then there is another way—the better way, we suggest.

To point out how this second way works, let us take the resolution passed this week by the U.S. House of Representatives, 333 to 55, endorsing President Nixon's efforts to conclude the conflict in Vietnam.

This is a highly controversial issue, and many of the electorate are not going to like, for one reason or another, the decision by the House to back Nixon's endeavors. Any citizen has a right to be against it, of course.

And if he doesn't agree with what his representative in the House did, he has a choice of ways to let his congressman know. He can write a letter. He can get up a petition and seek signatures, and send the petition to Washington. Or he can go to Washington and see his congressman, if he has the time and the money.

These are civilized ways of doing it. We are not proposing these courses of action because we are against the resolution (our stand has been to give Nixon a chance to see what he can do), but because we want to remind voters that there are better ways of trying to persuade a congressman than by trying to harass him, or intimidate him through showier tactics than a letter or a conversation.

## LETTER FROM A FATHER

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. TEAGUE of Texas. Mr. Speaker, on the occasion of my three trips to Vietnam, I was flown about the combat area by a Maj. Samuel Hopper who was the personal pilot for General Westmoreland. He is one of the finest officers I have known, and his son Bobby has taken up flying helicopters in Vietnam where his dad left off upon his retirement.

Unknown to him, Major Hopper's wife has forwarded to me a copy of a letter which he wrote to his son in Vietnam on the occasion of Veterans' Day and I would like to share it with the Members of this body, as I think it is a typical American masterpiece:

NOVEMBER 11, 1969.

DEAR SON: Well son, today is Veterans Day. I'd like to be able to say something profound, new, and different to you and Chuck and Billy. But, I suppose all of the fancy phrases have been put together long ago, by men more clever than I. So all that remains, is for me to try to express my deepest gratitude to each of you for your willingness to

become a Veteran. Your willingness to serve your country at a time when the Vociferous Minority seems to be in control. But let me assure each of you that this is a deception that I've known about for a long time. I think I may have realized it first when as a young man in World War II, I was strengthened by the courage of other young men who were as afraid as I, yet they persisted. They—no, we persisted even though there were those who were not in tune with the then, current, national policy. Yes, we persisted, and you were born free.

You were all too young to know of the turmoil created by our National Policy during the Korean Conflict. But the Hue and Cry was on and our National Leaders were disected on the chopping block of world opinion—but we persisted, and you remained free.

You grew up leisurely, like little kittens in a warm loft of hay. The hardships you have known were simulated on the campus of the Air Force Academy, the dust and heat of El Paso and San Antonio and the swamps of Alabama and Georgia. You bet your sweet bippie those simulated hardships seemed real, I have experienced them all. But, they were simulated, for you knew that if you ever faltered, there would be immediate help available. You and I have never known the harshness of a prison compound or a refugee camp for displaced persons. But before I lose you in a flurry of reminiscent phraseology let me say it is not the purpose of this letter to chide you for having been born free, but rather to gently remind you that your legacy has been paid for. But another advance payment is due, so that one day each of you might sit down and address a letter, "Dear Son."

Now I have come to the real purpose of this letter. I want to thank you for picking up the ball that I had carried as far as I could—the one inscribed: Duty, Honor, Country. I would usually close by saying, "Love, Dad" but on this Veterans Day, I'll say.

Respectfully yours,

MAJ. SAMUEL L. HOPPER,
*U.S. Air Force, retired.*

---

## ADDRESS BY UNDER SECRETARY OF STATE ELLIOT RICHARDSON

---

## HON. BARRY M. GOLDWATER, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 9, 1969*

Mr. GOLDWATER. Mr. Speaker, in a remarkably cogent address to the regional conference on foreign policy in Los Angeles, the Honorable Elliot L. Richardson, Under Secretary of State, recently addressed himself to the subject of United States-Soviet relations.

And while it is true that the Under Secretary said a lot of the usual things we have become accustomed to hearing from State Department officials, he also said some things that we are not used to hearing from State Department officials and it was these remarks that I found exceptionally refreshing.

For example:

Under Secretary Richardson pointed out that U.S. doubts and concerns about the Soviet Union that have characterized out post-war policies have not been conjured up in dread of some phantom but in response to palpable Communist threats and initiatives. The areas against which these agressive moves came, or where harshly threatened, sound a grimly familiar litany—Iran, Greece, Turkey, Czechoslovakia, Berlin, Korea and Hungary."

While the United States is more than willing to meet the Soviet Union halfway, the Under Secretary explained:

We cannot—until new evidence is upon us—allow ourselves to forget past manifestations of Soviet aggressiveness.

Other examples of Soviet recalcitrance and seeming reluctance to reduce tensions cited by Mr. Richardson were:

Vietnam: Although North Vietnam is not the puppet of the Soviet Union, it was noted:

They are the single most supplier of aid. Unfortunately, there is little to indicate that they have exerted any significant influence on North Vietnam to negotiate an end to this tragic conflict.

Laos: Despite the 1962 agreement that Laos would be neutral, there are North Vietnamese troops—some 40,000—in that country. Mr. Richardson asks:

Is the Soviet government willing to help Laos maintain its neutrality?

Middle East: The Under Secretary said:

The issue here is whether the Soviets will give sufficient priority to the long-term advantages of a genuine Arab-Israeli settlement or will instead focus on short-run gains that could only be swept away by another Arab-Israeli war.

All things considered, it is a good speech, and I include it in the RECORD and recommend my colleagues read it.

The State Department may not be as cleaned out as some of us might like it to be, but since we have taken over the rhetoric has improved; a considerable accomplishment in itself. The speech follows:

ADDRESS BY THE HONORABLE ELLIOT L. RICHARDSON, UNDER SECRETARY OF STATE

In one of the Disraeli novels there appears a character described as being "distinguished for ignorance; for he had only one idea and that was wrong." The character's name, curiously enough, was Mr. Kremlin.[1]

In the post World War II world our view of the goals of Communist governments, most particularly our view of the intentions of the Soviet state, has so dominated the direction of American foreign policy that those who disagree with that view have been ready to apply Disraeli's description of Mr. Kremlin to the entire policy.

Because our estimate of the potential for constructive relations with the Soviet Union is central to our entire international posture, any change in our assessment of this potential is bound to have wide significance. Indeed, this may well be the reason why the most quoted and most interpreted of all of President Nixon's statements since he took office has been the memorable passage in his Inaugural Address in which he said "After a period of confrontation we are entering an era of negotiation. Let all nations know that during this Administration our lines of communication will be open."

Our lines of communication are open. During the past nine months we have talked with the Soviet Union and with other Communist bloc nations on a large number of subjects. We have conferred with the Soviets about Vietnam, unfortunately with little effect, and have had a series of talks on the Middle East which we hope will be productive in leading the nations of the area toward a settlement.

---

[1] *Sybil* (1845) Book IV Chapter V

This week an especially significant aspect of the new "era of negotiation" opened in Helsinki with the beginning of preliminary discussions on the limitation of strategic arms.

The current talks are probably the most critical negotiations on disarmament that the United States has ever undertaken, and we approach them—to use Secretary Rogers' phrase—"in sober and serious determination."

As the President himself put it: "There is no more important task before us. We must," he said, "make a determined effort not only to limit the build-up of strategic arms, but to reverse it."

Success would not only mean a great stride forward in the cause of disarmament generally, but would be accompanied by significant economic benefits. Strategic weapons systems have been costing us some eight billion dollars a year to purchase and maintain, and these costs are increasing. In bringing this enormously expensive and unproductive competition to an end, large sums in both countries could be diverted to other uses. Since the Soviet Union spends a greater proportion of its national product on strategic weapons than we do, we have good reason to hope that this incentive for strategic arms limitations is at least as important to them.

Success in these talks, then, seems clearly in the interest of both nations and presents both with exciting opportunities. In addition to the immediate material benefits, it would help to bring about a beneficial, if still only partial, unravelling of the skein of suspicion that has enveloped relations between us for a quarter of a century.

The doubts and concerns that have characterized our postwar view of the Soviet government are, unlike Disraeli's Mr. Kremlin, hardly "distinguished for ignorance." They were not conjured up in dread of some phantom but in response to palpable communist threats and initiatives. The areas against which these aggressive moves came, or where harshly threatened, sound a grimly familiar litany—Iran, Greece, Turkey, Czechoslovakia, Berlin, Korea, Hungary.

Nor were NATO and the other structures of defense and world order that we joined in erecting built merely as an excuse for maintaining an American presence abroad. The United States—contrary to Marxist dogma—had no need, desire, or intention of spreading influence or empire. We withdrew our troops following the second World War and returned them overseas only at the request of friendly nations which felt endangered. Our world-wide system of alliances was constructed in the face of a real, not an imaginary threat.

If we are prompted to recall this melancholy history now, it is not to reopen old wounds, nor to deny that our actions, though not so designed, might have been perceived as threatening by the Soviets. It is rather to remind a new generation—and ourselves—that we had reason for our caution. And now, even as possibilities present themselves for a lessening of tensions, it is prudent once again to examine coldly the total realities of the bargaining situation. The era of confrontation has left a complex inheritance of problems, alignments, and alliances which cannot be sorted out or changed overnight. Change will require hard, realistic, and—inevitably—protracted bargaining. For international negotiating is always a tough and difficult business, and those who sit across the table from us are no more eager than we to lose any advantages.

So as we seek to exploit as fully as we can any opening for meaningful negotiation, we must at the same time take advantage of opportunities to probe carefully and meticulously for fresh evidence indicating whether or not we can safely moderate our previous fears and doubts about Soviet intentions.

In viewing the Soviet government today

some are naturally more skeptical of evidence of its amenability to an era of negotiation than others. A wide shading of interpretation is possible. At the two poles, and perhaps somewhat overstated and oversimplified, the interpretations run something like this:

Interpretation one hypothesizes that basic Soviet attitudes are little changed and that the threat to our security is not significantly diminished. Those who propound this view point to the continuing and accelerating build-up of Soviet military strength, to the spread of Soviet power into the Mediterranean and Middle East, to the invasion of Czechoslovakia and subversion of its government, to Soviet support of Hanoi in its evident desire to take over South Viet-Nam. They see the continuation of Stalinist harassment and persecution of Soviet writers and intellectuals, the political trials and suppression of dissent, as evidence of a regime which is inherently authoritarian and aggressive, no matter what its ideological cast. They believe that basic to this authoritarianism is a fear of contamination by progressive tendencies both within the Soviet Union itself and in neighboring countries and a consequent need to extinguish such tendencies whenever they emerge. And they fear that a leadership basically isolated from public response is more liable to follow dangerous and adventuristic policies.

This interpretation also urges us to take Soviet ideological pronouncements at face value and not dismiss them as ritualistic Marxist rhetoric. It would take, for example, the statement adopted on June 17 of this year by the International Conference of Communist and Workers' Parties, which met in Moscow under the auspices of the Soviet Communist Party, as indicating that Soviet intentions are as inimical as ever. Among other things, that long and turgid document said: "To curb the aggressors and liberate mankind from imperialism is the mission of the working class, of all the anti-imperialist forces fighting for peace, democracy, national independence, and socialism."

Interpretation two, on the other hand, would read such polemics only as window dressing intended to proclaim Marxist-Leninist legitimacy. According to this view, actual Soviet policies bear little resemblance to official ideology. Those who espouse this interpretation see Soviet policies as having moderated greatly since the death of Stalin and believe the Soviets now display a genuine willingness to reach accommodations with us on issues on which we have common or parallel interests. The Soviet Union, they feel, no longer pursues expansionist ambitions; on the contrary, its posture appears primarily oriented toward protecting the security of the motherland. Soviet military strength is maintained at least partially in response to the military strength of the U.S. and our alliances.

Those who put this interpretation forward think the Soviet government, if only by necessity, is willing to allow a certain diversity among the countries close to its border. Though it is not a democracy, they believe it is still necessary for it to be responsive to the popular will of its people and that this fact is causing it to moderate its policies. For this reason, too, the Soviet government is held to be preoccupied with domestic affairs—with problems of agricultural organization and growing consumer demands.

Soviet society is pictured as conservative and essentially bourgeois in outlook, with all the cultural and artistic adventurism of George G. Babbitt. The ruling party bureaucracy, as seen by this interpretation, is like all entrenched bureaucracies, cautious, unimaginative, and a little dull, the Soviet leadership, since it is largely a product of the bureaucracy, is similarly gray, cautious, and devoted to the status quo. In sum, this view holds that as practical needs have become more insistent, Communist ideological fervor has waned. The Soviet leadership is viewed, like Candide, as increasingly content to cultivate its own garden.

The truth, of course, may simply be that both portraits of the Soviet Union are facets of the same reality, seen through different eyes. On the face of things, indeed, neither wholly excludes the other: No government, and certainly no government in a nation as large as the Soviet Union, can be entirely monolithic—monolithic, that is, in the sense of being free from divergent and competing interests, forces, or views. Thus, when we speak of "Soviet intentions," we obviously do not mean to imply that these remain static. The Soviet Union, we know, has its own hawks and doves, its hard-liners and soft-liners. It has its scientists and intellectuals who are quietly pressing for more freedom, as well as its Stalinists who favor greater repression, and through the shifting and coming to influence of different elements and personalities is forged the amalgam of its policies and intentions.

For us, of course, the importance of trends in Soviet life and government lies in their significance for Soviet attitudes and intentions toward the outside world. And on this score new and important evidence can be obtained through negotiations whose objective is the concrete resolution of those specific issues which continue to embody the risk of confrontation or to enhance the danger of its consequences. Such negotiations, whatever their outcome, can thus serve the wider purpose of testing the prospects for a more stable and peaceful world. Progress will come only through the concrete resolution of specific issues which continue to disturb international tranquillity.

In this, we are more than willing to meet the Soviet Union half way. The entire drive and approach of this Administration is designed to bring about movement in the solution of outstanding issues and the growth of international understanding. While we cannot—until new evidence is upon us—allow ourselves to forget past manifestations of Soviet aggressiveness, we are eager to put the accent on the future rather than the past, to stress our joint opportunities rather than our old divisions.

"I believe we must take risks for peace," President Nixon has said, "but calculated risks, not foolish risks." It is in this spirit that we have entered the talks on strategic arms and the other discussions in which we have been engaged.

It is in this spirit that the President emphasized at Guam that the job of countering insurgency in the field will hereinafter have to be conducted by the government concerned, making use of its popular support, and with the nature of our assistance depending on the realities of the particular situation. And it is in this spirit also that the President has changed the pattern of the Viet-Nam war by beginning the process of turning our share of the fighting over to the South Vietnamese and withdrawing American ground forces.

Underlying these steps is a fresh approach to, and a new implementation of, the traditional American desire to let peoples and nations determine their own destinies. President Nixon recently articulated our guiding principle, which, while stated in the context of the Western Hemisphere, is equally applicable elsewhere. Our approach, he said, is to "respect . . . national identity and national dignity in a partnership in which rights and responsibilities are shared by a community of independent states."

We seek, then, a structure of world order based on the independence and equality of states; we do not seek ideological domination or confrontation. We care less about the ordering of a nation's economy or even its political structure than we do about the evidence it presents to us about its willingness to live in peace with its neighbors.

What is all this evidence that I keep talking about? What specific moves do we think the Soviet government can make to reduce tensions? What tensions are in question? Let me briefly outline some of the areas and issues in which progress can be made.

First, there is Viet-Nam. Over eighteen months ago the South Vietnamese government and the United States entered negotiations in Paris with the hope of reaching an agreement that would bring the fighting to an end. For a long time the Soviet government had told us that, once these negotiations began, such a settlement should be possible. After a beginning in which there were some signs of progress, the talks ground to a standstill last spring. We continue to hope that these talks will succeed and are still looking for opportunities to move them forward.

Although the Soviets do not control North Viet-Nam, as the single most important supplier of aid to North Viet-Nam, they undoubtedly exercise much leverage. Unfortunately, there is little to indicate that they have exerted any significant influence on the North Vietnamese to negotiate an end to this tragic conflict. Are we then to believe that the Soviet government is encouraging Hanoi to reject a negotiated solution and to continue the effort to impose its will on the people of South Viet-Nam?

There is Laos. In 1962 we agreed with the Soviet Union and twelve other states that Laos should be neutral. But North Vietnamese troops in conjunction with the Communist Pathet Lao continue to threaten the government of Premier Souvanna Phouma. Is the Soviet government willing to help Laos maintain its neutrality?

The Middle East, on which we have been engaged in intensive talks with the Soviet, is another area where their actions will provide important indices of their intentions. For the situation in the Middle East today is so emotional and so explosive that a failure by the great powers to act firmly and responsibly in support of United Nations' efforts could mean yet another war in the area and perhaps even a wider catastrophe. The issue here is whether the Soviets will give sufficient priority to the long-term advantages of a genuine Arab-Israeli settlement or will instead focus on short-run gains that could only be swept away by another Arab-Israeli war.

Soviet attitudes on the development of firmer foundations for peace and stability in Europe will prove another key to their basic willingness to reduce tensions. The Soviet government has recently proposed the convocation of a European Security Conference. But when they reached the point of suggesting what such a conference might do, they and their Warsaw Pact colleagues avoided concrete issues and put forward only vague suggestions.

We and our NATO allies are more than ready, of course, to do our part in solving the manifold and complex problems which for so long have divided Europe. But we are convinced that the way to go about it is through dealing directly, through whatever forum or procedure is most appropriate to the subject, wtih the issues that generate tension. A Europe-wide conference might fittingly climax, but cannot substitute for this painstaking process.

A beginning might be made by improving the situation in and around Berlin, including access to the city. We have, along with the British and French governments, suggested this to the Soviet Union and are prepared to go forward with such a discusssion. An even more important opportunity for East-West negotiation is the subject of mutual and balanced force reductions. Certainly progress on the reducing of forces would significantly contribute to reducing tensions in Europe. We are working with our allies to develop specific negotiating proposals and will be pursuing the issue further at the NATO Ministerial Meeting later this month.

These are only some of the areas and issues on which tensions can be lowered—though perhaps they are the most important. Each is a part of an interrelated whole and each constitutes a test—for both the United States and the Soviet Union. Can we reach agreements which will contribute to the achievement of a lasting peace? We are determined to seek the answers, cautiously, but also with patience and determination.

After all, why should we not be able to settle the disputes that divide us? There are no quarrels of the traditional sort between us, no disputes over territory, no competition for trade. There is no historic enmity between our peoples.

The aims and ambitions of our peoples seem, in fact very similar—to live and prosper, to educate our children, to build our communities free of the threat of war and destruction.

There seems no final reason why this could not be so.

Having begun with a quotation from a Disraeli novel, it seems fitting to end with one. "Man is not the creature of circumstances," the British Prime Minister wrote, "Circumstances are the creatures of men." [2] If this indeed be so, then it becomes our peculiar obligation to mold those circumstances so that all nations, large and small, can live in peace together.

## BANNING THE USE OF DDT IN THE UNITED STATES

### HON. PATSY T. MINK

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 8, 1969*

Mrs. MINK. Mr. Speaker, as sponsor of legislation, H.R. 13340, to ban the use of DDT in the United States by June 30, 1970, I am among those concerned with the threat to our environment posed by this "uninvited additive." I am happy to see steps by our Government to curb the use of DDT and hope that with enlightened policies we can reverse the contamination by this pesticide as well as by herbicides which have been found to induce birth deformations.

Our use of herbicides and defoliants has been especially hazardous to health in Vietnam, where there have been extensive reports of birth defects among children whose mothers were exposed to defoliants used by the United States in connection with the war. I feel that this practice should be stopped immediately.

For the benefit of my colleagues, I include at this point in the RECORD an article from the November 21, 1969, issue of Science which outlines these dangers:

ENVIRONMENT: FOCUS ON DDT, THE "UNINVITED ADDITIVE"

Since mid-October, the federal government has ordered a halt in production of the artificially sweetening cyclamates and announced timetables for restricting use of the herbicide 2,4,5–T and the pesticide DDT. In each instance, disturbing results of laboratory tests on animals had preceded the announcements, but the most obvious common factor in the three cases seems to have been growing public concern about environmental hazards.

The outburst of official activity served to focus attention on the difficulties of determining long-term effects on humans of chemicals introduced into the environment. And the government finds itself faced with serious questions about the adequacy of testing procedures and of the machinery for setting "tolerance" levels for chemicals.

The most important pronouncement was the one on DDT. It called, in effect, for a phasing out of most domestic uses of the pesticide over a 2-year period. DDT is the particular target of conservationists because of its persistence in the food chain, but it is widely relied on for its relatively low cost and its vast contribution to the control of disease and the production of food.

THE DELANEY AMENDMENT
